The PCMS Digital Telemetry System provides in-hospital ambulatory ECG monitoring resulting in greater patient freedom and reduced nursing workload. Digital technology enhances the quality of signal transmission resulting in a more accurate display of waveforms and fewer false alarms. The PCMS Digital Telemetry System communicates on the Ethernet network and is compatible with all PCMS central stations.

The compact, lightweight, battery-operated PC Express uses standard PCMS modules and is configurable for transport or bedside monitoring. The modules provide uninterrupted monitoring of patient vital signs because they can be removed from the PC Express monitor and inserted into the PC bedside unit. PC Express also offers an electro-luminescent screen which generates its own light to provide waveforms and other numerics that are easy to read in any light condition or at any angle.

Westmark, with headquarters in Seattle, Washington, is a worldwide developer, manufacturer and distributor of diagnostic ultrasound systems and electronic patient monitoring and clinical information systems through its subsidiaries, Advanced Technology Laboratories, Inc. in Bothell,

Washington and SpaceLabs, Inc. in Redmond, Washington.

Westmark's common stock is quoted on the NASDAQ National Market System under the symbol WMRK.

TROY, MI (MARCH 19) PR NEWSWIRE - MLX Corp. (NASDAQ: MLXX) announced today that it is continuing to negotiate with the Refrigeration & Air Conditioning Group's senior lenders with respect to MLX's proposal for a comprehensive restructuring of that Group's credit facilities.

In order to provide additional time to continue negotiations, all but one of the senior lenders have agreed to defer the installment due under the Group's senior term loan until March 28, 1990.

One lender, holding less than 4 percent of the outstanding loans and commitments, has not executed the extension. The agreement by the other lenders to the extension, as a practical matter, defers the entire installment until March 28, 1990.

MLX is the largest independent nationwide distributor of commercial refrigeration and air conditioning equipment, parts and supplies, and a leading manufacturer of high-energy friction products and components used in aircraft brakes and in clutches, brakes and transmissions for heavy-duty trucks and off-highway equipment.

CERRITOS, CA (MARCH 19) PR NEWSWIRE - Cardis Corp. (OTC) today announced a sharply reduced third quarter operating loss before an extraordinary gain related to the company's emergence from Chapter 11 reorganization.

The company reported a loss from continuing operations before extraordinary item of $996,000, or 11 cents per share, for the third fiscal quarter ended Jan. 31, 1990, compared with a loss from continuing operations of $2,895,000, or 50 cents per share, in the same period a year ago. The company posted sales of $20,379,000 for the three month period, compared with $22,055,000 a year earlier.

For the nine months, Cardis incurred a loss from continuing operations

before extraordinary item of $1,934,000, or 28 cents per share, versus a loss from continuing operations of $10,564,000, or $1.83 per share, in the comparable period last year. Sales were $63,636,000 compared with $72,137,000 a year ago.

An extraordinary gain from the extinguishment of debt pursuant to Cardis' recently completed Chapter 11 reorganization resulted in net income of $60,399,000, or $6.76 per share, and $58,732,000, or $8.61 per share, for the third quarter and nine months, respectively, of fiscal 1990. The prior year periods reflected a loss from discontinued operations included in the net loss of $3,445,000, or 60 cents per share and $11,500,000, or $2.00 per share, for the third quarter and nine months, respectively.

Per share results for the fiscal 1990 quarter and nine months are based on 55 percent and 18 percent more average shares outstanding, respectively, attributable to shares issued as part of the company's reorganization plan.

Kenneth D. Walker, Cardis president and chief executive officer, said the sharply reduced loss from continuing operations reflected the successful efforts to cut operating expenses and increase higher gross margin product sales as part of the company's reorganization.

Cardis Corp. recently emerged from its Chapter 11 reorganization on Nov. 27, 1989, pursuant to Order of the United States Bankruptcy Court for the Central District of California confirming Cardis Corp.'s Second Amended Consolidated Plan of reorganization, as amended. Cardis operates nine warehouse distribution centers and 27 retail stores located throughout California and Arizona.

ELK GROVE VILLAGE, IL (MARCH 26) PR NEWSWIRE - AAR Corp. (NYSE: AIR) today announced financial results for the period ended Feb. 28, 1990, the third quarter of the company's fiscal year. For the period, net sales rose 9.7 percent to $112,278,000 from $102,318,000 for the comparable period last year. Net income was $6,109,000 or 38 cents per share, compared to $6,045,000 or 38 cents per share for the third quarter of the previous year. The average shares outstanding at Feb. 28, 1990 was 16,067,000 versus 15,986,000 a year ago.

For the first nine months of the fiscal year net income rose 11.4 percent to $19,431,000 or $1.21 per share, from $17,449,000 or $1.10 per share for the comparable period of fiscal 1989. Nine-month net sales increased

11.1 percent to $325,479,000 from last year's $292,970,000.

AAR Corp. is a leading supplier of aerospace/aviation products and services. The company primarily distributes parts and equipment, performs technical services and manufactures proprietary products for the aviation industry in the United States and abroad.

#90078p0077 03/19/1990 ~PR Newswire

KALAMAZOO, MI (MARCH 19) PR NEWSWIRE - An overwhelming majority of Michigan residents are concerned about the physical corrosion and environmental damage caused by road salt and would support a switch to an environmentally safe but more expensive deicer, according to a study conducted by Kalamazoo-based Harrington Market Research, Inc.

The statewide study surveyed 200 male and 200 female heads-of-households selected at random ranging in age from 18 to over 65 and representing various income, education and occupation levels.

Concern for Corrosion and Environmental Damage More than three-fourths (79 percent) of the respondents said they were concerned or extremely concerned about the corrosion and environmental damage caused by road salt used to clear snow and ice from winter roads. Men were slightly more concerned than women about this issue and blue collar/trade workers and retirees were more concerned than other occupational groups.

Support for Switching to Environmentally Safe, More Expensive Deicer Eighty-one percent of the respondents said they would agree or strongly agree to switching from road salt to an environmentally safe but more expensive roadway deicer like Calcium Magnesium Acetate (CMA).

Males and females were equal in their agreement and all income levels supported the switch, especially respondents with household incomes of $20,000 to $30,000.

Eighty percent of the respondents said they agreed or strongly agreed to support increased funding for an environmentally safe non-corrosive alternative to road salt, and 85 percent said they agreed or strongly agreed to support changes in federal highway funding to encourage use of alternative products.

Eighty-three percent of the respondents said they agreed or strongly agreed to support legislation calling for the use of alternatives like CMA in environmentally sensitive areas. All age groups were equally interested in legislation with middle-income households, blue collar/trade workers, and

college graduates more likely to strongly agree with legislation.

On Jan. 11, 1989, Rep. William Van Regenmorter (District 54) introduced House Bill 4013 that calls for prohibiting the use of salt on the roads and highways of Michigan if a replacement would provide safety and long-term cost-effectiveness. The House Transportation Subcommittee on Road Salt has been holding public hearings throughout Michigan this winter.

Chevron Chemical Co. sponsored the study to determine public interest in Michigan on the corrosion and environmental damage caused by road salt. Chevron has been working with the Federal Highway Administration and the Michigan Department of Transportation to develop an environmentally safe, low-corrosive deicing alternative to road salt.

The result, Calcium Magnesium Acetate or CMA, is now being used in more than 12 states across the Snow Belt. In Michigan, CMA is being used on the new Zilwaukee Bridge near Saginaw and in the City of East Lansing. In addition, two of Michigan's top corporations, Ford Motor Co. and Chrysler, are using CMA at their proving grounds locations.

FREMONT, MI (MARCH 19) PR NEWSWIRE - Gerber Products Company (NYSE: GEB) today announced that it will establish an after-tax reserve of $8.3 million, or $.22 per share, to consolidate its Gerber Childrenswear business by eliminating certain non-strategic product lines and reducing resultant excess manufacturing capacity.

Al Piergallini, chairman, president and chief executive officer, said, "I have spent considerable time reviewing the company's apparel businesses, certain of which are currently generating good returns. I am convinced that our Gerber branded basic children's wear line sold by Gerber Childrenswear has strong market acceptance and potential for profitable growth. We must now focus on those market segments that provide the best returns in order to obtain apparel group operating margins above our 10-percent short-term goal. When the restructuring of the Gerber Childrenswear segment is complete, we will have a company with lower sales but one that is significantly more capable of contributing to shareholder value through better operating results in both the short and long term."

The reserve will be provided by a charge to the fourth fiscal quarter ending March 31, 1990, and will amount to approximately $11.2 million before tax. This amount includes charges for anticipated losses on the sale of three manufacturing facilities, the write-off of intangibles, employee termination costs and the liquidation of inventories.

Piergallini said that apart from this reserve and a previously announced charge ($.12 per share for consolidation of North American baby food operations taken in the third fiscal quarter), the company expects fiscal 1990 earnings per share from continuing operations to be at least $2.75, consistent with a prior forecast, and up approximately 25 percent from the comparable earnings for fiscal 1989.

Piergallini concluded, "The restructured Childrenswear operation will provide Gerber branded basic wear for children from birth to three years

of age. This line will offer value-added features and be backed by strong brand marketing support. This is consistent with our overall corporate Gerber branded strategy to provide a full line of food, child- care items, and apparel for children from birth to three years of age. The eliminated product lines, composed mainly of private-label sleepwear, were primarily targeted at older children. In addition, these product offerings were highly seasonal, marketed outside the Gerber packaged section, and were characterized by low prices and returns. This restructuring and paring of our product lines has allowed us to rationalize our manufacturing base by eliminating inefficient plants, and to further strengthen our ability to improve apparel group operating margins."

In a related move last month, Gerber announced the appointment of Kent C. Robinson as president of the Gerber Apparel Group, which includes Buster Brown Apparel, Inc.; Weather Tamer, Inc.; and Gerber Childrenswear, Inc. Robinson was formerly president of Buster Brown Apparel.

Gerber Childrenswear, Inc. was organized in April 1988 as a consolidation of four separate companies which were acquired prior to 1987. Gerber Products Company is this country's leading producer of baby foods, and offers a variety of general merchandise and apparel for children. Sales in fiscal 1989 exceeded $1 billion and are expected to increase about 10 percent in the current fiscal year ending March 31, 1990.

MURRAY HILL, NJ (MARCH 19) PR NEWSWIRE - Airco Gases' sister company, Airco Helex Limited, has announced that it will invest over $4 million to modernize a methane enrichment and helium plant in Odolanow, Poland. Airco Gases and Airco Helex, Ltd. are both members of The BOC Group, the Britain-based industrial gas and health care company operating in over 50 countries worldwide.

The Odolanow facility is the world's only commercial helium plant located outside of the United States, and has supplied liquid helium exclusively to BOC since the start of production in 1977. BOC, in turn, has marketed Polish helium primarily to wholesale customers in Continental Europe. Under the terms of Airco Helex's agreement with its Polish contract partners, BOC's existing Liquid Helium Supply Agreement will be extended by ten years, or through the end of 2003.

According to Phil Kornbluth, BOC's director of International Helium Marketing and Supply, the company's investment "will be directed toward increasing plant reliability, improving helium recovery and maximizing

plant throughput. The continued availability of Polish helium will enable BOC "to maintain a very strong competitive position on the European continent beyond the turn of the century, despite anticipated competition from a new plant expected to be built in Algeria during the mid-1900s" he added.

Pat Dyer, Managing Director, Gases, for BOC, went on to state that "BOC's investment is an indication of our interest in playing an expanded role in Eastern Europe and our commitment to the revitalization of the Polish economy."

The plant modernization program will be managed by BOC's Cryoplants division and is scheduled for completion by Sept. 30, 1991.

The BOC Group is a leading manufacturer and supplier of industrial gases and gas processes worldwide, with sales during the year ending September 30, 1989 exceeding $4 billion. In addition to helium, the company's primary gas products include liquid and gaseous nitrogen, oxygen and argon carbon dioxide, hydrogen, medical gases and a variety of special and electronic gases.

DALLAS (MARCH 19) PR NEWSWIRE - Continental Mortgage and Equity Trust (NASDAQ: CMETS) and National Income Realty Trust (NASDAQ: NIRTS) today announced the results of their annual meetings of shareholders. Shareholders of each trust overwhelmingly approved the repeal of the liquidation provision of the respective trust agreements, authorized a proposed one-for-three reverse share split and approved the eight nominees for the board of trustees.

The meeting held yesterday was to reconvene the regular annual meetings that were held on Dec. 21, 1989. The previous meetings were adjourned without counting the vote in accordance with a court order resulting from pending litigation. This litigation was subsequently settled, as previously reported, allowing the tabulation of the annual meeting votes.

"We are particularly pleased that we can now operate as ongoing real estate investment trusts," said a spokesperson for the trusts. "This will allow Continental Mortgage and National Income to continue actively managing and improving their real estate and mortgage portfolios. We expect the trend of positive operating results we've seen in the past few quarters will continue."

Continental Mortgage and Equity Trust and National Income Realty Trust are

combination mortgage and equity real estate investment trusts which operate nationwide.

CAMBRIDGE, ENGLAND (MARCH 19) PR NEWSWIRE - IXI Limited today announced a licensing agreement with Dell Computer Corporation whereby X.desktop 2.0(tm) will be bundled with Dell's newest hardware family, also announced today.

According to the agreement, X.desktop 2.0, an OSF/Motif(tm) compliant desktop manager, will be included with the Dell(R) Station 325 and DELL Station 425E, two UNIX(R)/DOS workstations based on Dell's high performance 80386 and 80486-based personal computers.

"Over the next two years a significant and growing number of PC users will interact with powerful, Intel-based UNIX computers using the industry standard X.desktop," said Anil Malhotra, IXI vice president of sales and marketing. "With this latest commitment from Dell and existing deals with IBM, NCR, SCO and others, we estimate that within two years there will be over 1 million X.desktop users."

The DELL Station, targeted for general business use, combines a Dell System 325 or 425E with a pre-loaded suite of software packages that includes an enhanced version of the UNIX operating system, Dell Unix System V, Version 3.2, X.desktop 2.0, and Uniplex office automation software. In addition, Dell Unix System V, Version 3.2 includes bundled software to concurrently access MS-DOS applications and provides support for the X Window System.

"The DELL Station is the perfect solution for the DOS PC user, who wants the power of a UNIX Workstation for office applications, but knows nothing about UNIX," said Joel J. Kocher, senior vice president of Dell's USA sales and support. "By incorporating IXI's X.desktop, the DELL Station can offer users the ease-of-use of a Macintosh computer along with the power of a UNIX workstation." X.desktop shields the user from the UNIX command line and is ideal for the non-technical user.

IXI's X.desktop customers include IBM, Uniplex, The Santa Cruz Operation, Locus Computing, Opus Systems, and NCR Corp.

IXI Limited, founded in 1987, is a leading developer and supplier of X windows-related software products and technology. IXI's corporate objective is to make it easier for non-technical users to take advantage of powerful computers.

STAMFORD, CT (MARCH 19) PR NEWSWIRE - Domestic information industry vendors have announced revenue growth of 5 percent in the fourth quarter of 1989 over the previous year, while in 1988 the fourth quarter growth was 10.7 percent 1987, reported Gartner Group, Inc., the research company covering the $357 billion industry.

Randall Brophy, senior research analyst, compiled this data from 216 publicly held companies in data processing (computers, software and peripherals), telecommunications and electronic products.

Mainframe and minicomputer net margins sank to record lows of 3.7 percent and 3.4 percent for 1989, down from margins of 6-10 percent in previous years. Microcomputers held a 7.4 percent margin, about the same as the two previous years.

The revenue growth rate for desktop computers has slowed, with fourth quarter growth down to 9.3 percent over the same period in 1988 and 17.5 percent for all of 1989 over 1988. Last year's annual growth was 24.8 percent.

Software revenue growth, historically around 20 percent, fell to a record low of 6.2 percent in the quarter.

Telecommunications revenues continued to grow in a narrow range. The relatively upbeat 9.6 percent sales increase (without AT&T) in the fourth quarter was widely dispersed. (With AT&T, the sales gain was only 6 percent.)

Eighty-four percent of the telecommunications companies reported growth in the fourth quarter, and 61 percent reported higher revenue growth rates in the fourth quarter than the third. Penetration of overseas markets contributed to growth.

Said Brophy, who prepared the data for the current Yardstick quarterly statistical review, "A bright spot for mainframe companies is IBM's updated marketing policy, which should lessen last year's deep discounting of large systems.

The Yardstick publications, with an annual five-year financial almanac, cost $1,995 a year.

MINNEAPOLIS (MARCH 19) PR NEWSWIRE - Employee Benefit Plans, Inc. (NASDAQ: EBPI) (EBP) announced today that it has completed the purchase of selected assets of August International Inc. for consideration of less than $450,000. August International Inc. is a managed health care company specializing in third party administration (TPA), hospital bill auditing (HBA), preferred provider networks (PPO) and utilization review services (UR).

The acquisition includes TPA, HBA, PPO and UR client contracts, the name "August International" and selected equipment. William Sagan, EBP's chief executive officer and president, said that the primary advantages of the acquisition are that EBP will now have an HBA operation, a large California PPO, and one of the largest independent UR operations in the United States, with more than 1.4 million participating employees and dependents when combined with EBP's operations. Mark Sorensen, EBP's chief financial officer, stated that as a result of the acquisition, EBP's annualized revenues will increase by approximately $7 million, and EBP's employee and dependent enrollment will increase by approximately 63,000.

Employee Benefit Plans, Inc., headquartered in Minneapolis, provides an integrated program of managed health care services to employers that self-fund their benefit programs. The company is one of the largest for-profit managed health care companies in the United States, with over 2,000 clients nationwide representing more than a half-million employees

and dependents.

DENVER, CO (MARCH 16) PR NEWSWIRE - Amdura Corp. (NYSE: ADU) today announced that it was experiencing a severe liquidity, or cash flow, problem and is negotiating with its bank group and its general unsecured creditors to resolve the issue.

The company said that it is current with its secured lenders, a 14-member bank group led by Chicago-based Continental Bank, but that it is unable to meet its general unsecured obligations on a timely basis.

Negotiations with both the bank group and key suppliers are expected to continue this week. No assurance could be given that these negotations will be successfully concluded, the company added. In the event these negotiations are not successful, the company stated that it and certain of its subsidiaries will consider alternative remedies, including, but not limited to, seeking relief under Chapter 11.

The company also reported that its preliminary, unaudited operating income (before interest, amortization and corporate and other expenses), including discontinued operations, for the quarter ending Dec. 31, 1989, was $900,000. For the full year, preliminary unaudited operating income was $15.0 million. The company also indicated that a restructuring charge will be recorded in the fourth quarter which will result in a substantial loss for the quarter and full year. A major portion of this restructuring charge will be non-cash.

Amdura is the nation's leading, independent harlines distributor, delivering thousands of hardware products to franchised Coast to Coast stores, Trustworthy dealers, and national and regional mass merchandisers.

NEW YORK (MARCH 19) PR NEWSWIRE - The First Australia Prime Income Fund, Inc. (AMEX: FAX), a closed-end bond fund, today declared a regular monthly dividend of $0.09 per share, payable on April 12, 1990 to all shareholders of record on April 2, 1990.

This dividend is consistent with the policy adopted by the fund's board of directors on Oct. 24, 1988 of declaring a regular monthly dividend of $0.09 per share, which commenced in February 1989. Qualifying U.S. taxpayers are additionally entitled to a foreign withholding tax credit on this dividend, and will be informed as to the amount at a later date.

At the time of its offering in April 1986, The First Australia Prime Income Fund was the largest-ever initial public offering on the American Stock Exchange. The fund has net assets in excess of $1 billion. The fund's policy is to invest at least 65 percent of its portfolio in Australian issuers or debt securities rated AA or better. The First Australia Prime Income Fund trades on the American Stock Exchange and the Pacific Stock Exchange. The fund is advised by EquitiLink Australia Limited, the largest independent mutual fund manager in Australia. Devoting itself only to the business of fund management, the EquitiLink Group manages over $1.8 billion on behalf of over 240,000 investors worldwide.

LAKE SUCCESS, NY (MARCH 19) PR NEWSWIRE - Staff Builders, Inc. (NASDAQ: SBLI), announced today that it has successfully completed a transaction with OTI Services, Inc., a New York corporation, wholly owned by ECCO Service Group.

Under the agreement, OTI has purchased certain Staff Builders company-owned personnel services offices for approximately $4 million. Proceeds will be used to reduce the company's outstanding indebtedness.

This transaction will allow Staff Builders to concentrate its growth through the franchise development program it embarked upon in 1989. To date, Staff Builders has established 25 franchisees in both health care and personnel services.

In addition, Staff Builders announced today that it has reached an out of court settlement with its former franchisee who brought suit against the company in August 1988. The longstanding litigation was settled on terms mutually satisfactory to Staff Builders and the former franchisee.

Staff Builders, Inc. provides temporary personnel and permanent placement services, including home care, hospital staffing and business services, to individuals, institutions, business and industry. The company presently has 138 offices in 28 states and the District of Columbia.

GRAND RAPIDS, Mich. (MARCH 19) PR NEWSWIRE - John C. Canepa, chairman of Old Kent Financial Corporation (OTC: OKEN), has announced the appointments of Michael J. Whalen to president and chief executive officer of Old Kent Bank - Chicago, and John D. Paul to chairman, president and chief executive officer of Old Kent Bank - Grand Traverse.

Whalen began his banking career in 1972 as manager of corporate planning at the Northern States Bankcorporation and later joined the BankOhio National Bank in Columbus as senior vice president in its Commercial Loan Division. Whalen joined Old Kent Bank of Kalamazoo in 1985 as executive vice president and manager of lending, and has been serving in his current position as chairman, president and chief executive officer at Old Kent Bank - Grand Traverse since 1987.

Whalen's activities in the Grand Traverse community include serving on the board of directors of the Grand Traverse Chamber of Commerce, vice chairman of the Downtown Development Authority, division chairman of United Way, and director of Traverse Bay Economic Development.

Whalen received both his B.A. degree in 1970 and his M.B.A. degree in 1972 from the University of Michigan.

Paul, who is assuming Whalen's responsibilities at Old Kent Bank - Grand Traverse, joined Old Kent in April 1978 as an analyst in the Credit and Financial Analysis Department. He was appointed corporate banking officer in the Metropolitan Division in May 1979 and assistant vice president in February 1981. Paul was appointed vice president in September 1983 and group head of the Regional Division in July 1984. He joined Old Kent Bank - Grand Traverse in his current position as senior vice president in charge of loan administration in April 1985.

Paul has been actively involved in the Chamber of Commerce and the American Cancer Society in Grand Traverse. He received his B.A. degree from the University of Michigan in 1976 and his M.B.A. degree from Michigan State University in 1978.

NEW YORK (MARCH 19) PR NEWSWIRE - Telefonica de Espana, S.A. (ADS - NYSE: TEF), the national telephone company of Spain and the ninth largest telephone company in the world, today announced that the Spanish government has approved rate increases averaging 7.3 percent. The new rates largely affect local calls, which will increase 11.42 percent.

In announcing the rate increase, Angel Garcia Cordero, executive director of Telefonica in the United States, said that at the same time the government reduced tariffs on trunk calls of distances over 400 kilometers by 4.44 percent. Rates for international calls were not affected.

Garcia said today that the increase is higher than the rate of inflation for 1989 and may be higher than the anticipated inflation rate for 1990. He added that in the future the government will consider the creation of a stable framework of telephone tariffs through a revision method, so that increases do not exceed Spain's consumer price index.

MORRIS PLAINS, NJ (MARCH 19) - Warner-Lambert Company (NYSE: WLA) today announced a realignment of executive responsibilities to support its succession planning process.

Lodewijk J.R. de Vink, 45, currently vice president and president-international operations, has been elected by the company's board of directors as executive vice president and president-U.S. operations, reporting to Melvin R. Goodes, president and chief operating officer. John F. Walsh, 47, has been named to succeed de Vink as president of international operations.

De Vink joined Warner-Lambert in 1988 after a 20-year career at Schering-Plough, where he rose to the post of president of international operations. During that period, he held marketing and general management positions in pharmaceutical and consumer operations in Canada, Europe and the United States. A native of Holland, he holds a bachelor's degree from Washburn University and an MBA from American University. He lives in Convent Station with his wife and two sons.

Reporting to de Vink will be Raymond P. LeFebvre, president-consumer health products group; Robert Serenbetz, president-American chicle group, and Joseph E. Smith, president-Parke-Davis group.

Walsh, who has been president of the Canada/Latin America group, will also report to Goodes. He has been with Warner-Lambert for 23 years in a series of financial, marketing and management posts. Walsh holds a bachelor's degree from Boston College and an MBA from Seton Hall University. Reporting to him will be Jay M. Gwynne, president-Asia/Australia/Capsugel group, and Sam J. Maugeri, president-Europe/Middle East/Africa group.

Frank Lazo, 42, president-Brazil/Chile/Peru/Uruguay region, has been promoted to president-Canada/Latin America group, reporting to Walsh. He was also elected a vice president of Warner-Lambert by the board of directors and will become a member of the company's management committee. Lazo joined Warner-Lambert in 1969. He is a graduate of University del Pacifico and holds an MBA from Escuela Superiore Administration, both in his native Peru.

Warner-Lambert is a worldwide company devoted to developing, manufacturing and marketing quality health care and consumer products. It employs approximately 33,000 people at its operations in more than 130 countries.

LANSING, MI (MARCH 19) PR NEWSWIRE - Max A. Coon, chairman and president of Maxco, Inc. (NASDAQ: MAXC), today announced that Eric L. Cross has been appointed executive vice president and chief operating officer, a new

position in the company. His responsibilities include strategic planning and overseeing the operations of subsidiaries.

Cross, 47, has been vice president since 1981. He began with Maxco in 1969 as president of the Triquet Paper Company, a subsidiary purchased by Great Northern Nekoosa in 1983. Cross holds an M.B.A. from Michigan State University.

Cross, Vincent Shunsky, and Richard Johns have been appointed to Maxco's newly created Executive Committee. The committee will be responsible for establishing policy, strategic planning, and human resource compensation and benefit programs for Maxco and its subsidiaries.

"Each of these executives has played a key advisory role with the company for many years, so the formal establishment of the committee is a logical step," said Coon.

Dr. Johns, 45, will be corporate vice president in addition to his current position as president of Wright Plastic Products, Inc., a Maxco subsidiary. He joined Maxco when Capital Management Group, Inc., of which he was part owner, was acquired in 1986. He earned his doctorate from Notre Dame University and has done post-graduate work at Florida State University.

Shunsky, 40, remains as vice president, treasurer and chief financial officer, managing all corporate finances and investor relations. Shunsky, a C.P.A., joined Maxco in 1975 and has an accounting degree from Walsh College.

With over $75 million annual revenue, Maxco distribution businesses include Finishmaster, Inc., which supplies auto paint and accessories. The construction supplies group markets commercial and highway construction materials throughout Michigan, Wisconsin and Indiana. Wright Plastics, Pak Sak Industries and Akemi Plastic are other Maxco businesses.

CONTACT: Max Coon or Vince Shunsky of Maxco, Inc., 517-484-1414; or Dixie Watterson, 708-564-5610, Bruce Marcus, 212-599-2820, Largent Parks, 214-387-4520, Earle Brown, 813-796-1452, or Tim King, 213-541-4415, all of The Investor Relations Co. for Maxco, Inc.

CHICAGO (MARCH 19) PR NEWSWIRE - The board of directors of Whitman Corporation (NYSE: WH) has approved a plan of corporate restructuring designed to increase the company's financial strength and strategic flexibility.

The new plan will sharpen Whitman's focus on consumer products, with an emphasis on packaged food and soft drinks. It will consist of the following steps:

1) -- Explore the possible sale of Hussmann Corp. at a price that will increase shareholder value. Also explore the sale of certain small business units and assets whose returns are below standard. 2) -- Use the net proceeds from any asset sales to reduce the corporation's long-term debt, and pursue a highly selective acquisitions program in food and soft drinks. 3) -- Study a plan of corporate reorganization designed to create an operating company structure in place of the current holding company structure. James W. Cozad, chairman and chief executive officer, said: "This plan is a strong step forward in the evolution of Whitman Corp. The successful completion of these steps will give the company a much stronger balance sheet, increased flexibility for future strategic positioning of the company and an enhanced opportunity for steady growth in earnings."

The announcement of this restructuring plan follows an announcement by Cozad in February saying that Whitman would focus on becoming a strong North American food and soft-drinks company, sell its investment in Northfield Laboratories at an appropriate time, consider asset sales and further restructuring to achieve greater financial strength and increase investments in new products and sales promotion.

Whitman's operating companies, in addition to Hussmann, are Pet Incorporated, Pepsi-Cola General Bottlers and Midas International.

#90078p0152 03/19/1990 ~PR Newswire

WHITE PLAINS, NY (MARCH 19) PR NEWSWIRE - NYNEX Corporation (NYSE: NYN) announced today that it will trial at its Science & Technology Center a new fiber-to-the-curb system developed by BroadBand Technologies, Inc. (BBT(TM)) of Research Triangle Park, N.C.

The BBT system uses an innovative approach to sharing fiber-optic bandwidth and proprietary breakthroughs in digital coding technology to deliver voice, switched video and other services. Starting in May, researchers at the NYNEX Science & Technology Center will put the system through rigorous tests in order to better understand the technology and the implications of field deployment.

"The trial we will conduct with BBT is consistent with our strategy to fully understand fiber-in-the-loop technology," said Casimir Skrzypczak, vice president - Science & Technology. "We believe our customers should receive the benefits of fiber-optic technology as quickly as possible and this trial with BBT will bring us closer to that goal."

"BBT has developed a cost-effective fiber-in-the-loop telephone system which can be upgraded to provide digital video service over the same integrated fiber-optic system," said Salim Bhatia, president of BBT. "Our system was designed and is being produced with deployment in mind. This evaluation represents an important joint effort to establish the pathway to deployment applications."

NYNEX was one of the earliest proponents of using a shared resource system to bring the benefits of fiber optic technology to customers' homes. On Jan. 30, it became the first company in the world to deploy a fiber-to-the-curb system in Lynnfield, Mass., using technology developed by the Raynet Corp. of Menlo Park, Calif.

Fiber-to-the-curb systems typically allow many customers to be served from the same fiber pair. Electronic interfaces installed at curbside convert optical signals to conventional telephone signals, which are then transmitted to customers' homes through existing copper wires. Such a system is less expensive to install and maintain and allows for faster deployment of services requiring fiber optic technology such as interactive video information services and pay-per-view movies.

#90078p0159 03/19/1990 ~PR Newswire

BILLERICA, MA (MARCH 19) PR NEWSWIRE - CSP Inc. (CSPI) (NASDAQ: CSPI) released its unaudited financial results for the second quarter ended Feb. 28, 1990. The company president, Samuel Ochlis, reported that sales for

the quarter had increased by $9,000 to $3,025,000, as compared to the same period of the previous fiscal year. Sales for the six-month period increased by $337,000 over the previous fiscal year. The sales increase was due to increased shipments of the MAP-4000 product, continued success of the Mini-MAP product line, and initial shipment of the SuperCard I, the new single board vector processor based on Intel's i860 processor chip.

Ochlis pointed out that the company increased its operating profit for the third straight quarter. The operating profit was $249,000 and $421,000 for the three and six-month periods ended Feb. 28, 1990. The increase in earnings was due to the increase in sales volume, improved profit margins and management of the operating expenses. The company had net income of $340,000 and $657,000, or 12 cents and 24 cents per share, for the three and six-month period ended Feb. 28, 1990, as compared to $200,000 and $354,000, or 7 cents and 13 cents per share, for the same periods of the previous fiscal year.

CSPI was founded in 1968 with specific strengths in signal processing and computer technology. Today, CSPI is recognized as a leading manufacturer of vector processors, also referred to as array processors, to enhance a computer's ability to perform high-speed arithmetic. Markets served include science and engineering applications in signal processing, sonar/radar/ASW, image processing, seismic research, medical imaging, electronic publishing and others. In addition to its vector processors products, CSPI recently formed a new division called Scanalytics for the development and marketing of turnkey image analysis systems (workstation). CSPI is a public company with stock traded over the counter via NASDAQ.

#90078p0160 03/19/1990 ~PR Newswire

LAS VEGAS (MARCH 19) PR NEWSWIRE - Nevada Power Company (NYSE: NVP) will add 210 megawatts to its power capacity in 1991 to meet unexpectedly high power demands in southern Nevada.

The company said it will purchase the power supply from the Mission Energy Company, an independent power producer. Mission will build a power plant on property adjacent to Nevada Power's Sunrise station located in the east Las Vegas valley.

The entire project will be financed, built and owned by Mission Energy with fuel provided by Nevada Power Company in exchange for the total energy generated. Natural gas and diesel fuel will power the three proposed combustion turbines.

Power from the new plant will be delivered at a price less than other resources available for service by 1991, resulting in a substantial savings to Nevada Power's customers. Under the terms of the agreement, annual price increases will not exceed five percent.

Frank Loudon, vice president of resource planning and power dispatch for Nevada Power, said fuel costs would be minimized because of the on- site delivery system and power would not have to be transmitted over major tie lines. Further costs will be saved, said Loudon, because Nevada Power will operate and maintain the facility at Mission's expense.

Nevada Power said it has been able to delay costly new base generating plants of its own by purchasing surplus power from other utilities.

Mission Energy will be required to obtain all permits from the state and federal governments. The project is scheduled for start of construction in September 1990, with on-line generation in June 1991.

CONTACT: Murray Westgate of Nevada Power, 702-367-5678, or Mike Hall of Mission Energy, 714-752-5588.

TYLER, TX (MARCH 19) PR NEWSWIRE - TCA Cable TV, Inc. (NASDAQ-NMS: TCAT) today announced results for the first quarter ended Jan. 31, 1990.

Revenues for the quarter ended Jan. 31, 1990, of $26,965,000, were up 47 percent over the 1989 revenues of $18,294,000, and operating income before depreciation of $14,604,000, was up 53 percent over the 1989 operating

income before depreciation of $9,540,000. Net income was $851,000 or $.04 per share, as compared to $2,881,000 or $.12 per share in 1989. These first-quarter results reflect the full impact of the acquisition made in the fourth quarter of 1989, which added 31 percent more subscribers. Depreciation and interest expense were up 41 percent and 103 percent, respectively.

TCA Cable TV, Inc. is engaged in the development and operation of cable television systems in Texas, Louisiana, Arkansas, New Mexico, Mississippi and Idaho. The company owns or manages 53 systems with approximately 450,000 equivalent subscribers. The company currently has 24,206,592 shares of common stock outstanding.

MONTREAL (MARCH 19) PR NEWSWIRE - Dominion Textile Inc. (Montreal: DTX) announced today that 4,033,931 common shares of Textiles Dionne Inc., representing 99.6 percent of the common shares outstanding, have been tendered under Dominion's purchase offer for the company. The corporation stated that it will take up and pay for such shares in accordance with the offer on or before March 26.

Charles H. Hantho, president and chief executive officer of Dominion Textile, welcomed the Dionne employees in Saint-Georges de Beauce, Montmagny and Drummondville, Quebec, into Dominion Textile's ranks and expressed satisfaction with the successful tender offer.

"The Dionne facilities strengthen our yarn business in North America and our ability to serve Canadian customers," said Hantho. "The combination of skilled people and modern manufacturing equipment will make a noteworthy contribution to our yarn group."

Dominion's North American sales yarn operations, consisting of eight plants, generated $227 million in sales in the fiscal year ended June 30, 1989. Textiles Dionne recorded sales of $51 million in the fiscal year ended Sept. 30, 1989.

Dominion Textile will issue 888,641 common shares and pay $5,653,835 cash in exchange for 4,033,931 Dionne shares.

Dominion Textile, with world headquarters in Montreal, is a leading international manufacturer and distributor of textiles and textile-related products with more than 40 manufacturing facilities and a presence in some 50 countries around the world.

MILWAUKEE (MARCH 19) PR NEWSWIRE - Midwest Express Airlines today began new nonstop service between its Milwaukee hub and San Francisco using new McDonnell Douglas MD-88 aircraft.

According to Timothy E. Hoeksema, president of Midwest Express, the new service to San Francisco offers connections through Milwaukee from Appleton, Madison, Eau Claire, Wausau/Stevens Point, LaCrosse and Green Bay, Wis.; Grand Rapids, Flint, Saginaw and Muskegon, Mich.; and Rockford, Ill. Connecting service is provided by Midwest Express and Skyway Airlines, The Midwest Express Connection.

The addition of San Francisco service follows the airline's March 1 launch of Los Angeles and San Diego service, and is the latest stage in the carrier's five-year, $120 million expansion plan announced in November 1987. Since that time, Midwest Express has relocated its headquarters to Milwaukee from Appleton; constructed a 60,000-square- foot maintenance facility at Mitchell International Airport; added eight aircraft and 10 cities to its route system; increased employment by over 530, bringing the total number of employees to over 800; signed a marketing agreement with Skyway Airlines to operate as The Midwest Express Connection, feeding passenger traffic from 17 midwestern cities through Milwaukee; and is currently expanding its facilities at Mitchell International Airport by nine gates, bringing its total number of gates in Milwaukee to 14.

Midwest Express Airlines, based in Milwaukee, is a wholly owned subsidiary of K-C Aviation, which, in turn, is a subsidiary of Kimberly- Clark Corp (NYSE: KMB). Operating since June 1984, Midwest Express has earned its reputation as "The best care in the air" by offering passengers luxury-class service at coach fares or less. A nationally reported survey of 75 major airlines has rated Midwest Express' two-by- two leather seating "the most comfortable coach seat" for three consecutive years. Midwest Express is the second-largest carrier at Mitchell International Airport based on passenger boardings.

Skyway Airlines is a wholly owned subsidiary of Mesa Airlines, a regional carrier based in New Mexico, and operates as The Midwest Express Connection through a marketing agreement with Midwest Express Airlines. Skyway operates new Beechcraft-model 1900 19-passenger propjets, painted in Midwest Express colors. Skyway Airlines has approximatley 80 employees.

SOUTH PLAINFIED, NJ (MARCH 19) PR NEWSWIRE - Princeton Diagnostic Laboratories of America, Inc. (AMEX: PDA) announced today that Leonard A. Mudry has joined the company as vice president of operations and finance.

Dr. Carlton E. Turner, PDLA's president and CEO, stated, "Mr. Mudry brings with him 15 years of operations and financial experience in the clinical and toxicology laboratory field. Leonard will add depth to our management team and provide leadership for growth."

A graduate of St. Peters College, Mudry was previously senior vice president of American Medical Laboratories in Fairfax, Va.

PDLA is an NIDA-certified laboratory authorized to provide drug testing services to government agencies and businesses regulated by the U.S. Department of Transportation, contractors for the Department of Defense, and other industries coming under federal drug testing guidelines.

PDLA's diagnostic drug tests utilize a forensic approach and are used as pre-employment drug screens by businesses involved in transportation, oil and chemical, nuclear power, financial institutions, security, general manufacturing, media, and sports.

KANSAS CITY, MO (MARCH 19) PR NEWSWIRE - Bjorn E. Olsson has been named president and chief operating officer of Harmon Industries Inc. (NASDAQ: HRMN), announced Robert E. Harmon, chairman and chief executive officer of Harmon Industries.

While the assumption of all duties of the position is not effective until Aug. 1, 1990, Olsson will be integrated into Harmon's operations immediately, including on-site inspections of Harmon's subsidiaries as

well as participation in investigatory meetings with a focus toward new operations strategies.

Olsson has been involved with Harmon Industries for nearly 10 years and has served as a member of the board of directors since 1982. With experience in the United States and worldwide railroad industries, Olsson brings a wealth of additional experience to Harmon's management team.

"Bjorn knows the international market extremely well and has served as COO previously at SAB NIFE AB," said Harmon. "His addition to our senior management is definitely an asset."

Olsson received a masters degree in Business Administration from the University of Lund, Sweden, in 1968. Currently, Olsson serves as vice president -- corporate development for AB Cardo of Sweden. His main responsibilities include strategic planning, mergers and acquisitions, and identifying new business opportunities. Previously, he worked in senior management positions for Swedish-based SAB NIFE, Sonessons, Linden-Alimak, and Kockums Industri.

Harmon Industries is traded in the over-the-counter market and is quoted on the NASDAQ National Market System under the symbol HRMN. For further information, please contact Vincent D. Burget, vice president - Corporate Affairs, Harmon Industries, P.O. Box 1570, Blue Springs, Mo. 64015. The telephone number is 816-229-3345.

WASHINGTON (MARCH 19) PR NEWSWIRE - AT&T today announced it will offer a long-distance plan that will give consumers the opportunity to save on calls to their favorite out-of-state area code.

Customers of the SelectSaver(SM) plan will pay only $1.90 a month plus low per-minute prices on all direct-dialed calls to the area code of their choice. Prices on most SelectSaver calls will be 12 cents per minute during evening and night/weekend calling periods, an average 23 percent less than AT&T's usual evening prices, and 20 cents per minute for daytime calls, an average 13 percent less than AT&T's regular daytime prices.

Customers of the plan also will receive a 5 percent discount on all other direct-dialed out-of-state calls.

As part of a special introductory offer, AT&T said there will be no sign-up fee for SelectSaver.

In a filing with the Federal Communications Commission, AT&T said SelectSaver would take effect May 3. Availability will depend on billing arrangements with local telephone companies and will vary around the country.

Consumers can order SelectSaver by calling toll-free 1-800-222-0300. In a related FCC filing March 15, AT&T said it plans to waive the $5 sign-up fee for its Reach Out America one-hour and half-hour plans from April 1 through June 30.

AT&T SELECTSAVER(sm) Per-Minute Prices

Distance Call Travels	Daytime(A)	Evening/Night/Weekend
1 to 55 miles	19 cents	11 cents
56 to 1,910 miles(B)	20 cents	12 cents
More than 1,911 miles	21 cents	13 cents

(A) 8 a.m. to 5 p.m., Monday through Friday. (B) The 56-to-1,910 mileage band includes 94 percent of AT&T out-of- state calls. SelectSaver prices in this mileage band are an average 13 percent below AT&T's regular daytime prices; 23 percent below evening prices, and 5 percent below night/weekend prices.

#90078p0211 03/19/1990 ~PR Newswire

AUSTIN, TX (MARCH 19) PR NEWSWIRE - Expanding its commitment to support the UNIX(R) marketplace, Dell(TM) Computer Corporation (NASDAQ: DELL) announced today the DELL(R) Station 325 and DELL Station 425E(TM), two UNIX/DOS workstations based on Dell's high-performance 80386- and 80486-based personal computers. The company also announced the DELL Station Partner Software kit which converts a personal computer into a low-cost, color X terminal.

The DELL Station, targeted for general business use, combines a Dell System(R) 325 or 425E with a pre-loaded suite of software packages that includes Dell UNIX System V, Version 3.2 and Uniplex office automation software, Dell UNIX System V, Version 3.2, an enhanced version of the UNIX operating system, includes bundled software to concurrently access MS-DOS(R) applications and provides support for the X Window System(TM). The X Window System is the evolving industry standard for graphical interfaces in the UNIX environment.

DELL Station hardware and software options are factory installed and custom-configured at the time of order. The DELL Station is ready to plug in and use when the system arrives, eliminating the time consuming process of installing hardware and software.

"The growth in commercial UNIX applications is creating a demand for standard, easy-to-use personal workstations," said G. Glenn Henry, senior vice president of Dell's product group. "Our customers put a high value on ease-of-use and personal productivity. The X Window System allows

users to have multiple views of one or more applications."

Dell has added IXI's X.desktop(TM), which provides the user with a Macintosh-like screen with icons that represent applications or functions. Also included with the X Window System is the Open Software Foundations's (OSF) Motif(TM) window-manager system which gives the X Window System applications the familiar look and feel of Microsoft Windows or IBM(R) Presentation Manager.

"The DELL Station is the perfect solution for the DOS PC user who wants the power of a UNIX workstation for office applications but knows nothing about UNIX," said Joel J. Kocher, senior vice president of Dell's U.S. sales and support. "The DELL Station combines the ease-of- use of a Macintosh computer, the power of a UNIX workstation, popular office applications and DOS compatibility all for the price of a PC." A comparable UNIX-based PC or workstation is priced several thousand dollars higher than the DELL station.

The Desktop Environment Makes the DELL Station Easy to Use X.desktop provides a visual working environment for the non- technical user. Users manage their work with an icon-based desktop and an easy-to-understand "drag-and-drop" concept. Files and programs are represented by icons and can be selected with a mouse. The icons can be visually dragged across the screen and dropped onto a desktop or action icon which initiates a function such as print, delete, mail or write to disk. X.desktop shields the user from the UNIX command line and provides a graphical representation of the files and applications on the DELL Station. File and program icons can be arranged in any way on the user's personal desktop.

Users can easily run applications and carry out file management operations such as copying, deleting, printing, renaming or creating new files by using a mouse. Each file in the system can be automatically associated with a specific program or behavior. For example, clicking on a document can open a window for a word processor application. The document, represented by the icon, is ready to edit. X.desktop allows the user to create custom icons or modify the behavior of existing icons, tailoring the operation to most effectively serve individual needs.

Bundled Office Automation Applications The DELL Station includes a comprehensive suite of integrated office applications from Uniplex. Uniplex X Windows applications include word processing, a spreadsheet, the Informix SQL (structured query language) relational data base, advanced business graphics, electronic mail and more. The applications are highly integrated, consistent and run within the easy-to-learn X.desktop environment. Uniplex provides dynamic links between the spreadsheet, data base and graphics packages.

Uniplex supports multiple overlapping windows, moving and resizing of windows, cut-and-paste between windows, scroll bars, pull-down menus, soft keys and context-sensitive "help."

A Versatile Network Environment Designed to serve a variety of roles in a multi-user computer network, the DELL Station can function as a PC, a powerful single-user workstation, an X Window host computer, a multi-user microcomputer or a PC network server. The DELL Station can be configured with up to 32 serial port connections for low-cost asynchronous terminals. Regardless of terminal type, all users can share the same applications, files and peripherals.

Multiple UNIX and DOS application programs can be run simultaneously within the X Windows environment. The PC DOS operation is enhanced by the inherent multi-user, multi-asking and security features of UNIX.

The DELL Station Partner Concept As a complement to DELL Stations, the company offers the DELL Station Partner kit. It includes PC Xsight, from Locus Computing Corporation, which provides a full implementation of the X Window System server specification and can control multiple processes running concurrently on one or more X Window hosts using multiple windows. The Partner kit supports VGA (640 x 480) or Super VGA (800 x 600) color graphics display options. It also supports X.desktop, OSF Motif, multiple fonts and X Window applications.

PC Interface, also from Locus Computing Corporation, allows DOS files to be transparently stored on a DELL Station host under the secure UNIX file system. PC files may be shared by all PC and VP/ix users on the network who have been given the appropriate access. PC print jobs can also be automatically spooled to a centralized DELL Station printer. Basic configurations of the DELL Station are attached.

Dell Computer Corporation designs, develops, manufactures, markets, services and supports a complete line of personal computers compatible with industry standards. The company is recognized in independent surveys as having the highest customer satisfaction level in the industry for its line of personal computers.

#90078p0212 03/19/1990 ~PR Newswire

AUSTIN, TX (MARCH 19) PR NEWSWIRE - Extending the high-performance end of its product line, Dell(TM) Computer Corp. (NASDAQ: DELL) announced today the Dell System(R) 425E(TM), its first personal computer based on the

Intel(R) i486(TM) microprocessor and the high-performance 32-bit EISA (Extended Industry Standard Architecture) bus.

Targeted for the experienced power user, the 425E offers exceptional performance at about half the price of the Compaq Deskpro 486/25. The price/performance of the 425E combine with Dell's top-rated service and support to provide outstanding value for applications that demand very high computation power and high-speed, large capacity storage.

The 425E provides an excellent platform for applications such as software development, large spreadsheets, CAD/CAM/CAE, single and multiuser UNIX(R) applications, and mid-range to high-end network server applications. The 425E, which will be available in the second quarter 1990, is also a platform for the DELL(TM) Station, a Dell developed, fully integrated UNIX-based office automation system.

"The 425E reaffirms Dell's price/performance commitment to its high-end customer base of corporate accounts, value added resellers and individual power users," said Joel J. Kocher, senior vice president of Dell's USA sales and support. "This system extends our ability to meet our customers' needs at a price significantly below competitive systems.

Only the Dell System 425E couples the industry's highest-performance processor and highest-performance expansion bus with Dell's service and support -- all at a price that is within the range of corporate users needing this level of power."

#90078p0215 03/19/1990 ~PR Newswire

ANAHEIM, CA (MARCH 19) PR NEWSWIRE - Distributed Logic Corporation (NASDAQ: DLOG) today announced operating results for the first quarter of its fiscal 1990 year.

Consolidated revenues for the three months ended Jan. 31, 1990, totaled $10,308,541, a decrease from the $12,129,107 reported for the first quarter of the previous year. The company reported a net loss for the current period of $1,684,153, versus a loss of $376,933 in the prior year's comparable quarter. On a per share basis, this amounted to a loss of $.67 per share for 1990, as compared to a loss of $.15 in 1989.

"As indicated in our year-end announcement, this loss resulted from a combination of factors, including a shortfall in U.S. revenues, a stretchout in deliveries to a major OEM customer and termination costs related to our recent staff reduction," explained Glenn C. Salley, DILOG chairman and chief executive officer. "Revenues in Canada and Europe have remained on plan, however.

"Despite the loss, we feel the company is now better positioned for growth " he said. "We have reduced our break-even point significantly. In order to improve cash flow in support of new product development and introductions, we have obtained a deferral on $2.2 million of principal payments on our subordinated acquisition notes, which will now begin in February of 1991, instead of the current fiscal year.

"In the first several weeks of the second quarter, shipments to our major OEM customer have resumed and bookings and revenues are now tracking our internal operating plans," he added. "We are beginning to see the results of having established tighter management of U.S., Canadian and European operations.

"As an example of the positive results achieved by this new organization, we have once again been awarded OEM status with Digital Equipment Corporation in Europe, which allows us to sell enhanced DEC computer systems into the MUMPS and UNIX software environments," Salley said. "We should begin to see the revenues from this added capability during the third fiscal quarter."

Salley also indicated that the company had made strides in major product areas that provide a means to extend business operations beyond the DEC marketplace. "The digital audio tape (DAT) stacker technology we acquired from Predator Systems Corporation has now been introduced in a line of products and we are experiencing considerable interest from major DAT

drive manufacturers, who wish to offer it as an option to their products. In addition, interest has been shown in this product by computer manufacturers, VARs and end users. Other products with application outside the DEC market are in development as well and will be announced in coming months."

SUNNYVALE, Calif. (MARCH 19) PR NEWSWIRE - Weitek Corp. (NASDAQ: WWTK) is pleased to announce that Jack Carsten, a 25-year veteran of the semiconductor industry, has joined Weitek's board of directors. Carsten joined Texas Instruments in 1963 after graduating from Duke University with a bachelor of science degree in Physics. At TI he was responsible for IC engineering and marketing and later was named division manager for both the TTL Circuits and the MOS Circuits groups.

In 1975 Carsten left TI to become Intel Corp.'s vice president of Sales and Marketing and was subsequently named to head their Microcomputer, Components and ASIC groups. After 13 years as an officer of Intel, Carsten resigned in 1988 and is currently a private venture investor and consultant based in Los Altos, Calif.

"We're very happy to have Jack join our board," said Arthur J. Collmeyer, president of Weitek. "His tremendous experience and marketing insight will help to strengthen Weitek's competitive advantage."

Weitek is the leading supplier of high-performance numeric processing solutions. The company's VLSI circuits and development tools power a broad range of computer systems, from minisupercomputers and engineering workstations to desktop computers and page printers.

#90078p0237 03/19/1990 ~PR Newswire

CHICAGO (MARCH 19) PR NEWSWIRE - Revenues of United States Cellular Corporation (AMEX: USM) climbed more than 123 percent in 1989 as the company doubled its subscriber base and expanded its markets, it was announced today.

However, the expenses associated with its growth results in continuing net losses for the emerging cellular telephone company.

H. Donald Nelson, president, said he expects expenses to continue to outpace revenue as the company establishes new markets and further expands existing operations.

"Viewed from the growing strength of our revenue stream, we are making progress toward our long-term goal of profitability," Nelson said.

One measure of the company's progress in 1989, Nelson added, is the company's positive cash flow of $3.2 million before all marketing related expenses.

Service revenues climbed 141 percent to $33.2 million primarily as a result of the increased customer base. Marketing related expenses also increased 141 percent mainly as a result of discontinued equipment sales. Discounted equipment sales accounted for over one-third of the company's operating loss. The 1989 net loss was $18.3 million, versus $6.6 million the year earlier.

United States Cellular experienced a 136 percent increase in subscribers in its managed markets during 1989, to 44,000 from 18,600 in 1988, Nelson said. The company owned or had the right to acquire 8,846,000 population equivalents -- or pops -- at the end of 1989, up 14 percent from 7,769,000 a year ago.

At the close of 1989, United States Cellular had 25 consolidated systems in operation and was the manager of systems serving another seven markets.

In the fourth quarter, revenues increased 114 percent to $12,760,000 from $5,945,000 in the fourth quarter of 1988, while the operating loss increased 68 percent, to $4,424,000 from $2,634,000 in the earlier period.

The net loss for the quarter totaled $5,499,000 compared to the 1988 fourth quarter net loss of $926,000. In the previous fourth quarter, a $2.2 million gain on the company's trade of certain cellular interests offset losses.

According to Nelson, the company has a strong financial position. Net investments in cellular partnerships and licenses amounted to $114.7 million and shareholders' equity was $81.8 million, equal to $2.87 per share. Debt totaled $74.9 million, representing 47 percent of total capitalization.

Headquartered in Chicago, United States Cellular Corporation manages and invests in cellular systems throughout the country. The company currently owns or has the right to purchase interests in cellular licenses in 75 Metropolitan Service Areas (MSAs) and 34 Rural Service Areas (RSAs). All the metropolitan areas were being served at the end of 1989, while one RSA was in operation.

Substantially all the rural systems should be in operation within the next 24 months, Nelson said.

United States Cellular Corporation's shares are traded on the American Stock Exchange under the symbol USM. The company is 81-percent owned by Telephone and Data Systems (AMEX: TDS).

CONTACT: Kenneth R. Meyers, vice president-finance of United States Cellular, 800-521-6350 or 312-399-8900.

NORWALK, CT (MARCH 19) PR NEWSWIRE - The Perkin-Elmer Corporation (NYSE: PKN) announced today that it has sold its Electron Beam Technology Division (EBT) in Hayward, Calif., to ETEC, Inc., with support from a broad base of key U.S. technology leaders.

ETEC is a newly formed Nevada corporation founded by former and current key managers of EBT with equity participation from the IBM Corporation, the Du Pont Company, Grumman Corporation, Micron Technology, Inc., and Zitel Corporation. Perkin-Elmer will also be an equity partner.

Financial terms were not disclosed. IBM's investment includes the provision of its own electron beam technology to ETEC under license. This technology was developed by IBM engineers in East Fishkill, N.Y., and represents the most advanced electron beam lithography capability in the world today.

"ETEC brings together leading users and contributors in the field of electron beam lithography," said Horace G. McDonell, chairman and chief executive officer of Perkin-Elmer. "We are pleased that they will share in the latest developments and future growth of this technology which is vital to the manufacture of semiconductor devices."

Charles E. Minihan is chairman of the board and chief executive officer of ETEC, Inc. and Thomas Halloran is president and chief operating officer. Both were formerly with Perkin-Elmer and served most recently with Micrion Corporation, where Minihan continues as a director.

"We are confident that the new company, with its strong investor base and world class technology, will help us retain existing customers and attract new ones," Minihan said. "We consider ETEC to be in direct support of the national interest to strengthen critical technologies and improve U.S. competitiveness. This is a prime example of U.S. industry cooperation and teamwork.'

Perkin-Elmer's EBT division has manufactured electron beam lithography machines used for direct writing of semiconductors and the patterning of semiconductor masks. Its Manufacturing Electron Beam Exposure System (MEBES) leads the market for mask-making machines. That position is expected to be significantly enhanced under this approach.

IBM President Jack D. Kuehler said, "This creative response by industry draws on an impressive variety of domestic companies and will strengthen the technology infrastructure on which we all depend."

"This partnership will ensure that technology vital to the U.S. photomask business remains in the U.S.," said C.L. "Jerry" Henry, group vice president in charge of Du Pont Electronics. "ETEC will provide mask makers with a window to emerging technology and will continue to play a key role in the development, manufacture and service of MEBES electron beam machines."

ETEC will continue operations in Hayward, Japan and Europe, employing approximately 500 people.

Separately, it was announced today that Perkin-Elmer's Applied Lithography Operations (ALO) in Danbury, Conn., has been sold to Du Pont.

ALO was part of the EBT Division and utilizes its electron beam lithography tools to manufacture and sell the photomasks used in optical lithography equipment. ALO also is engaged in applications and process development and government contracting assignments including X-ray masks. As an investor in ETEC, Du Pont will technologically cooperate with the firm in developing advanced mask processes for commercial users of electron beam lithography.

HERNDON, VA (MARCH 19) PR NEWSWIRE - Newbridge Networks (NASDAQ-NMS: NNCXF) announced today it has signed a one-year renewable agreement with GTE (NYSE: GTE) under which Newbridge will offer the 3624 MainStreet channel bank and other networking products to all GTE affiliates, including GTE Telephone Operations.

Under an earlier contract, GTE Supply distributed selected MainStreet items to the telecommunications market. This prior arrangement has been incorporated into the new agreement.

"We are very happy to enlarge the relationship with one of our major customers," said Newbridge President Peter Madsen. "We at Newbridge look forward to working very hard with the people in GTE Telephone Operations and other affiliated groups."

The 3624 MainStreet is a wall-mountable, intelligent T1 channel bank capable of providing up to 24 voice and/or data links over a single T1 circuit.

GTE Telephone Operations will sell the 3624 MainStreet channel bank and other networking products to businesses in conjunction with its Datacom/Office Systems services. The Datacom/Office Systems organization supplies data communications and office systems integration, technical support, customer training and maintenance in selected cities throughout the United States.

"With GTE's emphasis on offering complete telecommunications and office systems integration for our business customers, we are pleased to add the 3624 MainStreet channel bank to our product portfolio," said Todd Eliason,

GTE Telephone Operations director-premises systems and services. "The 3624 MainStreet channel bank gives us an opportunity to further meet the needs of our T1 customers."

GTE Telephone Operations is the largest of GTE Corporation's six business groups. GTE Telephone Operations provides local phone service to 14.4 million customers through 15.1 million access lines in portions of 31 states and two foreign countries. In addition, GTE Telephone Operations, through GTE Supply, markets telecommunications products and services nationally; and through GTE Data Services, supplies computer software and telecommunication services nationwide. Revenues in 1989 totaled $12.5 billion. GTE Telephone Operations has 103,000 domestic and international employees.

GTE's subsidiaries operate in 46 states and 41 countries, with combined revenues and sales of $17.4 billion and net income of $1.4 billion in 1989. GTE is a leader in its three core businesses -- telecommunications, lighting, and precision materials -- providing products and services worldwide.

Newbridge Networks designs, manufactures, sells and services a broad range of digital communications equipment focused on wide-area voice and data networks, and local area networking. The company has offices and manufacturing facilities in the United States, Canada, Hong Kong and the United Kingdom.

Newbridge Networks is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

For further information, contact Newbridge Networks, Inc., at 703-834-3600. Or write to Newbridge at 593 Herndon Parkway, Herndon, Va. 22070-5421. Newbridge has sales offices throughout the United States.

NEW YORK (MARCH 19) PR NEWSWIRE - The Journal of Commerce, Inc., a subsidiary of Knight-Ridder, Inc. (NYSE: KRI), has signed an agreement to purchase Traffic World magazine from International Thomson Transport Press Inc.

Traffic World, an 83-year-old weekly magazine headquartered in Washington, D.C., provides news and analysis of the domestic transportation industry and has 10,000 paid circulation.

Terms of the acquisition, which is subject to appproval by the Knight-Ridder board of directors at its regular meeting on March 22, were not disclosed.

The New York-based Journal of Commerce is a 163-year-old daily newspaper specializing in news of international trade and transportation.

Don C. Becker, president and publisher of The Journal of Commerce, said: "We are pleased at the prospect of owning a respected publication with a strong hold on its readers. Single ownership of Traffic World and The Journal of Commerce should lead to editorial and financial improvements at each publication."

Becker will be publisher of the newly acquired magazine. Stanford Erickson, Journal of Commerce general manager, will be its president. Howard Abramson, currently deputy chief of the newspaper's Washington, D.C. bureau, will be named editor. Traffic World's advertising sales director, Robert L. Hulsman, will continue in that capacity.

The Journal of Commerce, Inc, is part of Knight-Ridder's Business Information Services Division. In addition to the daily Journal of Commerce newspaper, the company publishes fortnightly international editions in Singapore and Zurich, and a Chinese-language edition in Beijing. Worldwide readership totals more than 217,000.

Additionally, the company publishes several directories and the weekly Import and Export Bulletins. Its two database subsidiaries, Transax/RATEs and PIERS, provide electronic information services to the maritime and international trade communities.

International Thomson Transport Press Inc. is an affiliated company of the Thomson Information/Publishing Group, Stamford, Conn.

NEW YORK (MARCH 19) PR NEWSWIRE - The Bank of New York Company Inc. (BNYCo.) (NYSE: BK) said today that it had completed the purchase of the credit card business of First City Bancorporation of Texas, Inc., Houston (NYSE: FBT).

The portfolio includes both MasterCard and Visa cards and has approximately 650,000 accounts and $550 million in outstandings. As a result of this acquisition, BNYCo. becomes the sixth largest bank issuer of credit cards

with approximately 3.1 million accounts and $3.8 billion in outstandings. First City Bancorporation has agreed to continue to market and issue credit cards to its customers in the Texas market as agent for BNYCo.

J. Carter Bacot, chairman and chief executive officer of BNYCo., said, "There is significant earnings potential to be realized in this new portfolio, both from cost savings and through aggressive marketing in the Texas area to existing and prospective cardholders."

BNYCo. said it intends to continue to expand its credit card business "by further internal growth and acquisition of credit card portfolios, by introducing new affinity cards, and by providing back-office processing services to smaller issuers," according to Bacot.

MIAMI (MARCH 19) PR NEWSWIRE - American Savings & Loan Association of Florida ("American Savings") announced today that American Savings has been informed by the Office of Thrift Supervision (OTS) of OTS' decision to object to American Savings' request to pay the regular quarterly cash dividend on its $2.19 Cumulative Convertible Preferred Stock, Series A next scheduled for payment on April 1, 1990.

OTS approval is required before ASLA can declare or pay any dividend.

American Savings meets all three of the capital standards recently promulgated under FIRREA and associated OTS regulations.

Harris C. Friedman, chairman, president and chief executive officer of American Savings said, "While the action by OTS is regrettable, holders of the Series A Preferred Stock continue to have the right to convert their shares to $16.40 in cash pursuant to a 1988 merger agreement between American Savings and Centerbanc Savings Association.

In fact, a substantial number of Series A holders have already converted their shares to cash." Details concerning the right to convert can be sent to preferred shareholders upon request.

SEATTLE (MARCH 19) PR NEWSWIRE - Arthur E. Hitsman has been named president of Boeing Computer Services (BCS) and John B. Sheridan has been named to replace Hitsman as executive vice president of Boeing Aerospace & Electronics (BA&E), The Boeing Co. (NYSE: BA) announced today.

Hitsman replaces Michael R. Hallman who is leaving BCS to become president and chief operating officer of Microsoft Corp., in Redmond, Wash.

Hitsman has been executive vice president of BA&E since May 1989, when the former Boeing Aerospace and Boeing Electronics divisions were consolidated. Prior to that he was president of Boeing Electronics and vice president and general manager of the Ballistic Systems Division of Boeing Aerospace.

Sheridan, most recently, was vice president and general manager of the Electronic Systems Division of BA&E. He also has been vice president of the Ballistic Systems Division, where he directed the company's efforts in intercontinental ballistic missile modernization.

Hitsman joined Boeing in 1950 as a design engineer and then became a senior design engineer on aircraft systems for the B-47 and B-52 bombers and the 707 airliner.

During his Boeing career, he has held various management assignments for development of advanced ground transportation equipment such as the Morgantown Personal Rapid Transit System and surface transportation systems for the Boeing Vertol Company.

Hitsman earned a bachelor of science degree in mechanical engineering from Oregon State University in 1949. The following year, he received a master's degree from the same school. He is a graduate of the Army Command and General Staff College and has completed an advanced management course sponsored by the University of Hawaii and Harvard Business School.

Sheridan began his Boeing career in 1956 as a circuit design engineer on the BOMARC missile program. Some of the positions he has held include: program manager for the Peacekeeper MX program; airborne systems design manager, systems test manager, and engineering manager on the Minuteman missile program; and site engineering supervisor at Vandenberg Air Force Base, Calif.

He received his bachelor of science degree in electrical engineering from Washington State University in 1957 and he has attended the University of Hawaii's advanced management program.

HOUSTON (MARCH 19) PR NEWSWIRE - Quanex Corp. (NYSE: NX), the Houston-based metals company, announced today that an agreement was reached on a 51-month contract with the Progressive Steelworkers of Hammond Inc., to end a strike that began at its LaSalle Steel plant in Hammond, Ind., on Feb. 14. The 317 members of the union voted to accept the contract by a two to one margin in a vote held Sunday, March 18.

"We feel that an equitable settlement has been reached and we are pleased to be returning to full operation. Reporting schedules have been posted for returning the employees to work in stages with all expected to have returned to work by Wednesday, March 21," said Robert C. Snyder, Quanex president.

"The company had previously announced that the strike would have an impact on earnings of approximately five cents per share per month of the strike's duration. Our next labor contract to expire will be October 1991 " said Snyder.

Quanex is a technological leader in the manufacture of specialty metals including steel, aluminum and titanium products for transportation, capital equipment, home building and remodeling and energy processing markets.

WASHINGTON (MARCH 19) PR NEWSWIRE - Citizen Action, the nation's largest consumer organization, today called on the United States Senate to break

what the organization said is the big oil companies' unhealthy stranglehold on America's automobile fuel market.

Citizen Action called on senators to vote for amendments to the Clean Air Act that set a clear and demonstrable environmental standard for cleaner burning fuels.

"Under the current compromise there is no assurance that oil companies will manufacture and sell gasoline that contains reduced amounts of benzene and other toxic chemicals that are fouling the nation's air and increasing the population's cancer risks," said Edwin S. Rothschild, Citizen Action's environment/policy director.

"The major oil companies are engaged in a malicious and devious campaign to persuade the U.S. Senate that the costs of reducing toxic air and other pollutants in their gasolines will increase prices by 15 to 25 cents per gallon. These claims are as false as the claims these same companies made 20 years ago about the costs of removing lead from gasoline," said Rothschild.

"According to independent estimates, the actual costs of producing cleaner fuels will be less than five cents a gallon, a small price to pay for healthier air in the nation's most congested population centers," Rothschild argued.

"Over the last ten years the major oil companies have increased the amount of cancer-causing benzene and other aromatic hydrocarbons in their gasoline in order to increase octane and to market premium unleaded gasoline, a highly profitable product most cars do not need.

Under increasing public pressure, companies like Mobil, Texaco, Exxon, Shell, and Chevron are giving lip service to the idea of 'reformulating' their gasoline, instead of making specific investment decisions to reduce substantially gasoline components that increase toxic air emissions, carbon monoxide and pollutants linked with urban smog," Rothschild continued.

Rothschild noted that the Daschle-Harkin amendment and a provision in the Wirth-Wilson amendment would require the production of cleaner-burning fuels. These provisions, said Rothschild, would require reducing benzene to no more than 0.8 percent and aromatics to no more than 25 percent and increasing oxygen content to a minimum of 2.7 percent.

"These changes are necessary because the Environmental Protection Agency has failed miserably in setting fuel standards that protect the public and clean up the air," Rothschild declared.

CHICAGO (MARCH 19) PR NEWSWIRE - R.R. Donnelley and Sons Co. (NYSE: DNY), North America's largest printer, is building a $17.5 million printing facility in Singapore for start-up late this year.

The manufacturing facility will provide pre-press, printing, binding, packaging and distribution services, as well as diskette replication, to produce computer manuals and other print-related products for hardware and software manufacturers -- particularly those that have relocated in the Far East to become low-cost, high-volume producers. Equipment, which includes a six-color sheetfed press and a six-color web press, is scheduled to be installed in the third quarter of 1990.

By the time it becomes fully operational, R.R. Donnelley (Singapore) Pte. Ltd. will employ approximately 150 people and be the company's largest manufacturing facility in the Far East. Donnelley's international network of computer documentation facilities includes locations in Hudson, Mass.; Crawfordsville, Ind.; Willard, Ohio; Los Angeles, Calif.; Portland, Ore.; Thorp Arch, England; and Dublin and Kildare, Ireland.

"This facility makes Donnelley the first focused, turnkey documentation supplier to the Far East market," says Rory J. Cowan, documentation services group president. "By expanding to Southeast Asia, we can better respond to the computer industry's needs for technical documentation on a global basis. The Singapore manufacturing facility, with the latest industry technology, will support local sales and customer service offices within the region."

The company has appointed David L. McGrew, 43, formerly senior vice president of documentation services sales in Santa Clara, Calif., as managing director of R.R. Donnelley (Singapore) Pte. Ltd. Hoshi D. Deboo 36, previously engineering group manager at Donnelley's plant in Los Angeles, was named manufacturing module manager of the 100,000 square-foot facility under construction in the Ubi Industrial Estate. Ramadas S.K. Naidu, 33, former vice president of R.R. Donnelley Far East, Ltd. in Hong Kong, has been transferred to Singapore as vice president of sales.

R.R. Donnelley and Sons Co. is the world's foremost printer of catalogs, newspaper inserts, magazines, books, directories, financial printing and computer documentation. It operates nearly 100 printing plants, sales offices, service centers and subsidiaries from coast to coast in the United States as well as in the United Kingdom, Ireland, Mexico, the Caribbean and the Far East.

NEW YORK (MARCH 19) PR NEWSWIRE - Primerica Corporation (NYSE: PA) today announced that Fingerhut Companies, Inc., an indirect subsidiary of the company engaged in direct marketing, has filed a Form S-1 Registration Statement with the Securities and Exchange Commission regarding a proposed initial public offering of Fingerhut common stock.

The preliminary registration statement calls for six million Fingerhut common shares to be sold. Upon completion of this proposed transaction, Primerica, through its Primerica Holdings, Inc., subsidiary, will continue to own 72.4 percent of Fingerhut common stock outstanding.

The registration statement anticipates that the initial public offering price will be in the range of $15 to $17.50 per share. The entire transaction is subject to regulatory approvals, as well as customary closing and market conditions.

Underwriters for the offering are Smith Barney, Harris Upham & Co., Inc., Goldman Sachs & Co., Lazard Freres & Co., Merrill Lynch Capital Markets, and Morgan Stanley & Co., Inc. Fingerhut Companies, Inc., has applied for listing of its common stock on the New York Stock Exchange upon completion of this proposed offering.

Primerica Corporation is a diversified financial services company principally engaged in life, credit, accident and health, and property and casualty insurance, investment banking and securities brokerage, mortgage banking, mutual funds, asset management, consumer lending, credit cards, and direct marketing. As of Dec. 31, 1989, the company had assets of approximately $18 billion, stockholders' equity of approximately $2.6 billion, and book value of approximately $23.50 per share.

DENVER (MARCH 19) PR NEWSWIRE - Vicorp Restaurants, Inc. (NASDAQ: VRES) today reported a 79 percent increase in net income for its fiscal first quarter ended Feb. 18, 1990. Net income for the quarter advanced to $3,313,000 from $1,849,000 reported for the same period last year. Earnings per common share almost doubled, reaching 31 cents compared with 16 cents in 1989. Revenues for the quarter rose to $115.9 million from $105.3 million a year ago. These results marked the 12th consecutive quarter of year-to-year operating improvement for the company.

"We continue to see the benefits of our commitment to quality customer service and our efforts to increase average per person expenditures," said Charles R. Frederickson, chairman of the board. "Overall restaurant sales grew by 10.3 percent, despite some adverse weather conditions that depressed sales in some areas during the quarter. Comparable restaurant sales increased 6.5 percent, aided by growth in both customer counts and per person expenditures.

"Restaurant operating income rose 19.1 percent from the comparable quarter a year ago, principally due to the increase in sales. The largest gains were in our Bakers Square-California group, where the combination of growing sales and increasing efficiencies resulted in a better than twofold increase in restaurant operating income. While the results in this market have been most gratifying, we still have significant opportunities in front of us," Frederickson added.

Vicorp operates and franchises approximately 400 mid-scale family type restaurants under the names Bakers Square and Village Inn, principally in the Rocky Mountains region, upper Midwest, Florida, Arizona and California.

CUMBERLAND, RI (MARCH 19) PR NEWSWIRE - Valley Resources, Inc. (AMEX: VR) today announced that its board of directors raised the quarterly dividend to 15 cents per share, a 7.1 percent increase from the 14 cents per share of the earlier quarter. The year 1990 marks the 25th year of independence for Valley Resources and 25 years of consecutive dividend payments.

Charles H. Goss, chairman, president and chief executive officer today announced earnings for the second quarter, the three-month period ended Feb. 28, 1990, of 73 cents per share which compares with 65 cents for the same period in the prior year.

Goss indicated that second quarter earnings of the corporation's gas utility were favorably effected by the extremely cold weather in December. The month of December, which was 25 percent colder than the previous December, was followed by a January and February which were 14 percent warmer than the prior period. The net impact was quarterly weather 3 percent colder than the prior year. Also, during the first quarter, Valley Gas Company added approximately 1,000 new customers. The combination of colder weather and customer growth caused firm Mcf sales to increase 10 percent over the prior year. Over 40 percent of the utility's firm sales are traditionally generated in the second quarter. A 4 percent increase in gallons sold by the corporation's propane subsidiary in the quarter, also impacted by weather, contributed to the increase in quarterly earnings.

Earnings for the six months ended Feb. 28, 1990 were $2,868,200 or 74 cents per share vs. $2,576,100 or 68 cents per share in the prior period. The earnings increase for the six-month period was directly attributable to the factors effecting the second quarter results.

Net income for the 12 months end February 1990 was $3,274,300 or 85 cents per share as compared with $3,155,100 or 83 cents per share for the prior year. For the 12-month period improved margins in the utility and propane business, resulting from customer growth and colder weather, more than offset a softening in the merchandising business resulting from the slowing of the New England economy.

Valley Resources, Inc. is a Rhode Island holding company with five wholly owned subsidiaries: Valley Gas Company, a regulated natural gas distribution company; Valley Appliance and Merchandising (VAMCO), a merchandising, appliance, rental, sales and service company; Valley Propane, Inc., a rental propane gas sales and service company; Rhode Island Development and Exploration Company (RIDEC), an inactive company; and Morris Merchants, Inc., d/b/a The Walter F. Morris Company, a wholesaler distributor of franchised lines.

HIGHLAND PARK, MI (MARCH 19) PR NEWSWIRE - Chrysler Corporation (NYSE: C) and Forstmann Little & Co. today announced that a corporation formed by affiliates of Forstmann Little & Co. and by Allen E. Paulson has completed the previously announced acquisition of Gulfstream Aerospace from Chrysler for $825 million.

Gulfstream, headquartered in Savannah, Ga., manufactures commercial aircraft.

Chrysler purchased Gulfstream in 1985 for $637 million. Chrysler said the sale of Gulfstream is a strategic move to allow the company to concentrate its resources on its core car and truck business.

Paulson, who founded Gulfstream in 1978, will operate it as chairman and chief executive officer.

ATLANTA (MARCH 19) PR NEWSWIRE - BellSouth Corp. (NYSE: BLS) today announced it has joined with JCPenney Business Services Inc., VeriFone Inc., CITGO Petroleum Corp., Integrated Network Corp. (INC) and Northern Telecom in a technical field trial of FASTCONNECT, a proposed "virtual private network" service.

The new service addresses the special data transport needs of retailers who use point-of-sale on-line transaction processing for functions such as credit verification and electronic draft capture. FASTCONNECT is intended to provide private-line performance at a dial-up price.

A Collaborative Approach to Improving Market Responsiveness

FASTCONNECT is the result of a focused effort by BellSouth to increase its responsiveness to the rapidly changing telecommunications market by working closely with both its customers and suppliers to address customer needs. The establishment of FASTCONNECT involved close cooperation among a number of different companies. In this trial, BellSouth supplies telecommunications services to JCPenney Business Services, which provides processing of credit authorization and draft collection services to CITGO Petroleum. CITGO Petroleum is also VeriFone's customer for Transaction Automation systems. Northern Telecom and Integrated Network Corp. are network equipment suppliers to BellSouth, which uses their equipment to provide service to JCPenney Business Services.

With FASTCONNECT the average credit authorization response time at the six CITGO retail locations was reduced to eight seconds from card swipe to the printing of the receipt. The improved performance offers a critical advantage to retail businesses sensitive to customer lines at the cash register. Customers spend less time in line and merchants serve more customers.

Over the past five years, the cost of high speed, dedicated private line networks has increased by more than 300 percent, according to JCPenny Business Services Vice President of Marketing Bernard Curran, driving many merchants into dial-up services which are less effective for high-volume, queue-sensitive environments.

The economics and performance of FASTCONNECT are attributable to a proposed new end-to-end virtual private network service made possible through the systems integration of two technologies.

BellSouth is an international telecommunications holding company comprised of two operating telephone companies, Southern Bell and South Central Bell which serve 70 percent of the population in nine southeastern states; BellSouth Services, which performs staff and planning functions for the two operating telephone companies, and BellSouth Enterprises, which manages the corporation's non-regulated activities throughout the United States and worldwide.

HAYWARD, CA (MARCH 19) PR NEWSWIRE - Deborah Salerno, president, Sharon Capital Corporation ("Sharon"), a publicly traded company (OTC), and Robert Lundak, chairman and CEO of Process Engineers, Inc. ("PEI"), today

announced the signing of a nonbinding letter of intent calling for the acquisition of PEI by Sharon in a tax-free exchange of common stock.

Under the proposed transaction, Sharon would acquire all of PEI's shares in exchange for the issuance of Sharon shares that would constitute 80 percent of the total Sharon shares outstanding upon completion of the transaction.

PEI manufactures and custom designs stainless steel and other equipment and systems used in the wine, food and biotechnology industries.

It also serves as a distributor for pumps, valves and other components used in such systems and for winery equipment imported from Europe. In addition, it provides repair and other services related to such equipment and systems. PEI was incorporated as a California corporation in 1966 to carry on a business founded in 1957. Its headquarters and plant are located in Hayward, Calif.

Customers in the wine and food industries are able to purchase from PEI a range of products, from components and simple hydraulic transfer devices to completely integrated process modules and turnkey process plants. For example, PEI has designed and manufactured aseptic pineapple processing systems, a custard plant and a $3.5 million turnkey cheese manufacturing facility. PEI is a distributor for brand name diaphragm valves, sanitary pumps and wine crushers, stemmers, presses and bottle-filling equipment. It is also the goal of PEI's management to develop new products and improve existing systems.

PEI recently designed and developed a "cross flow filtration system" for the wine industry, which eliminates several filtration steps presently used by wine producers.

PEI believes applications for current PEI products exist in the production of genetically engineered amino acids and proteins, antibodies, pharmaceuticals and pollution control devices. PEI intends to develop additional equipment and systems to service the biotech market, such as an advanced bioreactor for increasing biotech product yield.

WINDSOR LOCKS, CT (MARCH 19) PR NEWSWIRE - The Dexter Corporation (NYSE: DEX) has agreed in principle to acquire all of the issued and outstanding shares of Crown Metro Aerospace Coatings, Inc. (CMAC), a majority-held subsidiary of Crown Metro, Inc. of Greenville, S.C. CMAC is an international specialty formulator and manufacturer of polyurethane and epoxy finishes and coatings for the interior and exterior components of commercial and military aircraft in both OEM and maintenance applications. The products are sold to aircraft manufacturers, airlines and contractors. Consummation of the proposed transaction is subject to a number of conditions, including execution of a definitive agreement and completion of certain governmental clearances. The amount of the purchase price was not disclosed.

The CMAC business will be operated by its present management as part of the Dexter Specialty Coatings Division headquartered in Waukegan, Ill.

Commenting on the proposed agreement, K. Grahame Walker, president and CEO of The Dexter Corporation said: "The proposed acquisition of CMAC, expected to close during the second quarter, is consistent with Dexter's strategic plan to expand its position in high-performance specialty coatings serving the aerospace industry."

Richard J. Krause, president of Dexter Specialty Coatings Division, said: "I'm very pleased to have CMAC as part of Dexter because of their reputation as a quality aerospace supplier. In addition to the Greenville S.C., location, CMAC operates a production facility in Temple City, Calif.," Krause also said CMAC serves the European market through Crown Metro Salchi, s.p.a., Treviso, Italy, a joint venture with Salchi, s.p.a., an Italian coatings firm.

Dexter Specialty Coatings Division is well known as a pioneer supplier of high performance coatings to the aerospace and military markets under the trade name Laminar(R) X500. These and other specialty coatings are produced at its dedicated manufacturing facility in Hayward, Calif.

In addition to the aerospace market, Dexter Specialty Coatings supplies

specialty liquid and powder coatings, including products cured by ultraviolet radiation, for the industrial assembly and automotive markets. The division also has operations in Birmingham, Ala., and Tournus, France.

The Dexter Corporation is a Fortune 500 company producing specialty materials. Founded in 1767, Dexter is the oldest company listed on the New York Stock Exchange. Consolidated net sales and earnings for 1989 were $848.8 million and $42.9 million, respectively.

LOWELL, MA (MARCH 19) PR NEWSWIRE - COMFED BANCORP, INC. (AMEX: CFK) announced today that the company is one of the first mortgage lenders in the country able to provide borrowers with Fannie Mae's new, highly publicized mortgage product, "The Two-Step."

Available as of March 12, 1990, COMFED's "Two-Step" is a 30-year mortgage which offers a below market, fixed rate for the first seven years of the mortgage term. Rates vary, but are presently about 1/4 to 1/2 of a percentage point lower than a market 30-year fixed rate. At the end of seven years, the interest rate on a "Two-Step" adjusts to an at-market 30-year fixed rate. The "Two-Step" offers the best of both worlds; the security of a fixed-rate mortgage, and a low starting rate normally associated with an adjustable-rate mortgage.

The COMFED "Two-Step" is perfect for first-time homebuyers who plan to upgrade and sell their home during a seven-year period, for military personnel, for those who change jobs or move frequently, for professionals who anticipate transfers, or for anyone who wants to enjoy a below-market rate on their mortgage for seven years. According to Jack Zoeller, President of COMFED Savings Bank and COMFED Mortgage Company, ''The "Two-Step" mortgage is a very attractive program for all homeowners, including those who wish to refinance their adjustable rate mortgages, and homebuyers as well. The lower rate helps them qualify for more home, and save a substantial amount of money during the first seven years of the mortgage term.''

To make the "Two-Step" even more attractive to potential homebuyers, COMFED has added a "Totally Pointless" option to the program. With a Totally Pointless "Two-Step", borrowers do not have to pay points, legal fees, document preparation fees, credit check charges, or lenders' title insurance fees. According to Raymond LaGace, executive vice president of COMFED Mortgage Company, ''Totally Pointless "Two-Step" leaves new homeowners with more money in their pockets, at a time when a few thousand

more could be crucial.''

COMFED BANCORP, INC. is a $1.4 billion asset holding company headquartered in Lowell, Mass. Through its principal operating divisions: COMFED Savings Bank and COMFED Mortgage Company, the bank engages in residential mortgage lending, loan servicing and retail banking. COMFED Mortgage Company maintains a network of 16 offices in five Northeastern states. COMFED Savings Bank operates 30 retail banking offices in Massachusetts and Connecticut. The bank's loan servicing portfolio currently ranks in the top 20 among thrifts nationwide.

MONTVALE, NJ (MARCH 19) PR NEWSWIRE - The Great Atlantic and Pacific Tea Company, Inc. (NYSE: GAP) today reported record sales and earnings results (unaudited) for fiscal 1989.

For the year ended Feb. 24, 1990, the company said net income rose 15.0 percent to $146,698,000 or $3.84 per share compared to $127,582,000 or $3.34 per share last year, while sales were $11,147,997,000 up 10.7 percent compared to $10,067,776,000 in fiscal 1988.

In the 12-week fourth quarter ended Feb. 24, 1990, net income increased 12.8 percent to $34,509,000 or $.90 per share compared to $30,590,000 or $.80 per share in the same period last year. Sales for the quarter were $2,567,724,000 an increase of 5.5 percent compared to $2,433,417,000 during the same period a year ago.

Excluding the interest on the company's 20 percent investment in Isosceles PLC, net income would have improved 18.3 percent for the fourth quarter and 17.3 percent for the year.

James Wood, chairman, president and chief executive officer said, "1989 was our eight consecutive year of sales and earnings growth and A&P is well-positioned for future progress in the nineties. In 1990, we will embark on the most extensive capital spending plan in the company's history with $295 million budgeted for 43 new stores, 22 store enlargements, and over 140 remodeled stores," he said.

CHICAGO (MARCH 19) PR NEWSWIRE - The appointment of Guy F. Eberhart as national manager of communications for Sears Merchandise Group was announced today by Michael Bozic, chairman and chief executive officer.

He succeeds Philo K. Holland Jr., who has retired after 30 years' service with Sears.

Eberhart's appointment is effective April 1. In his new position, he will be responsible for internal communications, creative services, audio-visual communications and public affairs for Sears Merchandise Group.

He had been national director of public affairs since 1986, and previously served as director of public affairs for Sears Eastern territory from 1977 to 1986.

Eberhart joined Sears in 1960 as a management trainee in Trenton, N.J. He is a 1959 graduate of Temple University with a B.S. in education.

CAMBRIDGE, MA (MARCH 19) PR NEWSWIRE - Index Technology Corporation (NASDAQ: INDX), a leading provider of computer-aided software engineering (CASE) products, today announced a management restructuring under which Dr. Fred L. Luconi will serve as president and chief operating officer and Richard A. Carpenter, founder of Index Technology, will serve as chairman and chief executive officer.

Under the new management structure, all operating managers will report directly to Luconi, who will be responsible for day- to-day company operations. Carpenter, who founded Index Technology in 1983 and had been president and chief executive officer, will guide the company's strategic product and marketing direction.

"Index Technology is an industry pioneer and innovator, leading CASE into broad acceptance as an indispensable technology for business systems development," Carpenter said. "Now, as the company is poised to build on its established record of success, we have built a management team that is capable of carrying the company into new markets and new growth in the future.

The announcement follows by two months the hiring of William A. Seibel as vice president of applications development and Donald E. Wallroth as vice president of product management.

Before accepting the position, Luconi had served the company as a senior

consultant for the past year. He holds a Ph.D. in computer science from Massachusetts Institute of Technology. Prior to joining Index Technology, Luconi was president and chief executive officer of Applied Expert Systems Inc. (APEX), Cambridge, Mass., where he continues as company chairman.

Before founding APEX, Luconi was executive vice president and co-founder, along with Carpenter and Thomas P. Gerrity, of Index Systems, Inc. (now Index Group), Cambridge, Mass., a leading consulting firm that advises management on the use of information technology to support strategic business objectives.

Index Technology's Excelerator Series is the world's most widely used systems analysis and design CASE product, with an installed base of more than 20,000 copies. Index Technology markets its products from its Cambridge, Mass. headquarters, field sales and support offices throughout the U.S. and Canada, subsidiaries in the U.K., France and Australia, and through third-party distributors, providing coverage in approximately 25 countries worldwide.

#90078p0352 03/19/1990 ~PR Newswire

CHICAGO (MARCH 19) PR NEWSWIRE - Santa Fe Pacific Corporation (SFP) (NYSE: SFX) will complete repayment of the bank debt associated with its restructuring tomorrow, almost four years ahead of schedule, it was announced today.

In January 1988, the company's board of directors declared a special dividend of $4.7 billion, comprised of $25 in cash plus $5 principal

amount of senior subordinated debentures per share. In order to pay the $3.9 billion cash portion of the dividend, the company incurred a $3.66 billion of bank debt. The credit agreement called for the debt to be repaid by Feb. 16, 1994.

"We are gratified that we were able to accomplish this accelerated repayment without detracting from our efforts to develop the company's core assets," said Robert D. Krebs, chairman, president and chief executive officer.

"During the last two years we have invested capital of over $1.1 billion to strengthen the company's businesses. We have concluded an aggressive pipeline expansion program, stepped up development of our real estate, increased petroleum reserves to an all- time high, progressed construction of two gold mines, and embarked upon a new strategy for Santa Fe Railway."

SFP's 1988 restructuring was one of the largest recapitalizations in history. In the two years after the special dividend, the company concluded a series of transactions that enable it to expedite repayment of the bank restructuring debt.

SFP generated more than $1.5 billion in proceeds from the sale of assets, including timber holdings, a non-core pipeline, and the Southern Pacific Transportation Company. SFP also sold interests in its refined products pipeline, real estate and energy companies: 56 percent, 19.9 percent and 18.3 percent, respectively. Rather than sell real estate as originally planned, the company retained and financed its portfolio of income-producing properties. Another portion of the restructuring debt was repaid through financing at other subsidiaries.

Overall, the debt of SFP and its subsidiaries now stands at $3 billion, compared with $5.2 billion immediately after the special dividend.

MEMPHIS, TN (MARCH 19) PR NEWSWIRE - Federal Express Corporation (NYSE: FDX) announced today that total revenues for the quarter ended Feb. 28, 1990, increased 35 percent to $1.7 billion from $1.3 billion in last year's third quarter. Operating income declined 28 percent to $61.7 million from $85.6 million.

Pre-tax income was $10.9 million compared with $63.3 million in the third quarter a year ago. In addition to the $23.9 million decrease in operating income, this decline reflects increased non-operating expenses associated with the purchase of Tiger International and other international acquisitions.

Net income decreased to $5.2 million from $24.8 million. Earnings per share were $.10 compared with $.47.

#90078p0380 03/19/1990 ~PR Newswire

MIDDLETOWN, PA (MARCH 19) PR NEWSWIRE - Three Mile Island Unit 1 said today it has resumed generating electricity and is now at the 79 percent power level, generating 700 megawatts of electricity.

Mineral-like deposits in the two steam generators are reducing the production of steam and limiting the plant's ability to reach full power. The deposits do not affect the safe operation of the plant. Nor are they related to the steam generator tube leak that caused Unit 1 to interrupt its return from a refueling/maintenance outage two weeks ago. That return to service was resumed after the plugging of two steam generator tubes, one because it was leaking and another as a precaution.

Similar deposits limited TMI-1's power output in 1985 and 1987 and have occurred at other plants with the same type of steam generators.

TMI-1 engineers will be assessing the situation over the next few weeks to determine what steps might be taken to clear the deposits.

PITTSBURGH (MARCH 19) PR NEWSWIRE - The United Steelworkers of America

(USW) announced today that its tentative agreement with LTV Steel has been approved by a U.S. Bankruptcy Court, clearing the way for a vote on the agreement by USW members at LTV Steel.

The agreement was approved by U.S. Bankruptcy Judge Burton I. Lifland in New York, following a hearing today. Lifland is supervising LTV's reorganization under Chapter 11 of the bankruptcy law.

Following Lifland's approval, ballots are being mailed to 13,700 eligible voting members at 13 LTV Steel facilities. The secret ballots are to be returned by mail and counted on Apr. 2 in Pittsburgh by local union tellers from each LTV Steel location.

The tentative agreement was reached on Feb. 25. It provides for a three-year contract, including restoration of past wage and benefit sacrifices, $1.50 an hour in wage increases, and many other contract improvements. If approved by the USW membership, it will take effect Apr. 15.

The restoration of past sacrifices includes an average of $1.59 per hour in wages, three holidays and one week's vacation.

New wage increases will average $1 per hour on Jan. 1, 1991, and 50 cents per hour on Jan. 1, 1992.

NEW YORK (MARCH 19) PR NEWSWIRE - Banner Industries, Inc. (NYSE: BNR) announced that it was exploring the possible sale, in whole or in part and in one or more transactions, of its Aerospace Distribution Group in addition to, as previosuly announced, the possible sale of its Waste Water Treatment Group. Banner intends to use the proceeds from these sales to reduce its long term debt. The Aeropsace Distribution Group accounts for approximately $250 million of Banner's estimated annualized sales of approximately $850 million.

Banner also said that it intends to subscribe for between approximately $20 and $50 million in additional common equity of Rex-PT Holdings Inc., the parent corporation of Rexnord Corporation, pursuant to a proposed offering to all Rex-PT stockholders recently approved by that company's board of directors. Banner's purchases of additional common equity of Rex-PT may result in the re-consolidation of that company with Banner if the other Rex-PT stockholders do not subscribe for their pro rata share of the offering, which has not yet commenced.

Banner's executive committee has authorized these actions in order to maximize shareholder value. Banner stated that while it hoped to complete these actions within the next six months, it did not know when or if they would occur or on what terms.

Banner is a diversified industrial company engaged in a number of businesses, including aerospace parts, power transmission devices, tooling for plastics, water and waste treatment systems and communications services.

DENVER (MARCH 19) PR NEWSWIRE - Continental Airlines and the City and County of Denver have reached agreement on the construction of a new International Airport, scheduled to open in late 1993.

The historic agreement between Denver and Continental ensures that the first new airport to be constructed in the United States since 1974 will be completed with the commitment of an air carrier.

Cost of the new airport is estimated to be approximately $1.9 billion, excluding land. It will have three concourses and five runways when it opens.

Continental and Denver will work together to use their new airport agreement in the offering and marketing this April of up to $800 million in revenue bonds.

The new airport is also important to surrounding states, guaranteeing a major international transportation center in the Rocky Mountain area, providing a significant resource for the economic growth of the region. It is also the first new airport without a "majority in interest" clause, an unprecedented and pro-competitive arrangement wherein established carriers

do not have veto power over future expansion.

Continental has agreed to relocate all of its services within 30 days of when the new airport is ready, and has agreed to a long-term lease of 20 years at the new airport.

Continental's location at the new airport was chosen with customer convenience in mind. International gates will remain at the center of Concourse A adjoining the terminal. Continental's 30 gates and 15 commuter parking positions will be on the same concourse, with expansion capability.

Additionally, Continental will cooperate fully with Denver's efforts to obtain the maximum amount of federal funding, and will support Denver's current request for $537 million of federal funds for the new airport.

Denver will issue airport revenue bonds to finance the construction of Continental's maintenance facility, flight kitchen, cargo building, terminal finishes, de-icing facility and aircraft support systems.

This summer, Continental will operate 267 daily departures from Stapleton including 105 Continental Express departures.

ST. LOUIS (MARCH 19) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) today conducted its first flight test of an aircraft part made of superplastically formed aluminum-lithium, an alloy that is about 10 percent lighter than conventional aluminum.

McDonnell Douglas is using the air refueling receptacle fairing of an F-15

Eagle fighter aircraft for the tests. The forward half of the fairing, normally composed of three aluminum parts, was replaced with one aluminum-lithium part shaped through superplastic forming.

Flight testing is expected to lead to further use of the alloy in McDonnell Douglas combat aircraft.

Advanced manufacturing facilities used in making aircraft parts from the alloy are in place at the McDonnell Aircraft division here.

The Aluminum Company of Canada (ALCAN) produced the aluminum- lithium alloy being used in the test program. A new press at McDonnell Aircraft Co. designed specifically for superplastic forming was used to shape the alloy into the test fairing. An ALCAN subsidiary, Superform USA of Riverside, Calif., designed the press.

The F-15 used in the test program is leased by McDonnell Douglas from the U.S. Air Force. The aircraft serves as a flying testbed for new materials and technologies.

CALGARY, Alberta (MARCH 19) PR NEWSWIRE - Encor Inc. announced today that all closings related to the property dispositions initiated in May 1989 have been completed. On July 31, 1989, Encor announced that it had reached agreements in principle to sell 21 property packages to 10 purchasers for aggregate sale proceeds of approximately $126 million. The final property closing was completed on Mar. 16, 1990, while the other 20 property sales were concluded in 1989.

Proceeds from these dispositions have enabled Encor to reduce its long-term debt from the June 30, 1989, level of $714 million to a year end balance of $581 million. These repayments significantly enhanced the company's financial flexibility by deferring future scheduled principal repayments. Based on 1989 year end debt balances, Encor's first principle repayment of about $18 million is not due until Dec. 31, 1993.

Encor also announced that effective Mar. 1, 1990, the company assumed operatorship of the Teepee Creek sour gas plant, gas gathering system, associated reserves and 64 sections of land through its purchase of Mobil Oil Canada's 71.3 per cent working interest. The plant is capable of processing 18.4 million cubic feet of gas per day.

AUSTIN, TX (MARCH 19) PR NEWSWIRE - Maintaining its price/performance leadership in the personal computer market, Dell(TM) Computer Corp. (NASDAQ: DELL) today announced a $200 price reduction on all configurations of the Dell System(R) 325, a 25-megahertz, 80386-based personal computer. The new prices are effective immediately.

The price decrease reflects the company's strategy to sell more competitively to the corporate and vertical markets. "We are aggressively pricing the System 325 for major corporations and the governmental and educational markets," said Joel J. Kocher, senior vice president of Dell's sales and support. "This reduction enables us to compete more efficiently in these markets."

Standard configurations for the System 325 include a VGA Monochrome, VGA Color Plus, Super VGA Color Plus or GPD-16C monitors; one, two or four

megabytes of random access memory (RAM), expandable to 16 megabytes; 40, 80, 100, 150, 330 or 650 megabyte hard disk drives; and 5.25-inch 1.2 megabyte or 3.5-inch 1.44 megabyte floppy disk drives.

Prices for the System 325 range from $3999 for a 40 megabyte hard disk drive, one megabyte of RAM, a VGA Monochrome monitor, and a 5.25-inch or 3.5-inch floppy disk drive to $9499 for a 650 megabyte hard disk drive, four megabytes of RAM, a GPD-16C monitor and a 5.25-inch or 3.5-inch floppy disk drive.

All configurations of the System 325 are backed by Dell's 30-day total satisfaction guarantee, toll-free technical support and a one-year Xerox on-site service contract that is included in the purchase price of the computer. The Xerox service contract can be extended up to four additional years through Dell Computer Corp.

The System 325 has won several awards since its introduction in November 1988. Some of the awards include ranking first in PC Week's Poll of Corporate Satisfaction (2/5/90); PC Magazine's Editor's Choice (2/14/89); PC World's Best Buy (6/89); and Computer of the Year by Germany's Chip Magazine (11/90).

Dell Computer Corp. designs, develops, manufactures, markets, services and supports a complete line of personal computers compatible with industry standards. The company is recognized in independent surveys as having the highest customer satisfaction level in the industry for its line of personal computers.

NOTE: Dell System is a registered trademark and Dell is a trademark of Dell Computer Corporation.

CHICAGO (MARCH 19) PR NEWSWIRE - Kolcraft Enterprises, Inc. of Chicago announced today that it is recalling approximately 79,000 child safety seats bearing the model name "Dial-A-Fit" which were manufactured before Aug. 16, 1989.

Kolcraft notes that this recall covers the "Dial-A-Fit" model manufactured before Aug. 16, 1989. It does not affect the "Dial-A-Fit II" model, which became available in December 1989.

Kolcraft notified the National Highway Traffic Safety Administration that it was recalling these seats after Kolcraft determined that the seats did not comply with the head and knee excursion limits in the federal safety standard for child seats. The non-compliance was identified in a laboratory test. There have been no reports of injuries related to excessive head or knee excursion in the "Dial-A-Fit" model.

Kolcraft is offering "Dial-A-Fit" owners a free replacement shoulder harness and body shield that can be installed easily without any tools. Owners should call Kolcraft toll-free at 800-453-7673 or 800-526-2598, between 8 a.m. and 6 p.m. CST, Monday through Friday, to obtain the free replacement harness. Owners may also write to Kolcraft Enterprises, Inc., 3455 West 31st Place, Chicago, Ill. 60623.

HOUSTON (MARCH 19) PR NEWSWIRE - Trunkline Gas Co., a subsidiary of Panhandle Eastern Corp. (NYSE: PEL), will operate a natural gas pipeline between Grant County, Ind., and Lebanon, Ohio.

Trunkline will own the Indiana portion of the pipeline while the Ohio portion will be jointly owned by Trunkline and ANR Pipeline Co., a subsidiary of The Coastal Corp. The pipeline will connect Panhandle Eastern Pipe Line Co.'s (PEPL) system with facilities of Texas Eastern Transmission Corp., CNG Transmission Corp. and Columbia Gas Transmission Corp.

"Completing this new connection will permit Texas Eastern's expanding Northeastern gas markets direct access to abundant Mid-Continent gas

supplies which are already connected to the PEPL system," said Fred Fowler vice president of marketing. "Completing this link was one of the principle strategic objectives in the acquisition of Texas Eastern last year."

At 8 a.m. CST Tuesday, Trunkline will begin accepting requests for natural gas transportation service on the pipeline for delivery to Lebanon.

Shippers requesting the transportation service can have access to Mid-Continent and Gulf Coast supplies by asking for the Master Receipt Point List on their Panhandle Eastern Pipe Line Co. and Trunkline Gas Co. transportation agreements. Shippers who plan to transport gas from the Mid-Continent and the Gulf Coast will need a Panhandle Eastern Pipe Line Co. transportation contract redelivering to Grant County as well as a Trunkline agreement for redelivery to Lebanon.

Panhandle Eastern Corp. operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

SANTA MONICA, CA (MARCH 19) PR NEWSWIRE - WCI Holdings Corp. (AMEX: WCH) today reported a loss of $31.3 million before minority interest and extraordinary item on sales of $664 million for the fourth quarter ended January 27, 1990 and a loss of $147.8 million on sales of $2.9 billion for its fiscal year ended Jan. 27, 1990. After gains on retirement of indebtedness and minority interest, the company reported net income of $68.2 million for the quarter and a net loss of $15.4 million for the fiscal year. Amounts include the results of Wickes Companies Inc., 80 percent of which was acquired in December 1988 and the balance acquired through merger in April 1989.

WCI Holdings also announced that its board of directors authorized the expenditure of up to $6 million for the repurchase from time to time of its 15-1/2 percent Cumulative Exchangeable Redeemable Preferred Stock. Purchases may be made through open market or privately negotiated transactions. The timing and prices of any repurchases will depend on market conditions and other relevant factors. WCI Holdings also reserves the right to adjust the size of this repurchase program based on then-existing circumstances.

WCI Holdings is jointly owned by Blackstone Capital Partners L.P. and Wasserstein Perella Partners L.P.

#90078u0010 03/19/1990 ~United Press International
FORT MYERS, FL (MARCH 19) UPI - The FBI arrested a fugitive on cocaine charges Sunday and issued a nationwide alert for his brother, as the investigation continued into the firebombing of a Drug Enforcement Administration field office.

Authorities had said earlier that a man indicted on drug charges last week had threatened to blow up the DEA building, but the FBI refused to officially link the suspect to its investigation of the firebomb that destroyed the DEA's 6,000-square-foot building early Saturday.

The DEA building was unoccupied at the time of the bombing and no one was injured.

Officials refused to say where John Lewis Ciganek, 22, was arrested.

Ciganek reportedly was wanted for questioning about the bombing, but FBI spokesman Brian Kensel refused to comment on any such link.

''We're not going to get into those details,'' Kensel said. ''We have not yet identified any suspect in the bombing (and) no warrants have been issued for anyone in connection with the bombing.''

Ciganek was taken to the Lee County jail early Sunday evening, the FBI spokesman said.

A nationwide alert was issued for his brother, Jeffery Matthews, 23, who was named along with Ciganek and two others in an indictment. The other two suspects were already in custody, officials said.

Investigators would not say whether the alleged threat was made by one of the four charged in the Ciganek indictment.

Also Sunday, Kensel said authorities searched a mini-storage warehouse facility ''based on information that we gathered during the investigation.''

He refused to say if anything was found during the search. He identified the facility as Colonial Storage in Fort Myers.

Earlier Sunday, Kensel said authorities were interviewing several people, but ''we don't have any specific suspects. We're interviewing a number of people, talking to anybody who may have information that will help us.''

Discussing the bombing, Kensel said, ''From the best we can tell, it was a pipe bomb that used some kind of liquid accelerant, probably gasoline. The particular components have not been identified. That will require

laboratory analysis.

''There was not a lot of blast damage,'' the FBI spokesman said. ''The bulk of the damage was from fire, which resulted from the explosion. Most of the exterior walls are still standing. The roof is totally gone, but it appears that was damage from the fire rather than the blast.''

An FBI bomb team from Washington searched the site Saturday and Sunday and was expected to resume work Monday morning, Kensel said. ''They have retrieved various items that will be further analyzed,'' he said.

Investigators speculate the firebomb was tossed through a window, Kensel said. He would not say whether they had recovered the pipe portion of the bomb.

Two hours before Saturday's blast, another bomb exploded between two parked cars outside a Fort Myers home. There was no damage and no injuries and no apparent link to any DEA investigation. The FBI said that explosion also was caused by a pipe bomb, but not of the same type.

''Both were pipe bombs, but I doubt if the same kind of accelerant was used, since there was no fire damage (in the earlier explosion),'' Kensel said.

DEA records and files were destroyed in the fire, but agents said that would not compromise their work. ''It is my understanding they do have duplicate records,'' Kensel said.

The attack marked the first time that a DEA office in the United States had been destroyed in such a fashion, said Tom Cash, DEA agent in charge of the agency's Miami district.

Authorities from the FBI, the DEA, the Bureau of Alcohol, Tobacco and Firearms, the U.S. attorney's office in Fort Myers and local and state police were investigating.

#90078u0085 03/19/1990 ~United Press International

NAIROBI, KENYA (MARCH 19) UPI - A giant lizard foiled the escape of a would-be rapist in the Kenyan capital of Nairobi, a newspaper reported.

The man, who was not identified, had taken flight from a hostile mob at the city's Dandora housing estate after he attacked a woman planting vegetables on a plot of land, the Sunday Nation said.

Alerted by the woman's screams, a crowd armed with rocks, sticks and machetes gave chase before the man could rape his victim.

Fleeing the mob, the attacker ducked out of sight down the bank of the narrow Nairobi River and jumped across. But on the other side of the bank he came face to face with a monitor lizard.

Monitor lizards are among the largest reptiles in the world. Resembling south-east Asia's Komodo Dragons, they grow to be 10 feet long. Feeding on carrion and small mammals, they are normally harmless to man, but they look fearsome.

The lizard charged the would-be rapist, freezing him to the spot and enabling his pursuers to catch up with him on the far bank. The mob warned the suspect the lizard was on the verge of attack, the Sunday Nation said.

Deciding between the lesser of two terrors, the suspect recrossed the river and gave himself up to the mob, which beat him and dragged him off to the nearest police station, the newspaper said.

#90078u0105 03/19/1990 ~United Press International

CHICAGO (MARCH 19) UPI - Election officials predicted a light voter turnout in Tuesday's primary to decide the GOP nomination to succeed the nation's longest-serving governor and two hotly contested Democratic congressional races.

Republican Gov. James R. Thompson, who has held office since 1977, decided against seeking a fifth term but could not ensure an uncontested race for his hand-picked successor, Secretary of State Jim Edgar.

Edgar faces off Tuesday against conservative activist Steven Baer, the former executive director of the United Republican Fund, an organization that opposed Thompson over the years on tax questions and certain social issues.

Edgar benefited last month from a visit by Republican National Committee Chairman Lee Atwater, who took the extraordinary step of making an endorsement in a state primary.

''It is somewhat unusual, yes,'' Atwater told reporters at a Feb. 2 joint appearance with Edgar. ''I think Jim Edgar is a good candidate and I think he can win.''

Baer, 30, is counting on a low voter turnout in the GOP primary and strong support from conservative allies such as Phyllis Schlafly of Alton. Schlafly, who heads the right-wing Eagle Forum, was instrumental in defeating the Equal Rights Amendment.

Baer has accused Edgar of rejecting the Republican Party platform by refusing to rule out all tax hikes and taking a pro-choice stand on abortion.

Voter registration is down more than 100,000 since 1986, to 6,003,313, and state elections officials are projecting a turnout of between 25 percent and 27 percent on Tuesday. In Chicago, officials said registration is at its lowest level since 1942, when recordkeeping began.

Also at stake Tuesday are Democratic nominations in two hotly contested congressional races.

In the predominantly black 2nd District, on Chicago's South Side, Rep. Gus Savage, who has been criticized for allegedly trying to force himself on a female Peace Corps worker during a visit to Zaire, faces a strong challenge from Mel Reynolds, a Rhodes scholar, university administrator and a 1988 campaign aide to Jesse Jackson.

Reynolds is making his second bid to unseat Savage, who has scuffled with reporters and repeatedly accused his critics of having strictly racial motives.

In the 9th District, on the city's North Side, Rep. Sid Yates, 80, is being challenged by Alderman Edwin Eisendrath, known to his detractors as the ''boy alderman.''

Eisendrath, 31, has argued that Yates's re-election would mean ''another empty term in Congress'' for his constituents.

#90078u0136 03/19/1990 ~United Press International

NEW YORK (MARCH 19) UPI - Former Philippine first lady Imelda Marcos, forced from her homeland and now pleading poverty, goes on trial this week on charges arising out of the alleged looting of her homeland's treasury.

The strong-willed widow of Ferdinand Marcos, often called the ''steel butterfly,'' has been living a low-profile life in Hawaii since the death of her husband last September. That will end, however, when she shows up in Manhattan federal court Tuesday to face charges of fraud, conspiracy and obstruction of justice. She faces a possible 20-year sentence.

The former first lady is charged with conspiring to hide stolen Philippine government funds in lucrative Manhattan real estate investments.

Marcos will go on trial with Saudi Arabian financier Adnan Khashoggi, who faces charges of obstruction of justice and fraud, in allegedly helping to conceal the Marcos's interest in the real estate. Five other people also

were indicted in the case.

Throughout her ordeal, Marcos, often ridiculed for her extravagant tastes and enormous shoe collection, has maintained a proud demeanor, even charming onlookers at an arraignment at which she was fingerprinted like a common criminal.

Prosecutors say Marcos, with the aid of Khashoggi, siphoned more than $100 million from her country's treasury before fleeing the ''people power'' revolution in 1986 that gave Corazon Aquino the presidency. The indictments covered only a small portion of the billions the Marcoses allegedly stole from their homeland.

Khashoggi, the flashy millionaire and one-time friend of royalty and presidents, is confined to the New York metropolitan area by an ankle bracelet that alerts law enforcement officers if he leaves the region without authorization.

Khashoggi also emerged as a key middleman in the Iran-Contra scandal, which involved U.S. arms sales to Iran and the private airlift to resupply the Nicaraguan Contra rebels at a time when Congress had banned official U.S. aid.

After leaving the Philippines, the Marcoses settled in a comparatively modest ranch-style home in Honolulu.

Her lawyer, John Bartko, said despite her notoriety, Imelda Marcos is no longer a wealthy woman because the Philippine government has effectively frozen Marcos's assets ''anywhere in the world'' and the couple had been living on borrowed funds since coming to the United States.

Marcos's $5 million bail was posted by tobacco heiress Doris Duke. But when Marcos arrived in New York for her arraignment in November 1988, she stayed in an $1,800-a-day suite at the Waldorf Towers. During the trial, she reportedly plans to stay in an apartment provided by friends.

The trial begins after a series of pretrial judicial defeats for the defendants.

On March 13 U.S. District Judge John Keenan cleared his desk of all pretrial motions when he refused to let Khashoggi stand trial on his own.

Keenan rebuffed attempts to either dismiss or weaken the 1988 indictment. Those attempts even included an allegation that the former first lady was kidnapped from the Philippines.

In December, attorneys for Mrs. Marcos and the government met to discuss a possible plea agreement, which she rejected.

The prosecution reportedly has some 50 witnesses lined up, including Rodolfo Arambulo, 56, a bank official who was indicted in the case and pleaded guilty to one count of fraud.

The two defendants appeared in court Friday for a conference on jury selection.

The trial is expected to go into July, with the government case alone taking up to three months.

A civil racketeering also suit was filed last year against Ferdinand and Imelda Marcos to recoup any proceeds the former first couple may have received from the alleged racketeering scheme.

The complaint, filed in federal court in Manhattan, asked that the proceeds be distributed to the victims of their crimes, presumably the people of the Philippines.

#90078u0138 03/19/1990 ~United Press International

(MARCH 19) UPI - Before Loyola Marymount took the court to meet the defending national champions, Coach Paul Westhead told his team to play ''Bombs Away.''

The Lions complied, leaving Michigan shell-shocked and victims of the greatest offensive explosion in the history of the NCAA tournament.

With Jeff Fryer striking for 11 three-pointers - just one of many records Sunday - Loyola Marymount walloped the No. 15 Wolverines 149-115 at Long Beach Arena, in Long Beach, Calif., to advance to their first-ever Sweet Sixteen appearance.

''We instructed our guys at the start to play bombs away,'' Westhead said. ''We told them to let it fly.

''I think you saw our fastbreak system as we see it every day ... The players are free to let it go. Guys like Jeff Fryer love to do it. It's fun, it's not work.''

Indeed, the Lions, 25-5, made child's play of the Big Ten powerhouse. They shattered the tournament record for most points and scored more than any opponent had in 82 years of Michigan basketball.

''They made NBA three-pointers, they made them with people on them, with people not guarding them,'' Wolverines Coach Steve Fisher said. ''They were truly sensational.

''They are very much focused on moving forward in the tournament, as well as any team I've ever seen.''

Loyola, the 11th seed in the West Region, will meet Alabama Friday night in the regional semifinals at Oakland, Calif.

David Benoit scored 20 points and teamed with Robert Horry to trigger a 14-0 run midway through the second half to spark the Crimson Tide.

''The way Loyola is playing right now I don't think even the Lakers could match up with them,'' Arizona's Lute Olson said.

Bo Kimble of the Lions, the No. 1 scorer in the nation, contributed 37 points despite hitting just one three-pointer.

Michigan, which became the 17th straight team since the 1973 UCLA Bruins to fail to repeat its NCAA championship, finished 23-8. The loss was Fisher's first in eight tournament games.

Loyola, playing only its second game since the death of star Hank Gathers, topped the previous tournament record of 127 points set by Westhead's alma mater, St. Joseph's (Pa.), against Utah in 1961. That game went four overtimes.

The previous mark for points against Michigan was 119, accomplished by Utah in 1969.

Demetrius Calip's two foul shots had Michigan within 84-76 with 13:18 left but Loyola - once again fueled by its fullcourt press - reeled off nine unanswered points.

Kimble dunked to start a three-point play - drawing Mike Griffin's fifth foul - and Per Stumer struck for a corner three-pointer following a five-second violation for a 95-76 bulge with 11:55 left.

When Fryer drove for a left-handed hook, the lead was 100-79 with 11 minutes left, and Michigan was never again close.

Fryer's binge of long-range baskets topped the previous record of 10 set by Freddie Banks of Nevada-Las Vegas in 1987 against Indiana. Loyola hit 21 three-pointers in 40 tries, two more tournament marks.

''It's a great feeling,'' said Fryer, who made 15 of 20 field-goal attempts, including 11 of 15 from long range. ''I know I'm going to get my shots through the flow of the offense - it's just a matter of me hitting them.''

Terrell Lowery added 23 points while Stumer had 21 for the nation's top scoring team. Fryer's outburst was a season-high and one shy of his career-mark.

Terry Mills and Rumeal Robinson scored 23 points for Michigan, which finished with a season-high 27 turnovers.

In the second game, Horry, held scoreless to that point, nailed two three-pointers in the 14-0 burst as the No. 19 Crimson Tide, 26-18, advanced to the Sweet Sixteen for the fourth time in six years.

Benoit added 13 rebounds to key a 40-27 advantage under the boards for the winners.

''They are so big,'' he said of the Wildcats. ''Mainly it was desire. When you think about it, size doesn't matter. It's who wants it the most.''

Second-seeded Arizona, which struggled to beat South Florida in the first round, failed in its bid to advance to the Sweet Sixteen for the third straight year and finished 25-7.

The Tide, seventh in the nation in scoring defense, held the Wildcats - averaging almost 80 points a game - to their lowest point total this season.

Jud Buechler, Arizona's leading scorer, was limited to two field goals and six points. Brian Williams, who had a career-high 28 points against South Florida, was blanked.

Freshman Ed Stokes led No. 12 Arizona with 17 points.

EASTERN REGIONAL
At Atlanta

UCLA 71, Kansas 70

Freshman Tracy Murray sank two free throws with nine seconds remaining and UCLA advanced to the regional semifinals for the first time since 1980 with the victory over fifth-ranked Kansas. The Bruins, 22-10, move on to East Rutherford, N.J., for a Thursday matchup against No. 14 Duke. Rick Calloway missed a 15-footer in the final seconds for Kansas with Trevor Wilson draped all over him as the second-seeded Jayhawks finished 30-5 and fell to 0-8 lifetime against UCLA. All four Big Eight representatives were eliminated over the weekend, with Kansas State and Missouri losing Friday and top-ranked Oklahoma dropping a 79-77 decision to North Carolina Saturday.

Duke 76, St. John's 72

Robert Brickey made a tie-breaking layup with 34 seconds remaining and the Blue Devils held St. John's without a field goal for the final 6:33 in advancing to the NCAA East Regional semifinals. The third-seeded Blue Devils, 26-8, rallied from a 68-81 deficit and advance to meet UCLA. Duke has advanced to the final 16 five consecutive seasons and has earned three Final Four berths in the past four years. Brickey tied his season high with 22 points, and Alaa Abdelnaby added 17 points. Boo Harvey, who scored 14 of his 17 points after intermission for the Redmen, missed a 12-foot jumper with 14 seconds remaining and Brickey added two free throws for the final margin. St. John's finished the season, 24-10.

SOUTHEAST REGIONAL
At Richmond, Va.

Syracuse 63, Virginia 61

Derrick Coleman scored 19 points and blocked a shot with 2 seconds left to preserve the Orangemen's victory. No. 6 Syracuse advanced to the region's semifinals where they will face the winner of Sunday's Minnesota-Northern Iowa game. Virginia rallied from a 15-point second half deficit and held the Orangemen to just two field goals over the final 12:53. After Billy Owens missed the front end of a one-and-one with 14 seconds left, senior forward Coleman, the Big East Player of the Year, swatted Bryant Stith's 6-foot jumper and the ball bounced toward midcourt as time expired. Syracuse, 26-6, also received 10 rebounds and 9 assists from Coleman, and Owens had 16 points. The loss marked the end of Virginia Coach Terry Holland's 16-year tenure with the Cavaliers, during which he posted a 326-173 record. Holland will now take over as athletic director at his alma mater, Davidson.

Minnesota 81, Northern Iowa 78

Senior forward Willie Burton scored a career-high 36 points and made five free throws in the final 43 seconds, helping Minnesota return to the final round of sixteen for the second straight year. Burton, who also collected 12 rebounds for the Golden Gophers, shot 13-of-17 from the field. Senior center Jason Reese led the Panthers with 29 points and 10 rebounds, while Troy Mullenburg added 20 points. Northern Iowa turned in a shocking, upset victory Friday over Missouri and finished the season with a 21-9 record. Minnesota, 22-8, advanced to meet sixth-ranked Syracuse in a Southeast region semifinal game Friday in New Orleans.

MIDWEST REGIONAL
At Indianapolis

Texas 73, Purdue 72

Travis Mays made two free throws with seven seconds remaining and Guillermo Myers blocked a last-second shot, giving the Longhorns the upset of No. 10 Purdue. The Longhorns, 23-8, advanced to the Midwest regional semifinals Thursday in Dallas while Purdue finished the year 22-8. Purdue center Stephen Scheffler sank two shots from the line with 1:46 remaining to pull Purdue ahead 72-71. Mays lost the ball out of bounds on the next Texas possession but Tony Jones missed a 3-pointer and Jimmy Oliver fouled Mays for the winning free throws. Jones drove into the lane for Purdue's final shot, but the attempt was batted away by 6-8 Myers. Joey Wright scored 20 points and Lance Blanks added 19 for the Longhorns. Scheffler, the nation's most accurate shooter entering the game, missed 10 of 16 shots from the field, finishing with 18 points - his worst performance since the second game of the season. He finished his career at 68.6 percent, breaking the NCAA career mark of 67.8 percent set by Oregon State's Steve Johnson.

Xavier 74, Georgetown 71

Derek Strong scored 19 points and pulled down 13 rebounds, sparking Xavier (28-4) to an upset of the No. 9 Hoyas. Xavier's Jamal Walker, who scored 15 points, sank two free throws with 23 seconds remaining for the final points. Georgetown's Mark Tillmon missed a 3-point shot and David Edwards missed two free throws in the final eight seconds to seal the victory, as the Hoyas ended their season with a 24-7 mark. Alonzo Mourning finished with 15 points and 10 rebounds for Georgetown while Dikembe Motumbo had collected 9 points and 13 rebounds.

(MARCH 19) UPI - Red Cross officials in Alabama say up to 500 people have been evacuated from Montgomery and Selma because of heavy flooding. As many as 700 people could be forced to abandon their homes before the river crests Monday. In Elba, three-thousand people were evacuated when floodwaters from the Whitewater Creek reached the rooftops of schools and homes.

The Isabella Stewart Gardner Museum in Boston suffered a terrible loss Sunday when thieves posing as police overpowered guards and stole ''hundreds of Million of dollars'' worth of art. Works by Rembrandt, Degas and Manet were among the stolen paintings, drawings and etchings. One art expert speculates a private collector hired the thieves.

A bill guaranteeing the wide availability of abortions in Maryland faces state senators. During the past four days, abortion opponents have been staging a filibuster in an effort to kill the legislation. The Senate president says he's confident a compromise will end the marathon debate Monday.

CAYENNE, FRENCH GUIANA (MARCH 19) UPI - Secretary of State James Baker said the next step in the Middle East peace process must be taken by Israel, whose government collapsed last week because of bitter divisions over a U.S. plan to promote talks with the Palestinians.

''What happens now is a matter for the Israelis to determine. It is an internal matter within Israel,'' Baker told reporters aboard his plane en route to Windhoek, Namibia, for independence ceremonies.

Baker's remarks indicate he is not planning to undertake new efforts to push forward the peace process until Israeli political leaders are able to put together a new government.

The Israeli Knesset, or parliament, voted Thursday to bring down the government of Prime Minister Yitzhak Shamir after the Israeli leader refused to compromise and accept Baker's proposal for a Palestinian delegation to talks with Israel.

''The Israeli Knesset focused on the real issue,'' Baker said. ''The real issue is do we move forward to peace? That question remains there.''

Baker had asked the Israeli government to allow the delegation to include Palestinians expelled from the occupied territories and Arabs from East Jerusalem who have a second residence in the West Bank.

The delegation would meet with Israeli representatives in Cairo to

negotiate on a framework for elections in the territories. The elections would choose Palestinian representatives to negotiate with Israel on a final settlement for the West Bank and Gaza Strip.

Since the collapse of the government, Israeli President Chaim Herzog has been meeting with various political groups to determine which of the largest two parties, Labor or Shamir's Likud, has the best chance of forming a new government.

''We hope an Israeli government will emerge that will enable us to continue to move the peace process forward,'' Baker said. ''I am very hopeful we will see a government emerge in Isreal that will want to take the step (to peace).''

Labor Party leader Shimon Peres, in an interview in Monday editions of the Cairo daily Al Ahram, indicated that he would agree to Baker's proposals if Labor was chosen to form the new government.

Peres was deputy premier and finance minister in the government led by Shamir. His firing by Shamir last Tuesday in a dispute over the peace process triggered the coalition crisis that led to the no-confidence vote in Knesset.

#90078u0171 03/19/1990 ~United Press International
BY UNITED PRESS INTERNATIONAL

(MARCH 19) UPI - Lothar de Maiziere, who guided the East German Christian Democrats to a surprising election victory, is a soft-spoken lawyer and former musician who has been thrust almost against his will into the political limelight.

The 50-year-old de Maiziere, who did not become party chairman until November and is now the top candidate to succeed Hans Modrow as the country's prime minister, was nearly a background figure at rallies organized by the three-party Alliance for Germany during the election campaign.

While West German Chancellor Helmut Kohl appeared at the rallies as the star guest speaker, de Maiziere would blink in embarrassment when the cameras flashed, looking as though he would prefer to be home playing his beloved viola.

''I am a politician by duty rather than by calling,'' he once said.

But de Maiziere's common-sense approach to the problems facing East Germany and his firm commitment toward unification of the two German

states won him high marks with the voters Sunday.

De Maiziere was born March 2, 1940. He is descended from an old-line Huguenot family that fled France to escape religious persecution centuries ago.

In 1956, de Maiziere joined the East German Christian Democratic Union, which for decades had served as a dutiful party ally of the communists in the East German Parliament.

Although a member of the party, de Maiziere took care not to become too engaged in hard-line German politics. After completing musical studies, he played the viola in various orchestras for about 15 years until forced to quit because of health problems.

De Maiziere later qualified as a lawyer after taking correspondence classes at East Berlin's Humboldt University from 1969-75. Since 1982, he has been an executive member of the Berlin Board of Lawyers.

He joined the synod of the Federation of Evangelical Churches in East Germany and was appointed its vice president in 1986. He was widely regarded as a specialist in church affairs for the Christian Democratic Union.

De Maiziere began playing a more forceful role in the party after social unrest rocked East Germany last autumn. When Gerald Goetting, the Christian Democrats' long-serving leader, was forced to resign late last year after allegations of corruption, the party turned to de Maiziere for leadership.

The Christian Democrats began to distance themselves from the discredited communists in mid-December. The party discarded socialism from its concept of values and redefined its position as an independent and self-reliant Christian people's party.

De Maiziere briefly served as a deputy premier in the caretaker coalition of Modrow, but this year the Christian Democrats pulled out of the government.

Although he has shunned the political limelight in the past, the Christian Democrats' election victory Sunday will force de Maiziere to center stage whether he likes it or not.

And the new 400-member East German Parliament is likely to nominate him as prime minister once coalition negotiations on a center-right government are finalized in the coming days.

#90078u0190 03/19/1990 ~United Press International

EAST BERLIN (MARCH 19) UPI - Supporters at the headquarters of the Social Democratic Party shook their heads in disbelief or stared into their champagne glasses as they grasped the magnitude of their defeat in East Germany's first free elections.

Once expected to win by a slight margin, the Social Democrats were the clear losers in Sunday's elections, drawing an estimated 20 percent of the vote to barely outpoll the Party for Democratic Socialism - the renamed communists.

West German television projections showed the conservative Alliance for Germany, a three-party coalition backed by West German Chancellor Helmut Kohl, winning about 50 percent of the vote.

''This was not a conservative victory, but a victory for the (West German) deutsche mark,'' said Dieter Conrath, 53, as he watched the election

returns at the Social Democratic headquarters in the working-class district of Friedrichshain in East Berlin.

Others blamed the party's poor showing on Kohl's support of the Alliance, which is led by the Christian Democratic Union, an East German sister organization to Kohl's own political party.

''The people have not consciously voted for the East German CDU,'' said Ulf Mentzel, 34. ''They have voted for the West German CDU and its leader, Kohl.''

But Mentzel also tried to draw a lesson from East Germany's first political competition, saying the party's message was too broad and thereby alienated voters from the right and left.

''We lost the election because we tried to structure our campaign to appeal to both the left and the right wing of our potential electorate,'' Mentzel said.

''A left-wing campaign would have made less use of West German politicians '' he said. ''A right-wing campaign would have stressed rapid German reunification.''

''We lost left-wing support ... (by emphasizing) the creation of a broad coalition with the conservative parties after the election'' and lost right-wing support by calling for a slower pace to unification, he said.

#90078u0221 03/19/1990 ~United Press International

ADDIS ABABA, ETHIOPIA (MARCH 19) UPI - The first shipment of relief aid this year left the Red Sea port of Assab for famine-stricken territory controlled by the government, the official Ethiopian News agency reported.

But a Western relief official in Addis Ababa warned Sunday that negotiations between the government, church groups and rebels would have to be completed before any food could be sent to rebel-held territory, where about 4.5 million people face possible death by starvation this year.

The agency reported that a chartered Hercules aircraft left Assab on Saturday for the the Eritrean capital of Asmara, a government-held outpost cut off last month by rebels of the Eritrean People's Liberation Front.

A separate convoy of trucks left for Dessie, 250 miles southwest of the port. Rebels in Eritrea, a region that streches between the Ethiopian capital of Addis Ababa and the Red Sea, have been fighting for autonomy from Ethiopia for almost 30 years, but the government is reluctant to lose its only access to the sea.

The bitter fighting has prevented aid from reaching millions of Ethiopians suffering from widespread famine and both sides have accused the other of using starvation as a war tactic.

The famine, which reached a critical stage in the mid-1980s, is expected to flare again this year because harvests last year failed.

Government plans to ship relief aid to the worst areas were halted in early February when rebels captured Massawa, Ethiopia's only other port, 470 miles north of Addis Ababa.

Without Massawa, the government has no direct access to Eritrea or Tigre, another province where rebels are fighting against Ethiopian authority. The Tigre People's Liberation Front has controlled all roads into Tigre since last year and church groups have been negotiating for safe passage of famine relief convoys for several months.

John Wiater, a representative of the U.S.-based Catholic Relief Services, part of the interdenominational Joint Relief Program, said in Addis Ababa it appeared the rebels would give the convoys permission to enter Tigre.

Wiater said in a telephone interview that there were tentative plans to send an experimental convoy north from Dessie, which is controlled by the Ethiopian government. He said he was hopeful the government would give the agency permission to conduct the convoy ''in the next few days.''

The relief organization has only four trucks in Dessie, according to relief officials, but Wiater said the first convoy would be more symbolic than practical.

''A few trucks don't make a relief operation,'' he said. ''But the signs are encouraging.''

EAST BERLIN (MARCH 19) UPI - When historians write the story of the 1990 East German elections, much ink will be devoted to the role played by leading West German politicians.

Sunday's election was the first free and secret balloting held in the country's 40-year history and was preceded by an old-fashioned democratic-style campaign of rallies, speeches and parades.

West German Chancellor Helmut Kohl was one of the most active campaigners, stumping East Germany on behalf of the victorious alliance of three conservative parties. He was shown on television news programs addressing

vast crowds at rallies organized by the alliance.

The cries of ''Helmut, Helmut'' and ''Unity, Unity'' were no doubt sweet music to the ears of the West German chancellor, who wants to unite East and West Germany.

But not all East Germans were pleased by his presence. Baerbel Bohley, one of the founders of the New Forum citizen's movement, accused him and other Bonn politicians early on of ''hijacking the campaign.''

The West German officials at times seemed to swamp the scene. Bonn's foreign minister, Hans-Dietrich Genscher, spoke at 24 East German liberal rallies.

Just in the past week, Willi Brandt, the former West German chancellor and honorary chairman of the Social Democrats, addressed seven meetings.

Hans-Werner Oertel, a political commentator for the East German ADN news agency, said the wealthy West German government channeled $12 million to parties in the East as ''democracy assistance funds.''

West Germany trucked in state-of-the-art computers, data-processing units, satellite dishes and other high-tech paraphernalia to help the fledgling East German parties mount their campaigns and to assist with vote counting.

''This is not our show at all,'' an East German politician said bitterly. ''The West has taken us over. I guess it's a taste of things to come.''

A poll released Sunday indicated that 91 percent of East Germans want to unify with West Germany and only 5 percent opposed the combination of the two countries, which have been separated since the end of World War II.

West Germany's Mannheimer Research Institute, which conducted the poll, reported that 82 percent of the people in West Germany want unification.

Many of East Germany's 12 million eligible voters said Sunday they were delighted with the campaign, reveling in the secret balloting that allowed them to choose candidates from among the 24 parties and alliances contesting the 400 seats in Parliament.

It was nothing short of a revolution in East German electoral procedure, given that in past elections voters could only choose an uncontested candidate of the communist-dominated National Front.

''In past elections, we would go to the ballot box with the electoral list and we would just put it in,'' said Helen Winkler, an East German electoral observer in Leipzig. ''But now the difference is that we take a list and go in the cabin and vote. It is secret.''

''There were cabins before, but nobody went there, because if they did the others were surprised and gave them funny looks,'' she said.

(MARCH 19) UPI - Secretary of State Baker says the United States may propose financial aid to help South African blacks in their effort to participate in free elections in the racially divided nation. While en route to Namibia to take part in its independence ceremonies... Baker cautiously spoke about the developing American role in encouraging negotiations between the black majority led by Nelson Mandela and South African President Frederik de Klerk.

Consultations on forming Israel's next government started Sunday with President Chaim Herzog meeting with delegations from the Likud and Labor parties. An ultra-Orthodox religious party is urging Herzog to select the Likud Party and form another ''national unity government.'' Disagreement about a U-S peace proposal to start Israeli-Palestinian talks led to the collapse of the Labor-Likud coalition Thursday.

An art expert says Sunday's theft at a Boston museum is one of the country's worst in decades. Authorities say thieves posing as police overpowered guards at the Isabella Stewart Gardner Museum and stole ''hundreds of Millions of dollars'' worth of art by such masters as Rembrandt, Manet and Degas. The art expert speculates a private collector hired the thieves.

(MARCH 19) UPI - Treasury Secretary Nicholas Brady denies a report that Presi- dent Bush will accept cuts of up to 11-BILLION dollars from the 1991 defense budget. Brady says the administration will stick by its proposal of a three- BILLION-dollar cut. The presi- dent's acceptance of larger cuts would be a crucial development in the UNfolding debate about how the United States will deal with changes in the East Bloc. -
18-Elizabeth Morgan, who spent 25 months in jail rather than reveal her daughter's wherea- bouts, attended church with seven-year-old Hilary Sunday in Christchurch, New Zealand. The two are resuming their acquaintance after nearly three years apart. They also are waiting for the New Zealand Family Court in Christchurch to determine Hilary's future. Morgan is involved in a custody battle with Hilary's father, Dr. Eric Foretich, whom she says sexually abused their daughter.

The British Academy of Film and Television Arts chose ''Dead Poets Society'' as 1989's best film during Sunday's ceremonies in London. The best actor award went to Daniel Day Lewis for his role in ''My Left Foot.'' And Pauline Collins won best actress honors for her part in

''Shirley Valentine.'' Princess Anne, president of the British Academy, attended the 21st awards ceremony.

#90078u0251 03/19/1990 ~United Press International

PARIS (MARCH 19) UPI - From the wildest stretch body tights in town to richly brocaded evening wear, designer Christian Lacroix's creations for the Paris fall-winter ready-to-wear fashion shows confirmed him as a unique designer.

No matter that his daytime wool suits were a busy melange of different patterns and details, or that the hoods and tights reflect the current fads that have swamped the 10-day shows. Under Lacroix's touch, the designs were truly creative.

''He has such a color sense, and he takes the classical and gives it some pizazz,'' said John Fairchild, publisher of the American garment industry newspaper, Womens Wear Daily. ''Of course, you have to like highly decorative clothes.''

Lacroix's shapes tended toward the A-line trapeze and egg-shaped silhouette. His skirts and coats were short, short, short, shown along with cigarette pants, body tights, long and short jump suits, city shorts and both long and short evening garb.

Store buyers and reporters in the Lacroix salon applauded the body tights covered with artistic doodle designs. Often the tights were worn without skirts, or even a jacket, under lavish fur-trimmed coats.

Lacroix obviously drew ideas from abroad.

Black skirts with bullfighter-style flaming red and pink boleros trimmed with little black tassels were shown to Spanish ''Carmen'' music. Fringe dangled from giant coats and capes and one pony skin capelet was fringed, reflecting American Indian influence.

Luxurious evening coats, skirts and suits were crafted from Oriental and North African style fabrics, printed to look like rich brocade. Coats and jackets were embroidered with Arabesque scroll designs or one giant heart, a Lacroix symbol.

One hooded cape was dotted with rhinestones, worn over either cigarette trousers or tights or knee-high embroidered boots.

Daytime suits looked English in a mixture of plaids, the hats often trimmed with a separate plaid.

Lacroix followed a trend toward sunny, winter colors. A reversible apricot coat had fuchsia lapels and lining, and another teamed moss green and mahogany. Patchwork full-skirted dresses went over patchwork tights.

But the show quieted down to dark eggplant evening pajamas dotted with rhinestones and a black miniskirt with a navy blue satin blouse cheered by

white collar and cuffs.

Long scarves and stoles, often rich with embroidery or fur, trailed from the outfits. Scarf-like hoods softly framed the models' faces.

At the end of the opulent parade, Lacroix came out to smile at the wild applause, but a cast he was wearing to correct a back problem prevented him from taking a bow.

The Saturday night show of Italian designer Romeo Gigli also lit up Paris with opulent evening fabrics. Gigli's king-size theatrical coats with enormous stand-up collars in rich brocades reflected Arab and Chinese influence.

Less vibrant coats, trouser suits and mid-calf narrow dresses came in burgundy, gray and black wool or velveteen.

He ignored skirts. The intricate coats fell over body tights and boots or trousers. Heads were draped in scarves, hoods or snug helmets, some in gold lame and others dotted with sequins.

#90078u0310 03/19/1990 ~United Press International

JERUSALEM (MARCH 19) UPI - President Chaim Herzog began political consultations to decide who has the best chance of forming Israel's next government, and a swing ultra-Orthodox religious party urged him to select the Likud Party.

But the Shas Party decided Sunday against specifically recommending Prime Minister Yitzhak Shamir and urged the formation of another ''national unity government'' in which Likud and its primary rival, Labor, would work together.

Last week, five Shas members of Parliament, or Knesset, brought down Shamir's government when they failed to vote on a no-confidence motion that resulted in a 60-55 defeat for the Likud prime minister.

Herzog will meet with Israel's 15 political parties before giving the chance to form the country's next government to one member of the Knesset, where no faction holds a majority.

In efforts to win support and gauge their chances of leading a coalition, Likud and Labor leaders also met with smaller parties Sunday, especially ultra-Orthodox parties that hold 13 crucial votes.

Herzog's first meetings Sunday were with delegations from Likud and Labor, which recommended that their respective leaders Shamir and Shimon Peres be

given the mandate alone to forge a coalition. Later in the day, Shas told Herzog he should pick a Likud member, but stressed the importance of moving forward the peace process.

''The peace process is important to us, and I hope that after what happened the Likud will also realize that without a peace process it is difficult to exist,'' said Shas Knesset member Yair Levi. ''We are fearful that the extreme right parties will take over the government (in a narrow coalition) so we said we wanted a national unity government that can, with God's help, advance the peace process.''

Disagreement between Likud and Labor over the peace process, particularly whether to accept a U.S. proposal to start Israeli-Palestinian talks, led to the collapse of the Likud-Labor coalition Tuesday, with Shamir's firing of Peres from the Cabinet, set the stage for the vote of no confidence Thursday.

As part of the coalition breakdown, the other Labor ministers in the Cabinet resigned. With their removal, Shamir holds 10 Cabinet portfolios, including defense and finance, in addition to his role as prime minister in Israel's caretaker government. Senior staff of each ministry will run the day-to-day affairs, but Shamir must sign off on all items that need a minister's approval.

Just one hour before the decisive vote, Shamir rejected a compromise offer suggested by Shas spiritual leader Rabbi Ovadia Yosef to re-establish the Likud-Labor coalition. A primary point of the offer was acceptance of the U.S. proposal.

Sunday, Yosef defended his advice to Shas Knesset members to abstain on the no-confidence motions. His decision prompted party leader, Absorption Minister Yitzhak Peretz, to submit his resignation last week.

But Yosef said he believed a narrow coalition led by Likud with right-wing parties would be ''asking for war on Israel.''

''If there isn't peace, there is war. We want peace in Israel,'' said Yosef, who advises the Shas Party on its political decisions. ''If we have such a government, that is based on the extremists ... It appears that we don't want peace. That's how it will be seen in the whole world.''

While Yosef sounded more conciliatory in regard to the peace process, the party's constituency leans toward the policies of Likud, a factor that apparently pushed the party to recommend Likud to Herzog. But Shas clearly steered away from giving its approval to Shamir.

Another ultra-Orthodox party, Agudat Israel, which voted against the prime minister in the no-confidence vote, also has suggested it would not change

its position unless Shamir was removed as Likud leader.

Shamir faced mounting pressure to step down after the vote, but his Knesset faction decided to stick by the embattled 74-year-old prime minister and recommend him to Herzog.

Under the government negotiation process, the person Herzog picks has 21 days to fulfill his task, and may be given an extension. There also is the possibility of new elections being called.

Shamir received Herzog's mandate after the 1988 elections, when no party received a majority in the Knesset. He went with Labor to form the uneasy coalition more than 45 days after the elections.

BOSTON (MARCH 19) UPI - Objects reported stolen Sunday from the Isabella Stewart Gardner Museum:

-Vermeer, ''The Concert,'' oil on canvas, 72.5 x 64.7 centimeters.

-Rembrandt, ''A Lady and Gentleman in Black,'' oil on canvas, 131.6 x. 109 centimetersm.

-Rembrandt, ''The Storm on the Sea of Galilee,'' oil on canvas, 161.7 x 129.8 centimeters.

-Rembrandt, ''Self-Portrait,'' etching, 1 3/4 x 2 inches.

-Govaert Flinck, ''Landscape with an Obelisk,'' oil on oak panel, 54.5 x 71 centimeters.

-Manet, ''Chez Tortoni,'' oil on canvas, 26 x 34 centimeters.

-Degas, ''La Sortie du Pesage,'' pencil and watercolor on paper, 10 x 16

centimeters.

-Degas, ''Cortege aux Environs de Florence,'' pencil and wash on paper, 16 x 21 centimeters.

-Degas, ''Three Mounted Jockeys,'' black ink with flesh, white, and rose washes, on medium brown paper, 30.5 x 24 centimeters.

-Degas, ''Program for an artisitc soiree,'' charcoal on white paper, 24.1 x 30.9 centimeters.

-Degas, ''Program for an artistic soiree,'' less finished version of the above, charcoal on buff paper, 23.4 x 30 centimeters.

-Chinese bronze beaker or ''Ku,'' Shang Dynasty, 1200-1100 B.C., 10.5 inches in height; 6 1/8 inches in diameter.

(MARCH 19) UPI - When the season began, the Montreal Canadiens were a team with big questions to answer. Despite making it to the Stanley Cup finals, the Canadiens lost depth and experience in the off-season and had to forge a new identity.

But the team that whipped conference rivals Quebec Sunday night 8-3 on the strength of a six-goal barrage in the first period thinks it has found its Stanley Cup touch.

Russ Courtnall keyed the first-period scoring outburst with a pair of goals, and Petr Svoboda had four assists.

''We are coming together at the right time,'' said Courtnall, ''and we are playing better defensively. We have four solid lines and I think I have been shooting the puck a lot better over the last 28 games. I play well with Carbo (Guy Carbonneau) and Mike (McPhee). I am also skating better and I hope I can do what is expected of me.''

Montreal increased its undefeated streak to six games, its longest of the season. The third-place Canadiens stayed a point behind the Buffalo Sabres and moved to within six points of the first-place Boston Bruins in the Adams Division.

''We still have a fight on our hands to finish second in the standings,'' said Carbonneau. ''We need that home-ice advantage if we have to play Buffalo in the first round of the playoffs. We haven't played well on the road but at home we have the best record in the league. I think we can get untracked on that next four-game road trip because we are playing much

better now.''

Montreal certainly impressed Nordiques Coach Michel Bergeron.

''The Canadiens look like a team that wants to move up higher in the standings,'' Bergeron said.

-- AROUND THE NHL --

Elsewhere in the NHL, Pittsburgh and the NY Islanders skated to a 2-2 tie, Philadelphia blasted Los Angeles 7-4, Buffalo edged Winnipeg 4-3 in OT, the NY Rangers beat Vancouver 5-2, Hartford topped Edmonton 3-1 and Washington nipped Minnesota 4-3.

ISLANDERS 2, PENGUINS 2

At Uniondale, N.Y., Brent Sutter and Hubie McDonough scored first-period goals and the Islanders held on for the tie. The Penguins remained two points ahead of the Islanders in third place in the Patrick Division.

FLYERS 7, KINGS 4

At Philadelphia, Ron Sutter scored two goals and the Flyers broke open a 3-3 tie with four third-period goals. The Kings, who clinched a playoff berth Saturday, played without Wayne Gretzky, who suffered a groin injury during Saturday's win in Boston.

SABRES 4, JETS 3

At Buffalo, N.Y., Phil Housley scored his second goal of the game 2:03 into overtime to move Buffalo within five points of the first-place Boston Bruins. The game was the Jets' fourth-straight overtime contest.

RANGERS 5, CANUCKS 2

At New York, the Rangers scored two goals less than five minutes into the game, and got a pair of goals from their checking line. Mike Gartner scored his 40th of the season, the sixth time in his career he has scored at least 40. Gartner now has six goals in the six games he's played with the Rangers.

WHALERS 3, OILERS 1

At Edmonton, Alberta, strong goaltending by Peter Sidorkiewicz and third-period goals by Dean Evason and Jody Hull carried Hartford. Sidorkiewicz blanked Edmonton on seven power plays.

CAPITALS 4, NORTH STARS 3

At Bloomington, Minn., Don Beaupre made 33 saves and Dino Ciccarelli scored a goal and set up two more. Beapure and Ciccarelli were traded from Minnesota in separate deals last year. The victory, coupled with the Islanders' tie, gave the Capitals sole possession of fourth place in the Patrick Divison.

#90078u0401 03/19/1990 ~United Press International

TUCSON, Ariz. (MARCH 19) UPI - Despite a sudden halt to contract talks this weekend, federal mediators overseeing negotiations between striking Greyhound bus drivers and company officials said they would attempt to reopen the sessions soon.

Paul Stuckenschneider, one of two federal mediators assigned to the talks, said he would be contacting both sides soon in an effort to reopen negotiations.

''The issues remaining are serious and they are many,'' he said. ''And it's not unusual at this stage of negotiations for both sides to remain firm in their positions. We're not discouraged that it's over for now.''

But bus company officials said they had no plans to resume talks with union representatives after Greyhound Executive Vice President Anthony Lannie left the bargaining table one hour after Sunday's session had begun.

''It's broken off totally,'' he said ''There is no plan to get back together.''

The session, which included nine hours of discussion Saturday, was the first between management and union officials since 9,300 Greyhound workers walked off the job March 2.

Lannie accused the union of stepping up strike-related violence and refusing to budge on what the company considered excessive wage and benefit demands.

''There is no way to reach an agreement with people who are trying to break down the company through intimidation, violence and terrorism,'' Lannie said.

Union spokesman Jeffrey Nelson in Washington said Lannie's statement was ''the desperate words from desperate man.''

''We clearly condemn violence, and anything we can do to discourage our members we are doing so,'' Nelson said.

Edward Strait, president of the Amalgamated Council of Greyhound Local Unions, disputed Lannie's characterizations of union stonewalling while issuing similar charges.

''During our meetings, company representatives refused to make any compromises - any concessions - from their previous unacceptable proposals '' Strait said.

Late last year, Greyhound offered the union a three-year contract that included a 6.9 percent increase in wages and benefits in the first year. Union members, citing a 22 percent pay cut they took when the company was sold in 1987, rejected the offer.

Greyhound has hired about 1,000 non-union replacement drivers in an attempt to return the strikebound company's operations to a near-normal timetable, angering union members.

''I am now of the opinion that Greyhound management actually believes it can destroy this Union and continue to pay pennies to its employees while top managers pocket six-figure (incomes),'' Strait said.

Police have reported numerous incidents of shots fired at buses, the most serious March 11 in Jacksonville, Fla., where seven passengers were hurt by flying debris when a single bullet hit a Greyhound coach.

Union representatives charged that the company returned to the table over the weekend only to avoid the filing of an unfair labor practice charge by the union.

''The union demonstrated its intent to bargain in good faith by presenting the company with a new proposal,'' Strait said Sunday. ''Our new proposal contained significant reductions in the union's total package cost and addressed some of the company's concerns about work rules and alternative pay procedure.

Strait contended that the union is most concerned about issues other than money, primarily work rules and grievance procedure arbitration.

But Lannie said the union's proposals are too expensive.

''This union is simply trying to get something that they absolutely cannot get, because the company cannot afford to pay it,'' he said.

Greyhound carried 22 million passengers last year, primarily travelers living in smaller communities.

#90078u0403 03/19/1990 ~United Press International

CAYENNE, FRENCH GUIANA (MARCH 19) UPI - Secretary of State James Baker said the United States may propose financial aid to support South African blacks in their effort to participate in free elections on the future of the racially divided nation.

''I think it is important that we do what we can to encourage democracy, non-racial democracy, in South Africa,'' Baker said Sunday aboard his plane en route to Windhoek, Namibia, to participate in independence cermeonies for the former South African-controlled territory. ''That means to begin with, we ought to see some negotiations between the government and the black majority.

Baker, en route to French Guiana, spoke cautiously about the developing U.S. role in encouraging negotiations between the black majority led by Nelson Mandela, leader of the movement for full political rights in South Africa, and Frederik de Klerk, the reformist president of the racially divided nation.

But Baker was clearly responding to the request of black nationalist groups to lend technical support to the African National Congress and other black political organizations as they explore how to fully organize into peaceful political units.

The idea of one-person, one-vote elections in South Africa, home to 5 million whites and some 26 million blacks, is a revolutionary concept for South Africa that will be opposed by many white hard-liners.

As a part of that process, Baker used the example of the U.S. government sending $9 million to Nicaragua on a bipartisan basis to encourage and support a free electoral process. The elections led to the defeat of the pro-Soviet Sandinista government at the ballot box rather than through an armed guerrilla movement supported by the Reagan administration.

Baker indicated the aid idea was a suggestion only in its formative stages. He said he would discuss the issue with Mandela Tuesday in Windhoek.

The secretary of state said he would encourage de Klerk during their meeting Thursday in Cape Town to continue with the process of stripping away apartheid. The system of racial segregation has not only divided South Africa but has damaged the country's relations with the United States and other nations that have ordered economic sanctions in protest.

''We are going to point out that the question is not really one of sanctions or their removal, but rather one of negotiations,'' Baker said.

Mandela, freed after 27 years in prison as part of de Klerk's radical

racial reforms last month, has said the ANC objects to the Baker-de Klerk meeting because it could send the wrong political signal about the United States possibly moving to repeal the sanctions ordered in 1986 to protest apartheid.

Mandela said such a meeting suggests that de Klerk ''has done something positive, something fundamental, which requires the world to review sanctions and other strategies'' to increase pressure on South Africa to dismantle apartheid.

''If the secretary of state wants to see me, of course I will see him. But I will not see him in South Africa,'' Mandela said.

Baker must balance the U.S. view of denouncing apartheid with its efforts to encourage and welcome actions in South Africa to move away from the repressive system.

Baker's meeting with de Klerk will represent the highest level talks between the two countries since 1978, when South African Foreign Minister Roelof ''Pik'' Botha was received by President Jimmy Carter at the White House and warned to surrender control of Namibia or face sanctions.

A U.S. official said Baker will congratulate de Klerk for his ''bold and courageous steps'' to bring blacks into the political system of South Africa, but the secretary does not plan to raise the subject of sanctions.

Under the law, the sanctions can be lifted only if South Africa makes substantial progress toward reform, such as repealing stringent police laws and freeing all political prisoners.

During a stay of little more than two days in Namibia, Baker is to meet with Soviet Foreign Minister Eduard Shevardnadze, Foreign Minister Hans-Dietrich Genscher of West Germany, and President Hosni Mubarak of Egypt.

Baker is to see President Mobutu Sese Seko of Zaire in Kinshasa, and return to Washington Saturday.

(MARCH 19) UPI - Around the world... around the clock... the latest news from U-P-I.

The baseball lockout appears to be just about over. Baseball Commissioner Fay Vincent announced early this morning that major league team owners and players' union representatives have reached an agreement in principle on a new contract. Vincent says the season will open April 9th... and that at

least 158 regular-season games will be scheduled.

Vincent gave some details of the new four-year contract... but did NOT disclose the terms of the arbitration agreement which was a major obstacle to ending the lockout. He says the final language on the issue is being worked out by representatives of the owners and the union.

Thousands of people in the Deep South are taking refuge on ground higher than their homes because of vast flooding. The Alabama River is still rising at Montgomery and Selma. It's expected to crest today. Smaller waterways have submerged the Alabama towns of Elba and Brewton. Florida rivers also are swelling.

The East German leader expected to be the new premiere is the head of the Christian Democratic Union. Lothar de Maiziere says he will meet with the heads of the two other parties in the victorious conservative Alliance for Germany to discuss formation of a new government.

A national study of six major Protestant denominations concludes that many congregations fail to teach members the fundamentals of their faith. More than 11-thousand people in 561 congregations were questioned. Major Baptist, Methodist, Lutheran and Presbyterian denominations were among those studied.

Jailers evacuated 134 prisoners from their cells in Raleigh, North Carolina, during a fire yesterday. The jail is in the Wake County Courthouse. A fire broke out in a fourth-floor courtroom, just one floor below the jail. Officials say NO one was hurt. The cause of the fire has NOT been determined.

#90078u0407 03/19/1990 ~United Press International

NEW YORK (MARCH 19) UPI - While most fans were asleep dreaming of summers past, those that were awake early Monday morning to hear that baseball had returned were planning their next move.

''Good. Great. I'm going to buy my tickets tomorrow,'' said Donny, a security guard at the Helmsley Hotel, where Commissioner Fay Vincent announced around 1 a.m. Monday that the 32-day long spring training lockout was over. ''I love baseball.''

Vincent emerged from a marathon meeting at 1:18 a.m. and said that major league team owners and the players' union agreed in principle to end the lockout and start the 1990 season a week late.

Vincent said the 1990 season will begin on April 9, and that at least 158 regular-season games will be scheduled. The commissioner said

doubleheaders and make-up games could provide a full 162-game season.

''I'm happy they're starting right now,'' said Mike Cohen of Manhattan. ''I'm looking forward to players warming up, hitting in the batting cage, stretching on the field and getting ready to go.''

''I have a very pleasant duty, and it is simply to announce that tonight an agreement in principle has been reached between the Players Association and the Player Relations Committee - the owners assocation - and the labor agreement in baseball will be executed in the very near future,'' Vincent said during a 20-minute news conference that ended baseball's second-longest work stoppage.

As news that an agreement was imminent leaked to the media, fans gathered outside the commissioner's office on Park Avenue in Manhattan to await the news that there would be baseball.

While John Hanson of New Jersey was serenading the press corps on a trumpet with a rendition of ''Take Me Out to the Ballgame,'' Nick Poletis could hardly wait to see some action.

''As long as they play ball, that's all that counts,'' said Poletis. ''They're three weeks behind already.''

Fans have always welcomed back baseball following previous strikes, and early fan reaction indicated that the 1990 strike would not diminish fans' love for the game.

But at least one expressed bitterness.

''(The lockout) was one of the most ridiculous things I've ever heard in my life. Players are thinking of themselves, not the fans,'' one man said.

#90078u0408 03/19/1990 ~United Press International

NEW YORK (MARCH 19) UPI - Major league team owners and the players' union agreed in principle to end the 32-day-old spring training lockout and start the 1990 season a week late, Commissioner Fay Vincent announced early Monday.

Vincent said the 1990 season will begin on April 9, and that at least 158 regular-season games will be scheduled. The commissioner said doubleheaders and make-up games could provide a full 162-game season.

''I have a very pleasant duty, and it is simply to announce that tonight an agreement in principle has been reached between the Players Association and the Player Relations Committee - the owners assocation - and the labor

agreement in baseball will be executed in the very near future,'' Vincent said during a 20-minute news conference.

He said the new four-year agreement includes a minimum salary of $100,000 for major league players, up from the current $68,000; an annual $55 million owners' contribution to players' benefits, and ''arrangements'' relating to how much major league service a player must have before he becomes eligible for salary arbitration.

Jerry Reinsdorf, owner of the Chicago White Sox and a member of the Player Relations Committee, outlined the details of the salary arbitration settlement, which had proved the thorniest issue in the dispute.

He said that players with 2 1/2 years of major league service and who had at least 86 days of service in the year just concluded, would form a pool. Of the players in that group, the 17 percent with the most service would be eligible for arbitration, he said.

Owners had previously said they would not move on their position that a player need three full years of experience before becoming eligible for arbitration. Players had sought a roll back to the pre-1985 agreement, when players needed only two years.

Vincent said the final language on the issue was being worked out by representatives of the owners and the union, the Major League Baseball Players Association.

Asked by a reporter if a lockout had damaged baseball Vincent said, ''I think it was damaged. I believe the recuperative powers of baseball are very strong and I don't believe the damage will be permanent.''

Despite the agreement, the 1990 lockout became the second-longest baseball stoppage of this century. Players struck for 49 days in 1981, creating a split season. Owners locked out players for three weeks in 1976 before Commissioner Bowie Kuhn ordered camps opened and the season began on time.

American League President Dr. Bobby Brown said if the deal is signed Monday, camps will open Tuesday, with the clubs free to play exhibition games on March 26 should they desire.

After a hiatus of eight days, the negotiations at Vincent's Manhattan office intensified over the weekend, with a marathon session Friday night and a five-hour union caucus on Saturday.

Arbitration was the key issue throughout the contract dispute that led the owners to lock their players out of spring training on Feb. 15. The question was whether a player should be eligible for arbitration after two or three years' service in the major leagues.

Owners had conceded that work needs to be done on the so-called ''manipulation'' issue in which clubs have sent players to the minor leagues to control their major legue service time.

The owners' chief negotiator, Chuck O'Connor, had called it a fairness issue, and said clubs should concentrate on keeping the best 24 men on the big league roster.

Houston Astros pitcher Jim Deshaies, the club's player representative, said the union had made a new proposal Sunday on arbitration, but declined to give details.

''It's a better deal (for the owners),'' Deshaies said. ''It's further than a lot of players would like to go, but we want to play baseball. And apparently the owners weren't willing to accept our last proposal, so we made a little bit sweeter offer.

''It's more than a legitimate offer, it's a fair offer,'' Deshaies said. ''It's the best offer they're going to get. I feel pretty good that we've done our best job. Now I think it's in the hands of the owners to realize that.''

The season could not start before April 9. Although many if not most players have been working out independently since the lockout began, both the union and the owners have said the players need at least three weeks of organized training before Opening Day.

#90078u0426 03/19/1990 ~United Press International

ANNAPOLIS, Md. (MARCH 19) UPI - Anti-abortion senators, locked in talks to end a 4-day-old filibuster, held fast to demands that legislation keeping abortions widely available in the state provide more protection for viable fetuses.

State senate leaders seeking to satisfy enough members to end the debate worked Sunday to temper language in the far-reaching bill that has troubled abortion opponents - namely provisions that would allow viable fetuses to be aborted solely because the mother's mental health was in danger.

Senate President Thomas V. ''Mike'' Miller sent senators home at 11:20 p.m. EST Sunday, saying he expected to muster the 32 votes needed to end the filibuster sometime after the session resumed Monday.

Senators have had breaks to sleep each night since the debate began Thursday, prompting one member to dub it a ''limousine filibuster.''

''The only thing worse than a tyranny by the majority is tyranny by the minority,'' said Miller. ''What I'd like to get are the votes without turning up the heat.''

Senate Majority Leader Clarence Blount said both sides were close to resolving their differences, including the mental health provision.

''Nothing has been approved yet, but that is still a major issue,'' said Blount. ''We have a good feeling about it, but a snag can develop on any issue at any time.''

Abortion opponents have waged a campaign to write out of the bill the mental health provision, which they believe is equal to having no restrictions at all.

''It's a choice between more death and less death,'' said Sen. Patrick O'Reilly, a Prince George's County Democrat who opposes abortions.

In addition to mental health question, three other issues have been at the heart of talks over a possible compromise, including parental notification reporting abortions and testing to determine the viability of the fetus.

The bill before the Senate is designed to guarantee that abortions remain widely available in Maryland even if the U.S. Supreme Court eventually overturns its landmark Roe vs. Wade decision, which in 1973 created a constitutional right to abortion.

The measure was introduced after Maryland's attorney general determined that a 1968 state law restricting abortions would become enforceable if the Supreme Court ever overturned Roe vs. Wade.

If passed by the Senate, the bill would still need approval from the House of Delegates and from Gov. William Donald Schaefer, who has not taken a position.

Abortion rights advocates in the Senate who have maintained all along that they could eventually muster enough votes to end the filibuster opened negotiations with anti-abortion legislators Sunday afternoon.

Abortion opponents conceded that because of their numbers - slightly more than a dozen of the 47 senators are viewed as unswerving anti-abortionists - they remain vulnerable to losing the support of senators considered to be swing votes if the filibuster dragged on.

Abortion rights forces needed 32 votes - or two-thirds of the Senate membership - to invoke cloture, end the debate and allow passage of the bill on majority vote.

As drafted, the legislation would allow unrestricted abortions until a fetus is determined to be viable by a doctor. After that, abortions would be allowed when the mental or physical health of the mother or the physical health of the child was in danger.

Senators conducting the filibuster, usually addressing a near-empty chamber, have read aloud from books, constituent letters and legal briefs in their extended attempt to obstruct the bill and preserve the 1968 law.

The 1968 law, which became unenforceable after Roe vs. Wade, allowed abortions only during the first three months of pregnancy and only in cases of rape, incest or where the mother's life was in danger. It also provided that abortions must be performed in accredited hospitals and approved by a medical board.

#90078u0427 03/19/1990 ~United Press International

TOKYO (MARCH 19) UPI - Japan Monday put a satellite into orbit around the moon, joining the United States and the Soviet Union in the accomplishment scientists said.

Japan's first lunar satellite, Muses-A, completed two missions, a swing-by flight designed to boost its speed and enlarge its elliptical Earth orbit, and the placement of a smaller satellite in lunar orbit, said the government's Institute of Space and Astronautical Science.

''Both tests were completely successful, and we deeply thank U.S. and Japanese scientists for their cooperation in the probe,'' said an institute spokesman, who was not be identified.

The institute's chief scientist, Kuninori Uesugi, said the release of the smaller basketball-sized experimental satellite into orbit around the moon required extraordinary accuracy, ''in baseball terms ... comparable to hitting the eyeball of a bug in the outfield from home base.''

The spokesman said the satellite, nicknamed Hiten, or space flyer, conducted its first lunar swing-by after approaching within about 9,100 miles of the moon.

The institute said the satellite will conduct a total of eight swing-bys, four acceleration and four deceleration flights, during its flight, the official said.

Swing-by is a technique to accelerate or decelerate the satellite's orbiting speed around Earth by using the moon's gravity, institute scientists said.

The technique was employed by the U.S. Voyager 2 spacecraft in traveling to Jupiter, Saturn and Neptune.

Hiten, a cylindrical satellite, 33 inches in height and 4.6 feet in diameter and weighing 400 pounds, travels around the Earth at 2,237 mph.

The satellite was put aboard the domestically developed M3S-2 rocket Jan. 24 from the Tanegashima Space Center south of Japan's southernmost main island of Kyushu.

#90078u0431 03/19/1990 ~United Press International

(MARCH 19) UPI - Without Brad Daugherty, Mark Price and Larry Nance, the Cleveland Cavaliers were unable to defeat the expansion Orlando Magic when the two teams met earlier this season.

Sunday night in Orlando that trio teamed for 64 points - 54 from Daugherty and Price - and the Cavaliers cruised to a 120-103 victory over Orlando and kept their playoff hopes alive in the Eastern Conference.

This version of the Cavaliers closely resembled the 1988-89 team that won 57 games and the Central Divsion title before bowing to Chicago in the first round of the playoffs.

While winning their fifth straight and extending Orlando's losing streak to a season-high nine games, the Cavs shot well (53.4 percent) and repeatedly took advantage of the Magic's lack of defense.

''I think we're playing the best basketball that we have played all season right now,'' said Price, who scored 25 points and dished out a game-high nine assists. ''I think our defense is the reason we're playing like a different team. We're finally coming together.''

Two separate stretches spelled conquest for Cleveland.

The first run came in the final 2:55 of the second quarter, with Orlando ahead 49-45. Daugherty and Price ignited a 14-1 run that led to a 59-50 halftime advantage. Cleveland hit 12 of 19 of its shots from the field, for 63 percent, in the period.

But it was a 16-2 run in the third period that ruined any Orlando comeback hopes and eventually led to the Magic's 16 loss in 17 games. In that five-minute stretch, John Williams and Daugherty accounted for eight points apiece as the Cavs' cushion swelled to 85-62 with 3:02 remaining in the quarter.

Orlando, on the strength of rookies' Nick Anderson and Morlon Wiley, mounted a charge to cut the lead to 11 points early in the fourth period. Wiley hit a pair of three-pointers, the last coming with 9:44 left that sliced the lead to 96-85.

But Craig Ehlo countered with a three-pointer and Orlando could get no closer than 12 points the rest of the way.

Daugherty had a game-high 29 points, and Williams finished with 22 for the Cavs.

''We ran into a team that's playing very good basketball right now. They've basically got their club back together after the (Ron) Harper trade, and the (early-season) injuries,'' Orlando Coach Matt Guokas said.

''They seem to be getting into peak form and beat a lot of good teams this past week, including the Lakers and 76ers.''

-- AROUND THE NBA --

Elsewhere in the NBA, Detroit stomped Dallas 114-84, Portland pasted Houston 109-96, Boston downed New Jersey 122-106, Seattle topped Golden State 121-116, Denver nipped Minnesota 103-98, and Charlotte bested the LA Clippers 108-97.

PISTONS 114, MAVERICKS 84

At Auburn Hills, Mich., Bill Laimbeer and James Edwards led seven Detroit players in double figures with 16 points each and the Pistons gained their 11th straight win. The Pistons, who have won 24 of their last 25 games, ran up a 19 point lead in the first half and coasted to the win. Laimbeer also grabbed 13 rebounds and John Salley, Vinnie Johnson and Gerald Henderson finished with 13 Points each. Sam Perkins led the Mavericks with 18, all in the first half.

TRAIL BLAZERS 109, ROCKETS 96

At Portland, Ore., Clyde Drexler scored 21 points and a 16-0 spurt in the third quarter helped Portland extend its winning streak to nine games. Terry Porter added 17 points and 11 assists and Jerome Kersey had 13 points for the Trail Blazers. Akeem Olajuwon had 28 points and 15 rebounds for Houston.

BOSTON 122, NEW JERSEY 106

At Boston, Larry Bird had his seventh triple-double of the season with 29 points, 18 rebounds and 11 assists to pace the Celtics. New Jersey has dropped six in a row overall and 20 straight on the road. Kevin McHale had

25 points and Reggie Lewis added 22 for the Celtics, who moved to within one game of first place in the Atlantic Division. Dennis Hopson led the Nets with 19 points.

SONICS 121, WARRIORS 116

At Oakland, Calif., Dale Ellis scored 30 points off the bench to pace the Warriors. Ellis, playing in his fifth game since missing 27 with broken ribs, made 11 of 16 shots from the field. Derrick McKey had 20 points and 11 rebounds and Sedale Threatt had 20 points for Seattle. Chris Mullin led the Warriors with 28 points and Mitch Richmond had 26.

NUGGETS 103, TIMBERWOLVES 98

At Denver, Michael Adams had 14 of his 21 points in the fourth quarter as the Denver Nuggets held off Minnesota. Tod Murphy tied the game, 98-98, for Minnesota with 72 seconds left but Denver's Danny Schayes made two free throws and Adams added another to seal the win. Alex English led Denver with 29 points and Fat Lever had 22, nine rebounds and six assists. Tony Campbell led Minnesota with 22 points.

HORNETS 108, L.A. CLIPPERS 97

At Los Angeles, Randolph Keys scored 13 fourth quarter points and Charlotte gained only their second road win of the year. The win broke a 13-game road losing streak. Kelly Tripucka led Charlotte with 30 points and Armon Gilliam added 22. Charles Smith led the Clippers with 24 points.

#90078u0472 03/19/1990 ~United Press International

(MARCH 19) UPI - The South began drying out early Monday following a weekend of torrential rains and flooding that sent thousands scrambling for shelter, while a cold front swept into the mid-Atlantic states and wet snow fell in the Midwest.

The National Weather Service said flood waters were receding in parts of the Deep South that were deluged by the heavy rain being blamed for at least 11 deaths. River levels in some areas were nearing their peak.

The Pea River crested in Elba, Ala., Sunday morning but officials said it likely would be several days before most of the 3,000 evacuees would be able to return. Water reached the rooftops of some buildings at the height of the flooding.

Flood waters were still rising Monday along the Alabama River in Montgomery and Selma. At least 500 people have been evacuated from Montgomery, Autauga and Elmore counties, and the river was expected to crest Monday in Montgomery.

The flooding across the southern part of the Alabama was blamed for eight deaths, resulting from two accidents in which motorists bypassed barricades and had their cars swept into flooded creeks.

North Georgia was mopping up from the second flooding rainstorm in a month. The Chattahoochee River crested Saturday at its highest level in 44 years, flooding homes in several parts of the metropolitan Atlanta area, closing roads and forcing the city to dump untreated sewage into the river.

More than 60 families were evacuated from threatened homes. The storm was being blamed for three deaths, all in traffic accidents on rain-slick roads.

Rivers across the Florida Panhandle overran their banks Sunday, forcing residents in several counties to seek shelter on higher ground. Between 800 and 1,000 residents were ordered to evacuate low-lying areas near Caryville because of rising waters along the Choctawhatchee River, officials said.

Residents in 12 neighboring counties were warned to prepare for the same as Georgia and Alabama floodwaters flowed downstream, swelling Florida rivers.

The river in Caryville stood at 14 feet 6 inches late Sunday, or about 2 1/2 feet above flood level, officials said. The river was expected to crest at 23 feet sometime Tuesday.

County commissioners met in special session and voted to declare a local state of emergency and evacuate residents along the rain-swollen waterway, said Richard Morgan, a spokesman for the Florida Division of Emergency Services.

A cold front moving toward the South early Monday spread cloudiness over much of the region and brought the chance of more showers, but not the driving rains that caused the flooding, forecasters said.

Temperatures turned brisk, ranging from 49 in Jacksonville, Fla., to 52 in Knoxville, Tenn., 54 in Charleston, S.C., 56 in Atlanta and 70 in Miami.

The record-setting warmth that spread throughout New England for much of the weekend was gone Monday morning, with temperatures dipping into the 30s under clear skies in most areas.

Scattered showers moved out of the region late Sunday, and some snow was possible Monday night as a low-pressure system developed along the East Coast.

Cloudy skies covered the Middle Atlantic states, where temperatures ranged in the 20s and 30s from New Jersey to Maryland. West Virginia reported scattered light rain and snow.

An approaching cold front threatened to bring snow back to Pennsylvania and Maryland, where temperatures reached record highs last week.

In the Midwest, scattered snow and rain was reported in Illinois, Michigan and Indiana, making roads slick and driving difficult in some areas. Wet

snow fell over Ohio and Kentucky, while skies were clear to partly cloudy over Wisconsin.

Temperatures in the Midwest ranged from 12 in Wausau, Wis., to 28 degrees at Chicago, and 36 at Joplin, Mo.

A cold front was moving southward across Texas early Monday. Cold rushed into the state behind the front, sending the mercury into the 30s and 40s across the Panhandle, the NWS said.

Light rain was falling over parts of southern Oklahoma, and light rain covered much of northern Arkansas. Most of Louisiana was under cloudy skies.

In the West, a weather system heading into western Washington state brought scattered showers and cooler daytime temperatures. High clouds covered northern California but sunny weather was expected later Monday and Tuesday.

PARIS (MARCH 19) UPI - French fashion designer Yves Saint Laurent has been hospitalized because of fatigue and will be unable to attend his ready-to-wear show in Paris this week, his fashion house said Monday.

A statement from Yves Saint Laurent's doctor said the 53-year-old designer ''was suffering from intellectual fatigue and I advised him to abstain from all activities for several weeks in order to insure a period of total rest.''

He was admitted to a hospital Saturday.

The world-renowned designer's latest creations will be presented this Wednesday at the Paris Fall and Winter ready-to-wear shows.

BANGKOK, THAILAND (MARCH 19) UPI - A young woman jumped into a pond filled with crocodiles as hundreds of horrified tourists watched on in what police described Monday as a suicide.

The unidentified woman in her early 20s died of multiple bites after jumping into a pond Sunday at the Samut Prakkan Crocodile Farm, said Lt. Col. Sanya Weechareon, a police inspector at the Paknam Police Station.

Some tourists stopped the woman the first time she climbed the fence

around the pond, but she returned, scaled the fence and jumped in, Sanya said.

Some of the hundreds of crocodiles in the pond swarmed over the woman and bit her repeatedly as hundreds of tourists and farm officials watched in horror, the officer said.

Farm officials wielding long poles tried to save her, but it took more than 30 minutes to pull the woman's body from the crocodiles, Sanya said.

''We believe that she committed suicide,'' Sanya said. ''This is the first incident like this in 40 years.''

Police found no identification on the body and relatives had yet to contact police, Sanya said.

#90078u0481 03/19/1990 ~United Press International

BRASOV, Romania (MARCH 19) UPI - Officials of three independent labor unions said they would meet with provisional President Ion Iliescu Monday to turn over evidence of secret police activities during the bloody revolution that toppled dictator Nicolae Ceausescu.

The unions, representing nearly 300,000 workers, also have planned to call a general strike to protest government delays in turning over assets of old communist unions, a labor spokesman said.

Vasile Gogea, the intellectual leader of the 30,000-strong 15th of November movement in Brasov, a central Romanian industrial city, said funding for the discredited communist groups was due to expire Feb. 28.

The independent movements asked Prime Minister Petre Roman for the old groups' assets, ''but got only promises,'' he said in a weekend interview. ''The time has expired and the three movements will call for a general strike,'' he said, noting drivers already participated in a warning strike Friday.

The other movements are Bonateana, representing some 40,000 workers, and Fratia, a federation of five syndicates with 200,000 members including workers in the oil, aviation and television manufacturing industries, and drivers.

He said union representatives would meet this week to discuss a date for the strike.

On Monday, the unions' representatives were to meet with Iliescu, president of the ruling Council of National Unity, and the general

prosecutor to present evidence about operations of the Securitate secret police during the December revolution that ousted Ceausescu.

About 100 people were killed in Brasov, many of them allegedly by Securitate members.

He said the delegation had presented evidence to the county prosecutor of Securitate activities, ''but it disappeared.''

Although the 15th of November Movement was registered by the courts Jan. 29, it has no funds or headquarters.

''We are without a telephone or even a chair,'' said Gogea, who helps conduct union business from the offices of the weekly newspaper Astra, of which he is deputy editor.

The movement is named after workers' protests that broke out in Brasov Nov. 15, 1987, during which a crowd attacked local Communist Party headquarters and burned portraits of Ceausescu.

It was the largest sign of defiance against his autocratic regime since coal miners went on strike in the late 1970s. It resulted in 61 alleged leaders being sent from Brasov into internal exile. One died after police interrogation.

Another protest leader, Mircea Sevaciuc, has returned from the town of Radanti, and is being touted as the Lech Walesa of the 15th of November Movement.

Like Solidarity in Poland, the movement gathers different social and professional categories. Among its founders are workers, writers and journalists.

Its statute is patterned after the Solidarity founding declaration, and its representatives have had discussions with Solidarity adviser Adam Michnik, plus other union members who traveled to Brasov.

Last week, three movement representatives traveled to Poland for further talks.

MANILA, Philippines (MARCH 19) UPI - President Corazon Aquino Mon rejected calls from lawmakers for the cancellation of exploratory talks next month on the future of key U.S. military bases in the Philippines.

U.S. officials over the weekend raised the possibility Washington would

pull its military installations out of the Philippines within a year if no mutually acceptable arrangement was reached on a renewal of U.S. base rights, which expire in 1991.

Congressmen regarded statements by U.S. Defense Secretary Dick Cheney and Pacific Commander Adm. Huntington Hardisty as threats and urged Aquino to scrap upcoming talks with the United States and instead serve a notice of termination of the bases pact.

''It is essential that we do have these exploratory talks so that the Philippine side can also present its plans and also indicate again the (termination) of the present bases agreement in 1991,'' Aquino said.

''This is also in the matter of the shortfall (in aid levels of $96 million this year) we will be discussing in the exploratory talks (which) will go on and as scheduled either on April 18 or 19,'' Aquino said.

Washington has pledged to provide the Philippines $962 million in aid in the last two years of the treaty covering six facilities, including the huge Clark Air Base and Subic Bay Naval complex.

Any renewal of treaty requires approval by the Senate, where anti-bases sentiment is strong. Aquino has said she is keeping her options open on renewal of the pact.

Cheney said Saturday in Washington it was unlikely the U.S. Congress would approve the significant increase in compensation that the Philippines was requesting in return for renewing the bases treaty. The bases are manned by some 14,500 service personnel.

Hardisty was quoted Sunday by the U.S. military newspaper Stars and Stripes as saying the United States would be ''out of the Philippines in a year'' if no treaty was renegotiated.

Rep. Miguel Romero said Monday the statements by the U.S. officials were meant to evade Washington's failure to meet aid pledges.

''This is why I have been reiterating my position that the government should suspend any exploratory talks unless the U.S. government complies with the terms of the agreement,'' Romero said.

#90078u0490 03/19/1990 ~United Press International

NEW YORK (MARCH 19) UPI - Cardinal John O'Connor said he plans to name a team of as many as four people to manage Covenant House while a search committee seeks a new permanent head for the embattled charity.

Speaking after mass Sunday, O'Connor said the announcement could come within a week.

O'Connor announced on March 9 that he promised the board of directors of Covenant House to help find an acting president for the nation's largest shelter for runaway youths.

Following mass on the sixth anniversary of his appointment to head the archdiocese, O'Connor said ''several competent people'' were needed to assist in the internal investigation and management of the world's largest system of shelters for runaway youths.

''It is not a job for a single person,'' O'Connor said.

Covenant House founder The Rev. Bruce Ritter resigned Feb. 27 amid escalating allegations about his sexual and financial misconduct.

''They had asked that the acting president be a priest,'' O'Connor said. He said he would name a person to head the organization on the condition that payment would come from the diocese and not from Covenant House.

O'Connor also said the team would function full time, and would have no other duties. He did not rule out the possibility that at least one person on the team would be a woman.

O'Connor's initial intervention was an attempt to rescue Covenant House from the troubles it has faced since the allegations surfaced in December.

It also diminished Ritter's influence over the the organization by moving the founder's close associate, James Harnett, from the position of acting president to that of chief operating officer when an interim head is found.

O'Connor, who was in Rome during the past week, said he had directed people from the archdiocese ''skilled in child care'' to meet with the staff and board members of Covenant House ''to find out what they were expecting of the archdiocese.''

O'Connor said ''hours and hours'' of meetings ended at 5 p.m. Friday and he was expecting copies of Covenant House documents, including its by-laws and Ritter's official letter of resignation, by late Sunday afternoon.

''We must learn from the actual documents how the organization is structured,'' he said. He said his study would cover Covenant House operations worldwide.

Covenant House has retained former New York City police commissioner Robert McGuire to run its internal investigation.

#90078u0494 03/19/1990 ~United Press International

TOKYO (MARCH 19) UPI - An anonymous caller to a major Japanese newspaper, saying he was frustrated because he was fired, claimed responsibility Monday for Japan's worst department store fire in nearly two decades.

The fire Sunday raged through the fourth floor of the five-story Nagasakiya Supermarket building in Amagasaki, near Osaka, Japan's second-largest city about 250 miles west of Tokyo. The blaze killeed 15 people and gutted about 10,000 square feet of floor space.

The blaze killed 12 employees and three boys, including two Korean brothers, 14 and 10, police said.

The boys apparently were playing video games on the fifth floor when the fire broke out, police said.

The Asahi Shimbun, one of Japan's biggest newspapers, said it received a call Monday morning from a man who said, ''I set the fire. I didn't think it would turn into such a disaster. I was frustrated because I had been fired.''

''A man also phoned another newspaper before dawn Monday and said, 'I injected kerosene into bedding with a syringe and set the bedding afire with a cigarette lighter,''' the English-language Asahi Evening News said.

Police did not immediately comment on the reports, but previously said they would investigate arson as a possible cause of the blaze.

Fumiaki Iwata, president of Nagasakiya, issued a statement of apology Monday and said, ''We will do our best to prevent a recurrence of such disasters.'' The statement was posted at Nagasakiya stores across the nation, the company said.

''We will investigate all possibilities, including arson,'' a spokesman for the Hyogo Prefectural Police Headquarters said.

The official declined comment on news reports that police suspected arson.

Major dailies, quoting witnesses, said a curtain dangling from the ceiling caught fire and quickly spread through the fourth and fifth floors. A total of 57 fire engines battled the fire for nearly four hours before bringing it under control.

Police said most of the victims were asphyxiated and found at the employees' cafeteria on the fifth floor.

A 12-year-old boy leaped to safety from the fourth floor window, police said. He was taken to a nearby hospital with serious injuries, they said. Five other people were injured in the blaze.

Nagasakiya, based in Tokyo, is one of Japan's medium-sized supermarket chain operators. It operates 129 stores across the country.

It was the worst department store fire since Nov. 29, 1973, when 104 people died in a blaze at the Taiyo Department Store in Kumamoto on Japan's southernmost main island of Kyushu.

The worst department store fire in Japan occurred at the Sennichi Department Store in Osaka on May 13, 1972, killing 118 people.

#90078u0513 03/19/1990 ~United Press International

(MARCH 19) UPI - Baseball fans have reason to rejoice... conservatives win big in East Germany... and the swallows come home to Capistrano today. Those stories and more, next from U-P-I.

Major league baseball commissioner Fay Vincent today announced that team owners and the players' union have agreed in principle to end the 32-day-old spring training lockout.

Under the terms of the tentative pact, the season will get underway April ninth, one week later than scheduled. Vincent says at least 158 regular-season games will be slated, with the possibility that a full 162-game schedule can be staged using double-headers and make-up games.

Vincent says the new four-year pact will lift the minimum salary for major league players to 100-thousand dollars. The plan also calls for owners to contribute 55-Million dollars to players' benefits each year.

Chicago White Sox owner and Player Relations Committee member Jerry Reinsdorf says the salary arbitration portion of the agreement puts players with two-and-one-half years of major league experience, including at least 86 days the previous season, into a pool. Of that group, the most senior 17 percent would qualify for arbitration.

Arbitration was the key issue throughout the contract dispute that led the owners to lock their players out of spring training on February 15th. The question was whether a player should be eligible for arbitration after two or three years' service in the major leagues.

#90078u0534 03/19/1990 ~United Press International

(MARCH 19) UPI - Official election results from yesterday's East German balloting reveal that the conservative three-party Alliance for Germany fell just short of an absolute majority.

The Alliance captured 48-point-15 percent of votes cast, indicating that it is in line to take 180 of the East German Parliament's 400 seats.

The surprise victory came at the expense of the Social Democratic Party. The S-D-P was expected to edge out the Alliance, but managed to collect just 21-pointD-P's poor showing sets it up to get 87 seats.

But a conservative spokesman has NOT ruled out an Alliance-S-D-P coalition government.

The results, which will be confirmed by Friday, indicate solid support for West German Chancellor Helmut Kohl's blueprint for incorporating East Germany into the West German Federal Republic.

Critics of Kohl's plan say it amounts to virtual annexation of the East by the West. Other East Germans question the role played by Bonn in yesterday's vote.

A political commentator for East Germany's state-run news agency says Bonn funneled in 12-Million dollars to parties in the East for so-called ''democracy assistance funds.

The government might rest its case against former national security adviser John Poindexter before the day ends in the Washington courtroom where he is on trial.

Special prosecutor Dan Webb says he probably will finish his case against Poindexter today. Afterward, Poindexter's defense will begin.

Former President Reagan's one-time national security adviser is accused of lying to Congress and obstructing its investigation of the Iran-Contra scandal by destroying documents and withholding information.

Federal Judge Harold Greene complained earlier in Poindexter's trial that the first witness, Oliver North, was wasting valuable time. Green said North was trying to be overly precise in recalling conversations rather than testifying about their general content.

But Green told the jurors Friday the trial is proceeding more quickly than expected.

#90078u0545 03/19/1990 ~United Press International

(MARCH 19) UPI - Japan says it has put a satellite into orbit around the moon.

Japan is the third country with an active lunar satellite... joining the United States and the Soviet Union in the accomplishment.

The Japanese government's Institute of Space and Astronautical Science says a cylindrical satellite 33 inches in height and four and one-half feet in diameter completed two missions. One was a swing-by flight designed to boost its speed and enlarge its elliptical Earth orbit. The other was to place a smaller basketball-sized satellite in lunar orbit.

An institute spokesman said both tests were completely successful. He thanked U-S scientists for their co-operation in the probe.

Art experts call a Boston museum theft among the worst in decades in the United States... and possibly the most lucrative crime ever verified in U-S history.

Police put an estimated price-tag of more than 200-Million dollars on the art stolen from the Isabella Stewart Gardner Museum. But the museum's acting director, Karen Haas, says the exact value is UNcertain because people DON'T buy Rembrandts every day.

Two thieves overpowered guards at the closed museum yesterday. The thieves dressed in security or police uniforms, gained access to the museum by claiming to be Boston police officers investigating a disturbance near the building.

The thieves got away with 12 paintings, drawings and etchings by such masters as Rembrandt and Vermeer.

Five works were stolen from the museum's Dutch room... including a Rembrandt oil painting, ''The Storm on the Sea of Galilee,'' as well as a small self-portrait etching and a double-portrait, ''A Lady and Gentleman in Black,'' by the 17th-century Dutch master.

Also taken was an oil, ''The Concert,'' by Dutch master Jan Vermeer and an oil, ''Landscape with an Obelisk,'' until recently attributed to Rembrandt but now thought to have been done by his student, Govaert Flinck.

#90078u0638 03/19/1990 ~United Press International

CAPE TOWN, SOUTH AFRICA (MARCH 19) UPI - British Foreign Secretary Douglas Hurd arrived Monday for talks with President Frederik de Klerk in the first high-level Western contact with the white government since De Klerk unveiled his reform program six weeks ago.

Hurd was welcomed by Foreign Minister Roelof ''Pik'' Botha at Cape Town's airport, as six more political prisoners received an early release from the Robben Island prison and the Supreme Court unexpectedly acquitted eight anti-apartheid political activists.

Hurd's arrival also coincided with continuing reports of unrest in the country. Police said at least 17 people died Sunday, including 15 blacks in a bloody tribal battle in the strife-torn province of Natal.

British Prime Minister Margaret Thatcher, in a controversial break with the British Commonwealth nations, rewarded De Klerk last month for his reform program by lifting a number of econmic sanctions against Pretoria.

Hurd, who is representing Britain at Namibia's independence celebrations Tuesday in Windhoek, was certain to raise the issue of sanctions during the afternoon talks with De Klerk, the South African Broadcasting Corp. reported.

The meeting begins a week that represents a diplomatic coup for De Klerk, whose reform program unveiled on Feb. 2 included lifting a 30-year ban on the African National Congress and releasing black nationalist leader Nelson Mandela from 27 years imprisonment.

On Thursday, Secretary of State James Baker also will meet De Klerk in Cape Town after the Namibian independence celebrations. That meeting will be the highest level contact between Washington and Pretoria since November 1978.

Mandela objected to the Baker-De Klerk meeting on his return from an overseas tour Saturday, saying it threatened to send a wrong signal to the international community that De Klerk had implemented ''fundamental'' changes to South Africa's apartheid policies.

Prison authorities Monday freed six political prisoners held on Robben Island apparently in a program of staggered releases intended to meet demands that all political prisoners be freed before black leaders accept De Klerk's call for power-sharing negotiations.

All six were due for release in June, prompting activists to play down the significance of the move. The six were serving terms ranging between seven and 12 years for crimes such as terrorism, subversion and sabotage.

Also Monday, the Cape Town Supreme Court unexpectedly acquitted eight of 14 people on trial for ANC-related offenses, including terrorism. The acquittals came after the state announced it would not seek to prove the admissibility of statements the accused made while detained under the Internal Security Act.

Dozens of family members and friends swamped the eight as they left the court in emotional reunions and draped several with flags of the ANC and the South African Communist Party, which also was legalized by De Klerk last month.

The six still on trial include one white, Jennifer Shreiner, the daughter of a prominent academic. Another white, Chris Giffard, was among those acquitted.

#90078u0640 03/19/1990 ~United Press International

AGANA, Guam (MARCH 19) UPI - Gov. Joseph Ada Monday signed into law one of the strictest abortion statutes in the United States or its territories, setting up a potential direct challenge to the Supreme Court's landmark Roe vs. Wade ruling.

The law, banning abortions on the U.S. South Pacific island except when the woman's life is in jeopardy, faces a certain legal challenge in court.

The statute goes into force immediately, but also sets up a referendum on the issue on Nov. 6, when Guam's voters can rescind or affirm the measure.

Guam Attorney General Elizabeth Barrett Anderson has said she believes the law is unconstitutional. She noted that the Supreme Court's so-called Webster decision last July, allowing states to regulate abortion, did not go so far as to overturn the landmark 1973 Roe vs. Wade ruling, which created a constitutional right to abortion.

Some abortion opponents believe the current Supreme Court, however, might eventually overturn the 1973 decision.

Under the Guam measure, those performing an abortion could be charged with a felony, while women obtaining an abortion could be charged with a misdemeanor. The law did not specify possible sentences upon conviction.

The bill signed by Ada passed the Guam Legislature March 9 before a gallery full of anti-abortion advocates, led by Catholic Archbishop Anthony Apuron, head of the archdiocese of Guam and the Northern Marianas. Apuron had warned he would seek excommunication for any Catholic senator who voted against the measure.

About 90 percent of Guam's 150,000 citizens are Catholic. The Catholic Church has been a leading worldwide opponent of abortion.

Sen. Elizabeth Arriola, author of the bill, is a lay leader in the Catholic Church.

Janet Benshoof, a constitutional law expert from the American Civil Liberties Union, arrived Monday in Guam and was expected to announce a legal challenge to the law Tuesday.

Guam is an unincorporated territory administered by the U.S. Interior Department. It became a U.S. territory in July 1950.

Southernmost and largest of the Mariana Islands with 209 square miles, Guam lies 1,500 miles southeast of the Philippines and 3,000 west of Hawaii.

Its people are U.S. citizens, but cannot vote for president. Since 1972, Guam has had one representative in the U.S. House, who can vote in committee but not on the House floor.

CHICAGO (MARCH 19) UPI - Actor Robin Harris was found dead in a hotel room following a theater performance.

The Chicago-born Harris, 36, appeared in the movies ''House Party,'' ''Do the Right Thing,'' ''Harlem Nights'' and ''I'm Gonna Git You Sucka.''

Harris had performed Saturday night at the New Regal Theater on the city's South Side, authorities said. Relatives found him dead in his hotel room Sunday morning. There were no signs of violence.

''He hadn't had any problems that we were aware of,'' said Mike Harris, the victim's brother and manager. ''He hardly ever drank and he didn't do any drugs at all.''

Harris moved to Los Angeles as a child and began his entertainment career in nightclubs and comedy theaters in the Los Angeles area.

Survivors included his wife, Exetta; a son, Antoine; his mother, Mattie, his father, Earl; and a sister.

#90078u0689 03/19/1990 ~United Press International

SEOUL, South Korea (MARCH 19) UPI - A U.S. Air Force F4G fighter-interceptor crashed Monday while taking part in Team Spirit '90 joint U.S.-South Korea military exercise but its two-mem crew ejected safely, U.S. military authorities said.

The aircraft based at Clark Air Base in the Philippines went down near

Chongju, 70 miles southeast of the South Korean capital of Seoul, officials said. An Air Force response team from Osan Air Base went to the scene of the crash.

The Yonhap News Agency said the aircraft exploded after crashing and started a fire. U.S. officials said the fire burned some rice paddies.

Team Spirit '90 went into full swing last Wednesday when U.S. and South Korean marine units staged an landing assault on Pohang Beach 170 miles southeast of Seoul.

About 190,000 troops are involved in the two-week war games who include some 60,000 American soldiers including those brought in from bases outside Korea. Team Spirit has been an annual affair since 1976.

In another accident related to the military exercise, a Korean civilian was killed and two others were hurt Sunday in a collision with a U.S. Army truck.

#90078u0758 03/19/1990 ~United Press International
CAPE CANAVERAL, FL (MARCH 19) UPI - Engineers resolved a potential problem with the shuttle Discovery's nose landing gear and began a two-day practice countdown Monday, keeping the ship on track for blastoff April 12 to carry the Hubble Space Telescope into orbit, officials said.

Discovery's five-member, all-veteran crew flew to the Kennedy Space Center from Houston Sunday to review emergency procedures and to participate in the dress-rehearsal countdown, a traditional milestone in a shuttle's launch processing.

The practice session began on time at 8:30 a.m. Monday and if all goes well, it will conclude at 11 a.m. Tuesday with the simulated ignition and shut down of Discovery's three main engines.

''This is a tremendous milestone for the (Hubble) project,'' said astronaut Steven Hawley, who holds a doctorate in astronomy. ''There

aren't too many wickets left to go through before the telescope is in orbit, hopefully functioning as a state-of-the-art observational facility for many years to come.''

Hawley, commander Loren Shriver, 45, co-pilot Charles Bolden, 43, Bruce McCandless, 52, and Kathryn Sullivan, 38, plan to strap in aboard Discovery Tuesday for the final hours of the mock countdown.

Discovery is scheduled to blast off at 9:21 a.m. April 12 to kick off the year's third shuttle flight, a showcase mission to ferry the $1.5 billion Hubble Space Telescope into orbit. The flight has been delayed seven years by technical problems and the Challenger disaster.

The boxcar-sized telescope, equipped with the most perfect mirror ever made, is the most powerful astronomical instrument ever built to operate above Earth's hazy atmosphere and one expected to revolutionize knowledge about the cosmos.

Discovery was hauled to launch pad 39B Friday despite questions about a 6-inch nut that holds bearings in place around the ship's nose landing gear axle.

The issue came up last week when engineers discovered similar nuts on the shuttles Columbia and Atlantis appeared to be cross-threaded. Technicians assume the same problem exists with Discovery's nose gear.

But the only way to inspect the nut and make repairs, if necessary, would be to remove Discovery from its external tank and lower it to a horizontal position - a complex, time-consuming task that would require a roll back to the Vehicle Assembly Building and delay launch a week or more.

NASA managers decided they had nothing to lose by proceeding in the meantime with roll out and routine preparations for launch, a decision that paid off Saturday, Shriver said, when an analysis of Columbia's axle system showed Discovery was safe to fly.

(MARCH 19) UPI - Panic selling spurred by a strong U.S. dollar swept through the Tokyo Stock Exchange Monday, sending the major index tumbling to its third-largest daily loss, as individual and institutional investors dumped stocks across the board.

The blue-chip Nikkei Average of 225 selected issues, which eased 55.20 points Friday, plunged 1,353.20 points, or 4.15 percent, to 31,263.24 - for its lowest closing level in more than a year.

The broader-based Tokyo Stock Exchange Price Index of all major listed shares fell 92.98 points to 2,326.23, following a loss of 8.43 points Friday.

Trading was light, with an estimated 400 million shares changing hands, compared with 487 million Friday.

Declining issues overwhelmed advances 1,017 to 45, with 58 issues unchanged.

Elsewhere in Asia, prices closed lower in light trading on the Hong Kong Stock Exchange in line with the sharp decline in Tokyo.

The key Hang Seng Index fell 15.07 points to 2871.39. Financials eased 5.88 points, utilities lost 39.33, industrials slipped 13.40 and properties closed down 4.49 points.

Turnover was 919.23 million shares, down from 1.06 billion shares traded Friday.

Stocks closed lower in thin trading on the Singapore Stock Exchange in line with the sharp decline in Tokyo.

The Straits Time Industrial Index fell 8.13 points to 1,562.86. The narrower All Singapore Index slipped 2.35 points to 428.53.

Turnover amounted to 79 million shares.

In Australia, stocks closed higher on the Sydney Sharemarket led by blue chips and resource issues.

The blue-chip All Ordinaries Index rose 14.2 points to 1598.7 and the Gold Index climbed 23.7 points to 1787.2.

Turnover was 112 million shares, up from 92 million shares traded Friday.

Advances outpaced declines 178 to 123, with 250 issues unchanged.

NEW YORK (MARCH 19) UPI - Walter Mack, who as president of Pepsi-Cola made it the nation's second-largest-selling soft drink, died Sunday in his Manhattan home. He was 94.

Mack, who died of heart disease, headed the Pepsi-Cola Company from 1938 to 1951. He built the company into an international soft drink giant after a landmark battle that broke Coca-Cola's exclusive grip on the name "cola."

After leaving Pepsi, which had originally been part of Loft's Inc., a New York candy firm, Mack ran the Nedick's hot dog chain and led several other companies.

Mack also was a Republican fund raiser and ran unsuccessfully for the state Senate in 1932 and worked on Mayor Fiorello LaGuardia's campaigns. He also served as chairman of the New York County Republican Committee.

His wife, Ruth, died in 1986. He is survived by two sons, Walter Jr., a former assistant U.S. attorney, of Manhattan and Anthony, of Los Angeles; two daughters, Alice Ruther Sawyer, of Wilmington, Del., and Florence Ann Kelly of Manhattan, eight grandchildren and a great-granddaughter. A memorial service was planned for Thursday at noon at the Beth-El Chapel at Temple Emanu-El on Fifth Avenue.

#90078u0806 03/19/1990 ~United Press International

NEW YORK (MARCH 19) UPI - NASA experts have found that the $30 billion space station Freedom cannot be built as designed because parts would start to break down before it was completed, a published report said Monday.

The New York Times, citing sources in the National Aeronautics and Space Administration, said the anticipated maintenance problems could force a redesign of the 400-foot-long station, which is to be a key to the U.S. space program late this decade and into the 21st century.

Construction of the Earth-orbiting space base is scheduled to begin in 1995.

NASA engineers are to present a corrective plan in June but so far have only preliminary ideas of how the problems might be fixed, the Times reported.

The setback was uncovered by a team of NASA investigators early this year, the newspaper said.

Construction of the space station is expected to take five years and it would be only 60 percent to 70 percent complete before space-walking astronauts would be forced to turn from assembly to preventive maintenance inspection and repairs, the report said.

The station is designed to serve as an orbiting outpost from which astronauts would conduct a variety of experiments and venture back to the moon and to Mars.

This year's budget for the space station is $1.8 billion and the Bush administration has asked for $2.5 billion for next year.

#90078u0824 03/19/1990 ~United Press International
KHARTOUM, SUDAN (MARCH 19) UPI - Cut off from U.S. economic aid ten days ago, Sudan Monday said it has rejected International Monetary Fund conditions for further assistance. The IMF has asked Sudan to devalue the Sudanese pound, freeze salaries, and increase duties on imported goods in order to receive funds.

"We will not accept these demands," Gen. Omar al Bashir, military ruler of Sudan since June last year, was quoted by the official Sudan News Agency. "We will not bend before the conditions put forward by the International Monetary Fund and foreign donor countries," he said.

He said Arab donors had recently loaned Sudan $100 million. Total Sudanese debt in 1989, including arrears, amounted to about $12 billion. Its arrears to the IMF alone are more than $600 million.

The U.S. cut off military and economic aid to Sudan ten days ago under a Congressional rule which denies aid to governments seizing power and failing to resinstate democratic freedoms within eight months of doing so.

Al Bashir's fundamentalist Islamic government has frequently protested that foreign donors are trying to influence its politics with selective curtailment of aid. Two weeks ago it said it would accept no more refugees from famine and civil war in Ethiopia because the U.N. was not supporting Sudanese refugee efforts.

Sudanese Commerce Minister Farouq al Bushra flew to Libya for barter trade talks Monday and to press ahead with plans for the integration of Sudan and Libya.

Five planned days of talks were expected to lead to an exchange agreement worth $50 million, the official, who asked not to be identified, said. Libyan refined petroleum products worth $25 million and cement worth the same amount would be exchanged for Sudanese livestock and food under the arrangement, the official said.

Two weeks ago the two countries announced plans for political, economic,

and military integration, and abolished border restrictions for each others' citizens.

#90078u0836 03/19/1990 ~United Press International

BOSTON (MARCH 19) UPI - Roy Haynes, a pioneer of modern jazz drumming, is tired of hearing his name and his career talked about in the past tense.

But after 45 productive years in music, he laughs about that irony and its flip side: Some listeners are just discovering him. Some even think he's a newcomer on the scene, a mistake not likely from any serious jazz listener.

While Haynes has influenced several generations of modern drummers, he has toiled in relative obscurity compared to higher profile players of his own post-war generation.

''People always want to dwell on what we did in the past. What are we doing now? What can I still do now? THAT's what is important,'' Haynes says. ''I love to play, I can still play my ass off, and I was Charlie Parker's favorite drummer. These are the things the world should know.''

Haynes, who kept time for Miles Davis, Bird, Sarah Vaughan, Stan Getz, John Coltrane, Eric Dolphy, Thelonious Monk and Gary Burton at different points in his career, has just recorded with guitar whiz Pat Metheny.

''Fearless Conversations,'' due out in May under Metheny's name, is a trio session with Haynes and bass player Dave Holland, With the exception of the jazz chestnut ''Old Friends,'' all of the songs are originals. The session was inspired by some jamming Metheny and Haynes did at Ryles, a Cambridge, Mass., club the guitarist frequents.

''It sounds like a live gig. We just did it.'' Haynes says. ''It is great that Pat wanted to get involved with some of the things we did before. Some people are too busy doing their own thing.''

Haynes's light touch is his hallmark. He is a drummer who celebrates the melodicism in a song with tasteful accents.

In addition to studio work, he has his own quartet. The current band includes pianist David Kikoski, bassist James Genus and either Craig Handy or Ralph Moore on tenor sax.

''In a big band, the drummer has to generate the power. In a little band, you can say more musically. You're in demand, but not as much in the rhythm role,'' Haynes says.

Listen to four of the finest jazz recordings ever made: Volume One of

''The Complete Sarah Vaughan on Mercury,'' Getz's brilliant 1962 ''Focus'' album Verve and, Chick Corea's ''Now He Sings, Now He Sobs'' Pacific Jazz or ''Thelonious Monk: Live at the Five Spot'' Milestone. Haynes is right in the thick of things.

''I think Roy is one of the greatest drummers who ever lived,'' says jazz producer and pianist George Wein. ''I've played with a lot, and listened to a lot. Roy has a touch and creativity that very few can match.''

Born in Boston Mar. 13, 1926, Haynes worked the Boston jazz scene as a teenager with Felix Barbosa, Frankie Newton and Sabby Lewis. In the summer of 1945, a special delivery letter summoned him to New York to join Luis Russell's 17-piece band at the Savoy Ballroom. Haynes was paid $125 a week and stayed two years.

In late 1947, he joined saxophonist Lester Young's quartet for a two-year tour. Haynes roosted at Birdland in 1949 as house drummer, until Max Roach recommended him to Charlie Parker. He played with Bird for a year.

From 1953 to 1958, a period in which drummers Roach, Art Blakey and Philly Jo Jones had their own high-profile bands, Haynes worked almost exclusively with Vaughan.

''I may have had the sensitivity of accompanying a singer, but she made me really get down. There are musicians who can't play slow and keep the interest,'' Haynes says.

''Just hearing her, especially back in that period, she sounded like Charlie Parker or Bud Powell. It was never stiff. We never had to play the same thing. She was always ad libbing. I enjoyed every moment of it.''

Haynes was Coltrane's favorite substitute when Elvin Jones was unavailable. Tony Williams credits him with introducing the triplet feel on drums that Jones developed further.

''Back in the old days, some guys had only one cymbal, and one or two tom-toms. But they could get so much out of it,'' Haynes says. ''I always tried to say as much as I could with as little as I had.

''Most of today's young drummers all sound alike. There is more copying going on now than ever. Some are better musicians, because they have had more of a chance to study, and they are brighter. But I don't know if they really know what to do with all that brightness.''

On a recent trip to Europe, a fan came up to Haynes and told him he was famous. A household word.

''I said I didn't think so. But the fact that people know something about

me, and love me without having been sponsored by a record company promotion makes me feel good. It has all happened naturally,'' Haynes says.

''That is a great reward to me, even if it doesn't sell millions of records. But who knows, there is still some time left.''

#90078u0863 03/19/1990 ~United Press International
ANALYSIS BY STEVE GERSTEL

WASHINGTON (MARCH 19) UPI - The Senate is so consumed with civility and courtesy that real thoughts go unspoken. But Sens. John Danforth, R-Mo., and Warren Rudman, R-N.H., took care of that in one evening.

Danforth told his staid colleagues to ''shut up'' and Rudman said they looked like ''fools.'' Both were correct.

Only days after Nicaragua voted to kick out communist leader Daniel Ortega Sen. Malcolm Wallop, R-Wyo., rushed to the floor with one of the many, often meaningless, resolutions.

This one praised the winner, Violeta Chamorro, the coalition party UNO and the people of Nicaragua, but also found Ortega's post-election statement that the Sandinistas would hold power by ''governing from below'' deplorable and an insult and affront.

That kind of resolution, offered by Republican conservatives, would not do for liberal Democrats. They came back with a substitute resolution that did not mention Ortega's statement and added Costa Rican President Oscar Arias to those to be praised.

The Senate seemed headed for one of those left-right showdowns when Danforth blew.

''I come to the Senate floor and I cannot believe my ears,'' Danforth said. ''The best conceivable outcome has taken place in Nicaragua, and we are keeping the battle alive on the Senate floor.''

Danforth, who was an election observer, said former President Jimmy Carter and Secretary of State James Baker agreed that the best post-voting posture for the United States was to ''cool the rhetoric.''

''Why cannot we do that in the Senate?'' Danforth asked. ''Why cannot we just shut up for a change? Why must we wade in all the time after the victory is won in this partisan confrontation?

''Why do we have to rub it in with Ortega?'' Danforth asked. ''Why now do

we have to reach over and tweak his nose? What does it accomplish for the United States or for anybody else, much less the people of Nicaragua?''

Even more surprising than Danforth's outburst, is that the Senate took his advice. A few hours after he spoke - with almost no one on the floor - the Senate approved a resolution by voice vote praising the Nicaraguan people, urging a spirit of reconciliation and calling for peaceful transition of power.

Rudman's pithy remarks came when the Senate decided to adopt a resolution urging baseball's owners and players to settle their strike.

Explaining why he was voting no, the sometimes trigger-tempered Rudman said, ''Quite frankly, I think we have so many of these irrelevant - with all respect to my colleagues, frivolous resolutions - as if owners and the baseball players really give a damn as to what the U.S. Senate wants to do with the strike.

''Quite frankly, we are wasting everybody's time and we look like fools,'' he said.

The Senate needs more Danforth-Rudman comments, less civility and courtesy.

#90078u0873 03/19/1990 ~United Press International

PROVIDENCE, RI (MARCH 19) UPI - Trudy Coxe, the most visible environmental advocate in Rhode Island for several years, said Monday she will run as a Republican candidate for the 2nd District seat being vacated by Rep. Claudine Schneider.

''I want to convey to all that the speculation is over,'' Coxe said in a phone interview from her Cranston home. ''I'm a little behind schedule compared to everyone else so it seems to me it is time to get out there and get going.''

Coxe, 41, worked her last day as director of the environmental group Save the Bay on March 12. In 15 years with the organization, 11 as its director she became the leading environmental advocate in the state, building her reputation through efforts to curb pollution of Narragansett Bay and save property around it from development.

Her run for Congress had become somewhat of a forgone conclusion. Recently Gov. Edward D. DiPrete said he was pushing for Coxe as a candidate, and other prominent Republicans followed suit.

Schneider, a five-term Republican congresswoman, is seeking the seat held for three decades by Sen. Claiborne Pell, chairman of the Senate Foreign

Relations Committee.

Coxe will face a primary challenge from David Gingerella, a businessman and politician who announced his candidacy several weeks ago.

#90078u0909 03/19/1990 ~United Press International

BY JAN A. ZVERINA

DETROIT (MARCH 19) UPI - Toyota is ushering in the 1991-model year early with a completely restyled MR2 that replaces the first generation of the mid-engined, two-seat sports coupe that bowed in 1985.

The 1991 MR2, to go on sale this spring and compete with more expensive cars like Mazda's RX-7 and Porsche's 944, is graced with a smooth, rounded body that bears no resemblance whatsoever to the crisp, angular look of its predecessor.

Styling cues include a gaping goldfish mouth grille, and large cooling gills just aft of both doors. Its concave-shaped rear window blends into the rear roof pillars, just like the timeless design of Jaguar's XJS coupe.

The 1991 MR2 is larger in nearly every dimension than its predecessor, last labeled as a 1989 model. Its wheelbase is by 3.2 inches longer, to 94.5. Overall length is up by 8.7 inches to 164.2, and it is 1.3 inches wider, at 66.9.

Toyota's newest sportster also weighs about 250 pounds more than the last MR2, with a curb weight that starts at 2,599 pounds. But engine power is between 13 and 38 percent greater, depending on the model.

The MR2 is offered in two flavors for 1991 - potent and very potent.

The base model is powered by a 16-valve, 2.2 liter four-cylinder engine that generates 130 hp at 5,400 rpm and delivers between 22 and 29 mpg.

Replacing last year's 145-hp supercharged MR2 is a turbocharged version that delivers 200 hp at 6,000 rpm via a 16-valve 2.0 liter engine. EPA ratings are 20 city-27 mpg highway, and it is offered with a 5-speed manual only.

The base model starts at $14,898 when equipped with a 5-speed manual gearbox, up from $13,798. A 4-speed automatic adds $750. The turbocharged MR2 begins at $18,228, up from $17,628.

But expect to pay about $23,500 for a fully loaded version that includes

anti-lock disc brakes, a T-bar roof with removeable glass panels, and a compact disc player.

The normally aspirated MR2, predicted to account for 70 percent of total sales, cost $16,708 as tested, including a $265 destination fee. Major options included air conditioning ($825), AM-FM stereo with cassette ($250), cruise control and intermittent wipers ($245) and rear spoiler ($225).

Gone is the sharp-edged, aggressive appearance found in earlier MR2s, replaced by a roomier cabin and a smooth, integrated design that has become a hallmark of most Japanese cars.

Its instrument panel houses a large tachometer and speedmeter edged by smaller gauges for the temperature, battery and fuel. But the rim of its air-bagged steering wheel partially obstructs the driver's view of those gauges when in its lowest position.

The seats have a variety of adjustments that help accommodate even the tallest drivers. But like earlier models, drivers will still find the familiar rearward blind spots when changing lanes.

Another shortcoming is cargo space, although one can expect little else in a mid-engined car this size.

Its 5.5 cubic-foot trunk just behind its transverse-mounted motor is slightly larger than before, and a few odds and ends can be stowed with the spare tire up front. There are also two small compartments just behind the seats to store valuables.

In short, the MR2 has a fun-to-drive quotient that is very high, given the stratospheric prices of other sports cars possessing more exotic heritages.

Its non-turbo 2.2 liter engine, which gives the stereo some competition because of its high revving nature and placement directly behind the cabin has a wide and nearly endless power range. In fact no downshifting from fifth is required when a quick dose of power is needed.

The MR2 steers as if it were on rails, and its four wheel disc brakes scrub off speed without fanfare. Its ride also has none of the midship jiggle felt in other mid-engined cars, like the ill-fated Pontiac Fiero.

The MR2's pistol-grip shifter was also found to be smooth and precise, although not as slick as the ones in the Eclipse/Talon/Laser coupes jointly built by Chrysler and Mitsubishi.

Those brave enough to do their own maintenance will find changing the drive belts tough. The oil filter can be reached from above, but it is

right next to the hot exhaust manifold. Access to the battery is also tough, since it is hidden under the spare tire up front.

Toyota expects to sell only 15,000 of its new MR2s a year, which is about half the number that the previous MR2 sold in its first year on the market.

But Toyota is playing it safe, after watching the Fiero sell 125,000 copies in 1984, only to burn out after a five-year model run.

It also knows that small two-seaters make easy prey for insurance companies that charge high premiums, and that the sports car market has been sliced into slivvers by some very competent new models.

(For each car written about in his weekly Roadtalk column, UPI Auto Writer Jan Zverina test drives the vehicle for one week, driving it between 250 and 500 miles on both city and rural roads.)

#90078u0913 03/19/1990 ~United Press International

(MARCH 19) UPI - It looks as if the boys of summer will perform their feats this year. Major league baseball commissioner Fay Vincent announced today that team owners and the players' union have agreed in principle to end the the 32-day-old lockout. Vincent says the season will start April ninth.

Official election results from yesterday's East German vote indicate that the communists have been officially swept from power. The communists newly named Party of Democratic Socialism received only 16 percent of the vote, giving them 65 parliamentary seats.

The Soviet parliament is considering a law on secession today, one day after reports of Soviet aircraft buzzing the capital city of freedom-minded Lithuania. The Baltic republic's ruling nationalist party says the low-level swoops are part of a war of nerves.

Election results from yesterday's parliamentary polling in Estonia and Latvia are expected later today. The legislative bodies in the two secession-oriented Baltic republics are expected to lead the fight for independence from Moscow.

The volatile Tokyo Stock Exchange bottomed out once again today, sending the major index to its third-steepest loss ever as individual and institutional investors unloaded stocks. One market analyst says the plunge is worse than Wall Street's ''Black Monday'' in October 1987.

One of Japan's biggest newspapers says it received a call today from a man who claims to have set yesterday's tragic department store fire north of

Osaka. The man says he wa frustrated because he had been fired.

Japanese police say they'll investigate every possible cause of yesterday's fire. The blaze in the five-story building killed 15 people and injured six others.

#90078u0917 03/19/1990 ~United Press International

CHICAGO (MARCH 19) UPI - The Sara Lee Corp., famous for its frozen cheesecakes and pound cakes, is considering closing one of its oldest bakeries, a published report said Sunday.

High labor costs and the Deerfield plant's valuable north suburban property were considered the main factors for the move, which could displace 550 employees, Crain's Chicago Business said.

"We know it's a valuable parcel," a company spokeswoman told Crain's. Real estate experts estimate the 26-year-old facility sitting on a 50-acre parcel could be worth as much as $750,000 an acre, or $37.5 million, the report said.

The spokeswoman said Sara Lee has not yet made a decision to close the plant, but corporate officials told financial analysts that a move from Deerfield to a more modern plant was under consideration.

Crain's said production cutbacks, temporary layoffs, slowing sales and earnings over past months have all pointed to a possible closing. During the past year, the bakery has suffered under consumer preference for healthier foods, and competition from other companies such as Kraft General Foods' Entenmann's unit, which now offers a line of fat-free patries, Crain's said.

One industry analyst told Crain's he expects a closing before the end of Sara Lee's fiscal year, June 30. John Bryan Jr., chairman and chief executive officer, told a meeting of analysts in November the firm was considering a consolidation of bakery manufacturing at other company facilities, analysts who attended the meeting said.

The Deerfield facility employs almost 1,000 workers, including 450 union members and 100 non-union members at the plant and another 400 at the bakery's adjoining corporate headquarters.

The flagship bakery is the site where the company launched commercial production of the late Charles Lubin's famous frozen cheesecakes and poundcakes, named after his daughter, Sara Lee.

#90078u0937 03/19/1990 ~United Press International
CINCINNATI (MARCH 19) UPI - An Ohio Poll released Monday finds most Ohio voters either don't know or don't care where the major political parties stand on the issue of abortion.

Twenty-six percent of voters surveyed said the Democrats stand for abortion rights, but another 60 percent said they did not know the party's position on the issue.

Thirty percent said Republicans are anti-abortion, but 55 percent said they do not identify the GOP with an abortion position.

The national and the state Republican parties have both adopted positions opposing abortion.

Democratic gubernatorial candidate Anthony Celebrezze last December switched his abortion position to pro-choice. His opponent, former Cleveland Mayor George Voinovich, slightly modified his position to one that would allow abortions only in cases of rape, incest or to save the life of the mother.

In addition, 37 percent said the position a candidate takes on abortion has no effect on how they vote.

Only one in 10 respondents said abortion was the most important political issue to them. Fifty-six percent rated abortion as important along with many other political issues.

''Most voters don't know and many don't care where the parties stand on abortion,'' said Al Tuchfarber, director of the University of Cincinnati's Institute for Policy Research. The institute conducts the poll for The Dayton Daily News, The Cincinnati Post and WKRC-TV in Cincinnati.

The Ohio Poll involved a random sample of 544 registered voters. It was conducted from Feb. 2 through 12. The margin for error is 4 percentage points.

#90078u0960 03/19/1990 ~United Press International

CHARLESTON, WV (MARCH 19) UPI - Teachers began returning to their classes Monday for the first time in 11 days after West Virginia's first teachers strike but resentment lingered over the state's handling of the walkout.

Education officials reported no problems as school resumed and Department of Education spokeswoman Carolyn Spangler said Monday would be the last time a daily tally of counties would be taken to determine which schools were open.

West Virginia Education Association spokeswoman Jackie Goodwin said her group had received no reports of problems and teachers in only one county - Wayne - had yet to vote on whether to return. Wayne educators were voting Monday morning and it was expected they would return to work later in the day.

Some teachers, however, apparently are upset with Superintendent of Schools Hank Marockie. In Monongalia County, teachers voted unanimously to call for Marockie to step down.

The educators are upset over Marockie's contingency plans for keeping strikebound schools during the strike, which included using volunteers and allowing counties to hire anyone with a bachelor's degree to teach.

The West Virginia Federation of Teachers and the larger West Virginia Education Association announced the settlement Saturday, ending a strike that flared March 7 when the WVEA accused Gov. Gaston Caperton of backing out of a pledge to deliver a 5 percent pay raise.

WVFT Executive Director Bob Brown said he heard from teachers in 20 counties Sunday night, and without exception, the strikers voted to return to the classrooms. Brown said ''there's no question'' the brief strike served a useful purpose.

''I don't think, ever again, that any politicians will take teachers for granted, or not take seriously our resolve and commitment to improve education,'' Brown said.

Attorney General Roger Tomkins declared the strike illegal, and Caperton suggested last week he would seek replacements if teachers prolonged it. The walkout paralyzed schools in 46 counties for more than a week and prompted a complete closing by the state schools superintendent last Thursday and Friday as an official cooling-off period.

Teachers in several counties had been warned that they faced dismissal by staying off the job. The walkout had been settled before Saturday on the local level in some counties, including Jackson and Greenbrier.

An agreement calls for House Speaker Chuck Chambers and Senate President Keith Burdette to start work immediately with education leaders on a longterm plan to enhance teacher pay and benefits.

Chambers and Burdette said they would recommend a special legislative session once the package was complete.

The WVEA, which represents 16,000 teachers, led the walkout after accusing Caperton of reneging on a plan to provide $35 million for a 5 percent pay raise and an extra $6.5 million for health insurance.

Education Department figures showed 14,746 public school teachers had honored picket lines at some point during the strike. Some 238,000 of the state's 340,000 students were not reporting to school.

ANN ARBOR, MI (MARCH 19) UPI - Vigorous exercise may protect laboratory rats against a type of cell damage linked to cancer and heart disease, a study released Monday indicated.

A University of Michigan study found rats that ran as much as 9 miles a day seemed to be more resistant to injections of cell-damaging chemicals than inactive ''cage potatoes,'' the rodent equivalent of human ''couch potatoes.''

Robert Beyer, the biology professor who directed the study, emphasized his findings were preliminary, but said they may help explain the biochemical puzzle linking exercise with the reduction of heart disease and cancer.

Beyer's results were reported at a meeting in Rome in January and will be published in the scientific journal Free Radical Biology and Medicine.

In his study, the Michigan researcher looked at two groups of rats. One group was trained over four months to run 7 to 9 miles a day, the human equivalent of 15 to 20 miles. The second group was inactive.

''We induced them to run using food as a reward. The more they ran, they more they got to eat,'' Beyer said. In contrast, the non-exercisers would

''eat, drink and get fat. That's it.''

Both groups were then injected with two cancer-causing chemicals. Tissue samples from the heart, liver and muscles of all the rats were then analyzed.

Beyer found tissue from endurance-trained rats had 1.7 to 2 times as much of a molecule called coenzyme Q, which is involved in the biochemical process that turns food into energy.

The researcher said he believes coenzyme Q protected the tissue of the endurance-trained rats from pre-cancerous cell damage. His theory is that coenzyme Q helps the body resist damage caused by free radicals, which are metabolic by-products thought to promote cancer by damaging genetic material, proteins and cell membranes.

Beyer also found higher levels of malondialdehyde, a chemical that indicates damage from free radicals, in the sedentary rats.

The study was conducted on rats because they have similar biochemistry to humans, Beyer said. Sixty rats were used in the study.

Beyer, who began his study in January 1989, is now repeating the experiment, this time including a third group: non-exercising rats that are put on low-calorie diets.

''We're trying to see what part of the effect is from endurance training and what part is just from being leaner,'' Beyer said, referring to studies on humans that link higher cancer rates to being overweight.

#90078u0996 03/19/1990 ~United Press International

BEIRUT, LEBANON (MARCH 19) UPI - Former President Jimmy Carter met with leaders of the pro-Iranian Hezbollah group last week in an attempt to win the release of Western hostages held by the group, a Lebanese daily newspaper said Monday.

The daily Ad Diyar newspaper, which has good contacts with Syria, quoted diplomatic sources as saying that Carter met with high-ranking Hezbollah officials last week during his a three-day visit to Damascus.

''The atmosphere of the meeting was positive concerning the principle of freeing the captives soon,'' Ad Diyar said.

But the release of the captives was linked to Washington's response to a number of demands that Carter would convey to the Bush administration on his return to Washington, the east Beirut-based daily said.

Carter, who is on a tour of the Middle East is currently in Israel was not immediately available for comment but a Hezbollah official in Beirut called the report ''a mere lie.''

''This was another desperate attempt to engage Hezbollah in the hostages issue,'' the official said.

Hezbollah has repeatedly denied holding hostages or having links with the hostages' captors.

Carter told a news conference following talks with Syrian President Hafez Assad that he was hopeful of the release of Western hostages in Lebanon because of ''very encouraging'' statements from Iran.

He said that ''more opportunities and better chances now exist'' to settle the hostages problem.

Ad Diyar said Carter also would discuss with France ways to settle the case of a jailed pro-Iranian Lebanese terrorist, Anis Naccache, with the French authorities.

Naccache is serving a life sentence for the attempted murder of former Iranian Prime Minister Shahpur Bakhtiar in a Paris suburb in 1980.

The imprisonment of Naccache and two other Middle East terrorists prompted a series of terrorist attacks in Paris in 1986 that killed 13 people and injured 250.

Iran reportedly has demanded the release of Naccache as one of the conditions for freeing the hostages.

Eighteen Westerners are believed held hostage in Lebanon by various Islamic fundamentalist groups, many of whom are either offshoots of Hezbollah or have some contact with the Party of God, as Hezbollah is also known. Among them are eight U.S. citizens, four Britons, two West Germans, two Swiss nationals, an Irishman and an Italian.

The pro-Syrian As Safir newspaper said Arab League envoy Lakhdar Ibrahimi, who arrived in Beirut over the weekend, discussed the hostages issue with Hezbollah's spiritual leader Sheikh Mohammed Hussein Fadlallah late Sunday.

Pro-Syrian sources quoted Fadlallah as saying during the meeting that Iranian President Ali Akbar Hashemi Rafsanjani has recently ''informed him of the need to close the file of the hostages.''

On Sunday, Iran's First Deputy Foreign Minister Ali Mohammed Besharati said the hostages held in Lebanon would be released gradually within the

next 10 months.

''I think that in the circumstances I experienced I can say that all the hostages may be released by next January,'' Besharati told the Tehran Times.

U.S. officials have denied recent reports that secret talks involving American and Iranian officials were held to secure the release of the hostages.

WASHINGTON (MARCH 19) UPI - The Supreme Court Monday let stand a lower court ruling clearing the way for the family of a Washington suicide victim to sue the subway system in a case that focused on the transit authority's drug-testing policy.

The justices, without comment, rejected the appeal by the Washington Metropolitan Area Transit Authority, known as Metro.

The transit authority, in seeking high court review, urged a reversal of the U.S. Circuit Court of Appeals' decision in Washington, which found Eleanor and Franklin Johnson could sue Metro in connection with the death of their 29-year-old daughter, Devora, who jumped in front of a moving subway train at the Metro Center station in March 1986.

The Johnsons sought $6 million in damages from Metro.

A federal judge dismissed the Johnson's case before it came to trial, saying any reasonable jury would find the train operator, Keister Dixon, could not have prevented her death, even if he had been impaired by drugs.

Dixon tested positive for marijuana and cocaine immediately after the incident, but did not show any signs of impairment. The tests could not determine the time at which he took any drugs.

The appeals court sent the case back to the lower court to determine whether the train could have been stopped and to consider WMATA's failure to conduct more thorough testing of the train operator.

89-1112 Washington Metropolitan Area Transit Authority vs. Eleanor and Franklin Johnson.

#90078u1045 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - The Supreme Court refused Monday to disturb a

Florida court decision to lift the death sentence for a prisoner convicted of killing a fellow prisoner over a card game and two cakes of soap.

The justices, without comment, rejected the state's appeal, which focused on the admissibility of statements describing a victim's character during the penalty phase of a trial.

Lawyers for Florida argued against the use of such statements, saying they violate a defendant's Eighth Amendment protection against cruel and unusual punishment because they direct the jury's focus to the victim rather than the defendant.

The lawyers argued the state supreme court relied on such statements when it reduced Florida State Prison inmate Doy James Christian's sentence from death to life in prison.

Christian stabbed a handcuffed prisoner, Alfred Moore, 26 times in the chest and eyes and then threw him over a third floor balcony to his death following an argument over a lost bet of two cakes of soap in a prison card game.

Testimony showed Moore had a history of prison violence, previously had hit Christian over the head with a metal weight-lifting bar and had threatened him repeatedly.

On appeal, the Florida Supreme Court vacated the death penalty and ordered a life sentence.

Lawyers for Florida, arguing for high court review, cited a 1987 Supreme Court decision, Booth vs. Maryland, in which the justices ruled 5-4 that prosecutors may not use victim impact statements during the penalty phase of a trial.

Such statements, generally taken from a victim's family and friends, are designed to elicit sympathy from a jury so they might deliver a harsher sentence to the defendant.

Florida argued that if testimony about a victim's good character is inadmissible, then testimony about Moore's ''bad'' character should also be banned during the penalty phase.

#90078u1051 03/19/1990 ~United Press International

(MARCH 19) UPI - Baseball negotiators say they have signed a ''memorandum of understanding'' that ends the 32-day spring training lockout. They made

the announcement in New York this morning... about five hours after Commissioner Fay Vincent said the two sides had reached an ''agreement in principle.'' Vincent says Opening Day is tentatively scheduled for April 9th, one week late.

A cold front moving toward the South is bringing the chance of more rain- but NOT as much as the driving rain that caused flooding in recent days. Thousands of people are still evacuated from areas of Alabama, Georgia and Florida. And more evacuations could occur. The heavy rain and flooding is blamed for at least 11 deaths.

The Soviet parliament began considering a law on secession today. The result could affect Lithuania almost immediately. The new government in Lithuania declared independence from the Soviet Union. The Kremlin ordered Lithuania to reverse its stand. The Soviets are holding what Lithuania considers UNusual army maneuvers.

Guam has one of the strictest anti-abortion laws in the United States or its territories. Guam Governor Joseph Ada signed the law today. It bans abortions except when the woman's life is in danger. Voters in Guam will be able to rescind or affirm the measure November 6th.

Maryland State Senate President Thomas Miller predicts that a filibuster will end today. Anti-abortion senators have filibustered abortion legislation for the last four days. They want a measure that would keep abortions widely available in Maryland to also provide more protection for viable fetuses.

#90078u1060 03/19/1990 ~United Press International

TAMPA, FL (MARCH 19) UPI - A 10-year-old boy died of cardiac arrest after being hit in the chest by a pitch during a Little League baseball game, authorities said Monday.

Ryan Wojick went into cardiac arrest when the baseball struck him in the chest near his left armpit during a game Sunday, said Hillsborough County Sheriff's Department Sgt. Gordon Davis.

The incident happened in the fourth inning at the Citrus Park Little League field in Hillsborough County, Davis said.

Wojick was up to bat and the pitch was wild, said Wojick's coach, Fred Bloomingdale.

''Nobody dreamed that it would have come to this,'' Bloomingdale said.

His team, the Cardinals, was playing the Phillies.

''He lost his breath and everyone thought he had the wind knocked out of him,'' he said. ''He was gasping for air ... and then he went down on the field.''

Rescuers from a nearby fire-rescue station, along with paramedics watching another game ran onto the field and administered cardiopulmonary resuscitation, Davis said.

Wojick was flown by helicopter to St. Joseph's Hospital in Tampa about 15 miles away, where he died.

Davis, who was at the field watching his son play in another game, said parents worked hard to try and save Wojick's life.

''He got the best medical attention he could get. This is a tragedy,'' he said.

''You couldn't ask for a better kid,'' Bloomingdale said. ''He's what every coach would like to coach.''

#90078u1078 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - The Supreme Court refused Monday to review a case involving prison overcrowding in Puerto Rico in a dispute that has resulted in millions of dollars of fines.

The court refused to hear the case brought by Puerto Rico seeking review of a ruling by the 1st U.S. Circuit Court of Appeals.

The case began in February 1979 when a lawsuit was filed charging prison conditions violated the 8th Amendment that bars cruel and unusual punishment.

Federal courts agreed and ordered Puerto Rico to take a number of steps to allievate overcrowding, including building new prisons.

However, Puerto Rico, while making some efforts to comply with the orders, found itself unable to keep up because a rising crime rate filled up new space almost as soon as it was completed.

Courts eventually imposed sanctions on the commonwealth, which Puerto Rico said approximates $30 million. It characterized them as ''the highest civil contempt fines levied by a federal court in the history of the nation.''

Noting that lawsuits over prison conditions are rampant throughout the

nation, Puerto Rico asked the Supreme Court to set a ''workable standard'' for for prison systems to comply with court orders.

Puerto Rico was supported in its plea by 31 states that said in papers filed with the court that the ''issue is of vital national importance because of the substantial growth in institutional reform litigation that has taken place in recent years.

''To date nearly ever state and territory has found itself embroiled in such action. As of November 30, 1989, 41 states plus the District of Columbia, Puerto Rico and the Virgin Islands were under court order or consent decree concerning prison conditions.''

89-1016 Rafael Hernadez Colon et al. vs. Carlos Morales Feliciano, et al.

#90078u1085 03/19/1990 ~United Press International

LUSAKA, ZAMBIA (MARCH 19) UPI - African National Congress Secretary-General Alfred Nzo cautioned the Organization of African Unity Monday against re-establishing links with South Africa in the belief the struggle against apartheid was over.

Nzo urged the 14 members of the OAU's special committee on Southern Africa meeting for the fifth time in a one-day session in the Zambian capital, to ''come out with a clear message warning against such a trend.''

''Some pronouncements made by the South African government have led some to believe that everything is over and to conclude that they can re-establish diplomatic and other relations with South Africa,'' Nzo said.

If this happened, South African President Frederik de Klerk might halt recent moves towards negotiations to resolve the country's racial conflict Nzo said.

In August, the OAU Committee adopted in the Zimbabwean capital the Harare Declaration, a set of pre-conditions for negotiations to end apartheid put forward by the ANC. The United Nations subsequently adopted the declaration in a modified form.

''Since the adoption of the declaration, progress has been made, but much still needs to be done,'' Nzo told the OAU Committee, comprising the so-called Front-line States of Angola, Botswana, Mozambique, Tanzania, Zambia and Zimbabwe, and eight other African nations under the chairmanship of Egyptian President Hosni Mubarak.

Last month, de Klerk announced reforms, including the lifting of 30-year bans on the ANC and other anti-apartheid organizations, the release of

Nelson Mandela and other political prisoners, and a partial easing of a 45-month state of emergency.

''The liberation of Nelson Mandela and unbanning of the ANC... can be considered by all standards a victory,'' said Mubarak, who is chairman of the OAU.

''We must multiply our efforts and concentrate on the eradication of apartheid,'' he said.

Zambian President Kenneth Kaunda, chairman of the frontline states, said the changes in South Africa fell short of the goal.

''Let not the developments announced by de Klerk lure us into thinking that all is well in southern Africa,'' Kaunda said.

The ANC, whose headquarters have been in Lusaka for 25 years, will present a paper to the OAU Committee on how it and African countries plan to respond to the changed situation in South Africa.

An ANC delegation under Mandela is scheduled to meet de Klerk and senior members of his Cabinet on April 11 on obstacles standing in the way of formal negotiations to end the country's racial conflict, among them de Klerk's refusal to lift the emergency in its entirety.

The summit took place as British Foreign Secretary Douglas Hurd arrived in South Africa for talks with de Klerk in the first high-level Western contact with the white government the reform program was unveiled six weeks ago.

#90078u1107 03/19/1990 ~United Press International

NAIROBI, KENYA (MARCH 19) UPI - The U.N. World Food Program appealed Monday for $11.8 million to cover transport and logistic costs of famine relief in southern Sudan.

The organization said it had collected $1.5 million from donors for the program, part of the second phase of Operation Lifeline Sudan, a famine relief operation mounted to feed victims of Sudan's 7-year-old civil war.

In a statement issued in Nairobi, the World Food Program said it had more than enough food to feed 4.5 million people at risk of starvation but needed more money to deliver it.

It said 104,145 tons of food were needed and 116,150 tons had been pledged.

Twenty-one thousand tons of food was in stock at various locations, it

said, but there had been few deliveries to rural areas in the south.

The first phase of Operation Lifeline last year delivered 111,000 tons of food to those caught up in the bitter war between the Sudanese People's Liberation Army and the Islamic government in Khartoum.

''The relief effort averted a major catastrophe in Sudan last year,'' the agency's statement said.

But ''if food suplies and relief assistance do not reach the affected populations (this year) a major disaster is in the making,'' said James Ingram, the program's executive director.

About 250,000 people died of starvation in 1988 because of the war, according to U.N. estimates.

Phase two of Operation Lifeline had been planned to take effect by November last year, but the government did not give the go-ahead for food to be delivered until last week.

Under the operation, food will be delivered for the first time to 1.8 million displaced people in the capital Khartoum this year.

#90078u1132 03/19/1990 ~United Press International

HOUSTON (MARCH 19) UPI - Domestic drilling and activity in the Gulf of Mexico dropped off last week, industry monitors reported.

A total of 908 rotary rigs were working in the United States last week, compared with 923 the week before and 740 the same week a year ago, Baker Hughes Inc. reported Sunday. Drilling activity in the Gulf of Mexico dipped last week after increasing recently.

Offshore Data Services reported three less mobile rigs under contract in the Gulf, dropping the utilization rate to 68.5 percent, with 148 rigs working out of a fleet of 216. One more rig went to work in European waters, pushing the utilization rate there to 87.9 percent, with 116 rigs working out of a fleet of 132.

Worldwide, the utilization rate among mobile offshore rigs remained unchanged at 80 percent because two long-idled rigs were retired, offsetting two rigs that came off contracts, ODS said. There now are 535 rigs working out of a total fleet of 669.

There were 335 rigs working in Texas last week, compared with 350 the week before and 234 the same week a year ago. In Louisiana, 147 rigs were working last week, compared with 149 the week before and 122 the same week a year ago; New Mexico, 31, 32 and 30; and Oklahoma, 96, 107 and 109. In Canada, 227 rigs were working last week, compared with 228 the week before and 222 the same week a year ago.

WASHINGTON (MARCH 19) UPI - Army officials confirmed Monday that a non-commissioned Army officer from Fort Bragg, N.C., is under investigation for murder for shooting a Panamanian prisoner during the Dec. 20 invasion of Panama.

The Army Times, an independent weekly defense publication that first reported the case Friday, originally said the soldier was from Fort Ord, Calif. It later corrected the soldier's home base to Fort Bragg.

''We do not comment on pending investigations,'' an Army spokesman in the Pentagon said.

Army officials who asked not to identified, however, said the report was correct and that it appeared that the unidentified soldier might be charged with murder.

According to sources, the NCO and the other soldiers were manning a checkpoint at a roadblock in Panama during the invasion when several Panamanians drove up. When the Panamanians were ordered to halt, someone inside the car tossed a hand grenade at the soldiers.

The soldiers then fired on the car, according to this account, killing several occupants. The remaining passengers quickly surrendered, got out of the car and were taken prisoner. The senior NCO allegedly shot one of the prisoners and severely beat at least one other.

The alleged murder was the gravest of more than 60 incidents arising from the U.S. invasion, the Army Times said. Army sources said various violent

incidents resulted in 21 formal investigations, and eight involved deaths.

WASHINGTON (MARCH 19) UPI - The Supreme Court refused Monday to disturb a ruling that waived fees for Freedom of Information Act requests filed by the National Security Archive.

The court refused to hear the case brought by the government seeking review of a ruling by the U.S. District Court of Appeals for the District of Columbia.

At issue were government attempts to limit the use of the FOIA.

The act was originally passed in 1974 and designed to lift the veil of secrecy routinely placed over government files by allowing individuals to petition the government for such information.

As eventually amended, the FOIA would charge individuals for the cost of searching for and reviewing documents and for copying them. However, if the individual was a ''educational institution'' or a member of the ''news media'' all the fees, except the copying costs, would be waived.

The National Security Archive is a non-profit organization that collects information relating to national security and foreign policy and makes it available for review without charge at its office and publishes such information.

It has filed a number of FOIA requests with government agencies but the Department of Defense refused to waive the fees, which can amount to thousands of dollars, arguing the organization did not fit under either of the allowed exemptions.

The federal appeals court, however, disagreed.

In seeking high court review, the government warned if the decision were allow to stand it could flood the government with FOIA requests.

''Presumably any group interested in other areas of government activity, such as environmental regulation, immigration, or labor relations, would have a comparable incentive to form a private library or repository of government records at government expense,'' they said.

The National Security Archive, however, said the appeals court ''recognized the Archive's preferred fee status only 'by reason of its publication activities.'''

WASHINGTON (MARCH 19) UPI - Cheating by welfare mothers is more widespread than liberals like to admit and for more moral reasons - their families' survival - than conservtives argue, a new study said Monday.

The study by Christopher Jencks and Kathyrn Edin said that low benefits do not simply force welfare recipients to live frugally, but have ''another, more sinister effect. ... They force morst welfare recipients to lie and

cheat in order to survive.''

''Conservatives ignore this problem because admitting that welfare recipients cannot survive without cheating would weaken the case for cutting benefits,'' the study said.

''Liberals ignore the problem because admitting that welfare recipients cheat for any reason whatever reduces public sympathy for their plight,'' the study said.

The study, based on 25 in-depth interviews by Edin of mothers willing to provide full income and expenditure figures in an unnamed Midwestern city, was reported in the premier issue of The American Prospect magazine, a new liberal journal.

Jencks and Edin said they found that ''welfare mothers operate on the same moral principles as most other Americans. They think their first obligation is to care for their children and they assume this means providing food, shelter, heat, electricity, furniture, clothes and an occasional treat.

''Since welfare seldom gives recipients who follow the rules enough money to pay for these necessities, they feel entitled to break the rules. ... Welfare recipients also think that working ought to make them better off. Since the welfare system does not allow them to keep what they earn if they report their earnings, they feel entitled to ignore the reporting requirements.''

According to the study, not one of the 25 mothers was able to live on her welfare check and only one came close. None reported all of her extra income to the welfare department and only two reported any of it.

Welfare benefits, which averaged $344 per month, the study found, were seldom enough to cover rent and utility bills let alone other expenses. Rent averaged $261 a month, $48 a month for gas, the principal source of heat, and $48 a month for electricity. The families also spent an average of $19 per person per week on food, of which food stamps covered only $15.

''By the end of the month, the typical mother had spent $724 in cash plus $230 in food stamps,'' the study said. ''Since she got only $344 from AFDC (Aid to Families with Dependent Children) she had a $380 deficit.''

Edin and Jencks also reported that ''mainstream'' welfare mothers - those who had not grown up on welfare, completed high school and married before having children - ''showed no more respect for the welfare department's rules and regulations than underclass recipients did. Both groups were quite willing to cheat a system that gave them too little to live on.''

Instead of raising welfare benefits, which is politically unattractive, however, the two sociologists urged a system of ''fringe benefits'' that would make low wage work economically attractive.

They suggested increasing the Earned Incme Tax Credit, tax credits for child care expenses and housing expenses, including providing families who rent a tax credit equivalent to that now given homeowners and, in the absence of universal health insurance, allowing all workers to buy Medicaid coverage for 5 percent of their earnings.

''All these benefits should be defined as rewards for work, like Social Security,'' they said. ''If programs of this kind existed today, the great majority of welfare mothers would seek regular employment.''

#90078u1199 03/19/1990 ~United Press International

NEW YORK (MARCH 19) UPI - The thieves who pulled off the world's largest art theft in Boston have a slim chance of ransoming or selling the paintings they stole, one of the nation's foremost experts in art theft said Monday.

''Thieves responsible for other robberies have tried to ransom stolen art works but it isn't known to work out very well for them,'' said Connie Lowenthal, director of the International Foundation for Art Research, which publishes the only American newsletter devoted to current art thefts.

''I think the thieves in Boston have made a terrible tactical error in stealing such well known works,'' she said. ''They are so famous there is no real market for them although there are unscrupulous people everywhere in the world. Whoever would pay for them is a fool.''

Lowenthal said museums have a policy of not paying ransom and she knows of no cases of insurance companies doing it, although she has heard rumors.

''In the first place it would be an illegal transaction,'' Lowenthal said. ''An insurance company could get into trouble with the law and it would set a horrible precedent for the insurance industry.''

Lowenthal said there was no doubt in her mind that the theft of 12 Old Master and 19th century masterpieces from the Isabella Steward Gardner Museum Sunday was the biggest in history in terms of value.

''The Vermeer alone may be worth $200 million,'' she said. ''There are perhaps only 40 Vermeers in existence and only one is in private hands, owned by the queen of England. There hasn't been a Vermeer on the market in years.''

Lowenthal said she believes the thieves will be in touch with authorities and there will be ''delicate negotiations taking a lot of time'' before the paintings are returned to the Gardner Museum.

''I'm hopeful the thieves did not bargain on the publicity this theft has engendered,'' she said. ''I think they'll feel lucky just to get the paintings back unharmed.''

William F. Smith, a New York insurance specialist in the art field, said in his experience it is ''almost impossible'' to get ransom from an insurance company.

''It's a difficult question, of course, but the likelihood would be very small although underwriters always are interested in mitigating losses,'' Smith said. ''It would be an illegal transaction, and it isn't something underwriters would enter into casually. It's a too highly visible situation.''

Smith added that if an insurance firm secretly negotiated a ransom, ''They wouldn't be acting alone because there is always a whole cast of characters involved in a case like this.''

Smith said he already had made a wager that the museum will have its paintings back in six months.

Carolyn Bowden, assistant chief of operations for Interpol in Washington, D.C., which has been called into the Boston case, said two things usually happen in theft cases involving masterpieces.

''You either hear rather soon from the thieves and they ask for ransom or the artworks will disappear for several years underground because the thieves hope to get them into the market at a later date.

''If local police authorities have any reason to believe the paintings have gone abroad, they call on us for help.''

#90078u1206 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - The Supreme Court agreed Monday to decide the definition of the term ''falsly made'' in a case involving car titles with incorrect mileage numbers.

The court agreed to hear the case brought by Raymond J. Moskal seeking review of a ruling by the 3rd U.S. Circuit Court of Appeals. The court will hear arguments in the case in the fall with a decision not expected before next year.

The case involves a scheme to alter the high mileage figures on certificats of title for about 300 cars and to obtain ''washed'' Virginia titles with the false, low-mileage figures. The scheme involved Buddy's Auto Sales in Chesapeake, Va., and Al Davis Enterprises in Manheim, Pa.

According to court records, Curman ''Buddy'' Dickens, one of the principal owners and operators of Buddy's, would receive automobile titles with lowered mileage from Davis Enterprises. Dickens and his wife would then apply for Virginia certificates and return them for a fee of $100 per title.

The cars would then be sold to unsuspecting third parties.

Moskal, the office manager for Davis, was involved in the scheme. After a trial in Pennsylvania, Moskal was convicted on two counts of interstate transportation of falsely made securities and other charges and sentenced to six months in prison and fines.

On appeal, he argued that while the documents contained false information, they were genuine documents and as a result he should not be convicted under the statute.

(MARCH 19) UPI - There will be baseball, after all. Negotiators announced this morning that team owners and players' union representatives have ''signed off on a memorandum of understanding.'' That follows baseball commissioner Fay Vincent's earlier announcement that the two sides had reached a four-year pact in principle and tentatively planned to start the season April 9th.

The leader of the conservative Alliance for Germany, the surprise victors in yesterday's ballot, says his party's most important task is to stem the daily flow of an estimated two-thousand East Germans to the West. A West German newspaper also quotes Alliance's leader as saying he favors moving quickly to change East Germany's constitution to quicken the pace of German re-unification.

Maryland's state senate will re-convene this morning for the fifth-day of a filibuster staged by an anti-abortion minority. The dozen fervent anti-abortion lawmakers say they may lose needed support if the debate drags on much longer. And the head of the upper chamber says he believes he has gained the three missing votes to give pro-choice legislators a two-thirds majority to keep abortions available upon demand in Maryland.

Japanese police decline to say if they suspect arson in yesterday's fire in a department store north of Osaka. This word comes as one of Japan's largest newspapers reports that it received an anonymous call from a man who said he started the blaze that killed 15 people and injured six others. The man reportedly said he started the blaze because he had been fired from the company.

IDAHO FALLS, ID (MARCH 19) UPI - Democratic Gov. Cecil Andrus announced Monday he will seek re-election to an unprecedented fourth term, saying he has kept promises made four years ago.

Andrus, 58, faces no challengers so far in the Democratic primary May 22. State Sen. Rachel Gilbert, former state Sen. Roger Fairchild and stockbroker Milton Erhart will face off in the Republican primary.

''Four years ago I came before the people of Idaho to seek their support '' Andrus said. ''I made commitments to improve education and rebuild the Idaho economy. Ladies and gentlemen, the commitments were made and they have been kept.''

Andrus was first elected to the Idaho Senate at age 29. He was elected governor in 1970 and was re-elected in 1974. He resigned in 1977 to become interior secretary under President Jimmy Carter.

Andrus returned to Idaho in 1981 to establish his own natural resources consulting company before winning another term as governor in 1986 by 3,635 votes against former Lt. Gov. David Leroy.

Robert Smylie, a Republican, was the only other modern-day governor of Idaho to have been elected three times. Smylie served as governor from 1955 to 1967.

TOPEKA, KS (MARCH 19) UPI - Sen. Nancy Kassebaum, R-Kan., signed the necessary forms and paid the $984 filing fee Monday to officially enter the running for a third six-year term in the Senate.

Kassebaum, 57, a member of the Senate Foreign Relations Committee, had said in May that she would seek re-election, but she kept even her staff members in suspense until the official announcement at her Washington office.

The reason for the suspense was that Kassebaum had pledged to serve only two terms in the Senate.

''After 11 years in the Senate, there are some people who say I shouldn't be returned,'' Kassebaum said at a news conference at the Kansas Statehouse. ''I hope there are even more who think I am worthy of re-election.''

Kassebaum, the daughter of 1936 Republican presidential candidate Alf Landon, declined to rule out a 1996 re-election bid and said she got herself in trouble by pledging to end her Senate career in 1990.

But Kassebaum noted that she is a co-sponsor of ''an additional try on a constitutional amendment that would limit tenure in the House and Senate.''

She said she believes in limiting terms to get ''fresh blood'' into Congress, ''but if you're the only one doing it, it doesn't do any good.''

''The other side of it is that senority becomes very important,'' Kassebaum said.

She said the two most important issues of facing the United States in the 1990s are reducing the country's deficit and increasing America's competitiveness in a world economy.

A Sunday Topeka Capital-Journal statewide newspaper poll found that Kassebaum is the most popular member of the seven-person Kansas congressional delegation.

Kassebaum received a 2.98 grade on a 4.0 scale. The state's senior senator Senate Republican leader Robert Dole, scored 2.64 in the poll of 500 registered voters.

''I didn't see it, but I take all polls with a grain of salt,'' Kassebaum said. ''I'm a keen believer in door-to-door campaigning.''

#90078u1275 03/19/1990 ~United Press International

TOKYO (MARCH 19) UPI - Japanese automaker Nissan Motor Co. announced Monday it will send a high-level auto parts purchasing mission to the United States in April to expand its imports from overseas suppliers.

The Tokyo-based company said the delegation will visit some 20 leading parts suppliers, including major semiconductor makers, during a two-week tour to explain the company's purchasing system and standards for adopting parts.

The mission will also survey each company's research and development capabilities as a preliminary step toward possible joint development projects, the company said.

It said the delegation, headed by executive managing director Teiji Suzuki will also participate in a U.S.-Japanese conference in Las Vegas April 4-6 and hold individual talks with representatives of about 30 U.S. companies.

"Nissan is confident that the mission will lead to increased imports into Japan and also raise the local content ratio in its U.S. manufacturing operations," the company said.

"In addition to these short-term results, the mission is expected to be successful in finding strong partners with whom Nissan can forge long-term cooperative ties," it said.

The company has announced plans to increase its imports from overseas suppliers to $740 million for fiscal 1992, starting in April. Nissan will be the second major Japanese automaker to send a purchasing mission to the United States. Toyota Motor Corp. dispatched a similar delegation last summer in line with its import promotion program.

Nissan, meanwhile, has announced that it will market its U.S.-made vehicles in Taiwan from April to promote international cooperation through a program of global complementation among its worldwide facilities.

The vehicles to be sold in Taiwan will be Sentra XE 4-door sedans and Hardbody 4x4 pickup trucks, produced at Nissan's car manufacturing facility in Smyrna, Tennessee, the company said.

These vehicles will be sold through the dealer network of Yue Loong Motor

Co., a Nissan-affiliated company, which has been manufacturing Nissan vehicles for sales under its brand since 1959, the company said.

Taiwan currently bans imports of vehicles from Japan, except some commercial vehicles. Imports of American and European vehicles have been allowed since April 1985, the company said. The initial shipment of 330 units was en route to Taiwan from Los Angeles, California, it said.

#90078u1278 03/19/1990 ~United Press International

NEW YORK (MARCH 19) UPI - The Rev. Al Sharpton proclaimed his innocence to chanting supporters Monday on the first day of his fraud and grand larceny trial, claiming he is the target of a political vendetta sparked by the Tawana Brawley case.

''I never took any money. I can account for all of the money,'' the civil rights activist said outside the Manhattan Criminal Courts Building.

Sharpton, 35, a Pentecostal minister, is accused of stealing at least $250,000 from a Brooklyn youth group called the National Youth Movement, a charity he founded while in high school in 1971. If convicted, he faces up to seven years in prison.

As Sharpton arrived with his lawyer, Alton Maddox Jr., for jury selection, he greeted about supporters marching outside the courthouse.

About 75 supporters, members of the New Alliance Party, chanted ''Sharpton is our leader! Cuomo is the enemy!'' and hoisted placards reading ''Tawana Brawley's story has yet to be told.''

The black teenager claimed she was raped by six white men, including one wearing a badge, who scrawled racial slurs on her body and left her in a garbage bag behind her Wappingers Falls, N.Y., home in November 1987.

A subsequent grand jury investigation, led by state Attorney General Robert Abrams at the request of Gov. Mario Cuomo, determined that Brawley's claims were unfounded.

Sharpton, Maddox and attorney C. Vernon Mason made up her team of advisers. Abrams criticized them for giving Brawley poor advice, including urging her not to testify before the grand jury.

Throughout the investigation, Sharpton likened the attorney general to Hitler.

''I finally got my day in court where I can prove to the world that Mr. Abrams has a political vendetta and there is no merit to this,'' Sharpton

said Monday.

Abrams said the investigation into Sharpton's alleged business wrongdoings began a year before the Brawley case.

The attorney general's office is prosecuting the grand larceny, fraud and falsifying business records charges in Manhattan and in May will be prosecuting related tax evasion charges in Albany.

Sharpton also claimed authorities are picking on him because he is an effective black leader.

''Dr. King had to go through this type of trial. Adam Clayton Powell. Any time a black man stands up, he goes through this kind of trial,'' Sharpton said.

''I'm a black man who stands up for black people. I expected this.''

The indictment charges Sharpton represented the charity as a tax-exempt, nonprofit group between January 1985 and January 1988 and accepted contributions from businesses and individuals and used the money for himself.

#90078u1281 03/19/1990 ~United Press International

NEW YORK (MARCH 19) UPI - Kohlberg Kravis Roberts & Co. purchased a 3.9 percent stake in RJR Nabisco Inc. from Drexel Burnham Lambert Inc. for $51 million, increasing KKR's stake in the food-and-tobacco giant to 58 percent, a spokeswoman said Monday.

Drexel, which advised KKR on the record $24.9 billion leveraged buyout of RJR Nabisco that closed last year, acquired its position in RJR Nabisco in the course of underwriting bonds associated with the transaction.

Drexel has been selling off its equity in companies following the Chapter 11 bankruptcy filing by its parent, Drexel Burnham Lambert Group Inc., last month.

KKR paid for the purchase with cash from its buyout fund, the spokeswoman said. The purchase price was the same as the cost of the stock to both Drexel and KKR when RJR Nabisco was taken private, she said.

#90078u1300 03/19/1990 ~United Press International

TORONTO (MARCH 19) UPI - General Motors of Canada Ltd. has postponed the closing of its Scarborough van plant, slated for the end of the 1991 model

year, by one year, a spokesman said Monday.

Nick Hall, spokesman for GM's, said full-sized vans will be produced at least until August, 1992 and that a search for a new product for the plant is continuing. Production at the full-sized van plant, employing 2,500 workers, will reportedly be transfered to GM's truck plant in Flint, Mich.

The U.S. automaker earlier said it will consolidate production by moving full-sized van production from its Lordstown, Ohio, van plant to Flint by 1992,causing another 2,500 workers at the Lordstown van facility to lose their jobs.

MONTPELIER, VT (MARCH 19) UPI - Bernard Sanders, the former four-term socialist mayor of Burlington, Monday declared his candidacy for Vermont's sole House seat and vowed to tackle issues ranging from economic injustice to political malaise.

Sanders, 48, will seek the seat held by freshman Rep. Peter Smith, R-Vt. Smith has not yet announced his political plans, but is expected to seek a second term.

Sanders, who was mayor of Burlington 1981-89, told reporters he plans to campaign on health care, the environment, the economy, military spending and the need for a new political movement in the United States.

The socialist Sanders, who runs as an independent, said his top priority is the creation of a national health care system that would guarantee every American full medical coverage with no out-of-pocket expenses.

''Quality health care must be a right of American citizenship, and not just a privilege for the rich,'' Sanders said.

In the past decade, Sanders, a champion of working-class values and a tireless critic of big business and traditional party politics, has transformed himself from a fiery but obscure leftist politician into a serious candidate for statewide office with a proven political track record.

In the 1988 race for Vermont's House seat, Sanders, who had been labeled as a ''spoiler'' in the campaign's early going, captured 38.7 percent of the vote.

#90078u1349 03/19/1990 ~United Press International

JERUSALEM (MARCH 19) UPI - Former President Jimmy Carter criticized Israel Monday for depriving Palestinians of ''their basic human rights'' and creating an atmosphere not conducive to achieving peace.

''I think the intifada is being perpetuated partially by the abuse of the Palestinians themselves,'' said Carter, in Israel as part of a private Middle East fact-finding mission. ''There is hardly a family that lives in the West Bank and Gaza who hasn't had one of their male members actually incarcerated by the military authorities since the intifada started.''

Carter spoke to reporters after a briefing on the 27-month-old intifada, the Arabic name for the Palestinian uprising, from B'tselem, the Israeli Information Center for Human Rights in the Occupied Territories. B'tselem and the West Bank's Al-Haq Law in the Service of Man were recipients of the 1989 Carter-Menil Award for Human Rights, sharing a $100,000 grant.

The former president, who mediated the 1978 Camp David peace accords and a year later the Israeli-Egyptian peace treaty, urged the Israeli media to keep publicizing human rights violations in the Israeli-occupied territories.

''It's when they are kept secret, when they're not revealed that the abuses continue,'' Carter said. ''This is not good for Israel and it's not good for peace and it's certainly not good for the people who live in the occupied territories.''

During his visit, Carter has met with Prime Minister Yitzhak Shamir, Labor Party leader Shimon Peres and other Israeli officials. He also met Monday with prominent Palestinians who reaffirmed the need to include the Palestine Liberation Organization in peace negotiations.

Faisel Husseini, a prominent East Jerusalem Palestinian who spoke with Carter, described the former U.S. president as ''the conscience of the American people'' and said he hoped he would work to push the peace process forward.

''I hope he can deliver something from the Israelis to the PLO,'' Husseini said. ''After this meeting with the ex-president of the United States, there will be a meeting, we hope, with the president of the United States.''

Carter described the information given him by B'tselem as ''very sobering ... very disturbing.'' He cited figures showing that almost one out of four adult Palestinian males had been arrested and detained during the uprising, with B'tselem estimating 9,000 remained in detention and 1,000 of these described by Carter as ''prisoners of conscience.''

''What we're talking about is an authoritative government that is in charge that is depriving the people under its control of their basic human rights,'' Carter said.

''Here you have a democratic government who, for 22 years, now almost 23 years, has been responsible for the lives of these people and they are still demolishing homes. They are still putting them in prison without charge.''

Carter's discussions with prominent Palestinians in East Jerusalem centered on the peace process and daily Palestinian life such as health

care, deportation and the closure of schools.

''Without Jerusalem as the capital of our Palestinian state, without the full participation of our people in exile and the fulfilment of their rights and without the PLO, there can be no peace,'' the Palestinians said in a political statement addressed to Carter. ''Jerusalem is our capital, we are one people, and the PLO is our representative.''

Carter said he planned to meet with PLO chief Yasser Arafat in Tunis after leaving Israel Tuesday.

After his meeting with the Palestinians, Carter said he believed the peace initiatives on the table were ''adequate for the time being.''

''The ultimate goal should be as quick as possible to have an international peace conference,'' said Carter.

While Israel's Labor Party has expressed support for an international peace conference in the past, the Likud Party has opposed it. The peace conference has essentially become a non-issue in Israel's peace initiative launched last year that centers on elections in the occupied territories for Palestinians to negotiate with Israel on their future.

#90078u1350 03/19/1990 ~United Press International

ANNAPOLIS, MD (MARCH 19) UPI - Maryland's anti-abortion senators worked on changes Monday intended to satisfy enough of their number to settle a 5-day-old filibuster over legislation that would guarantee abortions remain widely unrestricted.

The filibuster resumed shortly after noon after being delayed by Senate leaders while abortion opponents met in a closed session to work on proposals from bill supporters to end the debate.

The central issue in the talks to resolve the filibuster was tempering language in the far-reaching bill that has troubled abortion opponents - namely provisions allowing viable fetuses to be aborted solely because the mother's mental health was in danger.

Senate President Thomas V. ''Mike'' Miller expected to bring the Senate back into session briefly following the meeting, and call a recess for both sides to meet in order to work on a final agreement.

''I would like to think it will be over today,'' said Miller.

The president planned to assemble the 29 senators who have already voted to end debate and have abortion opponents detail changes intended to swing

the three votes needed for cloture.

Miller needs 32 votes, or two-thirds of the Senate membership, to end the filibuster, which started Thursday.

Miller sent senators home at 11:20 p.m. Sunday, saying he expected to muster the necessary votes sometime after the session resumed Monday.

Senators have had breaks to sleep each night since the debate began Thursday, prompting one member to dub it a ''limousine filibuster.''

''The only thing worse than a tyranny by the majority is tyranny by the minority,'' said Miller. ''What I'd like to get are the votes without turning up the heat.''

Senate Majority Leader Clarence Blount said both sides were close to resolving their differences, including the mental health provision.

''Nothing has been approved yet but that is still a major issue,'' said Blount. ''We have a good feeling about it but a snag can develop on any issue at any time.''

Abortion opponents have waged a campaign to write out of the bill the mental health provision, which they believe is equal to having no restrictions at all.

''It's a choice between more death and less death,'' said Sen. Patrick O'Reilly, a Prince George's County Democrat who opposes abortions.

In addition to mental health question, three other issues have been at the heart of talks over a possible compromise, including parental notification reporting abortions and testing to determine the viability of the fetus.

The bill before the Senate is designed to guarantee that abortions remain widely available in Maryland even if the U.S. Supreme Court eventually overturns its landmark Roe vs. Wade decision, which in 1973 created a constitutional right to abortion.

The measure was introduced after Maryland's attorney general determined that a 1968 state law restricting abortions would become enforceable if the Supreme Court ever overturned Roe vs. Wade.

If passed by the Senate, the bill would still need approval from the House of Delegates and from Gov. William Donald Schaefer, who has not taken a position.

Abortion rights advocates in the Senate who have maintained all along that they could eventually muster enough votes to end the filibuster opened

negotiations with anti-abortion legislators Sunday afternoon.

Abortion opponents conceded that because of their numbers - slightly more than a dozen of the 47 senators are viewed as unswerving anti-abortionists - they remain vulnerable to losing the support of senators considered to be swing votes if the filibuster dragged on.

As drafted, the legislation would allow unrestricted abortions until a fetus is determined to be viable by a doctor. After that, abortions would be allowed when the mental or physical health of the mother or the physical health of the child was in danger.

Senators conducting the filibuster, usually addressing a near-empty chamber, have read aloud from books, constituent letters and legal briefs in their extended attempt to obstruct the bill and preserve the 1968 law.

The 1968 law, which became unenforceable after Roe vs. Wade, allowed abortions only during the first three months of pregnancy and only in cases of rape, incest or where the mother's life was in danger. It also provided that abortions must be performed in accredited hospitals and approved by a medical board.

#90078u1375 03/19/1990 ~United Press International

ADDIS ABABA, ETHIOPIA (MARCH 19) UPI - The Ethiopian government, facing threats of a catastrophic famine in rebel-held areas, sent negotiators to Rome Monday for surprise preliminary peace talks with the rebel Tigre People's Liberation Front.

The Rome talks with the hard-line Marxist Tigre rebels, fighting to overthrow the government since 1977, will try to set an agenda for formal negotiations and agree on the composition of delegations, the official Ethiopian News Agency said.

A first round of such talks was held in January in Rome with Ashagre Yigletu leading the Addis Ababa team.

Also Monday, the Ethiopian News Agency said stalled negotiations with the country's other rebel group, the Eritrean People's Liberation Front, would be held April 8-21 in Nairobi, Kenya, under the auspices of former presidents Jimmy Carter and Julius Nyerere of Tanzania.

The government said it was prepared to accept proposals from Carter and Nyerere to resume talking to the secessionist EPLF, which has fought a 28-year war of independence in northern Ethiopia.

But in Washington, a spokesman for the Eritrean rebel group office said an

outstanding issue blocking the talks has not yet been resolved.

''It is news for me,'' said EPLF spokesman Rezene Medhani of the report carried on the Ethiopian news agency.

Previous rounds of talks in Atlanta and Nairobi in September and November last year broke down without agreement on a proper agenda, venue or date for further negotations. At the time, the EPLF said it would not participate in more talks unless the United Nations, one of seven observers agreed by the two sides, was involved.

''We have been calling on Carter to extend invitations to all seven observers to the peace talks with both the Ethiopian and EPLF signatures '' Medhani said, but added there has been no resolution of the issue of U.N. participation.

The United Nations has expressed reluctance to involve itself since its charter does not allow it to intervene in domestic affairs. Participation would de facto recognize Eritrea's status as an independent entity.

Government forces have suffered a series of military defeats in the two civil wars over the past six months. Most seriously, in February, it lost control of the Red Sea port of Massawa to the EPLF rebels. Massawa is Ethiopia's only northern port.

Facing a repeat of the catastrophic famine of 1984-5 with about 4.5 million people risking starvation in rebel-held areas, the government has tried to announced sweeping economic and political reforms two weeks ago and has called on its opponents to come to the negotiating table.

The bitter fighting has prevented aid from reaching millions of Ethiopians suffering from widespread famine and both sides have accused the other of using starvation as a war tactic.

The loss of Massawa last month precipitated a crisis for the government, which had pinned credibility on supplying food to those at risk and planned to use the port to do so.

Without Massawa, the government had no land or sea access to roughly one third of the country because rebels control both roads north from Addis Ababa.

Western diplomats in Addis Ababa said last week they saw President Mengistu Haile Mariam's reforms as a hasty measure to secure Western aid in the face of dwindling support from the Soviet Union. The United Nations and a number of western countries have subsequently pledged assistance.

An alternative relief operation is expected to get off the ground in the

next few days, entailing the trucking of food through rebel military lines with the guerrillas' agreement - a result of negotiation among rebels, church groups and the government.

#90078u1392 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - A panel revising the United Methodist Church's book of worship services said Monday it has asked the church's Judicial Council - supreme court - to rule whether ''Father, Son and Holy Spirit'' must be used in all liturgical references to God.

A stalemate in the 18-member committee over whether church rules allow the use of ''almighty God'' as an alternative to ''almighty Father'' in a prayer prompted the request to the council.

Members of the committee disagree over the meaning of resolutions adopted by the 8.9 million-member church's General Conference last year on the touchy issue of inclusive language.

That meeting - the denomination's highest legislative body - created the panel to revise the official Book of Worship, which includes liturgical services for Sunday morning worship as well as other times, including baptisms, marriages and funerals.

General Conference delegates also referred to the worship book revision committee a number of petitions about language, most of which asked that the traditional trinitarian formula of ''Father, Son and Holy Spirit'' be retained, especially in the services of baptism and ordination.

Another, however, asked that ''all efforts to legislate specific adresses to God in United Methodist worship and liturgy be rejected'' in an effort to allow those doing the revision to use various metaphors and descriptions for God other than masculine ones.

Bishop Susan Morrison of Philadelphia, who chairs the committee, told the denomination's official news agency that the committee has tried to be faithful to both interests.

It has, for example, retained the ''Father, Son and Holy Spirit'' formula for baptism services and wherever the three persons of God are mentioned together.

At the same time, the committee has tried to offer some alternatives for those who prefer more gender-inclusive rituals.

The specific issue in the dispute involves a prayer used to open the holy communion segment of worship that traditionally begins ''Almighty

Father.'' Some committee members wanted to place the phrase ''Almighty God'' in parentheses as an acceptable alterntive.

Retired Bishop Ole Borgen, who served United Methodists in Northern Europe objected, arguing even an optional reference ''circumvents the intention of General Conference.''

''Having even a reference in parentheses gives that reference equal status with 'father,''' he said. ''We do not have the authority to do that.''

Other committee members, however, argued that the General Conference resolutions were limited to those instances where the full trinitarian formula is used and not in all references to God.

The Rev. Mallonee Hubbard, Millersburg, Ky., urged the committee to ''be as sensitive and as caring as possible to those who felt their beliefs and interpretations were undermined by (the restrictive) General Conference'' resolutions.

The panel has already adopted guidelines allowing it to use non-sexist references to people, changing such terms as ''sons of God,'' for example, to ''people of God'' or ''saints of God.''

The nine-member Judicial Council, which meets next in late October, can decide whether or not to hear the dispute.

MINDEN, NEV (MARCH 19) UPI - Carson Valley Middle School janitor Brian Osgood traded in his mop and broom Monday to become a teacher.

''Some of the teachers say I get more respect being a janitor. But I think respect is something you earn, whether you're a teacher, a janitor, president of the United States or whoever,'' Osgood, 47, said.

Osgood took a leave of absence from his job as janitor and began student teaching. He hopes to land a permanent job next fall teaching science.

He graduates in May from the University of Nevada in Reno, where he has gone to school part-time for five years, driving 100 miles a day roundtrip.

Osgood previously dropped out of college three times and worked as a truck driver, a telephone lineman and school bus driver.

He has been a janitor at the school for the last three years but promised his mother he would be the first in the family to graduate from college.

-30- 1082
#90078u1415 03/19/1990 ~United Press International
BRUSSELS, BELGIUM (MARCH 19) UPI - The European Community will grant $3.48 million in emergency aid to refugees and victims of fighting in the Middle East, Africa and Asia, the community's executive Commission said Monday.

Non-governmental organizations will receive $960,000 to send medical teams and equipment, food and medicine to Lebanon. Similar aid worth $804,000 will be sent to victims of the fighting in Cambodia.

Food aid worth $780,000 will be flown by a Danish humanitarian organization to 200,000 refugees in the area of Juba, in Sudan, the Commission said.

Medical aid programs for refugees in Senegal will receive $340,800.

The U.N. High Commissariat for Refugees will receive $588,000 for a census of about 200,000 Ethiopian refugees in Somalia in view of their possible repatriation, the Commission said.

-30- 1024
#90078u1422 03/19/1990 ~United Press International
LONDON (MARCH 19) UPI - John Major, chancellor of the exchequer, prepared Monday to play to the cameras when he delivers a budget speech Prime Minister Margaret Thatcher is counting on to improve the economy and her flagging popularity.

The spending plan is expected to be aimed at reversing the upward trend of inflation so that interest rates fall substantially in the next year.

The budget address Tuesday is the first to televised live and was expected to draw an audience of several million.

Television cameras were allowed in the House of Commons in last fall, and Major has promised his first budget speech will be tailored to the requirements of television.

The speech has traditionally started with philosophy, moving to minor fiscal amendments, with the big news left until near the end. While the suspense works in the House of Commons, an home viewers would quickly lose interest.

Major also was expected to keep his speech short.

The fastest budget address on record is Benjamin Disraeli's 45 minutes in 1867. More recently, Denis Healy holds the record with one hour in 1978.

If Major follows tradition, he will carry his speech to the House of Commons in a battered red dispatch box first used by William Gladstone in 1860 during his second term as chancellor before serving two stints as prime minister.

The new budget will be followed by a midterm election in mid-Staffordshire England, Thursday, where a previously solid Conservative area was expected to fall to the opposition Labor Party.

Thatcher is counting on Major's new budget to prove the government policy of using high interest rates will succeed in bringing down inflation and soaring mortgages before she has to call elections.

The nationwide poll does not have to be called until June 1992 unless so many Conservatives turn against her that she loses her 100-seat majority in Parliament.

Thatcher has pledged to ''fight every inch of the way'' to win the next general election, a tough battle given opinion polls showing Labor has extended its lead over the Conservatives to 20 percent.

Conservative support has slid with the government's introduction of a new community charge, or poll tax, which is very unpopular and has sent pictures around the world of demonstrations clashing with riot police around England.

Analysts said it is essential for Major to assure jittery international markets that sterling is in secure hands and inflation will be tamed, while persuading voters that short-term discomfort is worth long-term success. But Major is too shrewd a politician not to have some goodies in his red box.

Relatively inexpensive gestures toward poll tax relief, working mothers, and lead-free gas are widely anticipated. Holders of company cars are expected to pay more. Support for entering the European Monetary System is indicated.

After saying in his autumn budget statement that inflation had peaked and would come down to 5 3/4 percent by the end of 1990, Major will be forced to admit his forecasts have proved too optimistic.

Analysts expected Major to argue that high interest rates will bring down inflation to around 5 percent by mid-1991.

They argued, however, that the current 7.7 percent inflation coupled with the record 15.4 percent mortgage rate, higher rail fares and utility charges, and the poll tax mean inflation will stay at at least 8.5 percent

this spring.

-30- 3657
#90078u1423 03/19/1990 ~United Press International
BRANDON, FL (MARCH 19) UPI - A devoted deli clerk, unwilling to leave her post, gave birth to a healthy baby girl at the grocery store where she worked during the weekend.

Lillie Mae Guillory, 30, was busy taking orders at the Albertsons' deli Sunday when she went into labor.

''I'm an idiot,'' she said from her bed at Humana Hospital Brandon. ''I knew I was close, but I didn't want to miss a day of work.''

Judy Foronda, an assistant manager who helped in the delivery, said the experience was a bit nerve-racking.

''My legs have finally stopped shaking. We're like a family in this store, but this is going too far,'' Foronda said.

Guillory said she told assistant store director Bobby Jackson she wasn't feeling well just before 9 a.m. Jackson said he told her to punch out and go home.

''I said, 'Lillie, you are not having that kid on my shift,''' he said.

But only a few minutes passed before Jackson was confronted by the lobby manager who said, '''Bobby, she's having her kid,''' he said.

While Jackson ran next door to enlist the help of Hillsborough County Fire Station 110, Foronda and cashier Diane Williams helped deliver a baby girl in a small room near the store's video rental department.

''I ran to the bakery to get some towels, and by the time I got back the baby's head was crowning,'' Foronda said. ''Diane held the baby, and I held Lillie's hand, and it just popped out.''

Williams, who also works as a medical assistant for a Tampa doctor, said Guillory made it through ''OK, a little scared. She was more concerned about people walking in on us than anything else.''

Guillory, a mother of two, took the birth in stride Sunday night. ''I was hoping she would wait until I punched out at 4 p.m.''

-30- 1936
#90078u1426 03/19/1990 ~United Press International

TUCSON, AZ (MARCH 19) UPI - Despite a sudden halt to contract talks this weekend, federal mediators overseeing negotiations between striking Greyhound bus drivers and company officials said they would attempt to reopen the sessions soon.

Paul Stuckenschneider, one of two federal mediators assigned to the talks, said he would be contacting both sides soon in an effort to reopen negotiations.

Meanwhile, strike-related confrontations and violence continued with two striking drivers and another motorist arrested in Stuart, Fla., for allegedly trying to run a bus off an interstate highway.

Passengers told Florida Highway Patrol officers Sunday that the two men and one woman in separate cars cut in front of the bus on I-95 and slammed on the brakes suddenly to force the bus off the road. No one was injured.

All three were booked on suspicion of reckless driving.

Stuckenschneider said many serious issues remained unresolved when the talks ground to a halt Sunday.

''It's not unusual at this stage of negotiations for both sides to remain firm in their positions,'' he said. ''We're not discouraged that it's over for now.''

But bus company officials said they had no plans to resume talks with union representatives after Greyhound Executive Vice President Anthony Lannie left the bargaining table one hour after Sunday's session had begun.

''It's broken off totally,'' he said. ''There is no plan to get back together.''

Nick Nichols, spokesman for Amalgamated Council of Greyhound Local Unions, said the union's bargaining team remained in Phoenix - less than two hours from the site of the talks - and was ready to return to the table at any time.

''Our people are on standby,'' Nichols said Monday. ''As far as we're concerned, we are still at the table.''

The session, which included nine hours of discussion Saturday, was the first between management and union officials since most of Greyhound's 9,300 union workers walked off the job March 2.

Lannie accused the union of stepping up strike-related violence and refusing to budge on what the company considered excessive wage and benefit demands.

''There is no way to reach an agreement with people who are trying to break down the company through intimidation, violence and terrorism,'' Lannie said.

Union spokesman Jeffrey Nelson in Washington said Lannie's statement was ''the desperate words from desperate man.''

''We clearly condemn violence, and anything we can do to discourage our members we are doing so,'' Nelson said.

Edward Strait, president of the Amalgamated Council of Greyhound Local Unions, disputed Lannie's characterizations of union stonewalling while issuing similar charges.

''During our meetings, company representatives refused to make any compromises - any concessions - from their previous unacceptable proposals '' Strait said.

Late last year, Greyhound offered the union a three-year contract that included a 6.9 percent increase in wages and benefits in the first year. Union members, citing a 22 percent pay cut they took when the company was sold in 1987, rejected the offer.

Greyhound has hired about 1,000 non-union replacement drivers in an attempt to return the strikebound company's operations to a near-normal timetable, angering union members.

''I am now of the opinion that Greyhound management actually believes it can destroy this Union and continue to pay pennies to its employees while top managers pocket six-figure incomes,'' Strait said.

Police have reported numerous incidents of shots fired at buses, the most serious Mar. 11 in Jacksonville, Fla., where seven passengers were hurt by flying debris when a single bullet hit a Greyhound coach.

Union representatives charged that the company returned to the table over the weekend only to avoid the filing of an unfair labor practice charge by the union.

''The union demonstrated its intent to bargain in good faith by presenting the company with a new proposal,'' Strait said Sunday. ''Our new proposal contained significant reductions in the union's total package cost and addressed some of the company's concerns about work rules and alternative pay procedure.

Strait contended that the union is most concerned about issues other than money, primarily work rules and grievance procedure arbitration.

But Lannie said the union's proposals are too expensive.

''This union is simply trying to get something that they absolutely cannot get, because the company cannot afford to pay it,'' he said.

Greyhound carried 22 million passengers last year, primarily travelers living in smaller communities.

#90078u1446 03/19/1990 ~United Press International

JERUSALEM (MARCH 19) UPI - The ultra-Orthodox Agudat Israel party decided Monday to support the Labor Party, giving Labor leader Shimon Peres an apparent edge in forming the next Israeli government.

Agudat Israel's spiritual leaders, the Council of Torah Sages, met for more than four hours before deciding to recommend to President Chaim Herzog that Labor should form the next government.

''The Council of Torah Sages in a majority decision decided that the representatives of Agudat Israel will recommend to the president today that Mr. Shimon Peres form the new government with as broad a coalition as possible,'' said Rabbi Avishi Schtokhiemer.

Since Sunday, Herzog has been meeting with political parties represented in the Israeli Parliament, the Knesset, to determine which party has the best chance of forming a new government.

Prime Minister Yitzhak Shamir's government fell last Thursday when the Knesset passed a no-confidence vote introduced by the Labor Party. Shamir's government was voted out of office after his right-wing Likud Party refused to accept an American plan to hold talks with a Palestinian delegation.

With the support of the five Agudat Israel Knesset members, Labor had a total of 60 votes in the 120-member Parliament. Six left-wing and Arab parties have already expressed their support for Peres.

By Monday evening it was not clear whether Likud, with 35 seats plus two from the right-wing Tsomet Party, would receive the backing of the remaining religious, right-wing and breakaway Likud faction Parliament members. Even if Likud had 60 votes, Herzog most likely would chose Labor since it is the larger party in the Knesset with 39 seats.

The small religious parties, which usually consult their spiritual leaders for guidance, have played a key role in the current government crisis. Five members of the ultra-Orthodox Shas party abstained from the

no-confidence vote, bringing down the government.

Herzog had asked the Shas representatives to return to his residence Tuesday to clarify their position. They told him Sunday they supported Likud but did not mention Shamir.

The Knesset member chosen by Herzog to form the next government has three weeks to put together the coalition before reporting back to the president.

#90078u1471 03/19/1990 ~United Press International

LONDON (MARCH 19) UPI - Stock prices closed lower in thin trading Monday on the London International stock exchange as investors reacted to a weaker British pound and the 4.15 percent decline on the stock market in Tokyo.

The blue chip Financial Times 100-stock index, which gained 29.0 points Friday, lost 25.9 points to 2,238.0. The narrower top 30 industrial average fell 30.6 points to 1,758.6.

Volume amounted to around 320 million shares, compared with 485 million shares traded Friday.

Analysts said the drop followed a fairly upbeat week of strong corporate earnings and institutional buying.

Market watchers noting the fall nearly wiped out last Friday's euphoric 29-point rise, blamed the drop in prices on the light trading in anticipation of Britain's annual budget to be released Tuesday and the weakness of the pound.

On the London Foreign Exchange, the pound closed more than a cent lower against the U.S. dollar, at $1.6115 compared with $1.6240 Friday.

Among the most widely traded stocks, British Petroleum PLC lost 8 cents to $5.38 after the oil giant announced it would cut 1,150 jobs from its head office as part of a reorganization.

Guinness gained 11 cents to $10.67 amid speculation the brewer will report favorable results Thursday.

Berisford International fell 14 cents to $2.14 amid worries its New York property losses outweighed bid talks with other groups including Tate and Lyle. Tate and Lyle also lost 14 cents to $4.51.

Courtaulds, the industrial materials company, added 6 cents to $6.17 as its newly created company, Courtaulds Textiles in its first day of trading ended at $4.05 a share.

Among the day's other highlights, Isopad climbed 58 cents to $2.01, Turriff gained 8 cents to $4.50 and Broadwell Land fell 22 cents to $2.08.

Elsewhere in Europe, prices closed broadly higher in active trading on the Frankfurt Stock Exchange amid investor euphoria over the strong election showing of the alliance of right-wing parties in East Germany Sunday.

The German Stock Index climbed 17.08 points to 1,906.77.

Major gainers included banks, automakers and electronic issues.

WASHINGTON (MARCH 19) UPI - President Bush, saying he is troubled by Western Europe's reluctance to open markets to U.S. agricultural exports, said Monday that European Community officials must ''take a whole new look at their farm program.''

''We've got to expand our markets aboard, and that means we're not going to have our negotiators lighten up at all on this,'' Bush said in speaking with state attorneys general at the White House.

''Generally speaking, I've been pleased with how the agricultural economy has bounded back from an abysmal low,'' he said.

Asked about efforts by his administration to reach agreement with Congress on a new farm bill, the president said he would oppose any ''one of these managed farm economy'' measures.

''A farm bill that is market-oriented and gives flexibility to the farmer (in deciding what crop to grow) will have the strong support of the administration,'' he said.

''I feel a great burden to do more in the field of agricultural exports,'' Bush said.

''We've been successful in getting ag on the table for the Uruguay Round (trade talks),'' he said. ''But we're still running into a tremendous resistance from some countries in terms of getting access to foreign markets.''

He said, ''I'm troubled about the EC (European Community), Western Europe, on this. Because we are having difficulty getting them to understand. We've got to get them to take a whole new look at their farm program.''

(MARCH 19) UPI - Pro-Independence Popular Front candidates appear headed for victory in parliamentary elections in the Baltic Republics of Latvia and Estonia. Partial results from yesterday's voting indicate nationalists in the two republics should have the strength to join Lithuania in demanding independence from the Soviet Union. Lithuania declared its independence from Moscow March 11th causing yet another crisis for Mikhail Gorbachev.

The leader of East Germany's conservative alliance says he will form a broad coalition government to guide the nation on a path to a quick unification with West Germany. Lothar de Maiziere, leader of the Christian Democrat Party and the man likely to become East German's first NON-communist prime minister, invited the Social-Democratic Party of Germany and the liberal Federation of Free Democrat to talks on forming a ruling coalition. The Alliance for Germany won 48 percent of yesterday's vote.

A published report indicates NASA's plans for a 30-BILLION-dollar space station are flawed. The report quotes sources at NASA as saying the space station Freedom canNOT be built as designed because parts will start to break down before construction is completed. The report says the maintenance problems were discovered earlier this year and NASA engineers have only preliminary ideas of how to fix them. Construction of the 400-foot-long, Earth-orbiting base is scheduled to begin in 1995.

A new study on exercise may give health nuts more ammunition to use against couch potatoes. University of Michigan biologists say preliminary findings indicate vigorous exercise may protect laboratory rats against one type of cell damage linked to cancer to heart disease. Rats that ran seven to nine miles a day appeared more resistant to cell-damaging chemicals than inactive ''cage potatoes,'' the rodent equivalent of human ''couch potatoes.'' The study was published in the scientific journal Free Radical Biology and Medicine.

WASHINGTON (MARCH 19) UPI - Wanting not to be seen as ''trying to stir up any trouble,'' President Bush continued a diplomatic balancing act Monday in refusing to recognize Lithuania's declaration of independence from the Soviet Union.

Despite U.S. support for self-determination, White House press secretary Marlin Fitzwater suggested formal recognition could imperil the peaceful resolution of the secession crisis confronting Soviet President Mikhail Gorbachev.

His explanation of that wait-and-see policy indicated an overriding desire to give Gorbachev time and flexibility to deal with unrest in the Baltic states and do nothing to ''exacerbate the problems or attitudes on either side'' of the conflict.

''There are risks on both sides, there are opportunities on both sides and we want to walk the course that maximizes the opportunity for a peaceful conclusion of this issue,'' Fitzwater told reporters.

Since the Lithuanian parliament declared independence March 11, Bush has walked a careful diplomatic line, withholding formal recognition while noting the United States never regarded Lithuania, taken by force 50 years ago, as part of the Soviet Union.

The State Department and White House have insisted that position reflects a longstanding policy of recognizing only governments that are in ''control of their destiny'' or in ''control of their territory.''

Fitzwater all but acknowledged that those conditions, which would seem to require acquiescence from Moscow before the United States recognized an independent Lithuania, seem to have been applied selectively.

In the recent case of Panama, the United States recognized the new U.S.-installed government even before the old regime of Gen. Manuel Noriega was toppled. Fitzwater, however, said it ''doesn't pay'' to compare the two cases.

U.S. policy, he said, is ''that we should be a force for encouraging a peaceful process of development of democracy and not one of trying to stir up any trouble.'' He suggested U.S. recognition of Lithuanian independence would require a political judgment rather than fulfillment of specific criteria.

''Those are matters that have to be negotiated,'' he said.

Soviet Foreign Ministry spokesman Gennady Gerasimov warned Monday that recognition of Lithuania as a free country ''would be more than offensive to the Soviet Union'' and amount to ''intervention in the internal affairs of the Soviet Union.''

#90078u1513 03/19/1990 ~United Press International

BANGKOK, THAILAND (MARCH 19) UPI - Vietnam's powerful army has held nationwide meetings that harshly criticized the Communist Party for corruption, special privileges, sex scandals and ''too much talk and too little action,'' according to a Hanoi report made available Monday.

''Over the past three weeks, all military units of the entire army have held conferences to study the party draft program on mobilization work and have contributed tens of thousands of ideas,'' the official Hanoi radio said in a broadcast, which was made available Monday.

It said the party's efforts to improve the economy had yielded ''unsatisfactory results'' and cited a string of sex and financial scandals.

''Many other combatants said that there has been too much talk and little action for quite a long time,'' it said.

Many military men believe ''that leading party cadres from the central level down to grass-roots units should conduct self-criticism on their shortcomings,'' said the broadcast, which was aired last Wednesday.

The top leaders of the party are currently meeting in Hanoi to consider plans to improve the party's mass mobilization and restore its sagging prestige.

In an unusual move that reflected efforts at controlled liberalization, the party invited public comment on its plans.

The response in low-level meetings, articles and letters to newspapers has been harshly critical of the party's performance and its timid plans for reform.

But the tough response from the military must be especially worrying to party leaders because the million-man army has been at the forefront of the party's only major successes - its victories over the French, the Americans and the Chinese.

The near bankrupt government has forced the army to accept drastic cuts in its budget and a 500,000-man reduction in its manpower.

The report said many military men were indignant that top party officials were ''leading luxurious lifestyles and living in big houses while many combatants, workers, and state personnel live in small huts and cottages.''

It said troops and officers were angered by the loss of millions of dollars from the state bank due to bad loans to friends and political allies of bank officials.

The report said others were upset at a sex scandal at a restaurant-brothel involving 103 party officials.

The Vietnamese military has been under tight control of the party since

its founding during the struggle against French colonialism. Military leaders generally have a major role in party affairs.

#90078u1532 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - Defense Secretary Dick Cheney and White House officials Monday denied a news report that the Bush administration is willing to triple the spending cut that it proposed in the fiscal 1991 military budget.

Cheney, referring to the administration's proposed $3.9 billion reduction, said, ''These are real cuts. They are big ... but these cuts are as far as we responsibly can go.''

White House press secretary Marlin Fitzwater said, ''Our position is that we have proposed a budget that calls for something like $3.9 billion in cuts. We intend to stick with that proposal. That is our proposal.''

The New York Times reported Sunday that Bush - under pressure from Capitol Hill - is willing to accept $10 billion to $11 billion in cuts from his fiscal 1991 $306 billion defense budget.

''We can save a lot of money out of the defense budget, but we ought to do it over time,'' Cheney said in response to questions following a speech to the American Defense Preparedness Association.

Fitzwater said that while the administration is firm on its proposed cut

of about $3.9 billion for fiscal 1991, if the Soviet military threat continues to diminish there certainly will be deeper defense cuts in the future.

A defense official who asked not to be identified said, ''We don't favor cuts of $10 billion to $12 billion. The figures we sent up (to the Hill) were good and sound.''

The official also denied that Cheney was under any pressure from within the administration to cut more from defense.

#90078u1544 03/19/1990 ~United Press International

EMMAUS, PA (MARCH 19) UPI - Reports about the use of pesticides and other chemicals on foods prompted a significant number of Americans to change their eating habits and, in some cases, buy organic produce, a survey released Monday said.

The nationwide survey, conducted by Louis Harris and Associates Inc. for Organic Gardening magazine, found 30 percent of Americans interviewed between Nov. 6 and Dec. 13 changed their eating habits in some way after negative reports about pesticides.

The second annual telephone survey of 1,250 people also found 28 percent sought out organic produce or produce grown with limited use of chemicals after the publicity.

Organic fruits and vegetables are grown without the use of pesticides or synthetic chemical fertilizers.

The respondents were almost equally divided, however, over whether the federal government did a good job in protecting consumers from pesticides. While 47 percent thought the government did a good job, 48 percent thought officials did a poor job of policing the food industry. Another 5 percent said they were not sure.

''The message of this poll is clear. Americans are not willing to wait as government and environmental groups debate exactly what level of pesticide residue is safe for consumpton,'' said Stevie Daniels, executive editor of Organic Gardening, published by Rodale Press of Emmaus.

''They realize that the organic alternative is the answer, and they want government and conventional agriculture businesses to respond to their demands. What holds true for the home garden is also true on a larger scale - organic works,'' Daniels said.

The 1989 poll, like the 1988 poll, showed 84 percent preferred organically

grown fruits and vegetables, but only 44 percent said they would pay more for such produce, a slight drop from 1988's 49 percent.

Nearly 65 percent said long-term health effects were the most important reason for eating foods grown without pesticides, up from 56 percent the previous year.

Those most likely to have changed their eating habits over the last year included blacks, women, people under 50 and residents of the East. East and West Coast residents, city dwellers and those with higher incomes and education levels were more likely to specifically seek out organic produce.

''The 1988 poll results on organic preference, taken before the alarming reports on Alar and other pesticides in our food, are almost identical to the results from our current poll, taken in 1989 after those reports,'' Daniels said, referring to the use of the chemical Alar on apples.

''This shows that the organic mandate is not a passing fad fueled by fear, but a clear preference fueled by reason.''

#90078u1547 03/19/1990 ~United Press International

NEW DELHI, INDIA (MARCH 19) UPI - Prime Minister V.P. Singh's government Monday unveiled a budget designed to help the poor in which big companies and luxury goods are taxed heavily to support a massive fund diversion to rural areas.

Finance Minister Madhu Dandavate presented to the lower house of Parliament, or Lok Sabha, a spending plan of $55.6 billion, an increase of 7.7 percent over the current budget that ends March 31.

The new government also steeply increased by 21 percent funds to the Indian military, setting aside $9.26 billion.

''This increase in the defense expenditure is not of our choice. It is the direct result of the situation on our borders,'' Dandavate said referring to the strained ties with neighboring Pakistan following uprising in the Indian side of the Moslem-dominated Kashmir region.

The nearly 2-month-old unrest in the region initially ignited fear of a fourth-round of war between the two countries. But since then, leaders from the two countries have downplayed the possibility of war over Kashmir.

The proposals for the April 1990-March 1991 fiscal year increased funds to agriculture, rural and irrigation development by a massive 41 percent to $2.63 billion, upholding an electoral pledge by the minority National Front coalition government to transfer 50 percent of resources to rural

areas.

The rural sector would also benefit from allocations made for energy, transport, social services and fertilizer subsidy that would benefit farmers.

''We are committed to ensuring that 50 percent of the investible resources are deployed for the development of agriculture and rural development,'' Dandavate told members about his government program that would certainly please India's teeming poor - most of whom live in rural areas.

In a gesture to express its concern for rural poor, the government proposed to write off bank loans of up to $588 to help rural poor. Other populist measures included new employment programs, higher prices for agricultural produce and fertilizer subsidies.

The finance minister has proposed stiff doses of taxes on big companies to partially finance the welfare programs.

He told members that taxes on big companies would fetch the government $4.7 billion. In addition, he slapped nm 8 percent surcharge on all corporate income above $4,400.

The finance minister also proposed raising taxes on goods used by the upper middle class such as refrigerators, cars, air conditioners, video cassette recorders, gasoline and tires.

The proposed budget projected a deficit of $4.2 billion rupees - a gap of 8.02 percent over proposed receipts during the fiscal year which opposition leaders criticized as a move that would fuel inflation.

#90078u1569 03/19/1990 ~United Press International

DETROIT (MARCH 19) UPI - A good balance between sales and production may provide the opportunity for automakers to reduce buyer incentive lures to boost second quarter profits from expected poor first quarter results, industry analysts said Monday.

Automakers, which are spending an industry average of $1,000 or more to sell their vehicles under current buyer programs, could scale down those offers to $600 or $800 per car without seeing a substantial decline in sales, they said.

Buyer rebates now expire in early April and May among top U.S. carmakers, but those dates have almost become meaningless because of the endless rounds of offers from carmakers to spur generally soft sales since October.

Those lures are also not likely to go away. And despite sharply lower production during the first quarter of 1990, there will not be a shortage of new cars or trucks this spring as some automakers have suggested.

"At this stage, it is impossible to argue that there is any pent-up demand for cars because of so many strong sales cycles since 1984," said Michael M. Luckey, of The Luckey Consulting Group, in Tappan, N.J.

"They are giving money to people who would have bought cars anyway," Luckey said. "I firmly believe that the person who bought a car with a $1,000 rebate would have probably bought that same car under a $500 rebate."

Both domestic and import carmakers saw their U.S. inventories generally decline during early March from levels earlier this year, although some models are still in high supply.

Automakers could revise their broad-based programs by going back to ones that offered discounts on specific models. "They could keep the big rebates on some models, while lowering others to the $600 to $800 range and taking them off altogether on the popular models," said Thomas O'Grady of Integrated Automotive Resources Inc., of Wayne, Pa.

"But they have to try and pull back gradually, or sales will just plummet," O'Grady said. "People have to be weaned away slowly." That weaning could mean substantially improved second-quarter profits, especially from first-quarter levels, which analysts expect to be dismal when they are announced next month by General Motors Corp., Ford Motor Co., and Chrysler Corp.

Ronald Glantz, of Dean Witter Reynolds Inc.'s San Francisco office, estimates GM's first-quarter earnings will fall to 70 cents a share, from $2.29 a share earned during the first quarter of 1989.

Ford, probably the only automaker to earn money on its North American car operations, will earn $1 a share, down sharply from $3.44 a year ago, Glantz said, while Chrysler is expected to post a loss of 35 cents a share compared with a profit of $1.50 a year before. "Those results are because of the high costs of rebates and a production drop that is about 100,000 units less than in the fourth quarter of 1989," he said.

Analysts agree there will be an improvement in second-quarter profits just because of improved production rates. "But cutting back on the cash rebates would mean even better earnings," O'Grady said.

#90078u1570 03/19/1990 ~United Press International

NEW YORK (MARCH 19) UPI - A survey of 1,004 adult Americans shows

two-thirds of them feel TV programs that ridicule religion, home and mother should be censored, regardless of their popularity, Parents Magazine reported Monday.

The random telephone survey showed that 74 percent of those questioned thought vulgar four-letter words should not be allowed on television at any time.

Seventy-two percent said there should be a ban on ridiculing or making fun of religion.

Sixty-two percent said there should be no ridiculing or making fun of traditional values, such as marriage or motherhood.

Fifty-five percent said scenes that suggest but do not actually show homosexual activity should be cut, and 54 percent said they did not want to see objective discussions of Satanism.

Only 3 percent of those polled rated television programming as excellent, with 46 percent saying it was fair.

Nine percent said they felt programming was ''terrible,'' 16 percent said it was poor and 23 percent felt it was good.

But half the viewers questioned said scenes suggesting sexual activity between adults or including graphic violence were acceptable as long as the programs were restricted to late nights.

Despite the unhappiness with programming, a majority of those surveyed said they watched television every day.

The survey was conducted for Parents Magazine by Kane, Pearson, & Associates. The margin of error of the poll is plus or minus 3.1 percent.

#90078u1573 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - House Republicans raised objections Monday to the Democratic leadership's plan to bring a controversial child care bill to the floor for a vote this week.

The bill has been the subject of negotiations among Democrats for several months and final details still were being worked out Monday. Republicans complained that no copy of the bill was available and said they need more time to examine the measure and prepare possible amendments.

The bill is intended to help low-income families find and pay for child care and is one of the top priority items on the Democrats' social

legislation agenda.

The measure has been stalled for several months by differences between the Ways and Means Committee and Education and Labor Committee on how to finance the program, but a compromise reportedly was reached late last week.

The Democratic leadership said Thursday the bill was not scheduled for consideration this week, but that was changed late Friday and Republicans learned Saturday that the bill would be scheduled.

When the House convened Monday, Rep. Robert Walker, R-Pa., objected to the short notice given the GOP.

''They've cut their deals and now they want to rush it to the floor,'' Walker said of the Democrats.

Assistant Republican leader Newt Gingrich, R-Ga., said he understood the Democrats ''have not finished writing the liberal version of the child care bill. That they have not finished finding the exact wording of their version. That it is in fact still being negotiated by Democratic staff and that no one has seen the final product.''

Rep. Dave Nagle, D-Iowa, speaking for the Democratic leadership, confirmed that final details still were being worked out and that copies of the bill were not yet available.

The House Rules Committee was scheduled to consider the bill Tuesday and adopt the rules for debate on the measure when the full House takes it up Wednesday or Thursday.

#90078u1582 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - Defense Secretary Dick Cheney disagreed Monday with CIA Director William Webster's assessment to Congress that the reforms in Eastern Europe are irreversible and reduce the Soviet military threat to the West.

''Bill Webster and I have a difference of opinion,'' Cheney said in response to a question at a meeting of the American Defense Preparedness Association.

''My job as secretary of defense, I think, calls for me to err on the conservative side before I declare that the Soviets no longer constitute nor will they in the future constitute a significant military threat to the United States and our allies.

''... There are all the things you can tick off that lead me at this point to say we have to be very cautious.''

Cheney said the transition to democracy in Eastern Europe ''is far from complete.''

''It may turn out to be much easier to topple old regimes than to build new ones in their place,'' he said. ''It's great to have the Berlin Wall down but there's still 15, 16 Soviet divisions in East Germany.

''It's nice that we're making progress on strategic arms talks, but even after we complete that treaty, the Soviets are going to retain robust nuclear capability. They'll have that capability long after Mr. (Soviet President Mikhail) Gorbachev's gone from the scene.

''I cannot in good conscience look at that situation ... and not be concerned that we may indeed at some point down the road be faced with a government in the Soviet Union that is possessed of enormous military capability and is not nearly as benign toward the West as has been Mr. Gorbachev,'' Cheney said.

Cheney has repeatedly cited a continuing Soviet threat to argue that Congress should not cut the fiscal 1991 defense budget farther than the 2 percent he has already proposed.

Webster testified to Congress that he believes the changes in Eastern Europe are irreversible and that the Soviets can no longer count on their Warsaw Pact allies in a major conflict.

#90078u1617 03/19/1990 ~United Press International

MCPHERSON, KS (MARCH 19) UPI - The National Cooperative Refinery Association said Monday it would seek offers to buy substantially all of its oil and gas exploration and production properties. Reserves are estimated to be the equivalent of approximately 20 million barrels of oil.

The sale, plans for which were approved by the cooperative's board, would cover about 350,000 acres of undeveloped leasehold properties, certain gas processing plants and related assets.

The cooperative said the properties would be sold separately and according to region - west Texas/southeast New Mexico, San Juan Basin, Oklahoma, Rocky Mountains and Kansas.

The cooperative, involved in petroleum exploration, production, transportation, refining and product distribution, has a 70,000-barrel-a-day petroleum refinery and its corporate headquarters in

McPherson.

The cooperative is owned by Farmers Union Central Exchange Inc. of St. Paul, Minn.; Farmland Industries Inc. of Kansas City, Mo.; Growmark Inc. of Bloomington, Ill.; and MFA Oil Co., Columbia, Mo. Advisers on the sale of the properties are Texas Commerce Capital Markets and Chemical Bank Investment Banking.

#90078u1629 03/19/1990 ~United Press International

PORT-AU-PRINCE, HAITI (MARCH 19) UPI - President Ertha Pascal Trouillot installed her Cabinet Monday and told its members that both she and they would get a cut in pay as a gesture toward helping Haiti's impoverished masses.

Trouillot also made an urgent appeal to the United States and European countries for economic assistance to help Haiti make the transition to a democratic government after more than three decades of brutal Duvalier family dictatorship and the chaotic military regimes that replaced it.

Trouillot did not say by how much salaries would be cut. The president's official salary is only the equivalent of about $10,000 a year and that of Cabinet ministers officially is $5,000.

A Haitian factory worker, for example, earns about $3 a day. About 60,000 Haitians work in assembly factories, putting together U.S.-made products for reshipment back to the mainland. Most of Haiti's 6 million people are unemployed or eke out their livelihood in subsistence farming. Yearly per capita income is $365, lowest in the Western Hemisphere.

As she had at her inauguration last week, Trouillot, Haiti's first woman president, pledged to call early elections to allow the people to pick a permanent, democraticlly elected government.

Key appointments to the 13-members Cabinet were Interior Minister Joseph Maxi, president of the Haitian League of Human Rights who has been in hiding during a state of siege, and Justice Minister Pierre Labiessiere, a former member of the Electoral Council that organized the aborted elections of Nov. 29, 1987.

The new Cabinet will work with the 19 members of the State Council and the president to solve acute problems of the public administration.

Trouillot, a member of the Supreme Court, was named president after military dictator Prosper Avril fled to Florida last Monday. Avril, who had taken control of Haiti in a military coup in September 1988, was forced out of office after days of increasingly violent popular

demonstrations throughout the country against his regime.

#90078u1639 03/19/1990 ~United Press International

CHICAGO (MARCH 19) UPI - United Airlines' three major unions and its biggest stockholder joined forces Monday to press a $5.2 billion employee buyout of UAL Corp., parent company of the airline.

The Association of Flight Attendants, the Air Line Pilots Association and the International Association of Machinists and Aerospace Workers agreed to back a proxy solicitation by Condor Partners, L.P., to elect a new UAL board of directors at the annual meeting April 26. Condor said its slate will include four candidates selected by the unions.

In return, New York-based Condor, an affiliate of Coniston Partners, L.P., pledged to work to enable the United Employee Acquisition Corp. to acquire UAL.

The buyout proposal would give shareholders $150 per share in cash, $25 per share in 10-year senior subordinated notes bearing 15 percent interest and non-voting common stock constituting 25 percent of the new company's total common equity. The remaining 75 percent would be held by an Employee Stock Ownership Plan.

The unions and Condor declined to put a price tag on the buyout. But Robert Decker, airline industry analyst for the Chicago-based investment-rating firm Duff & Phelps, estimated the total value of the deal at about $230 a share, or $5.2 billion.

''I'd say it comes in in the upper range of what I've expected - which was $220 to $240 a share,'' Decker said. ''Of course, valuing a stub (the 25 percent non-voting equity portion of the deal) is always tricky because it's hard to determine what value the new company will have.''

UAL Chairman Stephen Wolf issued a statement saying the board ''is prepared to give careful consideration to any offer from Condor Partners and the three unions of UAL to attempt to effect the acquisition of the company.''

''The board will meet shortly to discuss this matter, as well as alternatives for realizing shareholder value,'' the statement said.

The new buyout proposal calls for the three unions to enter into new collective bargaining agreements at the time of the acquisition, providing the reformed company with labor-cost reductions. The unions said the concessions, combined with projected cost-modifications for non-union employees who also will take part in the buyout, would produce substantial

savings.

A statement by the United Employee Acquisition Corp. said the company also would realize savings from tax benefits related to the ESOP.

The unions' statement, released in New York, said consummation of the merger would be subject to stockholder approval at a subsequent stockholders' meeting, receipt of financing and ratification of the new labor contracts.

Wolf, who engineered a $6.75 billion, $300 a share employee-led buyout bid that collapsed last fall for lack of financing, has been left out of the new employee buyout.

Board sources said Wolf had lobbied against the new bid because employees had refused him a share in the deal.

Under last fall's failed proposal, a management group led by Wolf would have taken a 15 percent stake in UAL, with employees getting 75 percent and British Airways 10 percent.

UAL stock crashed when that deal collapsed, dropping from more than $290 a share to around $120 before new buyout talk perked interest.

UAL stock jumped Monday at news of the agreement between the three unions and Condor, which holds 11.8 percent of UAL's common stock. UAL stock was up $8.50 to $151 in early afternoon trading on the New York Stock Exchange.

Condor demanded that UAL directors act to bolster stock value following the collapse of the $6.75 billion, $300 a share deal, and threatened to seek control of the UAL board unless directors found a buyer or began pursuing restructuring plans by Jan. 8.

It extended that deadline earlier this year after the three unions and a non-union employee group agreed for the first time to work together on a new buyout bid.

Condor has advised the UAL board that it believed an employee-led buyout should be the company's first priority.

#90078u1645 03/19/1990 ~United Press International

LONDON (MARCH 19) UPI - British Petroleum Co. PLC announced Monday it will eliminate 1,150 jobs at its London headquarters as part of an effort to cut costs and reshape the company's central organization. BP, which has 118,000 employees worldwide, said the eliminations will be phased in over the summer.

Spokesman Ian Fowler said that 900 people will be dismissed from the company and that the other 250 will be transferred to different posts among BP's four core businesses.

Fowler said BP, the world's third-largest oil company, decided the reductions were necessary after studying the company's needs in light of a reduction in the number of its international businesses from 11 to four over the past decade.

Among those whose jobs are being cut are an undisclosed number of top- and middle-level managers. The bulk of the headquarters eliminations will come from the information system and the office maintenance and support services areas, the company said. Fowler also said the company was planning to move headquarters out of the Britannia House complex to a smaller site nearby later this year.

Robert Horton, BP's chairman, wanted to simplify communications throughout the company and therefore ordered the abolishment of about 20 committees within the head office, Fowler said. "What he wants to see is a flatter corporation with more personal responsibility, more clear reporting lines " said Fowler.

#90078u1650 03/19/1990 ~United Press International

LONDON (MARCH 19) UPI - Rampant coastal development and land-based pollutants threaten the world's oceans far more than oil spills or waste dumping, leading marine scientists said Monday.

''Man's fingerprint is found everywhere in the oceans,'' said a report issued by the Joint Group of Experts on the Scientific Aspects of Marine Pollution.

Twenty leading marine scientists spent three years compiling the 104-page report, which they described as ''the first serious scientific overview'' of the health of world oceans in eight years.

Professor Alasdair McIntyre of the University of Aberdeen, chairman of the study, compared oceans to a human body.

''The heart is good, the lungs are good, but there is a very definite tingling along the fingers and extremities,'' McIntyre said at a news conference. ''If something isn't done about it soon, then local problems will become global problems.''

The study, sponsored by the United Nations and six other international groups, found that the open seas were still relatively clean, while

coastlines were threatened.

''Destruction of beaches, coral reefs and wetlands, including mangrove forests, as well as increasing erosion of the shore, are evident all over the world,'' the report said.

''If unchecked, this trend will lead to global deterioration in the quality and productivity of the marine environment.''

The scientists estimated that runoff and land-based discharges caused 44 percent of pollution in seas, pollution in the atmosphere caused 33 percent, maritime transportation 12 percent, waste dumping 10 percent, and offshore oil and gas production 1 percent.

Pollution from offshore oil and gas production is not as serious as was once thought, the report said.

The most significant threat to the marine environment along coastlines is from the combined effects of coastal development, which is destroying the habitats of marine organisms, and the contamination of beaches, the report said.

''Habitats are being lost irretrievably to the construction of harbors and industrial installations, to the development of tourist facilities and mariculture, to the growth of settlements and cities,'' the report said. Mariculture refers to saltwater fish and shellfish farming.

The progressive build-up of chlorinated hydrocarbons, pollution of the beaches by plastic litter, overenrichment of coastal waters by phosphates and nitrates and accumulation of tar on beaches are of primary threat to the health of oceans, the report said.

McIntyre said marine mammals and birds are at greatest risk as the world population continues to expand, heightening the pressure to build more homes and resorts along coastlines.

Miles of lost or discarded nylon nets used by commercial fishermen create a ''wall of death,'' entangling fish and drowning them, McIntyre said.

Coastal marine pollution also could threaten the health of humans if corrective measures are not taken, the report warned.

''The most clearly identified health risk associated with coastal marine pollution by urban wastewater is the transmission of disease by the consumption of raw shellfish harvested in contaminated areas,'' it said.

The report also found a connection between water polluted by sewage and human gastrointestinal diseases, particularly among children under age 5.

McIntyre called for tighter restrictions to reduce wastes and international cooperation to help ensure the continued health of the oceans.

''By the end of this decade, if nothing is done, there will be very much more deterioration,'' he said.

#90078u1654 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - The chief prosecutor at John Poindexter's Iran-Contra trial asked a question Monday that strayed into testimony Poindexter gave to Congress under a grant of immunity, setting off a brief courtroom furor.

The problem occurred during testimony by Rep. Lee Hamilton, D-Ind., who was chairman of the House intelligence committee in November 1986 as the Iran-Contra scandal came to light.

Hamilton, who attended a briefing by Poindexter on November 21, 1986, appeared as a prosecution witness at Poindexter's Iran-Contra trial and testified that Poindexter did not tell the committee about a politically embarrassing order signed by Ronald Reagan authorizing an explicit arms-for-hostages deal with Iran.

Hamilton's testimony was at the heart of the case against Poindexter, who is on trial on five criminal charges that he conspired to deceive Congress, obstructed congressional inquiries and made false statements to Congress.

During questioning by deputy Iran-Contra prosecutor Dan Webb, Hamilton strayed into a portion of Poindexter's congressional testimony during the summer of 1987. Because Poindexter was compelled to appear before Congress under a grant of immunity, that testimony cannot be used against him during the current trial.

Webb's question dealt with Poindexter's revelation to Congress that he ripped up the first of three ''findings'' by Reagan. The first - from December 1985 - was the most politically embarrassing because it explicitly linked secret U.S. arms sales to Iran with attempts to win freedom for American hostages in the Middle East.

Webb asked Hamilton if Poindexter ever told him he destroyed Reagan's original finding the same day he held the Nov. 21, 1986, briefing for Hamilton and members of his committee.

''He did, but ...'' Hamilton said, stopping in mid-sentence as lawyers for both sides jumped to their feet. Webb's assistant, Howard Pearl, lunged

toward Webb in an effort to grab his arm.

Poindexter's lead lawyer, Richard Beckler, swiftly objected - and then withdrew it, saying he would save the issue for subsequent arguments.

Webb quickly realized his mistake - that he had asked a question that easily could refer to testimony Poindexter gave under immunity to another committee headed by Hamilton - and rephrased his question. He asked if Poindexter ever told the intelligence panel that he ripped up Reagan's finding the same day he gave the briefing in the White House situation room.

''No,'' Hamilton said.

Hamilton was also chairman of the House committee that, along with a Senate panel, investigated the Iran-Contra scandal during the summer of 1977 and heard the immunized testimony of Poindexter and others.

Poindexter, a retired Navy rear admiral, was Reagan's national security adviser and is the highest-ranking Reagan administration official to stand trial in the scandal.

The trial entered its third week before U.S. District Judge Harold Greene. Poindexter's wife, Linda, an Episcopal priest who has attended sporadically in support of her husband, was present.

Hamilton testified that when the congressmen attended the briefing, they were only told about Reagan's third finding of Jan. 17, 1986, from which the explicit arms-for-hostages language had been deleted. The prosecution has referred to that version as the ''sanitized finding.''

Hamilton testified that if Poindexter had told the committee about CIA involvement and knowledge of the first of five arms shipments to Iran - in November 1985 - members would have asked for the earlier finding that authorized it.

Hamilton said he had expected Poindexter to make ''a full disclosure'' at the briefing, because Reagan had stated publicly that he wanted the American people to know everything about the scandal. It involved diverting some of the profits from the Iranian arms sales to assist the rebel Nicaraguan Contras when Congress had banned such aid.

Hamilton also testified that the White House did not provide all relevant documents to his committee, which it had a legal right to. The documents "will tell you the story - we call it the paper trail,'' Hamilton told the jury.

#90078u1666 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - President Bush, his arm and glove ready, is checking all bases to see if he can throw out a first pitch in the lockout-delayed 1990 baseball season, the White House said Monday.

''He wants to go'' to an opening game, ''but I don't know when,'' press secretary Marlin Fitzwater said just hours after major league baseball owners and players agreed to end their labor dispute and begin the season a week late.

Bush, a former Yale first baseman who keeps his glove in a desk drawer, threw out the ceremonial first pitch last year at Baltimore's Memorial Stadium. He had been scheduled to take the mound this year in Cincinnati on April 2.

But the baseball lockout pushed back Opening Day to April 9, and the president's 1990 baseball debut is uncertain.

Fitzwater said Bush ''would like to'' throw out a ceremonial first pitch. ''But I don't know. We are working on all options.''

Bush told a White House news conference last week that he would not intervene in the baseball labor dispute, but appealed to ''both sides to get the matter resolved so the American people can hear that cry, 'Play ball,' again.''

Fitzwater, asked Monday if he believed Bush's plea helped end the lockout, said, ''I don't think we better take credit for it. It went on too long. I'm not sure there is much glory to be had in the resolution of the issue.''

Bush said last week that since he threw out a first pitch last year in an American League park, he would like to go to a National League city this year.

''Look, I'm a baseball fan. I want to go to the opening game someplace,'' said Bush. His son, George W. Bush, is part-owner of the Texas Rangers, an American League team.

#90078u1671 03/19/1990 ~United Press International

DETROIT (MARCH 19) UPI - Ford Motor Co. said Monday it is recalling about 60,000 1990-model Ford Tempo and Mercury Topaz compact cars to replace the engine cooling fan.

Ford said the fan blades on those front-drive cars could wobble during

start-up and rub against the fan shroud, causing the fan motor to overheat. That could cause the engine to overheat, although owners would be warned by an engine indicator light, the No. 2 automaker said.

Ford, which was made aware of the problem through an unspecified number of complaints from owners and dealers, is asking owners to return their cars to dealers to have the fan motor replaced free of charge. The repair is expected to be done in about an hour, Ford said. All Tempo and Topaz cars are equipped with a 2.3 liter four-cylinder engine.

#90078u1712 03/19/1990 ~United Press International

ORLANDO, FL (MARCH 19) UPI - Richard Stegemeier, chairman of Unocal Corp. said Monday that Congress should consider hiking gasoline taxes as a way to pay for cleaning up the environment or upgrading transportation.

"It's well known that gasoline taxes in the United States are ridiculously low compared to the rest of the world. Gasoline, including tax, in the United States is about $1 a gallon. Gasoline in Europe, Asia and so on is closer to about $3 a gallon," Stegemeier said at the annual meeting of the American Institute of Chemical Engineers.

"Certainly, Americans could afford to pay more than they do for gasoline. The question comes: what would these tax moneys be used for?" he said. If dedicated for transportation or environmental purposes, "I guess we would all agree" on raising the gas tax, Stegemeier continued. He said Americans want both cheap energy and protection of the environment - what he called contradictory goals.

"It's fairly clear that we're going to see increases in environmental legislation in the coming years," he said. "We must find a way to harmonize valid environmental concerns with our growing need to produce and use a balanced mix of energy resources. To do this successfully, we're going to need every creative ... idea we can get."

But Stegemeier said environmental damage control is already costing industry $80 billion a year and complained that regulations were to restrictive: "Wherever possible, we should replace complex rules and regulations with basic environmental goals and standards. ... We need more innovation, less litigation. We need more results and fewer rules."

Stegemeier applauded the Bush administration's plan that would allow

companies to buy and sell each other air-pollution "credits."

"The more efficient companies have an economic incentive to exceed pollution standards. This transforms pollution control into a profit center. It could be a very efficient way to reduce air pollution," he said.

"We should back off from our temptation to legislate and regulate technology and let the free-market system and our engineers and designers do what they do best."

(MARCH 19) UPI - Partial election results from the Soviet republics of Latvia and Estonian show candidates advocating independence from Moscow appear to be headed for victory and control of their local parliaments. Victories by nationalists in elections yesterday would put Estonia and Latvia right behind Lithuania in the Baltic race for independence. Lithuania's parliament declared independence last week.

East Germany appears on the fast track toward unification with West Germany. Fresh from an election victory that gave him a sweeping endorsement toward unification... the leader of East Germany's conservative alliance today vowed to form a broad coalition government. Conservative leader Lothar de Maiziere says the talks on forming a coalition may begin this week.

A Lebanese newspaper says former President Carter met with leaders of the pro-Iranian Hezbollah last week to try to arrange freedom for Western hostages. The daily Ad Diyar newspaper, which has contacts with Syria, quotes diplomatic sources as saying Carter met Hezbollah leaders in Damascus. A Hezbollah official in Beirut called the reported meeting ''a mere lie.''

African National Congress Secretary General Alfred Nzo cautioned the Organization of African Unity against re-establishing ties with South Africa today. Nzo told a O-A-U committee meeting in Zambia that the O-A-U must keep up the pressure on white-minority-led South Africa to resolve that nation's racial conflict.

More residents of southern Alabama fled from rising waters today, joining some four-thousand people forced from their homes by torrential rains. Aides to Alabama Governor Guy Hunt says he will seek federal disaster relief for flood-stricken areas and will make an aerial tour of flooded southeast Alabama today.

(MARCH 19) UPI - The U-S Supreme Court today let stand a lower court ruling allowing a suicide victim's family to sue the Washington, D-C, subway system in a case involving its drug-testing policies. The case stems from the 1986 death of a 29-year-old woman who jumped in front of a moving subway train, operated by a man who tested positive for marijuana and cocaine after the incident.

Comedian-Actor Robin Harris is dead at the age of 36. Harris, who appeared in the movies ''House Party,'' ''Do the Right Thing'' and ''Harlem Nights '' was found dead yesterday morning in his hotel room in Chicago following a theater performance. The cause of death was NOT immediately known. Authorities say there were NO signs of violence.

Little leaguers near Tampa, Florida, are mourning the death of a 10-year-old boy who died after being hit in the chest by a wild pitch during a baseball game yesterday. Authorities say Ryan Wojick was up to bat when the ball struck him in the chest near his left armpit. Wojick collapsed on the field and died later at Tampa hospital.

Los Angeles authorities report at least 15 people died in another weekend of violence. Police say one of the victims was shot to death while trying to help his handicapped brother out of the way of robbers who stole their car. Police say the brothers were stopped at a traffic light when two men forced their way into the car at gunpoint and forced them out.

#90078u1762 03/19/1990 ~United Press International
CINCINNATI (MARCH 19) UPI - Federated and Allied department stores have asked a bankruptcy judge to approve an employee retention plan designed to keep key managers from leaving.

In documents filed Friday in federal bankruptcy court in Cincinnati, the stores said the plan would counteract the period of instability experienced since the takeover of Federated and Allied by Campeau Corp.

"If key employees are lost, it will be difficult and very expensive ... to attract replacements," Federated said. Hiring new employees would involve large signing bonuses, relocation expenses and executive search fees, the company said. "During the period in which a position is not filled, sales and profits are likely to suffer," it said.

"Furthermore, the loss of one key employee is likely to lead to more losses, either as a result of employees who follow their colleagues to the same new employer, or because of the instability and impairment of morale resulting from the vacancy."

The plan will affect about 2,300 of the roughly 101,000 employees of Federated Department Stores Inc. and Allied Stores Corp. It includes a bonus plan that will cost approximately $10.6 million in the first year and $11 million in the second year.

Federated and Allied filed for temporary protection from their creditors under Chapter 11 of the U.S. Bankruptcy Code. Federated and Allied were left heavily in debt when they were taken over in a leveraged buyout by the Campeau Corp. of Toronto.

U.S. Bankruptcy Judge Vincent Aug Jr., who is handling the case, has said he wants to keep Federated operating as best it can during bankruptcy proceedings in order to help the firm eventually thrive on its own and repay as much of its $7.7 billion debt as it can.

Federated said key managers are being courted by competitors offering them new opportunities. The company listed four components to the employee retention plan:

- Agreements that provide for continuation of salary if an employee's services are no longer needed.
- Termination agreements that provide for continuing payments in lieu of salary if a key employee is terminated after a "change of ownership."
- A master severance plan that gives enhanced severance pay to provide "similar security for a broader spectrum of employees."
- A bonus plan that rewards employees based on corporate performance. This

plan is designed primarily to prevent workers from leaving voluntarily during the first two critical years following the Chapter 11 filing.

"The overall program is designed to retain key employees by both eliminating reasons why they might leave and giving them good reasons to stay," Federated said.

WASHINGTON (MARCH 19) UPI - Yields for 13-week and 26-week T-bills edged up Monday at the government's weekly auction.

The Treasury Department auctioned $8 billion of 13-week bills at an average discount of 7.97 percent, up from 7.96 percent at last week's auction, and the highest since Aug. 21, when the auction yielded 7.99

percent.

The government also sold $8 billion of 26-week bills at an average discount of 7.92 percent, up from 7.89 percent last week - and the highest rate since Oct. 2, when the rate also stood at 7.92 percent. The discount rate understates the actual yield to investors.

The investment, or coupon-equivalent, rate was 8.25 percent on the 13-week bills at an average price of $9,798.50 per $10,000 face value. The investment rate on the 26-week bill was 8.36 percent at an average of $9,599.60 per $10,000.

CHICAGO (MARCH 19) UPI - Grain and soybean futures retained strong midsession gains to close higher Monday on the Chicago Board of Trade.

Soybeans retained their gains on strong technical and fund buying and nervousness over the economic situation in Brazil. Traders talked about lower-than-expected soybean yields.

A round of buy stops was triggered around midday as the May soybean contract broke above the $6.00 a bushel level.

Corn rallied with a little technical buying and persistent rumors of trade with the USSR.

Wheat was sharply higher at the close, benefitting from fund demand and spillover spot buying.

At the close, corn was up 3 to 3 3/4, soybeans up 4 3/4 to 8 1/4, wheat up 2 3/4 to off 9 and oats up 1 3/4 to 2 1/2 cents.

#90078u1831 03/19/1990 ~United Press International

DALLAS (MARCH 19) UPI - Rep. Robert Roe, D-N.J., chairman of the House Science, Space, and Technology Committee, said Monday he will introduce legislation next week that would limit the federal government's funding

commitment on the superconducting super collider project to $5 billion. Roe's legislation would also call for foreign participation in constructing the ambitious atom smasher.

Roe, whose support is crucial to winning legislative appropriation for the program, toured the site where the collider will be built during the weekend and reported on its status at a news conference Monday. He was accompanied by several members of the Texas congressional delegation.

Roe told reporters his bill would set the cost of the entire project at $7.5 billion. Of that amount, the federal contribution would be capped at $5 billion. The state of Texas would spend $1 billion and the remaining $1.5 billion would comefrom non-governmental sources, including other nations.

The purpose of the legislation, Roe said, would be to set one lump-sum authorization for the whole project. "We will outline the entire authorization for the entire project rather than going from one appropriation to another," Roe said.

Suggested modifications have already pushed the estimated cost of the project to nearly $8 billion from the original estimate of $5.9 billion. This has raised concern among supporters of the project that Congress may get increasingly disenchanted with its escalating cost.

Expressing confidence the project would be built, Roe said, "I take back enthusiastic overview of what is happening here. I am confident of getting the funding." He also praised the Texas delegation's bipartisan effort on behalf of the project.

There was no question foreign participation would be needed, Roe said, adding Japan and India have expressed interest and more countries are likely to join. The New Jersey lawmaker said the level of foreign commitment will become clear only after the appropriation process is completed in Congress.

Roe noted there is opposition both in the Senate and in the private sector against foreign participation, but he rejected the notion that technology derived from the project can remain the exclusive property of the United States.

Throughout his three-day visit to Texas, Roe was strongly supportive of the collider program, stressing it would give a significant boost to the development of science and technology.

When completed by 1998, the collider site will encircle Waxahachie, about 30 miles south of Dallas, with an underground tunnel 54 miles in circumference. Powerful magnets in the tunnels will hurl atomic particles

at each other to help scientists learn more about the smallest bits of matter and the forces that hold them together.

Roe said non-federal government participation in the program could comprise between 25 percent and 33 percent of the total cost. Those same sources, he said, could be tapped for future cost increases.

Assuming Roe's legislation clears the science committee, Rep. Martin Frost D-Texas, said he expects smooth sailing for it in his Rules Committee before it goes to the House floor. Frost said it was his understanding that Japan would become a major participant in the project.

The Department of Energy, which requested $318 million for the collider for the coming fiscal year, has approved the exact location, or "footprint " of the collider, clearing the way for Texas to begin buying about 17,000 acres of land from 670 landowners in the area.

Rep. Joe Barton, R-Texas, whose district includes Ellis County where the collider would be built, said he was confident the land acquisition effort would proceed smoothly. He said the first phase of the acquisition may begin as early as June.

#90078u1854 03/19/1990 ~United Press International

WINDHOEK, NAMIBIA (MARCH 19) UPI - Secretary of State James Baker arrived Monday to join to the celebration marking Namibia's independence and to promote peaceful political change in South Africa.

Baker, 59, looking fit despite the 19-hour, all-night flight from Washington, went into talks with President Jose Eduardo dos Santos of Angola, where the U.S. is encouraging resumption of preliminary talks between the Marxist government and UNITA rebel leader Jonas Savimbi.

The meeting with dos Santos was the first of a series of high-level talks Baker will hold with dignataries attending Namibia's independence celebration. Tuesday morning he will meet with U.N. Secretary-General Javier Perez de Cuellar.

Later Tuesday, Baker arranged to meet with Egyptian President Hosni Mubarak who has played a pivotal role in nurturing Middle East peace process. He then will talk to Soviet Foreign Minister Eduard Shevardnadze and review a number of issues, including arms control and the evolving situation in southern Africa.

Baker will attend the independence day ceremony Tuesday night at the athletic stadium in Windhoek, at which the flag of South Africa will be lowered at 11:59 p.m. and the flag of Namibia will be raised.

Jazz great Dizzy Gillespie, 72, who will participate in the celebrations, was a guest aboard Baker's plane.

A pink, red and blue sunset, a gold, red and green rainbow, light rains and thunderstorms on the mountainous horizon greeted Baker outside this old German colonial city of about 100,000 people.

The United States played a key negotiating role during the last decade in leading Namibia out of the status of a territory ruled by South Africa and into nationhood.

The negotiations ultimately succeeded with the withdrawl of Cuban troops from Angola and Namibia and South African forces from Namibia, the former German colony Pretoria had ruled since World War I in defiance of the League of Nations and later the United Nations.

Baker was proud of the U.S. role and obviously felt it could be springboard for a greater diplomatic victory, but far harder task in South Africa - a peaceful restructuring of the racially divided society.

''We think the independence of this last colony or territory in Africa is a product of American diplomacy and makes it important that we have high level representation at the ceremony,'' Baker told reporters aboard his plane.

Before returning to Washington Saturday, Baker is to see President Mobutu Sese Seko of Zaire in Kinshasa.

But his key meeting should be with Nelson Mandela, long-time leader of the African National Congress who was freed from jail last month after 27 years of imprisonment for his struggle for black equality in white-ruled South Africa.

En route, Baker spoke cautiously about the developing U.S. role in encouraging negotiations between the black majority led by Mandela and Frederik de Klerk, the reformist president of the racially divided nation.

But Baker was clearly responding to the request of black nationalist groups to lend technical support to the ANC and other black political organizations as they explore how to fully organize into peaceful political units.

The idea of one-person, one-vote elections in South Africa, home to 5 million whites and some 26 million blacks, is a revolutionary concept for the country that will be opposed by many white hard-liners.

The secretary of state said he would encourage de Klerk during their

meeting Thursday in Cape Town to continue with the process of stripping away apartheid. The system of racial segregation has not only divided South Africa but has damaged the country's relations with the United States and other nations that have ordered economic sanctions in protest.

''We are going to point out that the question is not really one of sanctions or their removal, but rather one of negotiations,'' Baker said.

Mandela, freed from prison as part of de Klerk's radical racial reforms last month, has said the ANC objects to the Baker-de Klerk meeting because it could send the wrong political signal about the United States possibly moving to repeal the sanctions ordered in 1986 to protest apartheid.

Mandela said such a meeting suggests that de Klerk ''has done something positive, something fundamental, which requires the world to review sanctions and other strategies'' to increase pressure on South Africa to dismantle apartheid.

''If the secretary of state wants to see me, of course I will see him. But I will not see him in South Africa,'' Mandela said.

Baker's meeting with de Klerk will represent the highest level talks between the two countries since 1978, when South African Foreign Minister Roelof ''Pik'' Botha was received by President Jimmy Carter at the White House and warned to surrender control of Namibia or face sanctions.

Under the law, the sanctions can be lifted only if South Africa makes substantial progress toward reform, such as repealing stringent police laws and freeing all political prisoners.

#90078u1859 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - Robert Bork, the bearded conservative rejected by the Senate for a Supreme Court seat, was on the outside looking in Monday, arguing a banking case before the justices he had hoped to call brethren.

Although Bork argued before the court in the 1970s, when he was solicitor general in the Nixon administration, his appearance Monday was the first since the bitter battle over his nomination by President Ronald Reagan.

If not for his presence, the case at hand would have drawn only the attention of scholars and affected parties - a dispute involving the giant Citibank and the liability of U.S. concerns for deposits held overseas.

The Bork who faced the huge mahogany bench appeared little changed from his bruising confirmation hearings. He still has his wispy beard, wide

girth and smoker's cough.

The justices gave him no special treatment, peppering him with questions in a free-flowing exchange. The discussion, however, was dry and arcane.

Bork handled himself adaquately, although he appeared to forget the names of some members of the court and referred to Justice Sandra Day O'Connor as Mrs. O'Connor, an appellation considered outside court protocol.

Only eight members of the court were present for the argument - Justice William Brennan, the feisty liberal, stayed home with stomach flu.

Bork was rejected by the Senate on a 58-42 vote in October 1987. His foes argued he was insentive to the rights of minorities and women, and many were suspicious of his strictly limited interpretations of the Constitution. Justice Anthony Kennedy eventually won confirmation to the seat vacated by Justice Lewis Powell.

Since his rejection, Bork has resigned his lifetime seat on the federal appeals court in Washington, written a bitter book on his experience, and gone on the lecture circuit to complain of his treatment. In addition to a limited law practice, he became a fellow at the American Enterprise Institute and recently accepted a teaching post at George Mason University School of Law in suburban Washington.

The case that brought Bork to the high court deals with whether U.S. banks can be held liable for deposits in overseas branches when situations, such as the collapse of a government or economic upheaval, prevent the branch offices from honoring deposits.

Lower federal courts held Citibank, Bork's client, liable for such deposits and the bank warned that the rulings could cripple U.S. banks and the federal banking system. According to court filings, foreign branches now owe more than $200 billion to their depositors.

The case deals with $2 million deposited in Citibank's foreign branch in Manila by Wells Fargo Asia Limited, a Singapore bank wholly owned by Wells Fargo Bank, that was to be repaid in December 1983. However, due to the deteriorating political and financial situation in the Philippines in the fall of 1983 the Philippine government prohibited such accounts from being repaid.

#90078u1867 03/19/1990 ~United Press International
BY VERNON SCOTT

HOLLYWOOD (MARCH 19) UPI - The 62nd annual Academy Awards, like the

previous 61, offer movie aficionados with a betting bent the opportunity to handicap something with better odds than Santa Anita Park.

There are only five horses in each race under the lights at the Los Angeles Music Center Monday, Mar. 26.

And the favorites are fairly easy to pick. After all, the claiming races have been run at tracks operated by critics, directors and writers guilds, Golden Globes and other warm-ups.

The major contest, of course, is the cup for best picture. This year it appears to be a two-horse race - ''Driving Miss Daisy,'' a delicate filly, and ''Born on the Fourth of July,'' a powerful war horse.

Filling out the field are ''Dead Poets Society,'' ''Field of Dreams'' and ''My Left Foot.''

Of the two front-runners, ''Driving Miss Daisy'' has the shortest odds. It has earned more money than ''Born on the Fourth of July'' and includes two brilliant performances by veterans Jessica Tandy and Morgan Freeman. It helps that both are nominated for best performances.

The touching story of a Southern Jewish matron and her deferential black chauffeur suffers one major glitch. Its director, Bruce Beresford, was not nominated.

''Born on the Fourth of July'' is second in the betting. Its chances were boosted earlier this month when Oliver Stone won the Directors Guild of America award.

The entry's young jockey (Tom Cruise) although nominated for an Oscar, probably doesn't have the experience to boot his mount home.

Of the three remaining entries, ''Field of Dreams'' has the inside track although its director, Phil Alden Robinson, failed to qualify.

''My Left Foot'' will be an also ran, partly because it is an Irish-English import, a handicap on this western turf. ''Dead Poets Society'' is the old entry released early last year and not in the same class with the others.

Stone is the hottest horse in the directors' handicap. Not only did he win this race three years ago Platoon, he won this year's DGA tune-up. He's better than even money to win again.

Woody Allen - nominated for ''Crimes and Misdemeanors'' - usually finds the Oscars a muddy track and has little chance.

Kenneth Branagh, the young Irishman who triumphed with ''Henry V,'' is unseasoned and outclassed. The same goes for another Irish newcomer, Jim Sheridan, for ''My Left Foot,'' the only race he's ever run.

Perhaps the best bet on the Academy Award card is for best actress. Sure to hit the wire first is Tandy for her subtle performance in ''Driving Miss Daisy.'' She will romp home first, a winner all the way.

Running second is Michelle Pfeiffer, a classy filly who showed good leg and early speed as the sexy singer in ''The Fabulous Baker Boys.'' But she has future races to run and this may be Tandy's last shot.

Fading in the stretch will be Pauline Collins who turned in a bravura performance as ''Shirley Valentine.'' Here again, an English sire and dam will hold her back.

Isabelle Adjani, ''Camille Claudel,'' and Jessica Lange, ''Music Box,'' are there simply to fill out the field.

In the sweepstakes for best actor the winner should be Daniel Day-Lewis. His performance as the cerebral palsy victim in ''My Left Foot'' was so dazzling he should have been allowed to run unapposed. But he will be pressed by a pair who posted impressive starts in previous races.

Morgan Freeman, a seasoned campaigner, could carry the day. His remarkable performance in ''Driving Miss Daisy'' might well have won in past Oscar races in which Day-Lewis was not in the field.

Youthful Cruise, ''Born on the Fourth of July,'' proved he could go the distance in fast company, but the pace may be too tough in this company.

Robin Williams, ''Dead Poets Society,'' is out-classed here.

Branagh, expending too much of himself in the best director heat, will be an also ran despite a swift performance as ''Henry V.''

Best supporting actress may be the most difficult race on the card: Brenda Fricker, ''My Left Foot;'' Anjelica Huston and Lena Olin, an entry in ''Enemies, a Love Story;'' Julia Roberts, ''Steel Magnolias'' and Dianne Wiest, ''Parenthood.''

In a photo-finish give the nod to Fricker by a nose. Huston and Olin probably will bump each other out of contention. Roberts is new to the track. Wiest is a speed horse in a long race.

Battling all the way down the stretch for the winner's circle in the race for best supporting actor are Martin Landau, ''Crimes and Misdemeanors,'' and Denzel Washington, ''Glory.'' Consider it a toss-up.

If there is a long shot here, it would be Danny Aiello for ''Do the Right Thing.''

Railbirds, touts, shills and high rollers could do worse than paste the following in their hats:

Best picture - ''Driving Miss Daisy''
Best director - Oliver Stone
Best actress - Jessica Tandy
Best actor - Daniel Day-Lewis
Best supporting actress - Brenda Fricker
Best supporting actor - Martin Landau

BY PATRICK MOSER - UPI

EAST BERLIN (MARCH 19) UPI - The conservative victory in East German elections clearly heralds swift German unification, boosting West German Chancellor Helmut Kohl's chance of becoming the first leader of a reunited Germany.

Even before the election, tens of thousands of East Germans had voted with their feet, leaving the economically ailing country for affluent West Germany.

The humbling defeat of the Social Democratic Party leaves no doubt that East German voters have few qualms about Kohl's plans for the absorption of their state by West Germany.

Kohl, who backed the Conservative Alliance for Germany, has dominated much of the electoral campaign with a simple message: only a conservative East German government can give East Germans the type of affluence enjoyed on the other side of what was once the Iron Curtain.

The SPD's calls for a slower pace toward reunification cost it precious votes in East Germany's first free election, which ended four decades of communist rule Sunday. It marked the first free election for East Germans since Adolf Hitler's ascension as chancellor ended the Weimar Republic in 1933.

With a meagre 21.84 percent of the vote, the social democrats only garnered 5.5 percent more than the communists, whose image has been tarnished by 40 years of Stalinist policies.

The Alliance for Germany, with a proud 48.14 percent, is adamant that reunification will come soon.

A few hours after the elections, conservative politicians said monetary unity could come about as early as June. Whether the conservatives will manage to move as fast as they would like remains the big unknown at this stage.

In order to approve the constitutional amendment necessary for unification they will need to get a two-thirds parliamentary backing.

The SPD's refusal to join a government coalition is one of the first difficulties the conservatives will have to face.

But Kohl was certain to give whatever help he can to ensure that his East German proteges jump the hurdles.

The electoral results were a personal victory for Kohl, who obviously enjoys his recently forged reputation as the architect of reunificiation and who shows no sign of doubt that he will become the first leader of a Germany reunified under his terms.

The rapid process he seeks, and which the East German electorate endorsed by backing the conservatives, may well be his ticket to the job. Kohl faces West German elections in December.

There is a downside to reunification: up to 2 million East Germans risk losing their jobs as their country moves toward a highly competitive economy that made West Germany the world's largest exporting nation.

For West Germans, the exercise could mean soaring taxes and inflation.

Whatever the pace, these problems can hardly be avoided as the two countries separated by decades of economic imbalance prepare to merge into a single state.

It is impossible at this stage to know whether East Germans, used to an often dull and uncompetitive but socially secure life, eventually will like the Western ways toward which they are headed.

Electoral results indicated Berliners on the eastern side of the wall were not overly enthusiastic.

The Communist Party, which stands for a unified Germany that would retain socialist structures in the social service sector, won 30 percent in the capital, almost double its national showing.

NEW YORK (MARCH 19) UPI - Former President Reagan could be called as a defense witness in Imelda Marcos's racketeering trial, a lawyer of the former Philippines first lady said Monday.

Marcos and Saudi Arabian businessman Adnan Khashoggi are to go on trial Tuesday on charges they conspired to loot the Philippines treasury of more than $100 million and hide the money in U.S. investments.

Marcos's attorney, Gerry Spence, said he would ''absolutely'' call the former president or his wife, Nancy, to the stand. ''Much of the defense information will come from the lips of the President Reagan,'' he said.

''We will attempt to have Ronald Reagan in this case,'' he added. ''He is a substantive witness. Ronald Reagan knows many matters first hand in this case. He was close friend to President Marcos. He was close to Mrs. Marcos.''

A pool of 150 potential jurors in the trial were given questionnaires last Thursday to determine the extent of their knowledge of the high-profile case.

U.S. District Judge John Keenan hopes opening statements will be delivered Tuesday, with the complex conspiracy case expected to continue well into the summer.

Marcos, 60, is charged with fraud and obstruction of justice in a racketeering scheme to siphon more than $100 million from the Philippines treasury into New York real estate and art and faces up to 50 years if convicted of the charges against her.

Khashoggi, 54, a former arms dealer, faces up to 20 years in prison and a $250,000 fine if convicted of obstruction of justice and fraud.

If Reagan were successfully subpoenaed, it would mark the second time since he left office in 1989 that he was called to testify in a criminal trial. He recently testified by video tape in the trial of former national security adviser John Poindexter.

Spence said Reagan's testimony could prove vital to the case.

He said the Reagans knew the Marcoses ''very well,'' calling them ''confidants of the Marcoses.''

Lori Damrosch, a Columbia University law professor, called the criminal trial of Marcos, the wife of a former foreign head of state, ''extraordinary'' in the annals of American justice.

''I certainly wouldn't minimize how unusual that is,'' said Damrosch. ''The fact that it is a criminal trial instead of a civil one certainly underscores that.

''It certainly is extremely unusual to have a criminal trial of any official of a foreign government,'' she said, noting Mrs. Marcos served as governor of Manila and held other ministerial-level posts.

#90078u1926 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - Junk bonds, even before the collapse of Drexel Burnham Lambert Inc., appeared to be losing their luster among corporate takeover specialists, the Securities and Exchange Commission said Monday.

"There appears to be increasing reliance on bank loans and equity rather than high-yield securities to finance tender offers," the SEC said in a report prepared for Sen. Donald Riegle, D-Mich., chairman of the Senate Banking Committee. Moreover, the volatility of the high-yield bond market seemingly has slowed the level of corporate takeover activity.

Junk bonds came to power in the past four years as the favorite weapon of corporate raiders. Use of the bonds enable takeover specialists to amass vast pools of capital to pursue acquisitions and finance leveraged buyouts.

"The growth of the high-yield, non-investment grade market has raised numerous issues that have been, and will continue to be, the focus of attention by the commission and its staff," SEC Chairman Richard Breeden said in a letter to Riegle. Last October, Riegle requested the SEC examine the proliferation of junk bonds.

The SEC's report found that volatility in the junk-bond market appears to be affecting the level of takeover activity, with 38 companies filing their takeover intentions with the SEC from July to September last year - down from 76 filings for the same period the year before.

The report also said that the junk-bond market's volatility "apparently already has had an effect on the financing of corporate takeovers," noting that the acquisition of Northwest Airlines, one of last year's largest deals, was financed without junk bonds.

"Whether the financing structure used in these deals represents a trend toward using a higher proportion of equity in leveraged transactions and greater reliance upon secured asset-based financing or merely reflects current market volatility remains to be seen," the report said.

The SEC study found that more than 2,200 issues of junk bonds with a par value of $204 billion have been registered by about 800 companies

representing 100 industries.

Junk bonds represented an average of 12.5 percent of the total debt underwritten publicly between 1986 and the first nine months of last year, the report said.

During the first three quarters last year, $20.3 billion worth of junk bonds was issued. The report found the ten largest junk-bond underwriters accounted for 96.8 percent of all public offerings for high-yield securities, with Drexel having had a 43 percent share of the junk market. Drexel, the report noted, earned more in fees from underwriting junk bonds that the total earned by its nine largest competitors.

The largest purchasers of junk bonds were insurance companies, money managers, mutual funds, pension funds and thrifts, the report said. Banks, which do not participate directly in the junk-bond market, have "significant exposure" to the bonds as senior lenders in highly leveraged transactions. "Eleven U.S. commercial banks are reported to have $32.2 billion of highly leveraged transaction-related loans," the report said.

During the first three quarters of 1989, 18 issuers of junk bonds defaulted on $5 billion worth of bonds, resulting in a $2.8 billion loss to investors.

MOSCOW (MARCH 19) UPI - The Soviet government Monday ordered direct control from Moscow of all national enterprises in Lithuania and instructed the KGB and internal police to establish customs control in the fractious republic.

The statement, signed by Premier Nikolai Ryzhkov and released by Tass late Monday, amounted to direct rule by the Moscow ministries over communications, sea lanes and the property it deems to be of national as opposed to republican character.

''All sites designated as all-union will be run directly by the ministries of the U.S.S.R.,'' the order said in a heightening of what is emerging as a Kremlin economic war to slow down Lithuania's rush to independence and secession.

''The Ministry of Interior and the KGB of the U.S.S.R. are instructed to establish customs control on the territory of the Lithuanian republic,'' the order said.

The order instructed managers of state enterprises in Lithuania not to hand over any property that deals with the economy of the entire Soviet

Union.

The statement by the Council of Ministers ''ordered its representatives in the republic not to enter into any kind of negotiations on transferring property under their jurisdiction or the organizations themselves to the control of Lithuania.''

It mandated increased security at atomic power stations, which are under the jurisdiction of the Ministry of Nuclear Energy.

Earlier Monday, the Soviet government denied Lithuania's claims of unusual troop maneuvers in the Baltic republic and warned foreign countries against recognizing its recent declaration of independence.

''There are no major maneuvers under way in Lithuania. Armed forces activities are in accordance with current military training plans,'' Soviet Foreign Ministry spokesman Gennadi Gerasimov quoted the Defense Ministry as saying.

Lithuanian President Vytautas Landsbergis, head of the Sajudis nationalist organization that took control of parliament in Feb. 24 elections, told the legislature Saturday that unusual troop and tank movements had been seen in eastern and southern Lithuania.

Soviet aircraft repeatedly dived over Vilnius on Sunday, according to a Lithuanian government statement, a day after Landsbergis and Vilnius residents said helicopters dropped thousands of leaflets against the parliament's March 11 declaration of independence.

The get-tough measures put teeth into a resolution by the Congress of People's Deputies on Thursday that said Soviet laws still covered the republic. That resolution declared the declaration of independence by Lithuania's parliament on March 11 ''null and void.''

Gerasimov noted sarcastically that foreign governments have not recognized Lithuania as a free country and warned against any such recognition.

''It would be more than offensive to the Soviet Union, and such hasty recognition would be intervention in the internal affairs of the Soviet Union,'' Gerasimov said.

France, which earlier had indicated it would recognize an independent Lithuanian, said Monday it will hold off as long as discussions on the issue continue between Lithuanian leaders and Soviet President Mikhail Gorbachev.

Gerasimov, saying ''no one in the world likes to encourage separatism,'' said foreign governments have withheld recognition because they support

Gorbachev's ''perestroika'' drive for economic and political reform.

''They don't want to lessen Gorbachev's chances of success,'' Gerasimov said. ''We have this process, perestroika, Gorbachev started it and the Lithuanians are using it to their advantage. They don't want to rock the boat.''

President Bush issued a statement last week, saying Washington also has never recognized the annexation of Estonia, Latvia and Lithuania but adding that Moscow still exerts control of Lithuania.

Sajudis released the text of Landsbergis's answer to Gorbachev's telegram of Friday in which the Soviet president gave him three days to respond to a Moscow resolution declaring the Baltic republic's March 11 declaration of independence invalid.

Landsbergis said the resolution of the U.S.S.R. Congress of People's Deputies that said Soviet laws still operate in Lithuania ''itself has no legal foundation.''

(MARCH 19) UPI - Soviet officials deny Lithuania's charges of unusual troop movements in the Baltic republic. The Soviet parliament is considering a vital law on secession in Moscow today, amid reports from Lithuania's capital that Soviet jets buzzed the city yesterday and troops were on the move inside the republic. Lithuania declared independence from Moscow last week. Soviet Foreign Ministry spokesman Gennady Gerasimov says NO countries have recognized Lithuania's independence and he warned them against doing so.

Alabama Governor Guy Hunt is expected to ask for federal disaster funds in the wake of torrential rains that left at least 13 people dead throughout the South. Officials say the run-off from up to 18 inches of rain last week sent the Alabama River about 20 feet above flood stage today in Montgomery. In Selma, officials say the river is already 18 feet over its banks and may rise another two feet by tomorrow. More than four-thousand people have been evacuated in flood-ravaged areas.

Students and teachers are back in classrooms across West Virginia for the first time in 11 days. Striking teachers announced a deal during the weekend to end a walkout that began when two teachers' unions accused the governor of reneging on a promised five percent pay increase. The deal calls for state lawmakers to start work immediately on a long-term plan to enhance teachers' pay and benefits.

Federal mediators in the Greyhound strike say they'll try to get the two sides talking again... despite a lack of progress during weekend meetings in Tucson, Arizona. But bus company officials say they have NO plans to resume negotiations with union representatives after talks broke down yesterday just one hour after they began. More than nine-thousand Greyhound workers have been on strike since March 2nd in a contract

dispute.

#90078u1969 03/19/1990 ~United Press International
WASHINGTON (MARCH 19) UPI - A senior retired woman Air Force officer Monday termed the military's reluctance to let women have combat jobs ''Neanderthal thinking,'' arguing women should get the posts if they are qualified.

The comments of retired Air Force Col. Diane Ordes and those of retired Army Brig. Gen. Pat Foote opened a push by the National Organization for Women for passage of legislation seeking a four-year study by the Army of using women in combat units such as infantry, artillery and armored units.

A subcommittee of the House Armed Services Committee opens hearings Tuesday on the proposal offered by Rep. Patricia Schroeder, D-Colo.

Women are barred by law from combat jobs in the Navy and Air Force and by regulation from Army combat units, but the issue took on new impetus in

December when a military police unit led by a woman officer traded gunfire with Panamanian Defense Force troops at a kennel.

Asked why women can train Navy F-14 pilots, fly electronic surviellance planes and cargo runs, captain Coast Guard vessels and serve on Navy support ships but cannot fly Air Force F-16 fighters, Ordes replied, ''It's sort of like Neanderthal thinking. I can't explain it.''

Both Ordes, once the assistant dean at the Air Force Academy, and Foote, whose career was in the military police, said women should be allowed in combat units if they can meet the standards. They also said neither men nor women who cannot meet the standards should be in combat units.

''If a man can carry a 70-pound pack and walk 12 miles, he should be in the infantry. If a woman can do it, she should be in the infantry,'' Foote said.

Women account for about 11 percent of the 2.1 million people in uniform, but Foote said women have not gotten key policy jobs in the military because they do not have combat experience, an important ingredient in promotions.

And NOW President Molly Yard added, ''If women are denied combat units, they are denied promotion.''

(MARCH 19) UPI - Former national security adviser John Poindexter returned to a federal courtroom today in Washington, D-C, to continue his criminal Iran-Contra trial. Special prosecutor Dan Webb says he most likely will rest rest his case against Poindexter late today. Poindexter is accused of five felony counts of lying to Congress and obstructing its investigation of worst scandal of the Reagan administration.

In New York City today, outspoken civil rights activist the Reverend Al Sharpton went on trial in Manhattan on charges he stole at least 250-thousand dollars from a Brooklyn youth organization. Sharpton proclaimed his innocence to cheering supporters, claiming he's the target of a political vendetta. Sharpton is charged with taking the money from the National Youth Movement, a Brooklyn charity he says he founded while he was in high school in 1971. If convicted, he faces up to seven years in prison.

A new study reports widespread cheating by welfare mothers because their families need the money to survive. A study by Christopher Jencks and Kathryn Edins shows that low welfare benefits do NOT simply force welfare recipients to live frugally... but- quoting- ''force most welfare recipients to lie and cheat in order to survive.'' The study was reported in the premier issue of American Prospect magazine, a new liberal journal.

ATHENS, GREECE (MARCH 19) UPI - Soviet authorities have restored the barbed wire fencing along the border with Iran that was torn down by Azerbaijani rioters in early January, a report from Tehran said Monday.

The barbed wire reappeared in the Poldasht region, some 450 miles northwest of Tehran, more than two months after Azerbaijani Turks seeking union with Iran tore down several miles of fencing and other border installations.

Copies of the Tehran newspaper Kayhan reaching Athens said the barbed wire went up a few days ago, weeks after Soviet troops sealed the borders on Jan. 21.

Thousands of Soviet Azerbaijanis crossed into Iran in January to see friends and relatives and returned home after brief visits during the political turmoil that rocked the southern Soviet republic.

The border was sealed after Soviet troops restored order.

Kayhan and the official Islamic Republic News Agency said large crowds of people continued to assemble on both sides of the Aras river after the border was sealed, waving greetings and chanting slogans as Soviet troops looked on.

Several also continued to cross the river illegally, Kayhan said.

Iran and the Soviet Union signed agreements last month for people on the two sides to be given visas for extended visits to relatives, religious shrines and places of interest to tourists.

To facilitate travel, groups of 150 people or more are to be taken on guided tours on both sides, under another agreement signed last month, IRNA said.

#90078u2031 03/19/1990 ~United Press International

RIO DE JANEIRO, BRAZIL (MARCH 19) UPI - Thousands of Brazilians rushed to withdraw money at banks guarded by police Monday, the first working day under President Fernando Collor de Mello's new anti-inflationary economic plan.

Hundreds of policemen, armed with submachine guns and leading attack dogs, stood guard at banks as depositors attempted to withdraw what money they could after a five-day bank holiday.

No incidents of violence were reported, said Tomas Frota, a spokesman for the National Bank Association. "Most of the people are trying to withdraw a bit of money, and they are asking about how the (economic) measures affect them," Frota said.

The government, in an apparent attempt to withdraw cash from the marketplace and force prices down, set severe limits Friday on how much money depositors could withdraw from their accounts.

Brazilians can now reclaim only 50,000 cruzeiros, or $700, from their savings accounts and as little as 25,000 cruzeiros, or $350, from checking

accounts. The balance of accounts, some $115 billion, will remain frozen in banks for 18 months, according to government orders. The withdrawal limits "will affect hardly ten percent of investors," Collor de Mello said.

The banking situation was further complicated by the new administration's decision to rename the country's currency the cruzeiro, formerly the new cruzado. The new money will be worth the same as the old. Official figures indicated there was a total of $150 billion in new cruzados in circulation before the economic plan took effect.

Police also stood guard at most supermarkets, which, like the banks, opened their doors at midday Monday. Most prices had been cut - some by as much as 40 percent, according to press reports - to conform with a order reducing prices to their March 12 levels. Looters attacked at least seven supermarkets over the weekend in Rio de Janeiro, Sao Paulo, and Salvador, police said.

The Brazilian stock markets and foreign currency exchange houses also opened at midday Monday, but sources said trading was virtually paralyzed by the lack of buyers and sellers.

Most currency changers in Rio de Janeiro and Sao Paulo refused to buy or sell U.S. dollars, because, with the lack of liquidity, they did not know what to set the exchange rate at, financial operators said. Similarly, the Central Bank did not fix an exchange rate for the U.S. dollar Monday, leaving the rate subject to the law of supply and demand.

Collor de Mello said Economy Minister Zelia Cardoso de Mello called a series of meetings Monday with businessmen to convince them not to fire employees. "There will be no recession," said the president in a television interview Sunday night. "In 30 or 40 days, we will be in the streets celebrating the end of inflation," he said.

Other measures adopted Friday included the total liberation of imports, the privatization or elimination of a series of money-losing state companies, drastic cuts in public spending and in money printing and imposition of stiff restrictions on the amount of money in circulation.

Despite the apparent unpopularity of the economic plan, at least two quick-reaction public opinion polls showed some 80 percent of the population supports the new measures.

Collor de Mello said he hopes the congress ratifies the plan without adjustments. According to the Brazilian Constitution, if congress fails to approve the plan in 30 days, the measures are automatically vetoed.

JOHANNESBURG, SOUTH AFRICA (MARCH 19) UPI - A mob of blacks attacked the homestead of a Zulu chief in Natal Province with hand grenades, firearms and machetes, killing 15 people and injuring nine others, police said Monday.

The attack at Njobokozi near Hammarsdale in the semi-autonomous homeland of KwaZulu, 25 miles inland from the Indian Ocean port of Durban, occurred midday Sunday when attackers opened fire on the chief's homestead or ''kraal'' with an assortment of weapons, including a Soviet-made AK-47.

Two hand grenades were also thrown at the kraal and some of the victims had hack and stab wounds, the police report said.

Three policemen in the service of KwaZulu were victims of the attack. Two were killed and the third seriously wounded. The firearms of those killed were stolen.

The attackers fired on members of the kraal as they fled, killing 13 men and injuring eight others.

The report gave no further details and did not say whether the chief was in the kraal at the time of the attack.

Over the past three years, as many as 3,000 blacks have lost their lives in internecine strife between members of Chief Mangosuthu Buthelezi's traditionalist Inkatha movement and more radical anti-apartheid activists of the umbrella United Democratic Front.

Buthelezi accepted Monday an invitation from Walter Sisulu, veteran leader of the African National Congress, with which the UDF is allied, to hold talks on ending the violence.

#90078u2064 03/19/1990 ~United Press International

PRETORIA, SOUTH AFRICA (MARCH 19) UPI - A former police officer testified Monday he planted a bomb in an education center, plotted the death of anti-apartheid activists and hung a baboon fetus outside the home of Archbishop Desmond Tutu while in the pay of the South African Defense Force.

Giving evidence to a judicial commission of inquiry under Justice Louis Harms, former police Lt. Abraham ''Snake'' van Zyl, 29, described the establishment in 1988 of a covert army hit squad called the Civil Cooperation Bureau to combat the African National Congress and other anti-apartheid organizations.

He had been told in training that the purpose of the CCB was ''disruption of the enemy within the country as well as abroad,'' and he ''regarded it as an honor'' to be recruited by the organization, van Zyl told the commission.

Van Zyl cited a spate of bombings in public places, including restaurants, for which responsibility was claimed by the ANC, as reason for the establishment of the unit, which also was organized to combat right-wing

organizations.

He told the commission he resigned from the unit in October 1989 to pursue private business interests and because recent government reform initiatives, which he supported, had rendered the unit obsolete.

He said he decided to forego his right against self-incrimination and would tell all he knew. Van Zyl was released by police 11 days ago from detention without trial to allow him to testify before the commission.

Van Zyl described how he, under the command of Col. Joe Verster and a man identified only as General Joubert of the South African Defence Force, had planned and executed the bombing of the Early Learning Center in Athlone near Cape Town.

Anti-apartheid activists of the ANC and the umbrella United Democratic Front were using the building during the runoff to elections in September last year, with the aim of disrupting the election, van Zyl said.

He personally detonated the bomb on Aug. 31, 1989, after ensuring the building was unoccupied. It was intended ''to frighten them off continuing with their violent campaign,'' van Zyl said.

Van Zyl also described how he had hung a baboon's fetus in a jam jar from a tree outside Tutu's official residence in Cape Town. A colleague, Ferdi Barnard, had hammered ''eight long nails doctored by a witch doctor'' into the ground beneath the fetus.

The movements of Dullah Omar, lawyer of black nationalist leader Nelson Mandela, had been monitored by the CCB with the intention of ''eliminating'' him, first with a pistol and later by placing a powder in his food designed to bring on a heart attack, van Zyl said. The project was later aborted.

There also had been a plan to kill anti-apartheid activist and journalist Gavin Evans with a knife, but the CCB had been unable to find him, van Zyl said.

All operations had been approved by his senior officers, van Zyl said.

Van Zyl also gave detailed testimony of how payments were made to members of the unit, who were instructed to establish commercial operations as a cover for their security work using Defence Force funds.

His own venture, a transport business north of Johannesburg, had been so successful that he had engaged a partner and had resigned from the CCB to devote all his time to it.

#90078u2076 03/19/1990 ~United Press International
ANALYSIS BY JOAN HANAUER

NEW YORK (MARCH 19) UPI - Moon Unit Zappa discovered from the director of her new sitcom that she was a Stradivarius, not an oboe.

''I just want to know who was spreading rumors I was an oboe,'' the original Valley Girl said indignantly.

Dweezil Zappa said their characters so normal, playing them ''is a stretch.''

Moon, 21, and her brother Dweezil, 20, star with Max Gail and Cindy Williams in ''Normal Life,'' to debut on CBS Wednesday, Mar. 21, 8-8:30 p.m. Eastern time. The sitcom teams up in the time slot with ''Sydney,'' starring Valerie Bertinelli.

What are Frank Zappa's kids doing on a TV sitcom?

''We were dropped out of the sky in a pod,'' Moon said in an interview.

Dweezil went on to say a story appeared in a New York newspaper reporting they were going to do a television show. In fact, there were no such plans.

''They all panicked, this business being what it is,'' Moon continued, ''and wanted to know why they didn't know about it. So they started calling and wanted to have meetings with us.''

The result, judging by one of the early episodes taped, is a standard family sitcom with Gail and Williams as the happily married but occasionally bickering parents, and Moon and Dweezil as two of their three normal middle class kids.

''The thing about our show,'' Moon said, ''is that every story on the planet has been told. It's only that you like the characters going through this stuff. There's nothing really new, just variations.''

''There are just different perspectives,'' Dweezil added. ''That's the way television works. Perhaps there are certain storylines that are more

compelling to watch, but we're not a hot topic show; this is no little Geraldo experiment.''

''We're not trying to save the planet,'' Moon added.

Still, it seems odd to design a standard family sitcom as a vehicle for two kids named Moon and Dweezil.

''Actually, we got designed out of the show,'' Dweezil said, ''because originally, well, it was an entirely different concept going in. This is the show that just evolved.''

It was, they said, an instance of CBS taking a risk - ''but a conservative risk,'' Dweezil said, and Moon added, ''It's like they said, 'Let's do something dangerous - carefully.''

The Zappa kids have found television an educational experience, as when Moon was told she was a Stradivarius.

''It was a compliment,'' she said.

''There was one guy,'' Dweezil said, ''who was particularly fascinated with his own writing technique and his own philosophy of things. He tried to explain comedy in scientific terms. He would say, 'Comedy is the distance between reality and what you think is reality.' Buddy, that ain't gonna work with us.''

They also were intrigued by the different acting philosophies of their costars.

''Cindy and Max were the greatest teachers,'' Moon said with real enthusiasm. ''They come from totally different schools of acting and their approach is so different. Cindy is a cartoon personified. She'll do anything outrageous because she likes the cartoon aspect of it. If she could slap herself into a wall and slide down it like a liquid, she'd do it.

''With Max, everything has to be organic before he even takes a step.''

Their show will be sharing the hour with, ''Syndey,'' starring Bertinelli as Sydney Kells, who is trying to set herself up in the private eye business in Los Angeles. Her name is Sydney, you see, so people she hasn't met sometimes think they are dealing with a man.

In the first episode she gets herself a lawyer-client with the help of her cop brother. Sydney hangs out at The Blue Collar, a saloon whose name matches its clientele. They provide a dubious source of humor.

The people who made ''Sydney'' subscribe to the Zappa theory of television production - that it's the character you like. Bertinelli specializes in adorable. The script is something only the author's agent could love.

Hollywood has always looked to the bottom line - but these days the stakes are sky high and the players are mostly conglomerates who only bet on sure things.

That's the message Tom Brokaw delivers in ''The New Hollywood,'' to air on NBC Wednesday, March 21, 10-11 p.m. Eastern time.

Robert Redford, Robert DeNiro, Sally Field, Spike Lee, Sidney Pollack and Oliver Stone appear on camera, as do clips from some of their films, but the show is more than just another excursion into ''infotainment.''

The creative voice of Hollywood worries that the small independent moviemaker, the experimenter, the artist with a different or novel vision, will not be able to break through the system.

On the plus side, Hollywood still reveres talent. As Sally Field said:

''If you have knocked on every door and you have not gotten to where you want to be - it's because you're not good enough.''

Hollywood, she said, is not a fair town ''but it is very much in awe of talent.''

#90078u2087 03/19/1990 ~United Press International

BY VERNON SCOTT

HOLLYWOOD (MARCH 19) UPI - ''Lord of the Flies,'' adapted from William Golding's novel, was less than an unqualified hit when it was first released 27 years ago under the direction of Peter Brook and starring a group of unknown English kids.

But the tale of a group of upright English schoolboys who turn savage when marooned on a desert island did well in TV reruns, and eventually in video cassette. It became cult classic.

Its continued success emboldened producer Lewis M. Allen to make it a contemporary movie. To get financing, he found it expedient to cast unknown American kids. That was a blunder, considering American kids commonly are regarded as savages to begin with.

In searching for a director, he came upon Harry Hook who had directed ''The Kitchen Toto,'' a touching little film about a household black boy under English rule in Kenya in the 1950s.

Since the release of his version of ''Lord of the Flies,'' Hook has been lambasted unmercifully by critics who have written diatribes against the picture, director, cast and even the exhibitors who booked it.

Even Hook considers the original ''Lord of the Flies'' an extraordinarily fine film. So, why mess with it?

Hook says he didn't even try to improve on the original - he was simply intrigued by the story and wanted to tell it his way.

''There is something attractive about it from a director's point of view '' he said.

''They're all on an island and there's real purity in that and in the latent forces exposed in the children. There's something very dramatic and satisfactory in how that happens.

''I was determined to make the film. It had been 20 years since I had seen Brook's version, so I had no recent recollections of the work.''

For that reason, Hook said, his film bears little resemblance to the original, although it does follow Goulding's book closely.

''I told my story on the basis of the source (the novel),'' he said. ''It is a many-layered story - the landscape, the politics of the children, the sociological, spiritual and even the ecological aspects are a part of the story if you want to unearth them.

''In staying faithful to the novel I got involved with the potential evil in all of us.''

Although Hook had not seen the first version for 20 years, he did take a look at Brook's film after completing his own.

''I was very impressed,'' he said, ''and I found it an extremely curious experience. It's the same and yet it's totally different.

''For me it was like looking at an old photograph of myself. I know that person, yet I don't know him. Something had changed, yet it was the same.

''There were a couple of things I might have adapted. Yet if I had seen Brook's film immediately before I began mine, I would have been terribly handcuffed. I would have lost many things.

''In my film, the island as a character becomes stronger, especially from an environmental aspect. More dominant than in the book or the first version.

''I knew there would be endless comparisons between the two versions. Someone is bound to write 'By Hook or by Brook.' The comparisons, for me, are entirely irrelevant.

''There is a new generation of young people and I think they constitute a new audience. There is interest in 'Lord of the Flies' because it has been shown in so many schools over the years.''

Brooks made his version in Jamaica. Hook went to Puerto Rico for his.

''We went for a lush, jungle look,'' he said. ''A Garden of Eden. The key element, however, was the casting. I wanted each actor to look like the character described in the book. There were 24 boys and the look was as important as their acting talent.

''Many boys possessed the exact personality traits required for their roles. We found our boys in various parts of the country, ages 8 to 13.

''When I came on board the film hadn't been financed, which is the reason we went with American boys instead of English.''

And that, the critics tell Hook, was the fatal decision.

MOSCOW (MARCH 19) UPI - Latvian and Estonian Popular Front candidates swept to victory, gaining control of their parliaments in the swelling wave of independence sentiment sweeping the Baltics, partial results showed Monday.

Sunday's election victories by the nationalists put Estonia and Latvia right behind Lithuania in the Baltic independence sweepstakes. Lithuania's Parliament declared independence March 11, setting up a confrontation with Moscow.

But Estonian Prime Minister Indrek Toome, who met with President Mikhail Gorbachev in Moscow Monday as part of an Estonian delegation, said before making the trip that Estonia would not follow Lithuania's example of a sudden decalaration of independence, sources in Estonia said.

Toome told the Estonian media there would not be a ''Lithuanian variant'' in Estonia, according to the sources who have monitored the election results in Tallinn, the capital.

Estonia Radio projected that two-thirds of the 105 seats in the legislature in the Sunday balloting would go to the Popular Front.

Of the 63 seats already decided in the 105-member Estonian Parliament, 27 went to Popular Front candidates, the broadcast said. Pure communists, who have no allegiance to the Popular Front, won a mere four seats so far. One of those elected was the Communist Party First Secretary Vaino Valyas.

Of the 170 seats in the 201-member Latvian Parliament already decided, the Latvian Popular Front has won 108, the official Soviet news agency Tass said.

But the Latvian results gave no clear picture of how the communists were faring overall. It said of the 108 Popular Front victors, 34 were also communists. Also winning were 63 communists with no affiliation to the Popular Front.

Members of the Green ecological party, Social Democrats, and Interfront, representing the Russian-speaking community of Latvia, also won seats.

Tass said Latvia's voter turnout was larger than in December's balloting for local councils and accredited the packed polls to ''the ferocity of the struggle between rival forces and developments in neighboring Lithuania.''

Unlike Lithuania, which has a relatively small Russian population of some 9 percent, Latvia and Estonia have large Russian communities that fielded candidates in what were in effect multi-party elections.

Estonians comprise about 65 percent of their republic's population of 1.5 million, and Russians 27.9 percent. Latvians are barely a majority at 53.7 percent of the 2.6 million people in their republic with the Russians having 32.8 percent.

The Russians began arriving in large numbers after World War II, altering the ethnic balance of the two republics that were annexed in 1940 in a secret deal between Soviet and Nazi dictators Josef Stalin and Adolf Hitler.

BOSTON (MARCH 20) UPI - Massachusetts' bond rating was lowered again Monday by a Wall Street investor service, which cited the state's inability to deal with a budget deficit now approaching $1 billion.

Moody's Investors Services, which last November gave Massachusetts a Baa1 rating to tie it with Louisiana for the lowest state bond rating in the nation, lowered that rating again to Baa.

Dukakis administration officials said last week they would sell another $350 million in general obligation, long-term bonds, and another prestigious rating agency, Standard and Poor's Corp., declined to lower the state's rating Friday.

The decline of the state's credit rating has cost taxpayers millions of dollars in added interest payments, but it was not clear Monday what effect Moody's action would have on the new bond sales.

''We feel that right now the investing community has been aware of our problems,'' said Deputy State Treasurer Kathy Sheppard. ''This puts Moody's on par with Standard and Poor's. Most of that has been discounted in the rates already.''

Dukakis administration officials last week increased their estimate of the

potential deficit from $500 million to more than $700 million. They also acknowledged the budget gap could increase even more by the time the fiscal year expires June 30.

''The rating reduction to Baa1 last November recognized significant and growing financial difficulties, but also made explicit the forthcoming resolution of the problem,'' Moody's Vice President George Leung said.

The Legislature has repeatedly refused to approve new revenue-raising measures, despite constant prodding by Gov. Michael S. Dukakis and Leung said the apparent unwillingness of government officials to deal with the deficit was the chief cause of the downgrade.

''Extended inaction this fiscal year has reduced confidence that responsible action will be taken to contain this problem,'' he said. ''Also noted is the continued slowing on the state's economy.

Leung specifically cited slumping performances in the construction, housing and high technology sectors.

''The growing magnitude of the state's deficit with no plan in sight poses additional credit quality decline reflected in the rating revision to Baa '' Leung said.

But he also noted, ''Superior wealth levels, strong legal requirements and administative powers offer assurance of basic bondholder protection.''

Dukakis, who has conceded the state will have to issue bonds to cover the deficit, Monday renewed his call for legislative action on a new revenue stream to pay off the bonds.

He warned again that a major portion of the more than $1 billion local aid payments due from the state to cities and towns at the end of the fiscal year will have to be withheld without legislative action.

''The portion of the payment to cities and towns that clearly has to be withheld is approximatly $500 million. What happens to the other $200 million (of the deficit) I'm not prepared to say,'' Dukakis said.

''That would be inexcusable. It would be devastating to our cities and towns. It would do a terrible number on their credit rating. And there's no reason for it. We know what we have to do and we've got to do it.''

''We'll continue to cut and pare and look for ways in which we can save, but we all know we're going to need some additional revenue and the sooner we can do it the sooner we can get on with the business of the commonwealth,'' he said.

#90078u2174 03/19/1990 ~United Press International
NEW YORK (MARCH 19) UPI - The stock market followed up its "triple-witching hour" surge Friday with a mixed close Monday in light trading as the blue chips rebounded from sharp early losses but the broad market lagged.

The Dow Jones industrial average, which jumped 45.50 Friday, rose 14.41 to close at 2755.63 after being down as much as 28 points in early trading.

Among broader market gauges, the New York Stock Exchange composite index rose 0.74 to 188.66 and Standard & Poor's 500-stock index added 1.62 to 343.53. The price of an average share gained 14 cents.

Declines led advances 719-711 among the 1,960 issues crossing the NYSE tape. Big Board volume was 142,300,000 shares, compared with 222,520,220 shares traded Friday, when buying tied to the the "triple-witching hour" expirations of futures and options inflated volume.

Analysts said the market's resiliency in the face of steep losses in Tokyo overnight was a source of encouragement to investors and sent them flocking to blue-chip stocks.

"This was very impressive," said Alfred Goldman, market strategist at A.G. Edwards and Sons Inc. in St. Louis. "The market could have gotten a major nose bleed today. There were plenty of valid excuses to go down," he said, citing the sharp gains in the Dow industrials over the last few weeks and a sharp decline in Tokyo overnight.

"But the sellers couldn't get anything really serious going on the downside," he said. "The blue chips are the first place one goes when you're a little nervous but want to buy."

Some analysts said news of a renewed buyout effort involving UAL, parent of United Airlines, after the collapse of a bid in October because of a lack of financing, helped lift the market, but Goldman disagreed.

"A lot of people will credit UAL with the rally, but I don't think so. Everybody likes to see a deal, it sparks interest in stocks in general but if the market weren't in a mood to go up, UAL would rally and nothing else would," said Goldman.

Prices fell sharply in the early going, taking their cue from another sharp plunge in stock prices in Tokyo. Weakness in the yen sent the most widely watched index there tumbling to its third-largest daily loss, as individual and institutional investors dumped stocks across the board.

On the trading floor, Philip Morris was the most active issue, up 3/8 to 39. Parker Drilling followed, unchanged at 10. IBM was third, up 3/8 to 109. Also active was Amax, up 1 1/4 to 27 1/8 amid takeover speculation.

Among the other blue chips, AT&T was up 1/2 to 42 3/8, General Electric added one to 65, Coca-Cola jumped two to 75 1/4, and McDonald's rose 7/8 to 32 3/4.

Airline stocks gained after Condor Partners and United's unions said they have joined forces to pursue a buyout of UAL and will solicit proxies for

the election of a slate of directors at its annual meeting April 26.

UAL surged 12 to 154 1/2, while AMR, parent of American Airlines, jumped 1 1/8 to 66 3/8 and Delta Air Lines rose 1 3/8 to 73 1/8. The gains lifted the Dow transportation average 22.40 to 1179.23.

Elsewhere, Amdura, an automotive and hardware distributor, lost more than half its value, closing down 2 1/2 at two after reports saying it may seek Chapter 11 if it cannot get new working capital from lenders and renegotiate some debt. The company also said it expects a "substantial" loss for 1989 because of a restructuring charge against fourth-quarter earnings.

And British Petroleum fell one to 65 1/8 after saying that 1,150 jobs would be cut at its head office as part of a reorganization.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 170,246,660 shares, compared with 257,646,680 shares traded in the previous session.

Prices closed slightly lower in active trading on the American Stock Exchange. The Amex Market Value index lost 0.16 to close at 364.12. Declines led advances 306-229 among the 807 issues traded. The price of an average share was unchanged. Composite volume totaled 15,930,800 shares, compared with 19,348,930 shares traded Friday.

An issue of Salomon's "put" warrants on Tokyo's Nikkei stock index, which function as bets against that market, led the Amex issues, up 1 5/8 to 7 1/2.

The National Association of Securities Dealers composite index rose 0.74 to 442.90.

#90078u2186 03/19/1990 ~United Press International

(MARCH 19) UPI - The man likely to become East Germany's first NON-communist leader says the Soviet Union will remain a key ally. Conservative leader Lothar de Maiziere today invited the Social Democratic Party and the liberal Federation of Free Democrats to join in talks to create a coalition government. He says both parties favor a free market system. De Maziere also says East Germany's move toward democracy began with the Solidarity movement in Poland and the reforms of Soviet leader Gorbachev.

The Soviet Union is warning foreign states against recognizing Lithuania as independent. Soviet foreign ministry spokesman Gennady Gerasimov also denied reports of unusual troop maneuvers in Lithuania during the weekend.

France had indicated it would recognize an independent Lithuania... but, today French officials said Paris will hold off recognizing Lithuania as long as talks continue between Lithuanian leaders and the Soviet president.

Former President Carter criticized Israel today, charging that Palestinians are being deprived of their human rights. Carter is in the Middle East on a fact-finding tour. He told reporters in Israel that the Palestinian uprising- quoting- ''is being perpetuated partially by the abuse of the Palestinians themselves.'' He says there are few Arab families on the West Bank and Gaza Strip that have NOT had one of their men jailed by the Israeli military since the uprising began 27 months ago.

Two striking Greyhound employees and another motorist will be arraigned in Martin County, Florida, this afternoon for allegedly trying to force a Greyhound bus off the road. All three are jailed on charges of aggravated assault with a motor vehicle and ''willful and wanton reckless driving.'' State troopers intercepted the trio yesterday near Stuart in Central Florida. The incident was the latest in a string of increasingly violent attacks against Greyhound buses in the two-week-old strike against the bus line.

#90078u2190 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - Congress should eliminate a double subsidy that allows some Western farmers to get subsidized irrigation water plus payments for the surplus crops they grow with it, Rep. Sam Gejdenson, D-Conn., said Monday.

Western congressmen disagreed sharply with Gejdenson. Where he saw a contradiction in policy, they saw an Easterner - from a rain-blessed region - trying to deprive farmers of a vital tool.

''We're going the wrong direction,'' said Rep. Robert Smith, R-Ore., who argued Gejdenson's position would imperil thousands of small farmers who get irrigation water from the Bureau of Reclamation. Smith and Rep. Gary Condit D-Calif., said water and farm policies have the same goal - a stable rural economy.

Gejdenson is sponsor of a bill that would limit farmers to receiving either farm program benefits or subsidized irrigation water.

''If you believe in helping farmers, you've got to have a program that we can defend to the American people. There are parts of it that don't make sense. This is one of them,'' Gejdenson said, responding to his critics.

Gejdenson, who has sponsored similar legislation in the past, said it is illogical for the government to pay farmers to idle some crop land while

it makes it easier for other farmers to grow surplus crops.

Rep. Thomas Petri, R-Wis., supported Gejdenson's bill, arguing the water subsidy gives Westerners an edge over farmers in other parts of the country.

''We're only asking for an end to double subsidies. ... They (Westerners) will still have a good deal,'' Petri said. ''It won't be as outrageous a deal as they have today.''

Commissioner Dennis Underwood of the Bureau of Reclamation said the Bush administration agrees with the idea of eliminating subsidies that encourage overproduction but Gejdenson's bill is not the way to do it. He said the administration opposes the bill as inequitable.

Although about 35 percent of irrigated land is used to produce the seven crops - wheat, feed grains, rice and cotton - that are covered by the farm program, it amounts to 3 percent of total acreage planted to those crops.

Because of that, opponents said Gejdenson's bill would save the government little money.

#90078u2191 03/19/1990 ~United Press International

ANCHORAGE, AK (MARCH 19) UPI - Lawyers sorted through evidence Monday before the Joseph Hazelwood case goes to the jury, but one potentially important document has been sealed - the personnel file of the Exxon Valdez's helmsman.

The judge and lawyers worked out jury instructions focusing on three issues: whether the skipper of the Exxon Valdez was drunk when he sailed his tanker out of port on March 23, 1989, whether he was reckless, and whether he was negligent.

Jurors must decide whether Hazelwood is criminally responsible for the grounding early March 24 that caused nearly 11 million gallons of crude oil to pour out of gaping tears in the steel tanker. Closing arguments were scheduled Tuesday and the jury was expected to start deliberating Wednesday.

A stack of dozens of pieces of evidence before the jury - pictures, tapes, documents, diagrams, charts - omits the record of the man who was actually at the steering wheel the night the tanker hit Bligh Reef.

Helmsman Robert Kagan's file, state exhibit No. 153, has been sealed and no one will learn what light it might shed on the wreck of the Exxon Valdez.

Kagan hired a lawyer to protect his privacy, and both prosecutors and defense lawyers agreed to let Kagan's file, already offered as evidence, be sealed.

Kagan's lawyer, Lee Holen, without revealing the contents of the helmsman's now-secret Exxon personnel file, acknowledged that either side in the trial might have been harmed if it had become part of the evidence in the case.

Prosecutors, who initially sought to use Kagan's file and then agreed to let it be sealed, maintain that Hazelwood acted irresponsibly by leaving the bridge and letting Kagan and third mate Greg Cousins operate the tanker during its detour around icebergs.

Kagan had trouble steering, and Hazelwood should have known enough not to leave him alone with the third mate, unlicensed for those waters, prosecutors have argued, adding that Hazelwood did so because his judgment was impaired by alcohol. But testimony never fully established just how much Hazelwood knew about Kagan and his problems.

Considerable evidence pointed to Kagan's failure to execute the turns ordered by Cousins as the reason the ship hit the rocks. Testimony showed Kagan apparently turned less than ordered or applied counter-rudder after the turn - in other words, he turned the opposite way to cancel a sharp swing of the ship.

Cousins belatedly became aware that his turn orders to Kagan had not been fully carried out. But by the time he ordered a hard turn and grabbed the wheel from Kagan to make the turn, it was too late and the tanker was riding over the rocks, its bottom being ripped out.

Neither prosecutors nor defense lawyers hit hard at Kagan's role in the grounding during the trial, apparently out of fear that it could backfire. And perhaps for the same reasons, both sides agreed to Kagan's request to have his personnel file sealed.

Any culpability on Kagan's part could be interpreted by jurors as helpful or harmful to Hazelwood. If Kagan is blameworthy, then maybe Hazelwood would escape a conviction. But even if Kagan's steering problems contributed to the grounding, jurors might just as well blame Hazelwood for letting a troubled helmsman steer the ship during a touchy detour around icebergs.

Jurors, in their deliberations, still may ponder those issues, but if they do, they will do so without the benefit of Kagan's personnel file and what it says about the helmsman's abilities and actions and Hazelwood's awareness of them.

Neither Kagan, 47, of Harahan, La., nor Cousins, 39, of Tampa, Fla., was charged. Hazelwood, 43, of Huntington, N.Y., is the only individual on trial, facing seven years and three months in jail and a $61,000 fine if convicted of reckless endagerment, operating the tanker while intoxicated, negligent discharge of oil and criminal mischief.

Exxon Corp. and Exxon Shipping Co. were charged last month in a five-count federal indictment that, among other things, blames Exxon for Hazelwood's departure from the bridge, leaving the tanker in the hands of an unqualified mate and ''a helmsman who was known by Exxon Shipping Co. to be incompetent at performing his assigned duties.''

Although prosecutors agreed to let Kagan's file be sealed in the Hazelwood case, Assistant District Attorney Mary Anne Henry noted that the state was not agreeing to have Kagan's file sealed for the massive civil suit Alaska has filed against Exxon.

The Hazelwood trial is now in its eighth week. Jurors will get the case just a few days before the first anniversary of the Exxon Valdez spill.

#90078u2194 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - An intruder has penetrated the same nationwide computer network hit by a destructive ''worm'' program in 1988, but so far no damage has been detected, a federally funded computer alert center said Monday.

In a warning sent to the Internet's ''hundreds of thousands'' of users, the Computer Emergency Response Team, known as CERT, said the intruder has electronically ''broken into'' several computer systems and ''several dozen more attempts were made last Thursday and Friday.''

''We don't think the intruder is a (computer) program. Current evidence indicates it is one person sitting at a computer terminal and manually trying'' to enter various computer systems by stealing secret passwords, said Terry McGillen, a spokesman for CERT.

No serious damage had been reported as of Monday afternoon, McGillen said, but government investigators were still searching for the hacker behind the intrusion.

McGillen would not identify the affected institutions. But the New York Times quoted unnamed investigators as saying the intruder hit computers at Los Alamos National Laboratory in New Mexico, Harvard University, Boston University, the University of Texas and Digital Equipment Corp.

The invader had not stolen into any Defense Department computer programs, Pentagon spokeswoman Susan Hansen said Monday. ''We are aware of an intruder and are taking appropriate action,'' Hansen added.

Internet links computers at universities, government laboratories, non-classified military bases and private industry. It was one of the two national computer networks stricken in November 1988 by an electronic ''worm'' that shut down some 6,000 computers, including some belonging to the Air Force and National Aeronautics and Space Administration.

Earlier this year, Cornell University graduate student Robert Tappan Morris was convicted of a felony for creating that rogue program.

Compared with a computer worm or virus - programs that can rapidly reproduce and spread throughout data systems, an intruder generally poses a less serious threat because such damage does not copy itself, officials said.

The hacker now being tracked by government officials breaks into a computer system and steals users' passwords to gain access to their files, McGillen said.

It is not known what the thief is doing once he or she gains access to computer systems. But McGillen said obtaining passwords gives the intruder the potential to look into a regular user's files and perform tasks he or she is usually authorized to do.

McGillen, whose federally funded team is based at Carnegie-Mellon University in Pittsburgh, likened the latest Internet disruption to having a ''flat tire,'' compared with the ''car accident'' impact of the 1988 worm episode.

''A flat tire needs to be attended to, but you can quickly replace it,'' he said.

CERT's warning offered technical advice to Internet users, and also reminded them of the simple safeguard of changing passwords to make electronic breaking-and-entering a more difficult task.

#90078u2206 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - The government raised its estimate of farmers' net cash farm income by about $2 billion Monday, thanks to high prices for corn and hogs and cost-cutting by farmers.

''A gain of $2 (billion)-$8 billion in cash receipts and perhaps only a slight increase in cash expenses underlie the income prospects,'' the

Agriculture Department said.

''Net cash income could grow by about 6 percent, from $53 billion in 1989 to $54 (billion)-$58 billion this year.''

The estimate originally was $52 billion to $57 billion.

Net cash farm income measures the value of commodities sold during a calendar year, plus government payments but subtracting all out-of-pocket costs.

Net farm income, which measures the value of agricultural production during a year plus government payments and subtracts all costs, was forecast for $45 billion to $49 billion - ''steady to down 8 percent from last year.''

The government said net farm income might fall if feed grain prices ease from drought-induced high levels. That would reduce the value of this fall's harvest.

The report also said that 90 percent of farm program payments have gone to 32 percent of the farms that receive payments.

''Since 64 percent of all farms receive no direct payments, 90 percent of payments go to only 12 percent of all farms,'' the report said.

#90078u2219 03/19/1990 ~United Press International

NEW YORK (MARCH 19) UPI - The dollar weakened against the West German mark in New York trading Monday as traders acted on perceptions that a conservative coalition's victory in East German elections would speed Germany's reunification and reduce economic uncertainties in the process.

But the dollar's decline against the deutsche mark was less precipitous than some expected. Currency traders said the victory of the Alliance for Germany, backed by West German Chancellor Helmut Kohl, leaves unanswered a number of questions about monetary and political unification.

The deutsche mark's rise was steeper against Japan's yen, which was undercut by yet another serious Tokyo Stock Exchange decline and which also lost ground against the dollar. The yen recovered somewhat later on rumors that the Bank of Japan would hike a key interest rate Tuesday.

In late New York trading, the dollar was changing hands at 1.6860 German marks, off from 1.6985 marks Friday. The U.S. currency was quoted at 153 yen, up from 152.65 yen last week.

East Germany's election was "something the market has been waiting for," said chief dealer John McCarthy of the Amsterdam Rotterdam Bank. "The uncertainty has been at least marginally eliminated," he commented.

"The market was set for that kind of a win, to sell dollars and buy marks," said Robert White, vice president for corporate trading with First Interstate Bank Corp. in Los Angeles. "It stalled very quickly, though."

Markets were reassured because a win by allies of the West German opposition Social Democrats could have slowed reunification. Worries about inflationary effects of reunification recently depressed the mark.

The yen was braced in late trading by a report that a Bank of Japan policy committee on interest rates would meet Tuesday in special session to proceed with a long-awaited official discount rate hike. The Japanese report said the hike would bring the rate to 5.25 percent from 4.25. Commerce in such rumors has been fast and furious, White said. But he added, "The closer we get, the more the rumors seem to take hold."

If the Bank of Japan does act, he said, it will remain to be seen whether the hike can restore vigor to the ailing yen. Japanese interest rates must rise enough to hold capital now flowing out of the currency. "It could open the floodgate," White said. "They've got no more ammunition once they've done that (hiked the rate)."

Other dollar rates: 1.5085 Swiss francs, off from 1.5095; 5.6995 French francs, off from 5.7345; and 1,246.50 Italian lire, down from 1,253. The British pound eased to $1.6135 from $1.6190.

In Europe the dollar mainly declined, ending in Frankfurt at 1.6790 German marks against 1.6950 Friday. But it was unchanged in Zurich at 1.5065 Swiss francs.

It fell in Paris, Brussels and Milan to 5.690 French francs against 5.7390 35 Belgian francs against 35.24 and 1,245.00 lire against 1,254.10. In London, the pound slipped to $1.6115 against $1.6240.

Earlier in Tokyo, a stock market selloff sent the dollar to a new three-year high against the yen. It closed at 153.55 yen against 152.50.

Republic National Bank in New York closed cash gold higher at $401.75 an ounce against $400 Friday. The New York Commodity Exchange settled gold at $400.70 compared with $399.60. In Zurich, gold rose to $402.50 an ounce from $401. London gold rose to $402.75 an ounce from $400.50.

Republic closed cash silver at $5.125 an ounce, up from $5.12. Comex spot silver rose to $5.101 an ounce from $5.093. Zurich silver was unchanged at $5.10 an ounce. London silver held steady at $5.13.

-30- 3821
#90078u2249 03/19/1990 ~United Press International
(MARCH 19) UPI - Anti-abortion senators in Maryland today resumed their five-day-old filibuster against legislation that would guarantee abortions remain widely unrestricted in the state. Abortion opponents met in closed session to work on proposals from supporters of the bill to end the marathon debate. The central issue in the talks is tempering language allowing viable fetuses to be aborted solely because the mother's mental health is in danger.

Just like clockwork, the swallows are returning to San Juan Capistrano. Eight or nine swallows were spotted at the 214-year-old California mission this morning... prompting locals to declare the official return of the tiny brown-and-white birds with the customary ringing of the church bells. The swallows have returned to the mission every March 19th for the past two centuries from their winter home in Argentina.

But for the first time in the mission's history, the swallows' return was marked by controversy. Hundreds of descendants of the Juaneno Indians, who built the adobe mission, plan a peaceful march and sit-in during the height of the Swallows Day's festitivies. The local Indians have grown concerned with the diminishing role their tribe plays in the preservation of their ancestral land.

NEW YORK (MARCH 20) UPI - The racketeering and securities fraud trial of former junk bond king Michael Milken was tentatively scheduled to start May 1 and the government Monday promised a superseding indictment within a month.

In U.S. District Court in Manhattan Judge Kimba Wood said the trial date may prove to be just a date for a pre-trial conference because of the promised expanded indictment of the former Drexel Burnham Lambert Inc. junk bond chief.

Of the long-awaited superseding indictment, John Carroll, an assistant U.S. attorney prosecuting the case, said, ''I can tell you it will be no later than the week of April 16.''

The government had been expected to bring a new indictment, including additional charges against Milken, as early as October 1989. Superseding indictments also can name new defendants, but there was no indication the government was prepared to do so.

The new indictment would replace the original 98-count indictment naming Milken and his brother, Lowell, who also worked for Drexel. Both have pleaded innocent.

The original indictment, which was handed up March 29, 1989, charges Milken and his brother with violating federal laws, including insider trading, stock manipulation and racketeering.

Milken and his brother were released on $1 million bail each. Michael Milken set aside $700 million and Lowell Milken $50 million to secure claims to their assets, which allegedly were acquired through their illegal activities.

On Dec. 21, 1988 Drexel reached an agreement with the U.S. Attorney's office for the Southern District of New York to plead guilty to six felony counts, including securities fraud, and to pay $650 million in penalties and fines.

#90078u2294 03/19/1990 ~United Press International

WASHINGTON (MARCH 19) UPI - NASA disputed a report Monday that a planned $30 billion space station is seriously flawed because it would begin to wear out and require extensive maintenance before it is completed.

William Lenoir, associate administrator for space flight for the National Aeronautics and Space Administration, said problems outlined in a New York Times story are not new and will be overcome once the proposed station, called Freeedom, reaches the construction stage.

In a statement, Lenoir said questions about the space station's durability ''apparently result from a worse-case scenario that NASA used in a normal risk analysis assessment during the station's preliminary design phase.''

''This scenario is not considered credible,'' he said, adding that scientists assume ''unrealistically pessimistic'' conditions to make sure the space station can withstand the rigors of orbiting Earth.

The Times, citing NASA sources, said anticipated maintenance problems

could force a redesign of the 400-foot-long station, which is the centerpiece of the U.S. space program in the 1990s and beyond.

Construction of the Earth-orbiting space base, already at least four years behind schedule, is to begin in 1996, although continuing budget problems, design difficulties and political uncertainty could cause additional delays.

The report said that construction is expected to take five years and it would be only 60 percent to 70 percent complete before space-walking astronauts would be forced to turn from assembly to preventive maintenance inspection and repairs. Studies indicated as many as 2,200 hours of spacewalks, which are dangerous, could be needed for maintenance, the Times said.

It said NASA engineers are to present a plan to correct the problems in June, but so far they have only preliminary ideas of how the problems might be fixed.

But Lenoir disagreed with the report, saying, ''There is no major flaw in space station Freedom.''

''The issues raised (in the story) are not new nor are they of recent origin,'' he said. ''Studies such as the one noted are a normal part of doing business, part of the preliminary design process that will go on through December 1990.''

President Ronald Reagan endorsed the space station project in his 1984 State of the Union address. At that time, NASA said the orbiting outpost could be built for $8 billion. Since then, it has been redesigned and the cost has skyrocketed to more than $30 billion by some estimates.

This year is crucial for the program, with NASA requesting $1.8 billion for space station work alone. The Bush administration has asked for $2.5 billion next year.

Lenoir said changes to reduce the amount of spacewalking required to build and maintain the station ''can be accommodated at this time ... without disrupting the schedule, cost or overall architecture of the program.''

''NASA has been examining the (spacewalk) requirements in detail for about six months and plans to continue the study through the preliminary design review time frame,'' Lenoir said. ''At that time, NASA will plan to complete and baseline a servicing and maintenance plan to guide us through the next phase of the program.''

#90078u2303 03/19/1990 ~United Press International

(MARCH 19) UPI - U.S. crude prices took a nosedive Monday, to their lowest level in 15 weeks,in the wake of the failure of OPEC oil ministers to take any steps to curb cartel overproduction during their Vienna meeting over the weekend.

West Texas Intermediate crude for April delivery plunged 47 cents to $19.60 a barrel on the New York Mercantile Exchange, the lowest closing price since Nov. 29 and the first time the benchmark crude closed below $20 a barrel since Nov. 30.

April delivery WTI goes off the board Tuesday and most market attention was on the May delivery contract, which becomes the spot-month contract Wednesday. The May contract fell 47 cents to $19.96 a barrel.

Crude volume was a heavy 119,781 estimated contracts.

Prices of later-delivery WTI contracts were higher and they experienced less of a decline, indicating weaker demand for near-term delivery, said Randall Rothenberg of Dean Witter Reynolds' International Energy Futures Group in New York.

On the U.S. Gulf Coast cash market, prompt-delivery WTI for cash dropped 50 cents to $19.60 a barrel.

''The crude market was down because no action was taken by OPEC over the weekend,'' said Rothenberg.

Even though several OPEC ministers had warned no decisions would be made at this meeting, ''the market had hoped there would be something from Kuwait and the United Arab Emirates on their overproduction,'' the analyst said.

Oil ministers of the 13-nation Organization of Petroleum Exporting Countries met in Vienna over the weekend to reassess the 22 million-barrel daily ceiling placed on the cartel's collective output.

OPEC output has been running more than 23 million barrels a day, largely as a result of Kuwait and the UAE ignoring quotas assigned to them. The overproduction has placed a downward pressure on world crude prices.

OPEC's inaction had a similar effect overseas.

On the European spot market, Britain's widely traded North Sea Brent plummeted 41 cents to $17.89 a barrel.

The UAE's Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - dropped 28 cents to $15.42 a barrel.

WTI prices made a move to go below $19 a barrel in late Nov. after the year-end OPEC meeting failed to take any action to curb quota-cheating, but the market was rescued by unusually cold weather and demand for heating oil.

No market rescue from rising demand for petroleum products currently appears on the horizon, although there was a slight increase in heating oil prices as a result of a tightness in the New York Harbor cash market, Rothenberg said.

Prices of unleaded gasoline fell 0.85 cent on the harbor spot market to 54.35 cents a gallon and April contracts fell 0.60 cent on the Merc to 56.36 cents a gallon.

Heating oil for April delivery edged up 0.08 cent to 54.54 cents a gallon on the Merc, while spot prices rose 0.6 cent on the New York Harbor market to 58.55 cents a gallon.

#90078u2428 03/19/1990 ~United Press International

NASHVILLE, TN (MARCH 19) UPI - Country singer Johnny Cash was recovering Monday from oral surgery for a nagging dental problem that forced him to postpone a European concert tour, his publicist said.

Cash, 58, underwent surgery Sunday at Nashville's Baptist Hospital after complications arose from previous surgery to remove a wisdom tooth and a cyst from his jawbone, said publicist Hugh Waddell.

Cash is expected to be release from the hospital soon, but he'll need at least eight weeks to recover, Waddell said.

The surgery forced Cash to postpone a three-week European concert tour, which had been scheduled to begin Mar. 22 in Heerenveen, Holland. The tour has been rescheduled for later this summer, Waddell said.

Prior to entering the hospital, Cash finished a two-week, 12-city tour with The Highwaymen, the band comprised of country music legends Cash, Willie Nelson, Kris Kristofferson and Waylon Jennings.

#90078u2438 03/19/1990 ~United Press International

ALEXANDRIA, VA (MARCH 20) UPI - The chairman of Kay Jewelers Inc. said Monday that the nation's second largest jewelry retailer is in ''good shape'' and that he is optimistic about the future despite a 98 percent drop in income in 1989.

Anthonie C. van Ekris also dismissed as ''frivolous'' a lawsuit filed last Friday by two stockholders who say the Alexandria company filed ''false and misleading'' statements to the Securities and Exchange Commission about third-quarter earnings.

''I think the company is in very good shape,'' van Ekris said in a telephone interview from his office in London. ''We're looking for a fine year and we're looking for returning to historical profitability.''

The company reported Friday net income for 1989 of $196,000, or 2 cents per share, down from $10.9 million, or 88 cents per share, for the same period in 1988.

Sales were flat, rising only 1.5 percent to $426 million from $420 million the previous year.

Van Ekris denied reports that Kay Jewelers, which has 488 stores across the country, including the upscale Black Starr & Frost stores, is short of cash and has too much inventory on hand. Both allegations were made in the suit, filed in U.S. District Court in Washington, D.C.

''We're not in any cash flow trouble,'' he said. ''That's total nonsense. We'll be cash-flow positive for the year.''

Kay Jewelers does most of its business during the holiday season between Thanksgiving and Christmas, which in 1989 was marked by a price-cutting frenzy spurred by a soft retail market.

Van Ekris also blamed the problem on price slashing by department store magnate Robert Campeau, who offered deep discounts to generate much-needed cash.

Such discounts are not Kay's way of doing business, van Ekris said.

''We can safely assume that this year there will not be another Campeau. That's what really killed Christmas,'' he said. ''It was not so much soft buying but the Campeau failure. The retailers were getting scared and everybody started to discount like crazy. We didn't have that need because we're in a good cash position, but our volume suffered.''

To bolster his argument, van Ekris pointed to R.H. Macy and Co., which last week reported four consecutive quarterly losses in 1989 and said it would cut back on sales promotions.

Analysts say Kay's problem was not unique and does not mean business won't pick up this year.

''It's pretty much everybody in the business. There is some confirmation they have a pretty heavy inventory, but it was an abominably bad Christmas for anyone selling high-priced products,'' said Greg Drahuschak of Wheat First Securities in Pittsburgh. ''It was not a problem Kay has created so much as the marketplace created for them.''

Drahuschak said he believes business will get ''a little better'' this year.

Van Ekris said Kay will cut $15 million off its expenses this year through some layoffs and cutbacks in several programs, but the results won't be seen for several months.

He said earnings in the first half of the year traditionally are down and the next few months will be tough, but Kay will not be slashing prices.

However, he said he expected business to pick up later in the year, noting marriage Kay makes 50 percent of its money from the sale of engagement rings.

As for the suit, which Drahuschak called a ''nuisance'' suit, van Ekris said he is confident the company will win.

Among other things, the suit alleges Kay failed to disclose that it was encountering a severe inventory problem.

The plaintiffs seek unspecified damages for individuals who bought stock between Nov. 14, 1989, when the report was filed with the SEC, and March 11.

Kay has retained First Boston to consider offers for a merger or buyout because the company has been approached by potential buyers, but van Ekris said there is no serious offer pending.

#90078u2474 03/19/1990 ~United Press International
(MARCH 19) UPI - The Pentagon says another electronic intruder has penetrated a nationwide computer network that was affected by a destructive ''worm'' program two years ago. A spokeswoman says NO damage has been detected in the Internet system so far, and appropriate action is being taken. Internet links computers at universities, government laboratories and NON-classified military bases.

Authorities say flooding in southern Alabama has forced four-thousand people from their homes, and more evacuations necessary. Last week's rain is due to send the Alabama River 20 feet above flood stage today in Montgomery. In Florida's Panhandle, flooding has forced another one-thousand people from their homes.

President Bush says the United States must expand its farm market abroad and to do so the European Community must open its doors more to American products. Bush says E-C officials must- in his words- ''take a whole new look at their farm program.'' The president says U-S negotiators areN'T going to lighten up on this critical issue.

Resentment over West Virginia's handling of the first statewide teachers strike is lingering today as teachers returned to the classrooms for the first time in 11 days. Many teachers are angered that the state declared their walkout illegal and threatened to hire replacements.

Federal mediators say they'll push for more negotiations between Greyhound and striking company workers. But, there are currently NO plans to resume talks in Tucson, Arizona. In Stuart, Florida, two striking drivers and another motorist were booked after allegedly trying to run a Greyhound bus off the road yesterday.

The shuttle mission to put the Hubble Space Telescope into orbit reached a turning point today. Engineers began the practice countdown that traditionally marks a major hurdle in space shuttle launches. Engineers also solved a potential problem with the landing gear of Discovery, which will carry the telescope into space.

#90078u2653 03/19/1990 ~United Press International
HOLLYWOOD (MARCH 19) UPI - Warner Bros. set an all-time movie industry record this month when its films were shown across 6,876 of the 23,000 screens in the United States and Canada.

Films contributing to the record number of theater playdates were ''Joe

Versus the Volcano,'' ''Driving Miss Daisy,'' ''Hard to Kill,'' ''Lambada '' ''Tango & Cash,'' ''Men Don't Leave,'' ''National Lampoon's Christmas Vacation'' and ''Roger & Me.''

Still playing in theaters are such Warner holdovers as ''Batman'' and ''Lethal Weapon 2,'' accounting for 80 screens between them.

KEATON CAST

Michael Keaton, star of last year's blockbuster ''Batman,'' will play a different kind of law enforcer in the crime drama ''One Good Cop'' for Disney's Hollywood Pictures.

''One Good Cop'' will be Keaton's first film project for the Walt Disney Studios as well as the directorial debut of screenwriter-author Heywood Gould, who wrote the screenplay for ''Cocktail.''

Keaton will play a hardened New York City detective who is suddenly given the custody of three young girls when his longtime partner is killed in the line of duty.

PREVIN AND JAZZ

Pianist-conductor Andre Previn heads back into the studio this month to record his second jazz album in as many years for the Telarc label.

The new recording, ''Over the Rainbow,'' will celebrate the music of Harold Arlen. Last year's highly regarded session, ''After Hours,'' with bassist Ray Brown and guitarist Joe Pass, was Previn's first jazz recording in three decades.

BACK IN THE PLATINUM

Quincy Jones's all-star conceptual album ''Back on the Block'' has gone platinum, as certified by the Recording Industry Association of America for selling more than 1 million copies.

The funk-jazz-pop-rap album features the Chaka Khan-Ray Charles hit ''I'll Be Good To You'' and a new single, ''Secret Garden,'' with James Ingram, El Debarge, Barry White and Al B. Sure!

BURR ROLE

Raymond Burr will play a rare comedy role in ''Delirious,'' a new movie starring John Candy, Mariel Hemingway and Emma Samms.

Burr will be seen as the patriarch of a family of characters who exist only in the mind of a soap opera writer played by Candy, but who somehow

comes to life.

For the past five years Burr has played his Perry Mason role in several two-hour movies for television. In addition to his series, Burr has appeared on such TV shows as ''Kingston,'' ''79 Park Ave.'' and ''Centennial.''

STAR TEAM

James Earl Jones and Richard Crenna will team up to star in ''Last Flight Out'' for NBC-TV, a two-hour film dealing with a group of Americans who risked their lives to save 500 Vietnamese civilians.

The story involves the fact-based drama of the men aboard the last commercial flight out of Saigon in 1975, which carried both Vietnamese citizens and Americans out of the country.

Also appearing in the large cast are Haing S. Ngor, Arliss Howard, Eric Bogosian, Rosalind Chao, Elizabeth Lindsey, Bary Corbin and Molly Hagen.

WEIN SALUTE

Jazz producer George Wein will be honored April 11 with a musical salute at Carnegie Hall for his contributions to the entertainment industry.

All-star performers at the event include Joe Williams, Wynton Marsalis, Dianne Reeves, Billy Taylor, David Sanborn, George Benson, Jon Faddis, Tito Puente, Stanley Jordan and Bill Cosby.

The event is a benefit for WBGO-FM in Newark, N.J., the prime jazz station in metropolitan New York.

FOX FEAT

The Fox Broadcasting Company has been awarded a three-year contract to broadcast the annual Primetime Emmy Awards of the Academy of Television Arts & Sciences.

The contract calls for Fox to telecast annually in Los Angeles and New York the academy's previously non-televised presentations of Emmy Awards for creative arts categories. These awards will also air in primetime over Fox owned stations, KTTV in Los Angeles and WNYW-TV in New York.

An academy spokesman announced that the annual ''Television Academy Hall of Fame'' presentations, broadcast by Fox for the past three years, will not be broadcast by Fox this year.

WAHL GRADUATES

Ken Wahl, star of TV's ''Wiseguy'' series, is the latest small screen star to move up to feature films with his assignment to play the lead in ''The Taking of Beverly Hills.''

Co-starring with Wahl in the action adventure drama are Harley Kozak, currently working in Steven Spielberg's ''Arachniphobia,'' and Matt Frewer of ''Max Headroom'' fame.

''The Taking of Beverly Hills'' will be directed by Sidney J. Fury and deals with a massive sting operation to plunder the wealth of one of America's richest cities.

JACOB'S PILLOW GALA

Dancers Ann Reinking, Marge Champion and Judith Jamison will host a gala fundraiser Apr. 18 at the Waldorf-Astoria's Starlight Room to benefit the Jacob's Pillow Dance Festival in Becket, Mass.

Proceeds from the $300 per ticket event will benefit the inaugural

#90078u2667 03/19/1990 ~United Press International

DETROIT (MARCH 19) UPI - Ford Motor Co., the most profitable automaker during the last decade, paid a $2 billion premium - five times book value - for British carmaker Jaguar, according to Ford's annual report issued Monday.

The report, now being mailed to Ford's 286,500 shareholders, also disclosed the No. 2 automaker paid a $1 billion premium last October for the giant Associates finance and insurance company in Dallas.

Ford also said that it has earmarked $215 million of the $229.4 million set aside for bonuses to its salaried workers and that former chairman Philip Caldwell, 70, will retire from the board of directors in May.

Caldwell, chairman from 1979 to 1985, succeeded the late Henry Ford II. He is is credited with laying the groundwork during his tenure to help Ford achieve record earnings during the latter half of the 1980s.

Regarding Jaguar, Ford told shareholders the company had a fair purchase price of $500 million despite announcing late last year that it would acquire the carmaker for $2.5 billion.

''The purchase price on completion of the acquisition will be $2.5 billion '' Ford told shareholders in the report. ''The excess of the acquisition price over the fair value of the net assets acquired goodwill of $2

billion will be amortized on a straight line basis over 40 years.''

Ford had never publicly disclosed how much it estimated Jaguar's fair value to be, spokesman Rex Greenslade said. But industry analysts widely speculated a large premium was paid for the company.

''It is quite common for a company to pay a premium for another company,'' Greenslade said, although independent analyst David Healy in New York said he was hard pressed to remember the last time a company paid five times the net worth of another company.

''But Ford was after the name and the allure of Jaguar, not its market assets,'' Healy said.

Ford, which acquired The Associates last year from Paramount Communications Inc. for a total $3.4 billion, will amortize the goodwill on that purchase over 40 years as well.

''That means Ford will carry a little water on its books for a long time to come - at least $3 billion worth, which is more like the Atlantic Ocean '' Healy said.

Ford will hold the annual shareholders meeting May 10 in the Ford Auditorium in Detroit.

WASHINGTON (MARCH 20) UPI - Sales of Series EE savings bonds dropped to $652 million in February from $826 million in January, the Treasury Department announced Monday.

The savings bonds pay a variable rate on interest based on the yield of 5-year Treasury notes, are guaranteed to earn interest for 30 years and pay the face amount in at least 12 years.

The current rate is 6.98 percent.

#90078u2676 03/19/1990 ~United Press International

MEXICO CITY (MARCH 20) UPI - The proven hydrocarbon reserves of Mexico, a non-OPEC producer, declined by 1.7 percent in 1989, the state-owned oil giant Petroleos Mexicanos said Monday.

In its annual report, the oil company, known as Pemex, said although the country's crude production edged up by 0.3 percent in 1989 from the previous year, oil exports declined by 2.2 percent during the same period

to 1.277 million barrels a day in 1989 from 1.306 million barrels a day in 1988

Mexico, which is the world's fourth-largest oil producer after the Soviet Union, the United States and Saudi Arabia, is not member of the Organization of Petroleum Exporting Countries but in recent years has coordinated its pricing and production policies with the oil cartel.

''Proven hydrocarbon reserves on Jan. 1 of this year, considering the extraction of 1.258 billion barrels of total liquid hydrocarbon produced during 1989, is established at 66.450 billion barrels, which represents a reduction of only 1.7 percent,'' the Pemex report said.

The report said crude production in 1989 averaged 2.513 million barrels a day, up 0.3 percent from 2.506 million barrels a day in 1988.

Natural gas production rose to 3.571 billion cubic feet a day in 1989, up 2.7 percent from 3.478 billion cubic feet produced daily in 1988, the report said.

The production of basic petrochemicals jumped to 16.882 million metric tons in 1989, up 9.2 percent from 1988 levels, the report said.

Mexico earned $7.84 billion from exports of petroleum and petroleum products in 1989 and spent $800 million on importing similar products, registering a trade surplus of $7.04 billion, up 15.3 percent from 1988.

Of the total petroleum export revenue, Pemex earned 92.8 percent from crude, 5.8 percent from petroleum products and 1.4 percent from petrochemicals, the report said.

Crude exports rose to 1.278 million barrels a day, of which light Isthmus crude accounted for 27 percent, heavy Maya 61.5 percent and extra-light Olmeca 11.5 percent. The report said Olmeca exports rose from 71,700 barrels a day in 1988 to 147,500 barrels a day in 1989.

The average price of Mexican crudes on international markets in 1989 was the following: Olmeca, $18.76 a barrel; Isthmus, $17.10 a barrel; and Maya $14.37 a barrel.

In 1989, Mexico exported crude to 20 countries. The United States, which imported 56.8 percent of Mexico's total oil exports, was the largest importer, followed by Spain, 15.2 percent; Japan, 13.1 percent; France, 4.5 percent; and Israel 2.6 percent.

The domestic sale of petroleum products rose by 7 percent, natural gas 4.1 percent and petrochemicals 4.6 percent.

PITTSBURGH (MARCH 20) UPI - A federal bankruptcy judge in New York approved a tentative labor agreement between LTV Steel Co. and the United Steelworkers of America, union officials said Monday.

The agreement approved by U.S. Bankruptcy Judge Burton Lifland clears the way for a vote on the agreement by USW members at the LTV Corp. unit, the union said. Lifland is supervising LTV Steel's reorganization under Chapter 11 of the bankruptcy law.

Ballots will be mailed to 13,700 eligible voting members at 13 LTV Steel facilities and the secret ballots must be returned by April 2, when they will be counted in Pittsburgh, officials said.

A tentative three-year contract, reached Feb. 25, provides for restoration of past wage and benefit sacrifices, $1.50 an hour in wage increases and other contract improvements, the union said.

If approved by the union members, the pact will take effect April 15.

#90078u2702 03/19/1990 ~United Press International
WASHINGTON (MARCH 20) UPI - The U.S. food aid package to Poland is being revised to scratch the donation of 10,000 metric tons of butter and instead to send corn for livestock feed, the Agriculture Department said Monday.

Officials said the change was made because of large butter production in Poland.

''Instead of sending the unneeded butter, the (government) now will provide the Poles with additional corn, which will be used to support development of their livestock and poultry industry,'' said F. Paul Dickerson of the Foreign Agricultural Service.

''The corn will be sold and proceeds used to enhance economic development, with an emphasis on the Polish agricultural sector.''

The United States committed $120 million in food aid to Poland last fall. The aid was intended to counter short-term food needs and to meet livestock feed needs until this year's crops are harvested.

The butter, part of a $50 million donation announced last Nov. 20, will be replaced by 173,225 tons of government-owned corn. There are 39.4 bushels of corn in a metric ton, so the donation is the equivalent of 6.8 million

bushels.

Agriculture Department economists have projected that Poland would need only short-term food aid and that the country is on the brink of self-sufficiency in food.

#90078u2707 03/19/1990 ~United Press International

BUTTE, MT (MARCH 20) UPI - Mine wastes could prove to be a gold mine for Montana earth movers and technology companies as work accelerates on the state's 10 Superfund environmental cleanup sites.

U.S. Environmental Protection Agency Administrator William Reilly joined Gov. Stan Stephens and both Montana senators Monday to tour Superfund sites between the historic Mining City of Butte and the environmentally activist Garden City of Missoula.

Sens. Max Baucus, D-Mont., and Conrad Burns, R-Mont., said they want Reilly to hasten Superfund cleanups. They also hope to build support for their proposed national center for environmental technology at Butte, where the mile-deep, abandoned Berkeley Pit open copper mine is filling with dangerously contaminated water.

About 70 building contractors and representatives of technology development firms met in Butte Thursday to learn how to cash in on Superfund and other cleanup programs, which mainly involve mine wastes and wood treatment chemicals in Montana.

Evan Barrett, Butte development director, told participants they were living in ''the world's largest environmental test tube'' because of a century of ecologically insensistive mining.

''Most of the creative ideas and ways to clean up things have come from smaller companies,'' Barrett told the state-sponsored meeting. ''There's an entrepreneurship up there, creativity.''

Most of the actual cleanup in Montana will involve basic civil engineering: ''move dirt from here to there, put something on top of it,'' cleanup consultant Mike Rubich told the contractors.

He said $20 million to $30 million has been spent on environmental cleanup in Montana under the Superfund program in the last seven or eight years.

The state has its own ''mini-Superfund'' program funded at $250,000 for two years, but of the 150 sites identified by officials, ''they have cleaned up exactly two,'' Rubich said.

''The Abandoned Minelands Bureau has thousands more sites,'' he added.

Most of the cleanup in Montana is being done by the ''responsible parties'' - usually the current or previous owners of a contaminated site, state Superfund official Vic Anderson said. Atlantic Richfield Co. has been named the responsible party for four Montana Superfund sites and is subcontracting out much of the environmental work, officials said.

In the 10 years since Superfund was established, Congress has authorized $10 billion for cleanup nationwide. But ''adversarial relationships'' surrounding the program have resulted in ''tremendous expenditure for what I consider to be modest gains,'' Rubich said.

Ten of the nation's 1,200 Superfund sites are in Montana, the most in the nation on a per capita basis, Rubich said.

The worst site in Montana, ranked 20 on the national list, is a series of mine tailings running more than 100 miles along Silver Bow Creek and the Clark Fork River from Butte almost to Missoula. It is the largest Superfund cleanup area in the nation, Rubich said.

Heavy metals contamination allows only a few insect species to live in the creek, but Clark Fork water quality is generally excellent as it enters the Idaho panhandle, mainly because of dilution from the Bitterroot River and other tributaries, a state study concluded last month.

The Berkeley Pit is not on the Superfund list, but another former Anaconda Co. site is: the abandoned copper smelter that overlooks the city of Anaconda.

Other Superfund sites in Montana are the Asarco lead smelter at East Helena; a chromium refinery at Columbus; the Comet Oil refinery at Billings; mining wastes at the Milltown Reservoir; and wood treatment areas at Libby, Butte, Bozeman and Somers on the shore of Flathead Lake.

#90078u2755 03/19/1990 ~United Press International

FORT WORTH, TX (MARCH 20) UPI - The union representing American Airlines pilots in contract negotiations charged Monday the Federal Aviation Administration is improperly assisting the carrier in their dispute over a new labor agreement.

In a letter to Transportation Secretary Samuel Skinner, the Allied Pilots Association, representing more than 8,000 American crew members, charged the FAA ''is diverting its resources to aid one of the parties to a labor dispute.''

Contract talks between the carrier and the union, which began late last year, have stalled and the National Mediation Board has named Harry Bickford as mediator.

In the letter to Skinner, the union quoted a communication allegedly sent by a FAA staff member March 3 to area supervisors saying ''it appears that some flight crews are flying their aircraft at less-than-expected altitudes and speeds.

''American Airlines has asked, to the extent possible, that we record the 'flight call' signs, dates and times for forwarding to the airline,'' according to the quoted FAA communication.

''Revealed to us is the carrier's covert approach to a federal agency to give it gratuitous aid and assistance in a labor dispute that is the subject of current negotiations,'' Frederick R. Vogel, the union president said in the letter.

The letter warned that if current negotiations fail and a strike or lockout results, ''the FAA will have to face up to its share of responsibility.''

American Airlines spokesman Al Becker said the carrier has not experienced any flight problems since negotiations with the pilots began.

Talks are expected to resume March 27 with the arrival of Bickford, Becker said.

#90078u2763 03/19/1990 ~United Press International

LOS ANGELES (MARCH 19) UPI - A former Drug Enforcement Administration agent who was the subject of an international manhunt before his capture in Europe pleaded innocent Monday to narcotics charges stemming from a major corruption scandal that rocked the DEA.

Darnell Garcia, 43, denied two counts charging him with stealing $150,000 in heroin from a DEA evidence vault in October 1984, with the intention of trafficking the drug.

Garcia, however, refused to enter pleas to four other counts alleging conspiracy, money laundering and informing a fugitive drug trafficker he was the focus of a planned search and seizure by law enforcement officers.

Garcia's attorney argued those charges were not contained in the government's extradition agreement with the tiny European nation of Luxembourg, where the ex-agent was arrested.

U.S. District Judge Terry Hatter entered innocent pleas to those counts on Garcia's behalf and denied him bail, saying that Garcia was a flight risk.

Garcia and two other DEA agents based at the agency's Los Angeles office were charged in 1988 in a 42-count indictment alleging they participated in a drug trafficking and money-laundering scheme.

The case is the most sensational of three DEA corruption cases around the country involving agents who allegedly participated in drug trafficking.

Garcia's trial was set for Sept. 4.

Unlike the other defendants, Garcia faces only six counts in the indictment because a host of tax and other charges were not deemed appropriate for extradition by Luxembourg.

An international martial-arts expert, Garcia is the only one among five defendants not free on bail.

He became a fugitive in November 1988, and traveled the world for seven months, attempting to hide $3 million in profits from narcotics sales, prosecutors allege.

Garcia's bank accounts in Luxembourg have been frozen until the case is resolved.

Before his arrest last July, the renegade ex-agent traveled to Rio de Janeiro, Frankfurt, Madrid and Paris, where he allegedly hid out in a hotel with his wife, a fugitive drug dealer from Detroit, and a woman described in court documents as Garcia's ''paramour.''

The two other DEA agents charged in the case are John Jackson, 40, of Claremont, and Wayne Countryman, 47, of Walnut. Jackson's wife, Barbara, 41, and his former business partner, Sherman Lair, 39, of Alta Loma also are charged in the case.

#90078u2767 03/19/1990 ~United Press International

AUSTIN, TX (MARCH 20) UPI - Standard & Poor's Corp. reaffirmed Monday the State of Texas' AA bond rating, but state Comptroller Bob Bullock warned that state finances must be handled carefully.

''Our steady economic growth and conservative fiscal management have earned the confidence of investors,'' he said. ''While other states, such as New York and Massachusetts, are starting to flounder, people throughout the country are recognizing the growing strength of the Texas economy.''

S&P's annual assessment of Texas' economy and finances again gave the state an AA rating for general obligation bonds. S&P's top rating is AAA.

The Wall Street bond rating service cited ''low and manageable debt ratios an improving and diversifying economic base and continued improved finance performance.''

Bullock cautioned, however, that state finances are still fragile since the Texas Legislature avoided a tax hike in 1989.

S&P noted a one-time bookkeeping transfer approved by the legislature last year to avoid a tax increase, he said, adding: ''It has not affected our credit rating yet, but they have put us on notice that they are keeping an eye on the amount of fund transfers.''

Of the 10 largest states, only four have a better bond rating than Texas, the comptroller's office said.

Texas has $2.6 billion in outstanding general obligation bonds. The state plans to issue about $550 million in new general obligation bonds this year to build prisons, mental-health facilities and facilities for the superconducting super collider project.

#90078u2769 03/19/1990 ~United Press International

(MARCH 19) UPI - Moscow orders direct control of state enterprises in rebellious Lithuania... U-S welcomes East Germany's fair and free elections... A brief courtroom furor in John Poindexter's trial... And flooding forces more evacuations in the South... U-P-I details these top stories and more, next:

The Soviet Union today declared its direct control of all national facilities in Lithuania. The Soviet government told the K-G-B and internal police to control customs in the republic, which last week announced its independence.

The order would give Moscow direct rule of communications, sea lanes, and other property NOT deemed to be governed by the republic.

At the same time, the Supreme Soviet in Moscow is working on a law that would give all 15 Soviet republics the legal chance to secede.

But Lithuania says Soviet troops are moving within its territory and Soviet planes buzzed the capital of Vilnius yesterday.

The Soviets maintain there are NO major military maneuvers under way in Lithuania, and say any recognition of Lithuania as a free country would

hurt chances for reform.

In Washington, the White House continued to try to walk a diplomatic tightrope on the issue. The Bush administration has NOT explicitly recognized Lithuania's independence, but has said the United States has NEVER considered the republic part of the Soviet Union.

Spokesman Marlin Fitzwater today said U-S policy is to maximize the chances for Lithuanian democracy without ''trying to stir up any trouble.''

In the republics of Latvia and Estonia, partial election results show that candidates favoring independence were winning yesterday's elections. But the new leadership of both republics probably will be far less radical than Lithuania's.

-30- 1936

#90078u2817 03/19/1990 ~United Press International

(MARCH 19) UPI - East Germany's conservative Alliance for Germany won a sweeping victory in yesterday's elections. But forming a coalition government to lead the nation toward reunification with West Germany may be a much more difficult task.

Alliance leader Lothar de Maiziere says he wants to establish a broad coalition government. He invited the Social Democratic Party and Federation of Free Democrats to attend coalition talks today.

De Maiziere says he saw- quote- ''NO major differences that would make a coalition impossible.''

But the S-D-P doesN'T see things that way and its officials rejected the idea of a coalition leadership because the conservatives favor a much faster reunification process.

Although the alliance wants to speed up the unification of Germany, de Maiziere assured Moscow today that the nation would remain a key ally.

De Maiziere is likely to become the first NON-communist prime minister in East German history. But his party must win a two-thirds majority in the 400-seat Parliament to introduce the constitutional amendment necessary for reunification.

In Washington, a spokesman for President Bush today welcomed East Germany's ''free and fair'' elections and predicted that the- quote- ''March toward German reunification in inexorable.''

Marlin Fitzwater called the election... which ended four decades of communist rule... a victory for everyone who supports democratic values.

#90078u2870 03/19/1990 ~United Press International
BAKERSFIELD, CA (MARCH 19) UPI - A woman was sentenced Monday to 15 years to life in state prison for starving her infant daughter to death.

Tonnette Rae Lee, 32, of Ridgecrest and her husband James Lowell Lee, 38, were convicted Feb. 26 of second-degree murder in the death of their eight-week old daughter, Kern County Deputy District Attorney Terry Pelton said.

The baby, Janelle Rae Lee, was born Oct. 1, 1988, weighing 5 pounds, 6 ounces, and died Dec. 8, 1988 weighing 3 pounds, 14 ounces.

''It's probably the most monstrous, cruelest case I have ever seen. They had to have let this baby cry and scream for weeks before the baby died,'' Pelton said.

''The autopsy showed the baby had no body fat at all,'' Pelton said. ''Even the fat in her cheek pads was gone.''

The Lee's two sons, both younger than 5 years old, have been living with a grandparent since the pair was convicted, Pelton said.

The father's sentencing is set for April 16.

The mother claimed at trial to have fed the baby regularly, but a pathologist testified that the baby had not been fed, Pelton said. A pediatrician testified the girl would have weighed between eight and 15 pounds if she had developed normally, Pelton said.

Officials learned of the child's death only after the mother told a neighbor the girl had died. The neighbor called for help, Pelton said.

''There is no way the baby could have reached that stage of malnourishment if it had been well cared for,'' Pelton said. ''(The mother) testified she fed the baby on a regular basis and the medical experts said that was impossible.''

#90078u2898 03/19/1990 ~United Press International
(MARCH 19) UPI - A new study says cheating by welfare recipients is more widespread than liberals may admit. But it also found the reasons for the cheating are more moral than conservatives may think.

The independent study found many welfare recipients cheat the system so

their families can survive. It says conservatives ignore this reason because it would weaken their argument for cutting benefits.

The study says liberals doN'T talk about the cheating issue because that would reduce public sympathy for the plight of welfare recipients.

The study based on 25 in-depth interviews with welfare mothers in an UNnamed Midwestern city found that these women operate on the same moral principles as most other Americans. And they feel that their first obligation is to care for their children.

It says welfare benefits rarely provide enough money to pay for necessities, so the women feel entitled to break the rules.

''Cage potatoes...'' the rat equivalent of human ''couch potatoes...'' may have a lower resistance to cancer.

A study released today shows rats that exercise seem to be more resistant to cancer-causing chemicals than inactive rats.

The University of Michigan study trained one group of rats to run seven to nine miles a day, the human equivalent of 15 to 20 miles. A second group was INactive.

The exercisers got to eat more as a reward. The ''cage potatoes'' would simply eat, drink, and get fat.

Both groups were then injected with carcinogenic chemicals. Tissue from the running rats showed up to two times as much of a molecule called co-enzyme Q, which helps turn food into energy.

Biology professor Robert Beyer... who directed the study... theorizes the co-enzyme Q protected the tissue of the endurance-trained rats.

Beyer says the findings are preliminary. He's now repeating the experiment with NON-exercising rats that are put on low-calorie diets... to see how much of the cancer resistance is from training and how much is just from being leaner.

#90078u2943 03/19/1990 ~United Press International
NEW ORLEANS (MARCH 20) UPI - Chef Thomas Catherall of Atlanta outdid premier chefs from 33 other states to win the title of ''America's Best Seafood Chef'' in a three-day cook-off in a city where seafood kitchen magic is almost taken for granted.

Chef Hartmut Handke of Columbus, Ohio, was runnerup and Chef Michael

Trainor, Newport, R.I., was third in the American Seafood Challenge, an event the American Culinary Federation has called the best hot food competition in the United States.

The Seafood Challenge pits top chefs against the clock and each other in a three-day culinary marathon.

Catherall, executive chef of Cherokee Town and Country Club, won the American Seafood Challenge with an entree of ''Hot Smoked then seared Salmon'' served with a crab cake appetizer, oyster stew, a salad of roma tomato and seafood with herb vinaigrette dressing, a potato and asparagus with mushroom cream.

All of the ingredients for the winning menu were selected from a ''mystery market,'' a curtained off area where each of the 10 finalists had 15 minutes to select items and create a menu for the final round Saturday.

''They have use everything they pick,'' said Jennifer Moffat, spokeswoman for the Seafood Challenge. ''The judges actually go through the garbage to make sure they are not wasting anything.''

Competitors were rated by American Culinary Federation judges on taste and appearance of their creations, as well as general culinary skill, neatness and professionalism.

In the first round, each chef is required to prepare his signature dish as well as an appetizer, soup and salad.

To win one of the 10 spots in the final round, Catherall prepared his signature dish of ''Seafood Ragout, Georgia Coast,'' and a mystery market soup, salad and appetizer.

Catherall has been a member of the U.S. Culinary Olympic Team and won a gold medal with distinction in the 1988 international competition in Frankfurt, Germany. He also has won 10 gold medals in ACF competitions nationwide. This was his first year competing in the American Seafood Challenge at the national level.

#90078u2978 03/19/1990 ~United Press International

LOS ANGELES (MARCH 20) UPI - State agricultural officials, rejecting the advice of scientists, announced Monday aerial malathion sprayings will end in May, a month earlier than planned, and that sterile Mediterranean fruit flies will be used instead to eradicate the pest.

The shift in strategy conflicted sharply with recommendations made last week by five scientists advising the state in its fight against the Medfly

to continue spraying of the pesticide because there are not enough of the sterile flies available.

But Dr. Henry Voss, director of the California Department of Food and Agriculture, said at least 200 million sterile Medflies are expected to become available by the first week of May and will be released in infested areas to breed the crop-threatening pest out of existence.

As a result, the scheduled aerial pesticide sprayings over Southern California will end May 9, about one month ahead of schedule, Voss said.

Voss made his decision to end the malathion sprayings early after considering the recommendations submitted by the Medfly Science Advisory Panel, which said that the spraying should continue into June, as originally planned, and that any future abundance of sterile flies be held in reserve against future infestations.

The aerial sprayings of malathion began last August after Medflies were discovered in Elysian Park near Dodgers Stadium.

Spraying of the pesticide in some Los Angeles and Orange County communities has led to protests by residents concerned over the safety of repeated exposure to the chemical and spurred a number of unsuccessful lawsuits by those hoping to block the aerial bombardments.

Voss made his decision to end the sprayings after he was assured that at least 200 million sterile Medflies would be available, department spokeswoman Gera Curry said.

She said the release of the sterile flies was the treatment preferred over malathion spraying, but the state's laboratory in Hawaii, opened in 1982, was unable to produce them quickly enough to keep pace with the spread of the current infestation.

With the addition this year of a second temporary state lab and a third lab operated by the U.S. Department of Agriculture, the output of sterile flies will leap to 700 million a week by the end of 1990, enough to treat future infestations and possibly making the troublesome malathion spraying obsolete, she said.

However, Voss said that before the current eradication program ends, some areas will be sprayed every two weeks in April and May, as the panel of scientists recommended. The shorter interval between sprayings will compensate for the shorter Medfly life cycle in warmer weather.

The current eradication program is expected to cost the state and federal governments $25 million to $30 million, compared with $5 billion in projected damage to California crops had the infestation gone untreated,

Curry said.

#90078u3068 03/19/1990 ~United Press International
(MARCH 19) UPI - The Soviet news agency Tass today released a statement saying the Soviet Union is taking direct control of state enterprises in the republic of Lithuania. The order gives Moscow control of communications, sea lanes, and other facilities in the independence-minded Baltic republic.

Defense Secretary Cheney and C-I-A Director William Webster didN'T see eye-to-eye today in their assessments to Congress on reforms in Eastern Europe. Cheney disagree with Webster the reforms are irreversible and reduce the Soviet military threat to the West.

Both the Pentagon chief and White House officials deny reports that the administration is willing to triple its proposed spending cuts for the fiscal 1991 military budget. Cheney says deeper cuts should only occur over time.

In Washington, final details of a controversial child care bill are still being worked out on Capitol Hill today. But House Republicans are already raising objections to the Democratic leadership's plan to bring the measure to the House floor for a vote this week.

President Bush says he alone has he final say in matters of environmental policy. Bush vented his irritation at talk of discord among his advisers during a gathering of state attorneys general in Washington. He calls the rumors ''endless inside-the-Beltway speculation.''

20 leading marine scientists who spent three years compiling a report on the world's oceans say the leading threats to the oceans are rampant coastal development and land-based pollutants. They say these are far more dangerous than oil spills or waste dumping.

Homeless activist Mitch Snyder and other homeless advocates today ended a 10-day fast protesting proposed cuts in spending for the homeless in Washington, D-C. The group says it doesN'T want to appear to be pressuring the City Council in its vote tomorrow on proposed budget cuts.

New Haitian President Ertha Pascal Trouillot installed her Cabinet today and immediately announced that members will take a pay cut. Trouillot says she's also reducing her salary as a gesture toward helping Haiti's impoverished people.

British Foreign Secretary Douglas Hurd today held the first high-level Western meeting with South African President de Klerk since de Klerk

announced racial reforms six weeks ago. After the meeting in Cape Town, Hurd praised Pretoria for what he called ''impressive'' moves toward democracy.

Secretary of State Baker met with Angola's president in Windhoek , Namibia today. Baker's arrival in the west African nation begins a series of talks with high-level officials from several countries.

-30- 2812

#90078u3303 03/19/1990 ~United Press International

(MARCH 19) UPI - The Soviet Union today stepped up its economic war with Lithuania. The Soviet government declared all national enterprises in the republic to be under Moscow's control. The statement orders the Ministry of Interior and the K-G-B to take control of customs in the Lithuania. It also mandates increased security at atomic power stations, which are under the jurisdiction of the Ministry of Nuclear Energy.

European leaders say yesterday's election victory by East Germany's conservative Alliance for Germany will hasten German unification. One Soviet official says the victory will lead to a new Europe where- ''everybody is an ally of everyone else.'' But he adds that Moscow expects East Germany's new government to respect its obligations and respect the Soviet Union's interests.

A lawyer for Imelda Marcos says he will call former President Reagan as a defense witness in the trial of the one-time Philippines first lady. Marcos goes on trial tomorrow along with Saudi Arabian businessman Adnan Khashoggi. They are charged with conspiring to steal more than 100-Million dollars from the Philippine treasury. Attorney Gerry Spence says Reagan is an important witness because he was close to Mrs. Marcos.

In Washington, a second attempt by defense lawyers to have John Poindexter's Iran-Contra trial dismissed was rejected today by U-S District Judge Harold Greene. Poindexter's lawyers moved for a mistrial after chief prosecutor Dan Webb asked a question that strayed into testimony Poindexter gave to Congress under a grant of immunity. Greene said the question was- in his words- ''harmless beyond a reasonable doubt.''

Also in Washington, the Wilderness Society today publicized a report that there have been 10-thousand oil spills nationwide since the Exxon Valdez hit a reef in Alaska last year... causing the nation's worst oil disaster. The report marks the one-year anniversary of the accident on March 24th.

Robert Bork was at the Supreme Court today. The bearded conservative who was rejected as a justice in a bitter 1987 battle argued a banking case today before the land's highest court. Bork has actually argued other

cases before the Supreme Court... in the 1970's as solicitor general in the Nixon administration. But this was his first appearance in the chamber since his rejected nomination.

-30- 2538

#90078u3537 03/19/1990 ~United Press International

(MARCH 19) UPI - The Soviet Union today declared control over Lithuania's communications, sea lanes and all other property deemed a national enterprise. The order was signed by Premier Nikolai Ryzhkov and released by Tass. The statement instructed managers of state enterprises in Lithuania NOT to hand over any property that deals with the economy of the entire Soviet Union. It mandated increased security at atomic power stations.

The White House today again declined to formally recognize Lithuania's declaration of independence from the Soviet Union. The Bush administration insists it recognizes only governments that are in ''control of their destiny.'' But in the recent case of Panama, the United States recognized the new government even before the old regime was toppled. White House spokesman Marlin Fitzwater said it ''doesn't pay'' to compare the two cases.

The president of Estonia says Soviet President Gorbachev has appointed the chairman of the Supreme Soviet to negotiate with the Estonians over their desire for independence. Estonian President Arnol Ruttel said Chairman Anatoly Lukyanov is to start the talks ''in the near future.'' That announcement from Moscow comes as early returns show independence-minded candidates are sweeping to victory in yesterday's Latvian and Estonian elections.

Some European leaders are calling yesterday's election victory by East Germany's conservative political alliance a personal triumph for West German Chancellor Kohl. France's foreign minister says Kohl directed the campaign which most leaders expect will result in quick reunification of the two Germanys. Kohl says the changes in the East offer an opportunity for building a new peaceful Europe.

-30- 1891

#90078u3842 03/19/1990 ~United Press International

(MARCH 19) UPI - Moscow moved today to tighten its grip on Lithuania. The Soviet government issued orders to take over all concerns in the Baltic republic that are designated under ''national'' jurisdiction, as opposed to republican. The order also calls for the K-G-B and Ministry of the Interior to establish customs control in Lithuania. The directive amounts to a claim of direct rule by the Moscow ministries over communications, sea lanes and other property.

Alabama Governor Guy Hunt asked President Bush today to declare Coffee County a federal disaster area in the wake of flooding that's hit the state. And he predicts other counties will be added to the list. Three-thousand residents of the town of Elba alone have been washed out of their homes. Rivers also are over their banks in parts of Georgia and the Florida Panhandle. At least 13 deaths throughout the South are blamed on the flooding triggered by as much as 18 inches of rain last week.

A federal official has fingered the man authorities consider the ''prime suspect'' in Saturday's bombing that destroyed a Fort Myers, Florida, Drug Enforcement Administration office. The official says the suspect is the brother of a man questioned about the blast after his arrest Sunday on unrelated charges. The F-B-I and D-E-A have offered a 100-thousand-dollar reward for information leading to the arrest and conviction of the person responsible for the bombing.

The U-S territory of Guam today enacted one of the strictest abortion statutes under U-S jurisdiction. The law bans abortions on the South Pacific island except when the woman's life is in jeopardy. It goes into effect immediately... but sets up a referendum in November, when Guam's voters can rescind or affirm the measure. The American Civil Liberties Union is expected to announce a legal challenge to the law tomorrow.

#90078u3856 03/19/1990 ~United Press International

(MARCH 19) UPI - The Boston museum which had hundreds of Millions of dollars worth of art stolen during the weekend did NOT have theft insurance. That's according to a spokesman for the Isabella Stewart Gardner Museum, which said today the cost of such insurance would be prohibitive. Even if a policy paid off, the spokesman says the museum could NOT use the money to replace the art it lost. Early yesterday, thieves posing as police officers overpowered museum guards and made off with 12 paintings, drawings and etchings by such masters as Rembrandt and Manet.

NASA says a New York newspaper story that claims a planned 30-BILLION-dollar space station is seriously flawed is based on a worst-case scenario. The space agency says the problems outlined in the article aren't new and would be overcome once the station reaches construction stage. Officials say the worse-case scenario was used to ensure the station would be built to withstand the rigors of outer space.

Today's return of the swallows to San Juan Capistrano was to be marked by a large demonstration by Juaneno Indians, whose ancestors built the mission in Southern California. But the Indians staged a ceremonial dance instead, after agreeing with officials at the Roman Catholic mission that

today would NOT be an appropriate time for a protest. The Indians charge the mission is NO longer sensitive to their needs.

#90078u4004 03/19/1990 ~United Press International

(MARCH 19) UPI - The latest news... the details and the developments... from across the nation and around the world... off the 'round-the-clock wires of United Press International.

The Soviet Union today tightened the screws on Lithuania for its recent declaration of independence.

The Soviet government ordered direct federal control over all Lithuanian assets designated as the responsibility of the nation, rather than the republic.

The Ministry of Interior and the K-G-B are to establish customs controls at the Lithuanian border. The ministries of railways, sea fleet, fisheries and civil aviation are to ensure federal transportation.

The statement warned the Lithuanians that adoption of laws disrupting the Soviet Union's systems of credit and foreign economic relations will be viewed as illegal.

The get-tough measures are the first example of President Gorbachev's ability to use sweeping powers of the executive presidency which he got last week.

In Washington, President Bush continued to walk a fine line on the issue of Lithuanian independence, which the republic's parliament declared last week. The White House again declined to formally recognize the declaration saying it didn't want to be seen as ''trying to stir up any trouble.''

Defense attorneys for John Poindexter failed again today to convince the judge in the former national security adviser's Iran-Contra trial to dismiss the case.

Poindexter's lawyers seized a second opportunity today to have U-S District Judge Harold Greene declare a mistrial when the chief prosecutor asked a controversial question of Indiana Democrat Lee Hamilton.

Prosecutor Dan Webb asked Hamilton whether Poindexter had told him about ripping up a finding from former President Reagan explicitly linking the secret arms sale to attempts to free American hostages.

The inquiry strayed into testimony Poindexter gave to Congress under grant of immunity. But Greene rejected the request that he declare a mistrial,

saying the question was ''harmless.''

Webb rephrased his question and Hamilton said Poindexter did NOT relay that information to him on the day he briefed Hamilton's House intelligence committee.

The three-week-old trial resumes tomorrow.

#90078u4013 03/19/1990 ~United Press International

(MARCH 19) UPI - The results of yesterday elections in East Germany are eing viewed by European leaders as a sign of a speedy German unification.

The conservative East German political bloc known as the Alliance for Germany scored a landslide victory in the nation's first free elections... which were also considered a triumph for West German Chancellor Kohl.

Kohl backed the alliance and supports its call for the quick reunification of Germany... saying such a move threatens NO one.

Alliance leader Lothar de Maiziere said he wants to form a broad coalition government. But the Social Democratic Party... which finished second in the voting... rejected that idea because it doesn't favor a quick reunification.

The White House today said it expects a unified Germany to be a member of the Western military alliance NATO.

But Soviet Foriegn Ministry spokesman Gennadi Gerasimov said in Moscow that the Soviet Union has NOT lost an ally... and it expects the new East German government to respect its obligations.

Gerasimov added that the political changes will result in a Europe in which- quote- ''everybody is an ally of everyone else.''

Federal mediators say they now know what negotiators in the Greyhound strike already knew- the two sides are far apart on the issues.

The Federal Mediation and Conciliation Service says NO resumption of talks is in sight after negotiations broke down yesterday in Tucson, Arizona.

But agency spokesman James Power says now that mediators understand the many issues involved, they can meet separately with the parties to explore the gap.

Wages and benefits are the main dividing points in the strike, which began March 2nd.

Greyhound charges that the union refuses to budge on its demands and accuses its members of stepping up violence against replacement drivers.

The Amalgamated Council of Local Greyhound Unions suggests that accountants for the company and the union meet to agree on methods for determining the costs of contract proposals.

But Greyhound calls the suggestion a minor ''stalling tactic,'' and maintains it cannot offer any more money.

Strike-related violence continued with two striking drivers and another motorist arrested in Stuart, Florida, for allegedly trying to run a bus off an interstate highway. NO one was hurt.

#90078u4031 03/19/1990 ~United Press International

(MARCH 19) UPI - A federal computer watchdog group today warned that someone is sitting at a computer terminal somewhere breaking into the national Internet computer network.

That's one of the two networks that a destructive ''worm'' program bored into in 1988. A Cornell University student was convicted of a felony this year for creating that program.

But this time, the federally funded Computer Emergency Response Team... known as CERT... says evidence shows the intruder is a person instead of a program. This computer hacker manually enters computer systems and steals users' passwords to gain access to their files. CERT says users can take at least one simple safeguard by changing their passwords.

CERT warns the computer intruder has broken into several systems and attempted several dozen other attempts Thursday and Friday.... but has caused NO damage so far.

CERT sent its warning to hundreds of thousands of users on Internet.

Internet links computers at universities, government laboratories, non-classified military bases and private industry.

NASA disputes a New York newspaper story that claimed a planned space station had serious flaws that would cause it to wear out before its construction is completed.

The newspaper article cited NASA sources as saying anticipated maintenance problems could force a redesign of the 400-foot-long station. It added that a dangerous amount of time would be need in spacewalks to repair the

problems.

But NASA official William Lenoir says the problems outlined in the story apparently result from a worse-case scenario the space agency used to make sure the actual station could withstand the rigors of orbiting Earth.

Lenoir says the problems would be corrected before construction of the station... called Freedom.

He adds that the scenario is NOT considered credible because scientists normally assume ''unrealistically pessimistic'' conditions during a project's preliminary design phase.

-30- 2159

#90078u4045 03/19/1990 ~United Press International

(MARCH 19) UPI - An environmental group today released a report on U-S oil spills that have occurred in the year since the March 24th disaster with the Exxon Valdez in Alaska.

The Wilderness Society noted more than 10-thousand spills since the Exxon Valdez... and documented 100 of the worst spills. Society officials say these accidents serve as a reminder that huge spills are NOT an isolated event.

The study shows between four-Million and nine-Million gallons of oil were dumped in the nation's waters as a result of these spills... adding to the 11-Million gallons from the Exxon disaster.

Wilderness Society President George Frampton told reporters in Washington today that oil spills are an everyday occurrence. Frampton added that the report proves there is a need for tougher safety measures to prevent spills from tankers and pipelines.

He said pipelines accounted for the majority of the spills.

A new study says welfare recipients are ''quite willing'' to cheat the system... but generally do it so their families can survive.

The study was based on 25 in-depth interviews of mothers willing to provide full income and spending figures in an unnamed Midwestern city.

The study was written by sociologists Christopher Jencks and Kathryn Edin. They found ''welfare mothers operate on the same moral principles as most other Americans.'' That is to care for their children's necessities and an occasional treat.

But since welfare seldom gives enough money to pay for these necessities,

they feel entitled to break the rules. One way is by NOT reporting outside income.

But the authors said raising welfare benefits is politically unattractive. So they urge a system of ''fringe benefits'' that would make more welfare mothers seek low wage work.

The steps would include increasing tax credits and allowing all workers to buy cheap Medicaid coverage.

-30- 2060

#90078u4186 03/19/1990 ~United Press International

(MARCH 19) UPI - The first federal judge in the nation charged with racketeering was acquitted today of one count of obstruction of justice. But jurors in San Francisco deliberating the case of U-S District Judge Robert Aguilar deadlocked on the remaining seven counts against him, and a mistrial was declared.

The Soviet government is turning up the heat on independence-minded Lithuania. Moscow today ordered direct federal control over a wide range of installations in the Baltic republic deemed vital to the national interest.

Partial tallies from yesterday's parliamentary elections in the neighboring republics of Estonia and Latvia show nationalists sweeping to victory. But Estonia's prime minister told the Estonian news media his republic will NOT follow the abrupt path toward independence taken by Lithuania.

A Lebanese newspaper quotes diplomatic sources as saying former President Carter met with leaders of the pro-Iranian Hezbollah last week in a bid to win the release of Western hostages held by the group. NO comment from Carter, but a Hezbollah official in Beirut calls the report- quote- ''a mere lie.''

Secretary of State Baker is in Windhoek, Namibia to help celebrate the territory's independence from South Africa. While in Namibia, he'll hold a series of high-level talks with other officials... including Soviet Foreign Minister Shevardnadze .

In Anchorage, Alaska, closing arguments are scheduled for tomorrow in the trial of fired Exxon Valdez Captain Joseph Hazelwood. The jury is expected to start deliberating Wednesday whether Hazelwood was to blame for the worst oil spill in U-S history.

-30- 1811

#90078u4302 03/19/1990 ~United Press International
(MARCH 19) UPI - Moscow is turning up the heat in its efforts to force Lithuania to rescind its declaration of independence. The Soviet government today ordered a wide range of installations in Lithuania be placed under direct federal control. The government order gives Moscow control of communications, sea lanes and several other properties in the Baltic republic.

A report in an Iranian newspaper says the barb-wire fence along Iran's border with the Soviet Union is back in place. Copies of the newspaper reaching Athens, Greece, today say Soviet authorities replaced the fencing which was torn down by Azerbaijani rioters in early January. Soviet troops sealed the border January 21st... but according to the newspaper report, the fencing was NOT replaced until a few days ago.

The archbishop of Managua, Nicaragua, offered today to meet the Contra rebels in Honduras to discuss their demobilization. But Miguel Obando y Bravo says he will do so only if asked and accompanied by president-elect Violeta Chamorro . Nicaragua's Defense Ministry meanwhile says six Contras a government soldier and a civilian were killed this weekend in battles in Jinotega province... about 180 miles north of the capital.

A Pentagon spokesman refuses to comment on a report that a non-commissioned Army officer is under investigation for murder for shooting a Panamanian prisoner during the December 20th invasion of Panama. But Army officials who asked NOT to be identified confirmed the story about the officer from Fort Bragg, North Carolina. They also say it appears the soldier will be charged with murder.

-30- 1781
#90078u4337 03/19/1990 ~United Press International
(MARCH 19) UPI - The federal government took a step today in its gradual phaseout of the pesticide Alar in foods. The E-P-A lowered the levels of Alar allowable in apples and apple products, several other fruits and peanuts. And it banned altogether the pesticide in tomatoes or tomato products, milk, meat, and eggs. The agency began the phaseout last year after the use of Alar was linked to cancer.

A former Drug Enforcement Adminstration agent is denying he stole 150-thousand dollars in heroin from a D-E-A evidence vault in 1984. Darnell Garcia pleaded innocent in a Los Angeles court today to narcotics charges stemming from a major corruption scandal that rocked the D-E-A. A judge ruled Garcia was a flight risk and denied him bail. Garcia was the target of an international manhunt before his capture in Europe last July.

Teachers in West Virginia returned to the classroom today for the first time in 11 days. But resentment over the state's handing of its first

teachers' strike lingered. Teachers in one county were so upset with the use of volunteers to keep schools open during the walkout that they voted unanimously to call for the state superintendent of schools to step down. Union leaders agreed Saturday to end the strike after being promised a special legislative session will hear their demands.

A bird known for its wisdom has taken up residence in the girders of the shuttle Discovery's launch pad at Cape Canaveral, Florida. NASA says the owls... a parent and an offspring... probably will fly the coop by launch time next month. Astronaut Bruce McCandless is a member of the National Audubon Society and pegs the birds as great horned owls. He says moving the owls may harm them... though NOT as much as a blast from the shuttle's boosters.

-30- 1949

#90079b0009 03/20/1990 ~Business Wire

IRVINE, CA (MARCH 20) BUSINESS WIRE - Western Digital Corp. (ASE: WDC) Monday announced that it has introduced three new systems chipsets; the WD7500, for 80286-based systems; the WD7600, for 80286 or 80386SX-based systems; and the WD7600LP, for 286 or 386SX notebook/laptop computers.

When combined with the company's video chips and intelligent disk drives, these chipsets comprise highly-integrated, full-featured AT-compatible systems.

The chipsets feature advanced levels of integration and significantly increased performance and system flexibility for orginal equipment manufacturers (OEMs), resulting from the Western Digital's "interarchitecture" approach to semiconductor design.

"The chipsets we are introducing today go far beyond single-chip core logic - they are complete systems solutions," said Roger W. Johnson, president, chairman and chief executive officer of Western Digital. "Western Digital is one of the most diverse semiconductor manufacturers in the world and all of our technical expertise, across all of our products lines, has gone into these products."

Each new chipset consists of three "superchips" which provide a wide range of functionality in core logic, storage and data communications. All the devices, which are either analog or full custom, were designed and manufactured by Western Digital using 1.25 micron CMOS and packaged in cost-effective, streamlined 132- or 84-pin packages. Wetsern Digital's Interarchitecture

Robert N. Stephens, senior vice president and general manager of Western Digital's microcomputer products unit, said, "Our OEM customers receive a variety of competitive and functional advantages with these chipsets, most

of which comes from the fact that all these devices were designed in coordination - something we call interarchitecture.

"That process of designing semiconductors with an eye toward how they can work better in an overall system has resulted in a product that delivers higher performance and guaranteed compatibility. More importantly, these chipsets can be designed into systems vey easily and cost effectively, and this enables our customers to get their product to market faster."

One example of the benefits of interarchitecture in these chipsets is the optimized performance of the video function when the video chip is implemented with the core logic.

In a typical AT application at 8 MHz, video accesses require four wait states. In Western Digital's AT configuration, utilized in both the WD7600 and WD7600LP, the core logic and video contain interactive circuitry which allows early termination of video accesses, thereby compressing the input/output cycle and achieving the same eight MHz performance with only one wait state.

#90079b0018 03/20/1990 ~Business Wire

SANTA CLARA, CA (MARCH 20) BUSINESS WIRE - Western Digital Corp. (ASE: WDC) Tuesday introduced three new systems chipsets, based on the company's proprietary silicon, that significantly enhance both performance and system flexibility.

The three-device chipsets, when combined with one of Western Digital's video devices and intelligent drives, comprise complete systems solutions for AT-compatible desktop and laptop machines, enabling original equipment manufacturers (OEMs) to reduce the cost and time-to-market cycle of their products.

With these chipsets Western Digital is targeting the 80286 and 80386SX markets, including both desktop and laptop systems. Dataquest's Personal Computer Systems Group estimates that by 1993, approximately 50 percent of all the computers shipped worldwide will utilize either the 80286 or 80386SX microprocessor.

International Data Corp. (1989) projects that in 1990 shipments of 286-based systems will reach well over eight million units and that by 1993 shipments of 386SX-based systems will increase to approximately 6.1 million.

"These chipsets are the result of an eight-year strategic roadmap the company has followed to develop all the pieces that control the basic functions of computing and deliver systems solutions to our OEM customers " said Roger W. Johnson, president, chairman and chief operating officer.

"We have now combined our proprietary core logic, storage, data communications and video devices into comprehensive solutions that go far beyond single-chip core logic. The outcome of Western Digital's combination, especially when compared with purchasing those pieces separately, is a solution that simply works better."

Western Digital calls the process of integrating multiple-function chips into platform-specific chipsets "interarchitecture." The concept of interarchitecture is unique to Western Digital because it is the only company that designs and manufactures its own silicon across all the generic functions of computing - core logic, storage, communications and video.

Through interarchitecture, all these devices are designed in concert. And since Western Digital fully understands the design methodology and intricate specification for each chip, the company is able to build in special performance features and guarantee compatibility and memory support.

#90079b0023 03/20/1990 ~Business Wire

WASHINGTON (MARCH 20) BUSINESS WIRE - US Sprint Communications Co. Tuesday announced X.400-based binary file transfer via the SprintMail(sm) electronic messaging service.

SprintMail uses the National Institute of Standards and Technology (NIST) recommendation for binary file transfer via X.400. The company has begun a program of interoperability testing for other vendors who implement the NIST recommendation. The first vendor whose products have been certified with SprintMail is Soft.Switch Inc.

Starting now, companies can use the SprintMail public messaging service and the Soft.Switch(R) X.400 Gateway connected to their in-house electronic mail system to exchange software programs, engineering drawings CAD/CAM information, spreadsheets and other binary information in revisable form.

Users can thus share information across time and distance -- for example, by creating a spreadsheet in New York, delivering it via SprintMail to San

Francisco, updating it and delivering the revised version to Chicago, a company can keep its widespread offices running on the same track, while at the same time, having information at the place and time when it is most needed.

Until now, electronic message exchange using the X.400 standard has been limited to text-only documents, such as business letters, reports and memos. This new advancement is expected to stimulate the market for both in-house and wide-area electronic messaging systems and services by making available many more business applications.

The NIST recommendation specifies using P2 body-part 14 of the X.400 standard to exchange binary files. Soft.Switch and US Sprint have mutually adopted the NIST recommendation as a first step toward establishing an industry-wide standard for binary file transfer via X.400 electronic messaging systems.

Several other vendors also have indicated their support of the NIST recommendation, and their intention to work with US Sprint to certify their products and services with US Sprint's SprintMail electronic messaging service.

''Using SprintMail's global messaging capability, companies which implement the NIST recommendation on their systems can quickly and easily move binary information from one desktop or workstation to another, even if it is in a different hemisphere.

''As more vendors adopt the NIST recommendation, the benefits of being able to send and receive binary information in revisable format will spread to hundreds of thousands of users,'' said Howard Brooks, vice president and general manager of Messaging at Sprint International, a US Sprint subsidiary.

''This facility, to exchange any and all electronic business information, is the missing link for widespread use of electronic mail in an inter-enterprise environment,'' said Michael D. Zisman, president of Soft.Switch. ''The action by US Sprint and Soft.Switch demonstrates our continuing leadership in the X.400 arena.''

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City, Mo.

AGOURA HILLS, CA (MARCH 20) BUSINESS WIRE - Fortune Petroleum (NASDAQ:FPEX) President and Chief Executive Officer Dan E. Pasquini announced Tuesday the company has commenced the public offering of units previously made available to shareholders on an exclusive basis through a rights offering.

Pasquini said buyers may purchase a minimum of 10 units, each unit consisting of three shares of common stock and one common stock purchase warrant, at a price of $1.95 per unit. Shareholders of Fortune may continue to subscribe for units on a non-exclusive basis.

Units will be offered only in states where it is legally permissible to do so and only by means of the prospectus.

The maximum offering of units would raise a maximum of $1,608,750 for the company. The proceeds would be used to reduce or eliminate corporate indebtedness with the balance used for enhancing production of existing wells, property acquisitions and increasing working capital.

Pasquini noted that, ''With the successful completion of this offering, Fortune Petroleum will be esentially debt free and postured for future growth.''

Fortune Petroleum is an independent oil and gas exploration and development company with its principal producing properties located in California.

LAS VEGAS, NV (MARCH 20) BUSINESS WIRE - The board of directors of American Bancorp of Nevada, parent company of American Bank of Commerce, Tuesday declared a 15 percent stock dividend, said Claudine B. Williams, chairman of the board.

The dividend is payable April 10, 1990, to shareholders of record April 3, 1990.

This is the ninth consecutive year in the bank's 10-year history the board has approved a stock dividend, said Williams. ''The dividend reflects the vitality and profitability of the bank,'' she said.

American Bank of Commerce is an independent full-service bank serving the small to mid-size business community in Southern Nevada since 1979. The bank, with four branches throughout Las Vegas, concentrates on construction and business lending.

HAYWARD, CA (MARCH 20) BUSINESS WIRE - Cholestech Corp., which is focused on the treatment and monitoring of high blood cholesterol and other lipid disorders, has named Clair W. Sater, age 48, as executive vice president of marketing and sales.

Sater come to Cholestech from LifeScan Inc., a Johnson & Johnson company, where he was most recently vice president of international operations and president of LifeScan Canada.

Sater has extensive marketing and sales experience with both therapeutic and diagnostic products. While at LifeScan, he was vice president of marketing, overseeing the rapid commercial success of the company's blood glucose monitoring systems.

He also served for ten years at Syntex Laboratories, holding positions as director of marketing planning, group product manager and marketing research manager. During that period, he was responsible for the launch of Syntex's leading drug, Naprosyn. Sater holds B.S. and M.S. engineering degrees from Iowa State University and an M.B.A. degree from Stanford University.

''The addition of Clair Sater to Cholestech's executive team bodes well for our company's future,'' noted Judy O'Shea, chief executive officer. ''We are approaching the commercial launch of our first product -- an automated doctor's office system for monitoring cholesterol and other blood fats -- and the high caliber of Clair's experience will be invaluable to our success in the marketplace.''

Cholestech expects to introduce its innovative monitoring system during 1990. The product is designed to provide physicians with a quick, easy, accurate alternative to clinical laboratory testing and will enable them to make immediate treatment decisions while the patient is in the examination room.

Near term commercial prospects also include a promising therapeutic to decrease ''bad cholesterol'' and increase ''good cholesterol'' in the blood. This drug development is in late Phase II human clinical studies in the United States and has already been approved for marketing in Europe.

Cholestech Corp. is a privately held pharmaceutical company headquartered in Hayward. Venture capital funding has been provided by Hillman Ventures New Enterprise Associates and Sierra Ventures.

#90079b0051 03/20/1990 ~Business Wire

MT. CRESTED BUTTE, CO. (MARCH 20) BUSINESS WIRE - National celebrities helped American Airlines raise $425,000 to help fight cystic fibrosis, the number one genetic killer of U.S. children and young adults, announced Robert K. Dresing, Cystic Fibrosis Foundation president and chief executive officer.

The fifth annual American Airlines Celebrity Ski Benefiting Cystic Fibrosis, held at Crested Butte Mountain Resort at Mount Crested Butte, Colo., March 2 - 5, featured a variety of skiing races and exhibitions, a private concert starring the Bee Gees and concluded with a banquet/auction.

''This event has painted an even bigger picture of hope that wasn't there before,'' Dresing said. ''With the discovery of the gene that causes cystic fibrosis and the continued support of American Airlines, we're closer to a cure than ever.''

More than 20 celebrities, including ''Doogie Howser, M.D.'' star Jim Sikking, Grammy Award-winning pop singer Michael Bolton and Olympic Gold Medal swimmers Nancy Hogshead and Tracie Ruiz-Conforto, arrived at Crested Butte on Friday for the beginning of the American Airlines Celebrity Ski.

Throughout the weekend, they participated in race clinics and dual giant slalom races, and watched internationally acclaimed freestyle skiing champion Wayne Wong perform a freestyle exhibion. Non-celebrity participants made a donation to the Cystic Fibrosis Foundation for the privilege of rubbing shoulders with the celebrities and to help raise money for the cause.

Kim Reichelm, Abby Dalton and Jane Blalock posted the three fastest female celebrity ski times in the Challenge Race. Wayne Wong, Grant Goodeve and Bobby Grich had the three fastest male celebrity ski times. Team Vuarnet led by Wayne Wong won the Challenge.

The Celebrity Ski concluded with an auction and awards banquet.

''American Airlines is honored to help the Foundation fight this terrible disease,'' said Mike Gunn, American Airlines senior vice president-marketing. ''If we can help researchers find a cure and give hope to those children and young adults, that's fantastic. That's what this event is all about.''

VH-1/Video Hits One, the first and only music channel tailored for the diversified interests of the baby boom generation, is the presenting sponsor of the American Airlines Celebrity Ski.

Through the Celebrity Ski and other events, American Airlines has raised more than $1.5 million for cystic fibrosis research. Because of its efforts, American Airlines was awarded the Cystic Fibrosis Foundation's first Outstanding Corporate Partner Award in 1988.

SCOTTSDALE, AZ (MARCH 20) BUSINESS WIRE - Go-Video Inc., the Scottsdale company that designed and developed a patented dual-deck video cassette recording system to be marketed under its VCR-2 trademark, has completed a public offering of one million units of 4-1/8 per unit.

The offering constitutes new financing for the company. The managing underwriter is Paulson Investment Co. of Portland, Ore. Each unit consists of one share of common stock and a common stock purchase warrant to purchase one additional share for $8.25. The common stock purchase warrants expire in five years on March 9, 1995.

Also, the company will issue, without charge to shareholders, option and warrant holders of record on March 8, 1990, one warrant for every ten shares that the holder owns or has an option or warrant to acquire.

The National Association of Securities Dealers Automated Quotations symbol is GOVOU for the units, GOVO for the common stock and GOVOW for the warrants. In addition, the company's securities are listed on the Philadelphia Stock exchange and have been approved for listing on the Pacific Stock Exchange.

#90079b0062 03/20/1990 ~Business Wire

OAKLAND, CA. (MARCH 20) BUSINESS WIRE - Citicorp Savings plans to change its name to Citibank, Federal Savings Bank (F.S.B.), on April 16.

Citicorp Savings will notify its customers of the change and what it means to them the week before the name change takes place.

Citicorp Savings said it is looking forward to becoming part of a national consumer bank, while keeping its community orientation. Over time, the change from Citicorp Savings to Citibank will provide customers with consistent products, consistent high-quality service, and convient access to Citibanking through 600 Citibank branches in 9 states and the District of Columbia.

Citicorp Savings has 132 branches in 95 California communities, and assets of $7 billion. It is a subsidiary of Citicorp, formed in 1982 as a result of the acquisition of Fidelity Savings of San Francisco by Citicorp. In mid-1987, Citicorp Savings increased its California presence when it acquired 50 Sears Savings Bank branches.

NEW YORK (MARCH 20) BUSINESS WIRE - Citicorp announced Tuesday that it is changing the names of its savings and loan subsidiaries in California, Florida, Illinois and the District of Columbia to ''Citibank, Federal Savings Bank.''

''The change to the Citibank name is a reflection of our increasing commitment to a unified approach to community banking activities throughout the country,'' said William J. Heron Jr., group head for U.S. Consumer Banking. ''We're, in effect, providing customers with the access they'd like to community banking services throughout the country, just like a national consumer bank would.

''This is the first step in bringing a common set of products, a consistent level of quality service, and similar identification -- what we call CITIBANKING -- to our customers in all markets.''

The new names were approved by the Federal Home Loan Banks regulating the institutions, in conjunction with an application which changed the charters of the four savings and loans to federal savings banks.

The name change will be implemented at the four S&L's 252 branch locations over the next few months. Previously, the institutions operated under the name ''Citicorp Savings.'' In addition to the four savings banks, Citicorp conducts community banking activities through banks in Arizona, Florida, Maine, Maryland, New York, Nevada and Utah.

Heron noted that the introduction of Citibanking will include three basic initiatives, focused on serving consumers: establishing a common identification for Citibank branch banking activities nationally; maintaining a consistent level of quality service and financial products in all markets; and increasing capabilities developed within all areas of Citicorp.

''CITIBANKING benefits consumers by combining the personal service and community orientation of local Citibank organizations with the experience, expertise, and geographic scope of the institution as a whole,'' he said.

Citicorp had been restricted from using the Citibank name in identifying the four savings and loan institutions it had acquired during the 1980s. But with differences between banks and savings and loan institutions narrowing in recent years, and a number of savings institutions now using the word ''bank'' in their identification, those limitations were removed as part of the FIRREA legislation passed by Congress last year.

Shortly thereafter, the Federal Reserve Board modified its order that had restricted offering products and services of other Citicorp businesses to customers of the four institutions and sharing resources with other units of Citicorp.

As an example, Heron noted that even though almost 2 million Citibank credit card customers live within five miles of a branch of the four savings and loan institutions, the Federal Reserve had prevented Citibank from providing those customers with other banking services through its branches.

But with those restrictions now eliminated, he said, over time Citibank's branches in nine states and the District of Columbia, will offer customers a wide range of similar products, such as the Citi-One account, state-of-the-art banking machines using a Citicard, and Citibank MasterCard and Visa, as well as a number of common service-oriented programs, such as CitiPhone, a telephone account management service.

''So, for example, just as customers from San Francisco have had the ability to use our banking machines throughout California,'' Heron said,

''they'll now have access to services, presented in the same familiar, convenient way, at any Citibank banking machine in New York or Illinois or Florida, whether they're moving, visiting or traveling on business.''

As part of its program to announce the name change and to communicate its CITIBANKING strategy, a major promotional campaign is to begin within the next few months in each of the four savings bank markets. Heron said that the campaign will revolve around the benefits of CITIBANKING in each local market.

In total, Citibank's U.S. Consumer Banking Group serves more than 8 million customer accounts at nearly 600 branches in nine states and the District of Columbia.

#90079b0066 03/20/1990 ~Business Wire

SAN FRANCISCO (MARCH 20) BUSINESS WIRE - AT & T has been awarded sanctions in two separate cases in which it defended against charges of employment discrimination, including an award against one plaintiff's attorney close to $50,000.

The decisions were handed down late last week.

''The award is one of the highest we've ever seen for a case of this nature,'' said Lynne Hermle, an attorney at Orrick, Herrington & Sutcliffe and former AT & T in-house attorney. Orrick defended AT & T in both matters.

''We think it shows that the courts are getting fed up with employment cases that simply have no factual or legal foundation. Judges are sending a message to plaintiff's attorneys that they take a real risk when they pursue frivolous litigation.''

The case involving the nearly $50,000 award, ''Robert B. Lorbeer v. American Telephone and Telegraph Company,'' involved alleged wrongful termination and employment discrimination by AT & T against a former employee of the company's Federal Systems organization. United States District Judge Marilyn Hall Patel found that the action was ''wholly unneccessary,'' resting upon ''a faulty reading, interpretation and application of case law.''

In cases such as this, the court has the discretion to determine the amount of attorneys' fees to award to a party victimized by a frivolous lawsuit -- and whether the costs shall be borne by the plaintiff or the

plaintiff's attorney. The court imposed the unusually high award solely against the plaintiff's attorney.

The other sanction was imposed against the plaintiff and his counsel in ''Brian Barlow v. American Telephone & Telegraph,'' after a jury ruled in favor of AT & T in a sexual preference/wrongful discharge lawsuit. Following the jury verdict, the plaintiff submitted a motion for reconsideration, based on the allegation that AT & T and/or its attorneys orchestrated a scheme of perjury causing the witness to lie under oath.

The plaintiff's counsel based this theory of perjury on the alleged inconsistent testimony given by various witnesses at the trail.

''Inconsistency in testimony is not ground for a new trial,'' wrote U.S. Magistrate Claudia Wilken in her decision.

''The motion was not well-grounded in fact, nor was it warranted by existing law or a good faith argument for the extension, modification or reversal of existing law in violation of Rule 11, Fed. R. Civ. Proc.

''Unfounded allegations of perjury and subordination albeit implied, are serious in that they impugn the reputation of the defendants and their attorneys,'' she added, in explanation of her decision.

The award in this case was approximately $4,900 for time spent by the defendant's attorneys in opposing the new trial motion and preparing the sanctions motion.

''We applaud these decisions,'' said Rosalie Johnson of AT & T. ''Large companies are frequently considered easy targets by plaintiffs and their attorneys. By imposing sanctions on those who bring frivolous suits, the courts are helping to stem the tide of ill-conceived litigation.''

BEVERLY HILLS, CA. (MARCH 20) BUSINESS WIRE - The U.S. Navy has awarded Litton's Ingalls Shipbuilding division a $12.2 million contract to continue engineering and planning support for the Navy's Aegis guided missile destroyer program.

The new contract is the second award under a five-year program begun in December 1988 that will have a total value of approximately $66 million. Under the contract, Ingalls will perform various technical, engineering and design tasks at its Pascagoula, Miss., production facility.

Ingalls now has construction contracts for six of the Arleigh Burke (DDG-51) class ships.

Gerald J. St. Pe', Litton senior vice president and president of Ingalls, said, ''This support contract, coupled with the award in February for construction of three more Aegis destroyers, is further evidence of the Navy's confidence in our shipyard's ability to build Aegis destroyers, as well as provide the technical expertise necessary to support a construction program of this magnitude and importance.''

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

SPOKANE, WA (MARCH 20) BUSINESS WIRE - Key Tronic Corp. (NASDAQ: KTCC), leading manufacturer of keyboards and other computer products, has reached an agreement with Selsys Corp. of Boulder, Colo.

The agreement grants Key Tronic manufacturing and marketing rights to Selsys' powerful 386SX notebook computer, it was announced by A.T. (Fred) Zirkle, Key Tronic president.

Founded in 1975, Selsys Corp. is a technology-based development company whose technologies have produced sales in excess of $1 billion. According to Howard (Binx) Selby, Selsys Corp. chairman, companies such as NBI, Cadnetix, Lasertrak, Reference Technology and Anatel were based on technology originated by Selsys.

''The 386SX notebook computer will provide our Original Equipment Manufacturer (OEM) customers with a state-of-the-art design for the rapidly expanding portable computer market,'' stated Zirkle. Products using the design will weigh less than five pounds and run on AA batteries.

According to Zirkle, initial discussions with OEMs have focused on providing the notebook design with a number of unique product features, including communications options, sophisticated power management, VGA displays and a unique form factor. The first notebook computer is scheduled to be released early fourth quarter, 1990.

While Key Tronic is best known as the world's largest independent

manufacturer of computer keyboards, its role is expanding from that of components manufacturer to technology packaging vendor. ''With our design and worldwide manufacturing experience, providing OEMs packaging technology for the portable computer market is a logical step for Key Tronic,'' Zirkle said.

Key Tronic, which recently celebrated the 20th anniversary of its founding is a vertically integrated manufacturer with facilities in Spokane and Cheny, Wash.; Dundalk, Ireland; and Hsinchu, Taiwan.

BEAVERTON, OR. (MARCH 20) BUSINESS WIRE - Tektronix Inc. has settled its patent infringement claim against Kikusui Electronics Corp. for $4.75 million.

In reaching an agreement, the Japanese oscilloscope manufacturer admitted infringement of five Tektronix patents.

As part of the settlement, Tektronix agreed to license Kikusui to continue importing and selling oscilloscopes in the United States. Tektronix filed suit in a California U.S. District Court in January 1988 alleging that Kikusui Electronics Corp. of Japan and Kikusui International Corp. of California, willfully infringed upon Tektronix patents in the manufacture, use and sale of certain Kikusui oscilloscopes in the United States.

The suit involved patented technical features incorporated into Tektronix portable oscilloscopes, instruments which measure and display electronic signals.

Under the terms of the settlement, Kikusui will reimburse Tektronix for the cost of litigation and a portion of its lost profits. Kikusui will pay Tektronix royalties for past and future sales. Tektronix is the leading manufacturer of oscilloscopes in the world.

#90079b0082 03/20/1990 ~Business Wire
ANAHEIM, CA. (MARCH 20) BUSINESS WIRE - At the National Computer Graphics Association (NCGA) '90 conference Monday, Sun Microsystems introduced

SunVision, the industry's first software product that gives developers and sophisticated users a wide range of visualization tools and libraries of low-cost SPARC-based workstations.

SunVision delivers image processing, volume rendering and photo-realistic rendering capabilities in Sun's OpenWindows application environment. OpenWindows combines the X11/NeWS Window System with OPEN LOOK, an intuitive, easy-to-use graphical interface.

The introduction of SunVision and XGL -- a graphics software library also unveiled today -- gives Sun the widest range of integrated graphics and imaging products in the workstation industry.

For less than $16,000, including hardware and software, the SPARCstation 1 running SunVision offers a complete visualization development environment on the desktop. Comparable software has been available only on graphics supercomputers in the $80,000 to $100,000 range. By dramatically cutting the cost of powerful visualization tools, SunVision makes this advanced technology available to a wider range of developers and users.

While SunVision is ideal for application developers, sophisticated end users in the scientific and medical communities can also take advantage of its broad capabilities to perform many advanced visualization tasks right on the desktop at a low cost.

SunVision is well suited for developing applications for users in areas such as medical imaging for surgical planning, diagnostics and radiology, remote sensing for satellite data interpretation, scientific visualization for finite element analysis and realistic rendering for architecture and engineering.

With SunVision, developers have the industry's most comprehensive, highly integrated, low-cost solution for designing visualization applications for the scientific and engineering sectors. Included in SunVision are two new programming interfaces for developing software for SPARC-based systems: an image processing library and a high-quality renderer, which has RenderMan-compatible interfaces.

''Since a SPARCstation 1 running SunVision is such a functional, inexpensive development platform, it can be used to design a whole new generation of powerful applications that cost a third of what's presently available,'' said Mary Whitton, director of marketing for visualization products. ''This presents an attractive business opportunity for developers of high-volume visualization applications.''

SunVision consists of libraries and advanced tools that integrate key elements of visualization: image processing, volumetric data display, 3-D interactive graphics and high-quality rendering. All SunVision tools

share the OPEN LOOK interface and common data and image formats, providing a cohesive visualization environment. In addition, a user can easily reconfigure the elements of the interface, without programming, to best suit individual needs.

ANAHEIM, CA. (MARCH 20) BUSINESS WIRE - At the National Computer Graphics Association (NCGA) '90 conference Monday, Sun Microsystems expanded its graphics product family with the introduction of XGL, a graphics software library that increases the performance of Sun's family of 2-D/3-D graphics workstations.

XGL allows software developers to create high-speed graphics applications in Sun's OpenWindows application environment. OpenWindows combines the X11/NeWS Window System with OPEN LOOK, an intuitive, easy-to-use graphical interface.

XGL is designed to meet the needs of 2-D and 3-D mechanical computer-aided design (MCAD) and electronic computer-aided design (ECAD) applications and is optimized for Sun's graphics hardware.

XGL is the latest addition to Sun's broad graphics software family that includes industry-standard libraries such as SunPHIGS and SunGKS, XLib and PostScript. Underscoring its commitment to graphics users, Sun also yesterday unveiled SunVision, a comprehensive visualization and image processing software package.

As standard libraries, PHIGS and GKS provide data management by including a pre-defined display list structure. However, XGL gives developers the freedom to create and maintain their own display list within the

application. Thus they can protect their software investment by easily porting their existing display list application to XGL.

XGL has a consistent programming interface for both 2-D and 3-D applications. For demanding 3-D applications such as MCAD, animation and simulation, XGL can render images with advanced features such as shading, depth-cueing and multiple light sources. For 2-D applications such as ECAD and mapping, XGL has a separate 2-D rendering path that eliminates 3-D overhead.

Competitive products do not offer this degree of functionality and development flexibility, thus these features make XGL especially attractive. More than 20 vendors, including Cadence, CAMAX, Excellon Photonics, General Dynamics, Ithaca Software and McDonnell Douglas Corp., are currently porting their applications to XGL.

XGL software has been optimized to take full advantage of Sun's GX graphics accelerator and will also run on all of Sun's future graphics hardware.

XGL running on the SPARCstation 1GX further improves its speed by more than 440,000 2-D vectors per second and boosts 3-D performance to 220,000 3-D vectors per second (10 pixel transformed, clip checked, rendered). It can also process up to 200,000 2-D flat-shaded polygons per second (100 pixel transformed, clip checked, rendered).

This fast rendering speed lets a system display smooth dynamic motion of 2-D/3-D wireframe objects. XGL is unique in that it provides lighting, shading and hidden surface removal on the GX without the need for special 3-D solids modeling hardware.

According to Shrikant Sathe, director of hardware vendor relations at Cadence Design Systems Inc.: ''Cadence customers running their software on a Sun GX graphics workstation can confidently expect at least a 50 percent performance enhancement compared to a corresponding non-XGL Cadence application.

Based on our experience with XGL thus far, we see this new Sun product as a major contribution to the development of EDA applications.''

XGL is the first implementation using Sun's breakthrough Direct Graphics Access display technology. DGA works in the OpenWindows environment, managing access to the screen between the graphics library and the windowing system. This allows graphics applications to realize the full potential of hardware acceleration while benefitting from the industry-standard X Window System.

XGL, priced at $1,500 is supported on all SPARC and Sun-3 systems. XGL

will be shipped in 90 days.

Sun Microsystems Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

SAN DIEGO (MARCH 20) BUSINESS WIRE - Security Pacific Bank Arizona has joined the STAR SYSTEM ATM network, it was announced Tuesday.

Security Pacific's 123 ReadyTeller machines in Arizona were brought on-line with STAR SYSTEM on Feb. 26.

''We welcome Security Pacific Bank Arizona to the network,'' said Ronald V. Congemi, president, Star System Inc. ''Security Pacific's membership contributes greatly to the network's expansion in Arizona and throughout the Western United States.''

''STAR SYSTEM membership significantly enhances our customers' ability to access their bank accounts in the West, which is their most common travel destination,'' said Brian L. Cooper, first vice president and manager, Security Pacific Bank Arizona.

With 94 banking offices in Arizona and total assets of $4.2 billion, Security Pacific Bank Arizona is one of that state's largest banks. The bank is also a subsidiary of Security Pacific Corp., the nation's fourth-largest bank holding company with more than $84 billion in assets.

STAR SYSTEM is the largest regional electronic funds transfer network in the West, with 474 member financial institutions in Arizona, California, Hawaii, Nevada, Oregon and Utah. The network switches more than 9 million ATM and point-of-sale transactions monthly through more than 21,000 ATM and POS terminals.

SANTA CLARA, CA (MARCH 20) BUSINESS WIRE - TeLeVell Inc. has expanded the potential of its sales software, TeleSell, to include powerful forecasting capabilities with which the user can develop dynamic strategies and identify trends affecting his market and sales force.

Forecasts are automatically generated from each level of the sales department, enabling a manager or corporate executive to see the entire system below his level.

With this information he can analyze where the strengths and weaknesses are located in his sales team, and then generate an updated automatic forecast after inserting pertinent information and solutions available to him on his level of expertise.

Even after a forecast has been generated, forecast reports can further define data, providing precise information required by management in various situations. If a further breakdown by territory, company or product is needed, one of the forecast reports will do the job.

The Sales Manager Module is also integrated with TeleSell's Remote Update Module, allowing a sales force distributed across the nation or around the world to forecast more efficiently and accurately. Sales rep forecast information, and management forecasts, can be summarized from remote users with full data security.

The single user price for the Sales Manager Module is $695. The network version is available for $1,995.

#90079b0141 03/20/1990 ~Business Wire
WESTLAKE VILLAGE, CA. (MARCH 20) BUSINESS WIRE - Consolidated Energy Systems Inc. announced that its recently formed subsidiary, Decalux Development Inc., has signed a contract to acquire an electronics contract manufacturer, Decade Technology Inc. of Simi Valley.

Based on current unaudited financial statements for the period ending Dec. 31, 1898, Decade has annualized gross revenues of $1.862 million, which would represent a projected increase to the revenues of Consolidated Energy of over 150 percent.

Consolidated Energy formed Decalux Development in February 1990, retaining

63 percent of all outstanding stock, and Decalux Development will be purchasing 80 percent of the outstanding stock of Decade -- providing Consolidated Energy with a resultant ownership interest in Decade just in excess of 50 percent.

In addition to the interest in Decade, Decalux Development is also acquiring, through Decade, 100 percent of the assets of Ranger Technologies Inc., a sister corporation to Decade. The remaining 20 percent interest in Decade will be retained by its existing chief executive officer, who is contracting to remain with and operate that company.

Richard J. Abruscato, president and chief executive officer of Consolidated, noted that Decade is an established electronics manufacturer engaged in the business of providing surface mount technology, end product manufacturing and related engineering products and services to its customers.

Like Consolidated, Decade operates on the cutting edge of its large technological field, is known for producing high-quality products and has an in-place management committed to supporting the customer. Abruscato said that the parallels between the two companies' business philosophies and management styles were the attraction which brought them together.

Decalux Development, whose minority interest is held by a private investor who is also involved in the ownership and business activities of Consolidated, was formed to allow the energy/cogeneration and electronic activities of the two companies to operate separately.

Abruscato also emphasized that contingencies have been built into the purchase contracts for the benefit of Consolidated that allow thorough due diligence investigations of the business, financial and legal affairs of Decade prior to final closing. The contract sets the final close of escrow to occur by July 16.

Consolidated has the option to cancel the contract by reason of any adverse discoveries made during the due diligence period set to expire on July 15. Decalux Development, the actual purchaser of Decade, is to be capitalized by Consolidated with 400,667 of Consolidated's unregistered common voting shares and by cash or promissory notes in the amount of $250,000 to be provided by the 37 percent minority shareholder.

Contingent upon the minority shareholder's determination of which among designated capitalization options he will elect, the Decalux Development capitalization contract is expected to close by late May.

The pending purchase of Decade will be made from out of Decalux Development's inventory of common voting shares and by a leverage

agreement, which both provides Decade with a cash infusion and also requires Decade to undertake certain cash obligations from out of its own revenues.

Abruscato noted that no provisions exist requiring Consolidated to use its own cash or revenues to finance the acquisition. Said Abruscato, ''Once it was clear that the managing owners of Decade were interested in having a stake in Consolidated's future, we formulated a structure by which Consolidated could avoid any material risk to its primary business of cogeneration and energy conservation.

''Instead, we will realize immediate growth in our assets and revenues, improved profits and the benefit of overseeing the development of a successful electronics engineering company which is capable of the same kind of dramatic growth that our management team is bringing to Consolidated. This is an excellent transaction for Consolidated and its shareholders.''

Following vesting of certain contingencies and election of options, Consolidated Energy will be making subsequent announcements concerning the completion of the purchase, including actual dates and events of closing.

Consolidated Energy Systems Inc., founded in 1984, is a publicly traded company with emphasis on developing cogeneration and energy conservation projects. The company recently announced its new lighting conservation products line. Consolidated has been a public company since 1987. Its common shares and near-term warrants (to purchase common shares) are presently traded over-the-counter in the ''pink sheets.''

MONROVIA, CA (MARCH 20) BUSINESS WIRE - STAAR Surgical Co. (NASDAQ:STAA) is pleased to announce the closing of its previously outlined transaction with The Cooper Cos. Inc. of Palo Alto, Calif.

This transaction involved the exchange of a $7.7 million STAAR convertible debenture and related accrued interest held by Cooper and the assumption of approximately $1 million of STAAR's subsidiary (Frigitronics of Connecticut) debt and liabilities in exchange for non-exclusive licenses to some of STAAR Surgical Co.'s technologies and substantially all of the assets of Frigitronics of Connecticut.

In addition, Cooper acquired an option to purchase STAAR's Glaucoma Shunt business.

A company spokesman said this transaction is yet another step in fulfilling STAAR's new management's plans of recapitalizing the company which will allow STAAR to focus strongly on obtaining approval of its Intraocular Lens through the FDA, and on the continued development of its IOL business.

STAAR, a publicly traded company founded in 1982, develops, manufactures and markets products for small-incision surgery, primarily for use in cataract procedures.

#90079b0145 03/20/1990 ~Business Wire
SANTA CLARA, CA (MARCH 20) BUSINESS WIRE - 3Com Corp. (NASDAQ:COMS) Tuesday reported continued quarterly improvement in sales and net income for the third quarter ended Feb. 28, 1990.

Net income of $6.7 million (23 cents per share) increased 27 percent from the prior quarter while sales grew modestly to $107.3 million. Orders of $108.8 million for the current quarter tracked sales.

''Gross margin increased 3.3 percentage points from the second quarter due to continuing cost reductions from our automated manufacturing operations, an increasing percentage of revenues from new products, and improved inventory management,'' said Bill Krause, 3Com chairman and chief executive officer.

''Third-quarter results also reflected a continued ramp in sales of 3Server/500 and 3+Open 1.1, which began shipping at the end of August.''

International sales represented 45 percent of sales this quarter, an 18 percent increase from the previous quarter, principally reflecting strength in the U.K. and French subsidiaries. Cash and equivalents increased 22 percent to $80.7 million reflecting continued attention to managing both inventory and accounts receivables.

Compared with the $107.1 million posted in the like quarter last year,

sales this quarter were relatively flat. Net income for the prior-year quarter was $10.7 million (36 cents per share). For the nine-month period ended Feb. 28, 1990, sales were $302.3 million, a 10 percent increase from the year-earlier period.

Net income for the current nine-month period was $13.2 million (45 cents per share) compared with $26.1 million (88 per share) last year.

''Increasing our incoming orders and continued improvement in gross margin remain top management priorities as the company continues to introduce new products in key computer networking markets,'' Krause said.

3Com Corp. is a computer networking systems company providing multivendor connectivity and information sharing for workgroups, departments and corporate environments worldwide. The company designs, manufactures, markets and supports a wide range of networked client-server computing systems based on industry standards and open systems architecture.

NUT TREE, CA. (MARCH 20) BUSINESS WIRE - Renaissance Concepts Inc. has signed a preliminary agreement to acquire 100 percent of SourceOne Environmental Services Inc., a Beaumont, Texas-based environmental testing and research and development firm.

According to Stephen Calandrella, president of Renaissance Concepts, SourceOne will be issued 24,000,000 shares of Renaissance common stock at the completion of the acquisition, expected within 30 days. The newly merged company, which will continue operations under the SourceOne name and management, will have 30,000,000 shares outstanding.

Founded in July, 1989, SourceOne specializes in comprehensive environmental services, including environmental impact assessment, waste load allocation, biomonitoring and toxicity testing, and hazardous waste determinations.

In addition to its headquarters in Beaumont, the company operates a full-service laboratory and research facility in Louisiana.

Renaissance Concepts Inc. completed its ''blind pool'' public offering in December 1989, issuing 1,200,000 shares at 5 cents.

VANCOUVER, BRITISH COLUMBIA (MARCH 20) BUSINESS WIRE - Robert M. Friedland, chairman of Galactic Resources Ltd. (AMEX,TSE,ME,VSE:GLC), Tuesday announced the completion of the sale to a wholly owned subsidiary of CRA Ltd. of 75 percent of Galactic's 40 percent interest in Far Southeast Gold Resources Inc. which owns the rights to mine the Far Southeast gold/copper property in Benguet Province, Republic of the Philippines.

CRA Ltd., a 49 percent owned affiliate of the RTZ Corp. PLC, is one of Australia's largest companies with extensive worldwide mining interests. Galactic has now received gross proceeds of the sale amounting to approximately Cdn. $17.8 million (U.S. $15 million).

Galactic retains a 10 percent interest in FSEG and continues to be represented on its board of directors. CRA holds an option to purchase Galactic's remaining interest in FSEG for U.S. $20 million until May 1, 1990 and thereafter for U.S. $25 million until Oct. 28,1990.

Galactic mines gold with joint venture partner The RTZ Corp. PLC in South Carolina, and at its wholly owned Summitville Mine in Colorado. Galactic also has precious metal development projects in California, Nevada, Canada China, and the Philippines.

Galactic Resources Ltd. trades on the American, Toronto, Montreal, and Vancouver Stock Exchanges (symbol:GLC). American Stock Exchange quotes in U.S. dollars are listed daily in the Wall Street Journal under ''American Stock Exchange Composite Transactions.''

TORONTO, ONNTARIO (MARCH 20) BUSINESS WIRE - NHI Nelson Holdings International Ltd. (ASE/ToSE/VcSE:NNH) (the ''Company'') announced Tuesday that it has secured a U.S. $20 million underwriting commitment (the ''Financing'').

This Financing, which is expected to be completed Tuesday, is based on the company having issued through Laing & Cruickshank, London, (a wholly owned subsidiary of Credit Lyonnais) approximately U.S. $20 million in Secured Convertible Debentures (the ''Debentures'') (convertible at U.S. $9.75 per share) and 2 million Warrants (the ''Warrants'') (exercisible at U.S.

$9.75 a share).

The convertibility feature of the Debentures and the issuance of the Warrants becomes effective on Sept. 28, 1990, prior to which time the company may redeem the Debentures in which case the Debenture holders would not have the right to convert or receive Warrants.

NHI Nelson Holdings International Ltd. is the holding company for the Nelson Entertainment Group whose subsidiaries include: Nelson Films, a film production company; Nelson Entertainment Home Video, a North American home video distributor; Nelson Entertainment International, which markets theatrical, video and television rights outside North America; Nelson Television, a television production company involved in all forms of television production; and for 68 percent-owned Nelson Vending Technology Limited, which currently operates as a videocassette retailer in Ontario, Canada, utilizing a network of automated dispensing terminals.

CUPERTINO, CA (MARCH 20) BUSINESS WIRE - Measurex Corp. (NYSE/PSE:MX) Tuesday reported that net income for fiscal year 1990's first quarter was $7.2 million, or 40 cents a share, compared with $9.7 million, or 51 cents a share, in 1989's first quarter.

Revenue for the quarter, which ended Mar. 4, was $67.8 million, slightly lower than the $68.5 million recorded in the like period in 1989, which ended Mar. 5, 1989.

As previously reported, system orders were $37 million, down 14 percent

from 1989's first-quarter orders of $43 million. European orders continued at record levels, with shortfalls experienced in North America and the Pacific.

System backlog at the end of the first quarter was $102 million, a decrease of 12 percent from $116 million in last year's first quarter. Backlog was down $7 million from $109 million at the end of 1989.

The decline in net income was primarily due to lower margins on system sales and a rising tax rate in 1990. The impact on net income was partially offset by $0.6 million in royalty income from International Business Machines (IBM) Corp., derived from IBM's acquisition of a license to use the PlantWorks Application Automation Edition software package at a number of IBM plants.

''The weak orders in North America and the Pacific reflect postponed projects by our customers and not lost orders to the competition. Measurex's product line is the strongest in our industry and we continue to maintain our leading market share,'' said David A. Bossen, president and chief executive officer of Measurex.

''As we indicated earlier, we believe the first three quarters and 1990's total-year operating income will be less than that of 1989's. Measurex's product and market strategies are sound, and we are positioned to successfully compete in the process control and information systems market which is forecast to have a good growth during the decade of the '90s.''

The board of directors voted to increase the quarterly dividend to 11 cents from 10 cents a share, payable April 18 to stockholders of record on April 4, 1990.

Measurex, which stands for measurement execellence, provides the world with computer-integrated manufacturing through design, production, marketing and servicing of sensor-based information and control systems.

SANTA BARBARA, CA (MARCH 20) BUSINESS WIRE - County Bank (NASDAQ:CNBA) Tuesday announced plans to sell up to $10 million in Series A Convertible Preferred Stock.

The details of the offering are set forth in a registration statement filed with the Office of Thrift Supervision for its approval. The Convertible Preferred Stock issue is part of County Bank's Capital Plan which was submitted in January to the Office of Thrift Supervision in accordance with the Financial Institutions Reform, Recovery and Enforcement Act of 1989.

Roy G. Green, president and chief executive officer, said, ''Senior management and directors who already own 45 percent of the bank's stock have committed to invest more in the new Convertible Preferred Stock offering.

William J. Levy, chairman, Roy G. Green, president and chief executive officer, and Roy J. Millender, Jr., a director, are leading the bank's investment group and have guaranteed to buy a minimum of $3 million of the Convertible Preferred Stock offering.''

Green added, ''The new Convertible Preferred Stock offering will pay dividends in the form of Common Stock. It will first be offered to County Bank stockholders and option holders, then to directors and senior management and employee 401K and ESOP plans, and then to others.''

''In addition to the sale of Series A Convertible Preferred Stock,'' Green said, ''the bank is also negotiating with holders of our existing subordinated debentures to convert them to a new Series B Preferred Stock.

''If completed, the conversion would further enhance County Bank's capital position and move the bank closer to full capital compliance, which is anticipated within the prescribed regulatory time period.''

County Bank with over $1.4 billion in assets is based in Santa Barbara, Calif., and serves Santa Barbara, Ventura and San Luis Obispo, Calif., counties.

LOS ANGELES (MARCH 20) BUSINESS WIRE - Security Pacific Corp. and Santa Clarita National Bank Tuesday announced that they have signed a letter of intent for Security Pacific to acquire Valencia-based Santa Clarita National Bank.

Security Pacific will pay $52.5 million in SPC common stock for the shares of Santa Clarita National Bank stock. The number of SPC shares to be issued will be based on the average SPC stock price for the five trading days prior to the closing date, with a minimum number to be issued of 1,117,022 and a maximum of 1,458,334.

The signing of a definitive agreement is expected shortly, followed by approvals of both Santa Clarita National Bank shareholders and appropriate regulatory authorities.

''This acquisition will significantly increase our market share in both the Santa Clarita Valley and San Fernando Valley areas of Los Angeles,'' said Jerry A. Grundhofer, president and chief executive officer of Security Pacific National Bank. ''It is a clear indication of the importance we place on this growing, dynamic area,'' he said.

''Santa Clarita National Bank has built its reputation in Los Angeles County as being a provider of top-quality financial products and services '' said Don Guglielmino, chairman of the board and president of Santa Clarita National Bank.

''We believe becoming a part of a solid institution like Security Pacific Corp. enables our customers to continue in this tradition while greatly expanding their ability to conduct business throughout the western United States,'' he said.

Santa Clarita National Bank has 11 branches in Los Angeles County with assets of $258.2 million and deposits of $228.1 million as of Dec. 31, 1989. Santa Clarita National Bank reported net income of $4.165 million during 1989.

Security Pacific Corp. is the fifth-largest bank holding company in the United States, with over $84 billion in assets. Its principal subsidiary, Security Pacific National Bank, is the second-largest bank in California, with 557 branches and over 1,100 automated teller machines.

EMERYVILLE, CA (MARCH 20) BUSINESS WIRE - Farallon Computing Inc. Tuesday announced the company has added three new managers to its sales team.

Patrick J. O'Haren will lead the OEM program, Phillip A. Okun joins as major accounts group manager responsible for corporate, government, education and business development and Petra C. Nielsen will be in charge of education sales.

''Unlike numerous manufacturers, Farallon does not sell direct to our end users,'' said Amy E. Lewis, Farallon's director of sales. ''We're adding resources to our Major Accounts Group so we can launch new products quickly into key accounts and direct more business to our resellers. Both Phil and Petra have had extensive experience in team-selling with dealers.''

Farallon is the world's leading provider of twisted-pair networks, with more than one million PhoneNET System nodes installed worldwide in Fortune 500 companies, universities and government agencies. The company produces personal communications products and technologies, primarily for use on Macintosh computers.

Farallon products embrace a variety of communications media, including ISDN, analog and digital voice, data, fax and video. The company has more than 160 employees and is headquartered in Emeryville, with research facilities there and in Lawrence, Kan.

Farallon sells its products worldwide through retail distribution and makes its technologies available through OEMs and relationships with other major vendors.

#90079b0618 03/20/1990 ~Business Wire
EAST HANOVER, N.J. (MARCH 20) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT), Tuesday announced that its board of directors has appointed financial and industrial management experts Alexander W. Giles Jr. and Frank R. Meshowski, as directors of the company, bringing the total number of directors to nine, seven of whom are outside directors.

According to the announcement made by Chairman Michael J. O'Donnell, Giles and Meshowski were chosen based on their past successes and experience in the computer industry and strategic planning, respectively.

Giles is president of Englewood, N.J.-based Exley-Giles Associates, a management and corporate finance consulting firm which specializes in strategic and business planning, merger and acquisition evaluation and productivity studios, among other services.

Giles was formerly chairman of the board of directors at General Automation, a worldwide supplier of computer systems and a competitor of Ultimate's and served as co-chief operating officer of Long Island Lighting Co.

Prior to that, he held executive and financial positions with SCUSA Inc., Brean Murray Foster Securities and served as chairman and chief executive officer of Modular Computer Systems Inc. He also has served on numerous boards of directors of computer and industrial companies, as well as a major venture capital firm.

''Lex's broad background in executive and financial positions at major technological, financial and industrial companies will be a beneficial asset as he helps to direct Ultimate's growth in the 90s and beyond,'' O'Donnell said.

Meshowski is the former executive vice president and a former director of OPT Industries, a Phillipsburg, N.J.-based manufacturer of power supplies, transformers and filters used in the computer, industrial and military markets.

He presently is an independent management consultant specializing in strategic planning, marketing and distribution. He was formerly president of UNICORD Inc., a subsidiary of Gulf & Western Industries. While at UNICORD, he was responsible for the highly successful turnaround of the company by significantly increasing sales volume and profits. In 1984, he was cited as Outstanding Unit President by Gulf & Western.

Prior to that, his executive positions included senior vice president at

Nytronics Inc., an Alpine, N.J.-based diversified company involved in consumer electronics, peripherals, electronic components and other industrial products; Gulton Industries and Curtiss Wright Corp.

In commenting on Meshowski's appointment, O'Donnell said: ''Frank Meshowski is a results-oriented senior executive with over 30 years of management experience. His proven track record in achieving outstanding profitable growth, combined with his strong background in management, strategic planning, marketing and distribution will help Ultimate meet its goals.''

Ultimate provides business solutions to companies of all sizes by integrating system-level software and applications software on hardware platforms from premier computer vendors such as Bull HN, Hewlett-Packard, IBM and Sequoia.

Ultimate also provides education, training, consulting and field-maintenance to customers across a wide range of vertical markets. In addition to its domestic operations, Ultimate has subsidiaries in the United Kingdom, Canada, France and Australia.

#90079b0619 03/20/1990 ~Business Wire

SEYMOUR, CT. (MARCH 20) BUSINESS WIRE - Summagraphics Corp. (NASDAQ:SUGR) Tuesday announced earnings and revenues for the third quarter of fisc year 1990.

Net sales for the third quarter of fiscal 1990 rose to $11,575,146, a 4.3 percent increase over the $11,100,300 reported for the same period a year ago. Income before taxes increased 1.7 percent to $1,985,939 over the $1,952,726 reported for the third quarter fiscal 1989.

Net income declined 8.6 percent to $1,715,598, or 45 cents per share, from the $1,877,169, of the prior year, or 5 cents per share. Year-to-year comparison of net income and income per share is distorted by the previously reported limitation on the utilization of the company's net operating loss carryforwards. The limitation reduced reported earnings per share for the third quarter of fiscal 1990 by approximately 50 cents per share.

For the first nine month period of fiscal 1990, the company reported net sales of $33,667,830, an increase of 6.7 percent over the $31,553,585 reported for the same period in 1989. Income before taxes increased 5.4 percent to $5,272,464 from the $5,000,763 reported for the comparable

period last year.

Net income for the period was $4,454,800, a decrease of 7.5 percent from $4,817,460 for the comparable period a year ago. On a per share basis, earnings were $1.18 compared with the $1.29 reported for the same period a year ago.

Year-to-year comparison of net income is distorted by approximately 16 cents per share due to the previously reported limitation on the utilization of the company's net operating loss carryforwards in March of fiscal 1989.

Summagraphics Corp. is a leader in the designing, developing, manufacturing and marketing of digitizing tablets for use with high resolution computer graphics systems. Brand names offered by the company include SummaSketch (a), Bit Pad (a) and Microgrid (a).

Note (a) -- SummaSketch, Bit Pad and Microgrid are all registered trademarks of Summagraphics. -0- T

PROVIDENCE, R.I. (MARCH 20) BUSINESS WIRE - Nortek Inc. (NYSE:NTK) announced Tuesday net sales from continuing operations of $1.080 billion for its fiscal year ended Dec. 31, 1989, compared to $1.029 billion for 1988, an increase of 5 percent.

Net loss for 1989 was $12,500,000 compared to net earnings of $19,600,000 for 1988. Pre-tax loss from continuing operations, before loss on

investment and marketable securities, was $35,600,000 in 1989, compared to a loss of $7,400,000 in 1988. Loss on investment and marketable securities was $23,900,000 in 1989 versus a gain of $11,000,000 in 1988.

The company also reported net earnings from discontinued operations and net extraordinary gain from debt retirements of $14,000,000 and $16,000,000 respectively in 1989, compared to $13,000,000 and $6,400,000 respectively in 1988.

For the fourth quarter of 1989, Nortek reported net sales from continuing operations of $256,776,000, compared to net sales of $249,298,000 for the fourth quarter of 1988.

The fourth quarter net loss was $6,650,000, compared to a net loss of $1,800,000 for the fourth quarter of 1988. Pre-tax operating loss from continuing operations, before loss on investment and marketable securitiues, was $19,300,000 in 1989, compared to $3,750,000 in 1988. Loss on investment and marketable securities was $16,800,000 in the fourth quarter of 1989 versus $3,200,000 in 1988.

The company also reported net earnings from discontinued operations and net extraordinary gain from debt retirements of $10,050,000 and $8,900,000 respectively in 1989, compared to $1,800,000 and $1,300,000 respectively for the fourth quarter.

Fully diluted net loss from continuing operations was $3.10 per share for 1989 as compared to fully diluted net earnings per share of 24 cents for 1988. For the fourth quarter of 1989, the fully diluted net loss from continuing operations was $1.88 per share as compared to a fully diluted net loss of 34 cents per share for the fourth quarter of 1988.

Fully diluted net loss was 91 cents per share for 1989 as compared to fully diluted net earnings of $1.26 per share for 1988. For the fourth quarter of 1989, the fully diluted net loss was 49 cents per share as compared to fully diluted net loss per share of 12 cents for the fourth quarter of 1988.

Ralph R. Papitto, chairman of the board and chief executive officer of Nortek, stated that ''1989 was a very disappointing year. Profitability was adversely affected by costs associated with plant consolidations, a plant strike, product line conversions and by market softness. We have taken strong steps to counteract that market softness and simultaneously increase market share by making substantial investments in property, plant and production equipment.

''As to the year ahead, Nortek will continue to implement programs to reduce overall capital employed in our operations and control costs to the degree necessary to operate in a modest growth economy. To sustain the

kind of growth that establishes the company as a quality, low cost producer in certain of our markets, we will develop additional productivity programs aimed at continuing our internal growth, while selectively reviewing possible business acquisitions. We believe the successful implementation of these efforts will translate into a return to meaningful profitability and improved shareholder values in 1990 as market conditions improve.''

Nortek Inc. is a diversified Fortune 500 corporation, manufacturing and marketing residential and commercial building products and commercial ventilating and and air conditioning systems.

#90079b0626 03/20/1990 ~Business Wire

MOUNTAIN VIEW, Calif. (MARCH 20) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) announced its fiscal 1990 first quarter operating results.

Revenue for the first quarter ended March 2 was $37,181,000 up 46 percent from the $25,539,000 reported in the first quarter of fiscal 1989. Net income was $10,142,000 an increase of 45 percent compared to the $6,985,000 reported in fiscal 1989. Earnings per common share were 48 cents for the quarter compared to 32 cents, an increase of 50 percent over the first quarter of fiscal 1989.

Apple Computer was the company's largest customer accounting for approximately 24 percent of Adobe's total revenue for the quarter. Royalty revenue is being received from 23 OEM customers and totaled $24,226,000 an increase of 41 percent compared to $17,152,000 in first quarter of fiscal 1989. Application product revenue was $10,916,000 an increase of 59 percent over the $6,877,000 reported in first quarter fiscal 1989.

During the quarter the company shipped Adobe Photoshop, its Apple Macintosh product for the creation and production of color and black and white images. It allows you to design, do photo retouching, color correction and other professional level editing of images. Adobe Photoshop software began shipping in the middle of February and has received very positive marks in recent articles and reviews.

In early March, IBM announced that it intends to provide Adobe's font rendering technology and Adobe Type 1 font software across IBM Systems Application Architechture (SAA) compliant operating systems. IBM also announced in February that Adobe's Display PostScript system will be included in the AIX operating systems of its new RS/6000 risc based workstations. The combination of these announcements means that Adobe's

type software and type rendering technology will be available across the IBM hardware line.

The board of directors of the company voted to increase the cash dividend on the company's common stock to 6 cents from 5 cents per common share. The dividend will be for shareholders of record as of March 30 for payment on April 13.

For more information about Adobe Systems contact Bruce Nakao, Adobe Systems Inc., 1585 Charleston Road, Box 7900, Mountain View, CA, 94039-7900. Telephone 415/961-4400.

SAN FRANCISCO (MARCH 20) BUSINESS WIRE - Western Investment Real Estate Trust (ASE:WIR) announced Tuesday that it has purchased the Yreka Junction Shopping Center in Yreka, Calif., for $7,195,850 in cash.

Located at U.S. Interstate 5 and State Highway 3, the 13.69 acre center was purchased with proceeds realized from the Trust's September 1989 underwriting of 4 million shares.

Yreka Junction is anchored by a 60,000 square foot Raley's Superstore and a 22,200 square foot J.C. Penney store. Other principal tenants of the center include SPROUSE!, Beno's, Kinney's and Kragen Autoworks. The center consists of approximately 116,000 square feet of gross leaseable area.

The property was purchased from Yreka C & R Associates which will master lease the center for a period of five years. Connolly Development Inc. of Sacramento will continue to act as manager and leasing agent for the property.

Western Investment Real Estate Trust is a self-administered equity real estate investment trust based in San Francisco. The Trust has invested in properties consisting, for the most part, of shopping centers and commercial buildings in the Central Valley of California and in northern Nevada.

Founded in 1962, the Trust now has investments in 56 income producing properties, including 35 supermarkets and shopping centers.

#90079b0628 03/20/1990 ~Business Wire
LAS VEGAS, NV (MARCH 20) BUSINESS WIRE - Eastman Kodak Co. recently announced Kodak Ektacolor Royal paper, designed especially for use in minilab equipment.

The paper features a higher gloss; a thicker, more-durable stock, and a distinctive gold backprint.

''Ektacolor Royal paper will appeal to consumers who rely on minilabs for on-site print processing and who expect a higher grade of photofinishing '' said Thomas F. Busch, manager, Marketing, Photofinishing, U.S., Consumer Imaging Division. ''The paper's high-gloss finish enhances the superior sharpness of Ektacolor paper. The resulting photographs have a brighter, lasting quality that discerning picture-takers will appreciate.''

Busch said the new paper is derived from Ektacolor 2001 paper. However, the thicker Ektacolor Royal paper features a special coating which increases gloss to take maximum advantage of the sharpness inherent in the technology of Ektacolor 2001 paper.

''This new product has a richer, more substantial feel,'' he said. ''Consumer testing revealed appreciation for photographic prints with a heavier stock and durability.''

Busch said a distinctive new gold backprint on the reverse side of the paper identifies it as ''Kodak Royal paper,'' thus differentiating it from other photographic papers.

The new paper will be available on a regional roll-out basis, with nationwide availability planned for late May, 1990. Limited quantities will be offered worldwide.

BELLEVUE, WA (MARCH 20) BUSINESS WIRE - Aris Corp. (''Aris'') (NASDAQ:LMNT) Tuesday reported results for the three months ended Feb. 3, 1990.

Aris reported strong revenue increases for its sole operating subsidiary, Lamonts Apparel Inc., acquired on Sept. 21, 1989. Revenues, consisting wholly of sales from Lamonts 49 stores, were $79.9 million and represent a 13.7 percent increase over Lamonts' prior year first quarter sales of $70.3 million. Of this increase, revenues of the 44 comparable stores (those stores open for one full year in both three month periods) rose $5.0 million, or 7.1 percent while the five new stores (those stores open for less than one year) added incremental revenues of $4.6 million. The additional week in the three months ended Feb. 3, 1990, accounted for approximately $2.2 million, or 3.2 percent, of the 13.7 percent increase. Lamonts' sales were strong with exceptional performances in several markets including a 14 percent increase in the Seattle/Tacoma area and a 12 percent increase in the state of Alaska.

Operating cash flow (defined as earnings before interest, depreciation, amortization, LIFO and other non-cash accounting adjustments) generated by Lamonts for the three months ended Feb. 3, 1990, was $9.1 million, or 11.4 percent of sales. This performance represents an increase of $1.3 million, or 15.4 percent, as compared to the three months ended Jan. 28, 1989. Lamonts strong sales, coupled with improved gross margin and tight expense control throughout the company, contributed towards significant improvement in the cash flow results for the current quarter.

For the three months ended Feb. 3, 1990, the company reported (on a consolidated basis) net earnings of $0.2 million and cash provided by operating activities of $7.6 million.

AKRON, OH (MARCH 20) BUSINESS WIRE - American Business Computers Corp. (NASDAQ:ABCC) reported a net loss of $266,000, or approximately 2 cents per share, compared to a $20,000 profit for the same period a year ago.

The primary reason for the loss is a reduction in soft drink dispensing product line revenues.

Bob Cutting, president of ABCC Inc. said: ''We started our soft drink dispensing equipment product line three years ago from scratch. ABC is now being recognized as a technological leader. Unplanned delays were encountered on the market roll out of our first soft drink dispensing product which has caused financial losses. However, ABC has developed additional products and we are working towards establishing a worldwide distribution channel for our entire soft drink dispensing product line. We have learned a great deal about soft drink equipment and are ready to move forward.''

American Business Computers Corp. develops and markets state-of-the-art products for the foodservice industry, which increase the efficiency, control, and profitability of food and beverage operations.

STAMFORD, CT (MARCH 20) BUSINESS WIRE - NYCOM Information Services Inc. (NASDAQ:NYCM) Tuesday reported revenues of $6,287,858 for the year ended Dec. 31, 1989, compared with revenues of $807,730 for the year ended Dec. 31, 1988.

The company also reported a net loss of $8,598,721, or 32 cents per share, compared with a net loss of $3,833,419, or 23 cents per share in 1988.

The company also reported that it had fourth-quarter revenues of $3,384,853 compared with revenues of $247,264 for the quarter ended Dec. 31, 1988. The net loss for the quarter ended Dec. 31, 1989 was $1,405,951, or 5 cents per share, compared with $1,874,790, or 10 cents per share for the quarter ended Dec. 31, 1988.

David Lyons, chairman and chief executive officer of NYCOM Information Services stated: ''1989 was an important year for NYCOM. The financial results reported today represent the positive trends of both the revenue and operating expense sides of our business. We anticipate that the

accomplishments achieved in 1989 should be reflected in even further improvement in 1990.''

The year-end and fourth-quarter results do not take into account the anticipated acquisition of American Network Exchange Inc., which has been previously reported. Lyons stated: ''With the pending acquisition of AMNEX, we look forward to continued growth in our revenue and subscriber base, as well as continued realization of cost savings due to the economies of scale which typically accompany a consolidation of this kind.''

NYCOM Information Services is a telecommunications company which offers a broad spectrum of standard and enhanced information and operator services to meet the needs of the transient telephone user in the payphone, hotel, hospital, and interexchange carrier marketplace.

MUNCIE, IN (MARCH 20) BUSINESS WIRE - Ball Corp.'s aerospace systems group has been selected for contract negotiations on three Earth Observing System (EOS) projects, totaling $146 million, from NASA's Langley Research Center.

NASA's EOS program goal is to advance scientific understanding of the Earth's land masses, oceans and atmosphere; the interactions among them; and how the Earth's system is changing. It will look at Earth as a total system: atmosphere, oceans, biological cycle, chemistry and the ''greenhouse'' effect.

The Spectroscopy of the Atmosphere Using Far Infrared Emission (SAFIRE) project is the largest single contract ever awarded the company's aerospace systems group. It is a two-part program with a potential worth of approximately $95 million. The first phase, which runs for 18 months, is valued at about $880,000. The second phase is about $94 million and is an option that NASA will exercise if the negotiated terms of the first phase are satisfied and Congress continues to fund the EOS program.

Two more Ball EOS programs recently negotiated are the Tropospheric Radiometer for Atmospheric Chemistry and Environmental Research (TRACER), and the Stratospheric Aerosol and Gas Experiment (SAGE III). Contract values are $28 million for TRACER and $23 million for SAGE III.

SAFIRE will perform science not done before. It will provide detailed, molecular-level chemistry profiles of the Earth's ozone layer. Its

results will help scientists understand the mechanisms that both break down and enhance the ozone. A key international cooperative project, the SAFIRE program includes science teams from the United States, England, Italy and France. As prime contractor, Ball has management responsibility for the international team, overall system design and integration, and the cryogenic system.

TRACER is an instrument to measure global distribution of carbon monoxide at multiple levels in the troposphere, define global scale atmospheric motion and clarify the interactions between the chemistry and the horizontal and vertical atmospheric motion.

The TRACER instrument is designed to be so sensitive that it will detect variations of carbon monoxide in different parts of the world. From part measurements, it has been determined that the production of carbon monoxide from tropical burning of vegetation rivals that created by transportation and industry in the northern hemisphere.

SAGE III is a system consisting of three spaceflight instruments expected to provide vertical resolution profiles of aerosols and other atmospheric gases from near the Earth's surface or cloud tops into the stratosphere and mesosphere.

Ball Corp. manufactures and markets packaging, industrial and consumer products, and provides aerospace systems and professional services to the federal sector. The company participates in the domestic glass container industry and Canadian packaging market through two joint venture companies Ball-InCon Glass Packaging Corp. and Ball Packaging Products Canada Inc.

PHOENIX (MARCH 20) BUSINESS WIRE - New Mexico and Arizona Land Co. (ASE:NZ) announced its financial results for the year ended Dec. 31, 1989.

The company recorded losses totaling $5,652,000, equivalent to $2.29 per share. This compares to the 1988 loss of $112,000 or 5 cents per share.

The Tucson Inn at the Airport was responsible for a major portion of the 1989 deficit because of a $980,000 operational loss plus a writedown of $2,460,000.

The company sold the hotel in January 1990. Other properties

contributing significantly to the loss were University Center, an office complex near Arizona State University in Tempe; and 62 acres of undeveloped commercial land in Mesa, Ariz., on which the company foreclosed the purchaser's interest during the fourth quarter.

Despite these unusual losses, the company has ample cash flow to meet all obligations and to make modest debt reductions.

New Mexico and Arizona Land Co. is traded on Amex under the symbol ''NZ.'' It holds real estate, mineral, and petroleum interests in its namesake states.

NEW CASTLE, IN (MARCH 20) BUSINESS WIRE - Paul W. Prior, chairman of the board, president and chief executive officer of Ameriana Savings Bank (NASDAQ/NMS:ASBI), Tuesday said that Ameriana's previously announced reorganization of the bank to the holding company form of ownership was completed on March 19, 1990.

As a result of the reorganization, the bank becomes a wholly owned subsidiary of Ameriana Bancorp, a company formed by Ameriana to be its holding company. All outstanding shares of Ameriana's common stock have been automatically converted by operation of law into shares of common stock of Ameriana Bancorp on a one-for-one basis.

Ameriana Bancorp, through its wholly owned subsidiary, Ameriana Savings Bank, offers an extensive line of banking services to the east central Indiana area through offices in New Castle, Knightstown, Middletown and Greenfield.

In addition to banking services, Ameriana, through Ameriana Financial Services Inc., has an interest in a life insurance company headquartered in New Orleans, owns Thalls-Ameriana, a full-service insurance agency in New Castle, and provides a full line of investments and securities products in its brokerage center.

The common stock of Ameriana Bancorp is traded in the National Market System under the NASDAQ symbol ASBI.

EMERYVILLE, CA (MARCH 20) BUSINESS WIRE - Cetus Corp. (NASDAQ:CTUS) announced Tuesday that its wholly owned European subsidiary, EuroCetus B.V., has received pricing approval in Spain for Proleukin interleukin-2.

EuroCetus expects to begin marketing Proleukin in Spain shortly.

Last October the Spanish Board of Health granted approval of Proleukin for the treatment of advanced renal cell carcinoma (kidney cancer). This approval followed the May 1989 recommendation of the Committee for Proprietary Medicinal Products, the central regulatory body of the European Community.

''We are very pleased with the rapid approval we have received for Proleukin throughout the European Community,'' said Filippo La Monica, president of EuroCetus. ''With the addition of Spain, we now market Proleukin in seven European countries.''

The other countries include Denmark, Netherlands, Germany, Ireland, Italy and France. In Spain, it is estimated that 2,000 patients are diagnosed with kidney cancer each year, among a population of 38 million.

Proleukin is under development in Europe on behalf of Cetus Healthcare Limited Partnership II.

Cetus Corp. is a leading biotechnology company primarily engaged in the development, manufacturing and marketing of pharmaceutical products to treat cancers and serious infectious diseases.

The company is also developing commercial applications of its GeneAmp polymerase chain reaction (PCR) technology. Founded in 1971, Cetus is based in Emeryville, and also operates EuroCetus in Amsterdam, Netherlands.

CAMARILLO, CA (MARCH 20) BUSINESS WIRE - Everest & Jennings International Ltd. (ASE:EJ.A; EJ.B) Tuesday announced that it has completed the acquisition of the Smith & Davis and Amedco Health Care subsidiaries of Huntco Manufacturing Inc. for $4.5 million in cash and 984,000 shares of Everest & Jennings class A stock.

With headquarters in St. Louis, Smith & Davis is a leading homecare and nursing home bed manufacturer and Amedco is a supplier of hospital beds and related equipment. The acquisition agreement also includes Oxycon, a unit of Smith & Davis that manufactures home oxygen therapy equipment.

Barre L. Rorabaugh, president and chief executive officer of Everest & Jennings said: ''These acquisitions represent a major step forward in the implementation of our long-range plan to reinforce and expand our penetration into global healthcare markets. Our product line has been significantly expanded, thus providing our customers with a broader selection of products within the durable medical equipment market and strongly positioning us in the long-term healthcare market.''

Everest & Jennings International Ltd. is engaged in the design, manufacture and distribution of wheelchairs and other durable medical equipment to worldwide markets, primarily in North America and Western Europe.

WHITE PLAINS, NY (MARCH 20) BUSINESS WIRE - IBM Tuesday announced several new Personal System/2(a) models, busmaster adapters and peripherals for advanced computing in the 1990s.

The new workstation/servers, busmasters, fixed disks and CD-ROM drive introduced today feature the flexible expansion capabilities of the Small Computer System Interface (SCSI). Through incorporation of one of the SCSI busmaster adapters, customers will be able to attach up to seven peripherals through a single system expansion slot.

Because of the versatility of IBM's Micro Channel(a) architecture, PS/2(a) customers may incorporate these SCSI adapters as options into their installed systems, providing continued growth and expanded performance of their Micro Channel PS/2s.

Packaged with more memory, greater storage capacity, and faster disk drives than previous workstations/servers, the new PS/2 systems provide all the necessary ingredients for shared-resource computing. ''The combination of these products creates a total solution for connected or standalone personal computing. And these products are available for first-time customers or as growth options for the millions of PS/2 Micro Channel systems already installed,'' said James A. Cannavino, IBM vice president and general manager, Personal Systems.

The workstation/servers that support SCSI announced today are: -- Four new configurations of the IBM Personal System/2 Model 80 -- two of which are based on the 25 megahertz (MHz) Intel 80386 microprocessor and come standard with a 64 kilobyte (KB) memory cache and 4 megabytes (MB) of random access memory (RAM).

The other two models, based on the 20 MHz, 386(a) processor, come standard with 2 MB of RAM and either a 120 MB or 320 MB SCSI fixed disk; -- The IBM Personal System/2 Model 65 SX, a new system,

designed around the Intel 80386SX microprocessor, comes standard with 2 MB of RAM and either a 60 MB or 120 MB SCSI fixed disk.

#90079b0660 03/20/1990 ~Business Wire

WHITE PLAINS, NY (MARCH 20) BUSINESS WIRE - IBM Tuesday expanded the high end of the Personal System/2-a family with six new Micro Channel-a server/workstations that introduce the Small Computer System Interface (SCSI), and include high-performance fixed disks as standard equipment.

The new PS/2s-a -- four new models of the PS/2 Model 80 386 and a new system, the PS/2 Model 65 SX -- provide customers with high-performance, expandable systems that excel as general business and engineering/scientific workstations, or as intelligent workstations and servers in network environments.

Also introduced for the Personal System/2 family is a high-resolution, 14-inch color display that brings improved contrast and sharpness to text, graphics and image applications.

More than a billion bytes of storage, more system memory

The new systems provide plenty of room for future growth, with up to six bays, or disk file compartments, that have room for storage expansion of more than 1 billion characters of information.

The PS/2 Micro Channel SCSI Adapter, standard in all new systems, ensures customers the flexibility to add up to seven enhanced peripherals -- such as CD-ROM drives or optical scanners -- on each adapter. Seven available expansion slots ensure a high degree of connectivity and flexibility. The new Model 80s have four 32-bit and four 16-bit slots; the 65 SX has eight 16-bit slots.

All the new workstation/servers offer twice as much memory as earlier Model 60s and 80s. The new Model 65 SX and two versions of the new Model 80s have 2 megabytes (MB) of memory standard, and the two high-end Model 80s have 4 MB standard.

CANTON, MA (MARCH 20) BUSINESS WIRE - Instron Corp. (ASE:ISN), a leading worldwide producer of materials testing instruments, announced the appointments of Joseph E. Amaral as vice president, corporate technical director, and Linton A. Moulding as vice president, corporate director of manufacturing.

Harold Hindman, chairman and chief executive officer of Instron said, ''These appointments are key steps in our long-term strategy of strengthening the management team and improving operating efficiencies worldwide.''

Amaral has been with Instron for 12 years in positions of increasing

responsibility, including a leading role in the company's pursuit of common international products and a globally integrated engineering team. Prior to joining Instron, he was with General Dynamics Corp. He received both his Bachelor's and Master's degrees in Physics from the University of Rhode Island.

Amaral, his wife, Claudia, and their three children are residents of Glocester, R.I.

Moulding joined Instron in 1985. He had previously compiled a record of accomplishment in both financial and operations management in Europe, the Middle East and the U.S. serving with Tube Investment Inc., a specialized engineering company based in the U.K., and Baker Hughes, Inc., a major international oil services company.

Moulding received his undergraduate degree in Management from Warwick University in Coventry, England and his Master of Business Administration, with distinction, from Harvard University.

Moulding and his wife, Jane, live in Cambridge, Mass.

WHITE PLAINS, NY (MARCH 20) BUSINESS WIRE - IBM Tuesday announced a new 30 megabyte (MB) version of the award-winning portable Personal System/2-a introducing a lower entry price.

The PS/2-a P70 386 Model 031 features a powerful 16 megahertz (MHz) Intel 80386 microprocessor, and 2 megabytes (MB) of random access memory (RAM) on the planar board.

Designed for business professionals who need more than a laptop, the newest P70 offers a complete desktop system, ''ready to go,'' at a very attractive price. The P70 Model 031 shares many features with IBM's other 386(a)-based systems, including: Micro Channel-a architecture; support for IBM DOS and IBM Operating System/2-a (OS/2-a); and the ability to communicate to mainframe computers and local area networks through an optional internal modem.

With the PS/2 P70, busy professionals are able to take their offices on the road with them. The P70 can run a graphics presentation and present documents and digitized photographs on an optional IBM color display with the built-in video graphics array (VGA) support. Statistics and reports can be downloaded from the company's mainframe via a modem.

Integrated Design Eliminates Adapters

The P70 Model 031 is a highly integrated design, featuring an industry-leadership gas plasma display for sharp text and graphics, and a full-sized PS/2 Enhanced Keyboard. As with the rest of the PS/2 family, a wide variety of other functions are integrated into the system, including VGA, serial and parallel ports, external display, and an external storage device port for options such as the IBM 5 1/4-inch External Diskette Drive. This eliminates the need for adapters.

For additional, flexible expansion the Small Computer System Interface (SCSI) adapter, also announced today, enables customers to attach up to seven peripherals through a single P70 expansion slot.

The Personal System/2 P70 386 Model 031 is available immediately from IBM authorized Advanced Product Dealers, IBM authorized Industry Remarketers and directly from IBM. It is priced at $5,995. (a) IBM, Personal System/2, PS/2, Operating System/2, OS/2 and Micro Channel are trademarks or registered trademarks of the International Business Machines Corporation. 386 is a trademark of the Intel Corporation.

#90079b0665 03/20/1990 ~Business Wire

WHITE PLAINS, NY (MARCH 20) BUSINESS WIRE - IBM Tuesday announced the availability of Operating System/2(a) (OS/2-a) Extended Edition Version 1.2.

This new release includes significant enhancements that offer functional, price and performance gains over previous versions. Many of these enhancements also position OS/2 EE 1.2 as a powerful operating system solution for client-server computing.

IBM also announced a new version of Easel(a) 1.1 for OS/2 Extended Edition that provides software developers with new capabilities, including the creation of cooperative processing applications and the ability to access OS/2 distributed relational databases.

All previously announced functions are now included in OS/2 EE 1.2. These functions, designed to meet the growing connectivity and data-management needs of users in the 1990s, include: expanded communications support; greater access to and management of data; additional programming language support and simplified installation. OS/2 EE 1.2 is an integrated Systems

Application Architecture(a) (SAA) offering, consisting of a base operating system (Standard Edition), a Communications Manager, a Database Manager and a LAN Requester.

The base operating system now includes a new memory management feature that provides up to 512 kilobytes (KB) of additional memory for OS/2 applications. The memory is swapped from the DOS application storage area to the disk. This improves system performance by reducing the amount of swapping required to meet multiple OS/2 application demands for storage.

Also included in the base operating system is a Dual Boot utility enabling users to load both OS/2 and DOS from the same fixed disk; additional printer device drivers; a High Performance File System, which can efficiently manage storage as large as 32 gigabytes; and an additional 65 KB of memory available in the DOS compatibility box when operating in a Token-Ring local-area network (LAN) environment. The Communications Manager offers support for additional protocols, including SNA LU0, X.25, Ethernet DIX Version 2.0 and IEEE 802.3, and a SNA LAN gateway. A 5250 Workstation feature is also provided for additional connectivity to the AS/400(a). Using these connections, other OS/2 EE components can participate in various environments, including client-server computing.

DALLAS (MARCH 20) BUSINESS WIRE - Cybertek Corp. (NASDAQ/NMS:CKCP) Tuesday announced the signing of a major agreement with The Equitable Life Insurance Co. of Iowa to license Cybertek's CK4/VS issue and administration software.

An agreement has also been reached under which Cybertek will assist in the conversion from Equitable Life of Iowa's current life administration systems. The company ultimately plans to convert all of its individual life and annuity policies to the CK4/VS system. The value of the agreements is expected to exceed $1.5 million.

In its second century of operation, Equitable Life of Iowa, located in Des Moines, enjoys an excellent reputation with a Best A+ (superior) rating and is held in high regard by the insurance industry. Offering a complete portfolio of insurance products, Equitable Life of Iowa has in excess of $7 billion insurance in force.

''These agreements are significant for two reasons,'' said Vaughn Morgan,

president and chief executive officer of Cybertek. ''First Equitable Life of Iowa is one of the leading companies in our industry, and enjoys the reputation of being an extremely well-managed and financially sound company.

''Also, Equitable Life of Iowa is located in an area that is one of the strongholds of the insurance industry. A partnership with an exemplary company located in this region is indeed a valuable relationship. These contracts will strengthen our presence in that marketplace,'' said Morgan.

Entering its 21st year, Cybertek has long been considered a pioneer in the development of real-time computer systems and software programs designed to increase user productivity for insurance customers.

FORT WAYNE, IN (MARCH 20) BUSINESS WIRE - Tokheim Corp. (NYSE:TOK) Tuesday reported sales and earnings for the fiscal first quarter ended Feb. 28, 1990.

Sales for the fiscal 1990 first quarter were $51.1 million, an increase of approximately 9 percent from sales of $46.9 million recorded in the comparable period of 1989. This increase is attributable primarily to sales growth in international petroleum dispensing equipment markets.

Net earnings for the first quarter were $1.6 million, or 18 cents per share on a primary basis, vs. net earnings of $0.1 million, or 1 cent per share, in the year-ago quarter.

Profits in the company's United Kingdom and Canadian operations increased strongly. In addition, the company's Brazilian operation, which was undergoing costly construction and start-up activities during most of fiscal 1989, began shipping products toward the end of the 1990 first quarter.

Tokheim Corp. is principally engaged in the design and manufacture of electronic petroleum marketing and monitoring systems, including service station equipment, point-of-sale control systems, card-activated transaction systems, and underground tank monitoring equipment. Through a subsidiary, it is engaged in the design and manufacture of solid-state time delay and time and temperature control devices for the fast-food and other industries domestically. The company also designs and produces process control automation systems for the natural gas, oil, petrochemical water, and agriculture industries.

STAMFORD, CT (MARCH 20) BUSINESS WIRE - TSS Ltd. (NASDAQ: TSSL) announced Tuesday that it has entered into a sales and marketing agreement with Howard Marlboro Group Worldwide (HMGW), a marketing services subsidiary of Saatchi & Saatchi Co. plc.

The agreement provides for the non-exclusive representation of TSS's The Savings Spot automated, electronic, in-store coupon distribution program to HMGW's clients and other selected packaged goods manufacturers as well as their advertising and promotion agencies. In addition, HMGW was also named the exclusive worldwide marketing and sales representative for applications of TSS's patented, networked dispensing technology outside the company's core packaged goods retailing marketplace.

HMGW will also provide TSS with assistance in placing its coupon dispensing terminals with supermarket chains and related retailers in the United States.

Howard Marlboro Group Worldwide is a full service in-store marketing and merchandising company specializing in retail marketing programs for customers around the world.

Stephen D. Tannen, president and CEO of TSS Ltd., stated, ''By virtue of their strong relationships with the packaged goods industry, Howard Marlboro is expected to significantly and effectively expand our internal marketing and sales capability to reach our target markets in a shorter time frame.'' He added, ''We expect to benefit greatly from the wealth of their unique in-store display, merchandising and promotion knowledge.''

TSS Ltd., a development stage company, provides its proprietary in-store coupon distribution service to packaged goods manufacturers through its ''The Savings Spot'' program utilizing its patented consumer-operated, electronic coupon dispensing machines.

The Savings Spot user-friendly kiosks, installed in supermarkets, thermally print and dispense cents-off coupons within three seconds after they have been selected by shoppers enrolled in the program. There is no fee to the consumer to participate in the TSS program.

TSS is currently operating its program in supermarkets in Georgia, South Carolina, North Carolina and Florida. TSS's common shares, warrants and units are traded on NASDAQ under the symbols TSSL, TSSLW and TSSLU, respectively.

WHITE PLAINS, NY (MARCH 20) BUSINESS WIRE - IBM strengthened its position in the personal-printer marketplace with the introduction Tuesday of a very competitive, affordable and upgradeable entry-level model of the IBM LaserPrinter, and an Adobe(a) PostScript(a) option enabling both models to be used for desktop publishing and other applications utilizing graphics or text scaling.

In addition, IBM made the award-winning LaserPrinter even more affordable and competitive by reducing its base price.

''The new IBM LaserPrinter E is ideal for small businesses and professionals who seek a standalone desktop printer well-suited for a variety of high-quality personal printing functions,'' said William R. Bowles, general manager, IBM Information Products. ''With its speed, paper-handling features and optional PostScript and upgrade capabilities, this is truly more than a very affordable personal laser printer -- it's a printer that allows users to take advantage of the function they need now, with the flexibility to upgrade to what they may need in the future.''

Designed for small businesses and professionals, the new LaserPrinter E offers significant advantages when compared to the most popular, comparably priced competitor's model. With speed of up to five pages-per-minute, the LaserPrinter E prints 25 percent faster. Also, it is fully compatible with the IBM LaserPrinter, offering the same high-resolution graphics printing/plotting capabilities and a wide variety of fonts and options for printing and collating documents, letters and envelopes. And, unlike its competitors, the LaserPrinter E can be upgraded to become even faster.

The LaserPrinter E is affordably designed for those whose needs include printing letters, documents and spreadsheets, and for desktop publishing. As customer needs increase in sophistication and volume, the LaserPrinter E can easily be upgraded with additional paper and envelope feeders, more memory, PostScript for desktop publishing, and an upgrade feature enabling

it to produce up to 10 pages-per-minute.

The IBM LaserPrinter E, priced at $1,495, and the IBM LaserPrinter, newly priced at $2,395, are available now. The PostScript Option, priced at $499, and the Premium PostScript Option, priced at $899, also are available now. The Upgrade Option for the IBM LaserPrinter E is available now for $1,099. IBM LaserPrinters and all their options may be purchased through IBM authorized computer dealers, IBM Authorized Industry Remarketers, and directly from IBM.

#90079b0680 03/20/1990 ~Business Wire
MOUNTAIN VIEW, CA (MARCH 20) BUSINESS WIRE - IBM Tuesday announced the availability of a PostScript interpreter for the IBM LaserPrinter and the new LaserPrinter E.

Configured for PostScript printing, the LaserPrinter E is priced at $2,443 -- making it the lowest-priced PostScript printer on the market.

The PostScript interpreter, which is customer-installable onto the system board of the printer, provides 17 scalable Adobe typeface programs and is priced at $499. A premium font package, which includes the interpreter and an outline font card containing another 22 scalable Adobe typeface programs, is priced at $899.

The printers and PostScript interpreter are available immediately from IBM authorized dealers, industry remarketers and directly from IBM.

The latest addition to IBM's LaserPrinter family, the five-page-per-minute LaserPrinter E, is a 300-dpi printer priced at $1,495. The family also includes the 10-page-per-minute LaserPrinter, newly priced at $2,395. Both printers have serial and parallel interfaces and both come with one-half megabyte of memory.

Customers who add the PostScript interpreter will also need to add another megabyte of memory, priced at $499.

The interpreter for the LaserPrinter is the newest addition to the line of IBM products that incorporate Adobe technology. IBM already includes PostScript software in the IBM Personal Page Printer II, AFP/PostScript interpreter, and Display PostScript software in AIX Windows and AIX NextStep for the RISC System/6000 family.

IBM also recently announced it would provide Type 1 font technology from Adobe across its Systems Application Architecture (SAA) compliant operating systems. As more SAA-compliant applications become available, this will ensure IBM users benefit from a consistent method of creating and imaging high-quality type on displays and output devices.

In addition, through its broad support of the PostScript imaging model, IBM offers its users a unified imaging strategy across a wide range of applications, platforms and output devices, including displays and selected laser printers.

The LaserPrinter and LaserPrinter E, for example, can be attached to the Personal System 2, IBM Personal Computer, ES/9370, AS/400, System 370 and RISC System/6000 office systems. For users of IBM systems and compatibles IBM's overall imaging strategy, which includes future support for Adobe fonts under the OS/2 operating system, makes buying PostScript-based devices the logical long-term investment.

Adobe Systems Inc. (NASDAQ:ADBE), founded in 1982 by Dr. John Warnock and Dr. Charles Geschke, has headquarters in Mountain View. Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing, and Display PostScript, a device-independent graphics software component for computer displays.

WESTBORO, MA (MARCH 20) BUSINESS WIRE - Data General Tuesday introduced the WALKABOUT/SX, a 386SX laptop that features the performance, disk capacity, and graphics resolution of 386SX desktop PCs in a battery-powered, portable system.

Priced at $4,995, the WALKABOUT/SX offers superior price/performance over 386SX laptops from Toshiba and Zenith, and 16-MHz 286 laptop offerings from Compaq and NEC. The new laptop is making its debut at Hannover Fair in West Germany this week.

The WALKABOUT/SX is one of the industry's first battery-powered laptops based on the high-performance, 16-MHz Intel 80386SX microprocessor. The 80386SX lets users take advantage of software written for the 32-bit Intel 80386 microprocessor, such as MS Windows/386.

''With the WALKABOUT/SX, users no longer have to sacrifice power and performance for portability. This new laptop can be used as a high-performance portable and as a full-featured desktop PC, and is ideal for the many users who are looking for a balance of computing power and portability both at the desk and on the road,'' said Ted Webber, director of PC product marketing.

The WALKABOUT/SX features a tiltable, black-on-white, backlit LCD VGA screen that displays 32 levels of gray, which permits easy readability of text and graphics and supports color application software with no loss of clarity.

A WALKABOUT/SX base configuration, which includes one MB of memory, floppy disk drive, 40-MB hard disk, MS-DOS 4.01, GW-BASIC, and a Lotus-Intel-Microsoft (LIM) 4.0 expanded memory manager is priced at $4,995. The WALKABOUT/SX includes a one-year, mail-in warranty and is available 30 days after receipt of order.

FORT LEE, NJ (MARCH 20) BUSINESS WIRE - On-Line Software International Inc. (NYSE:OSI) Tuesday announced that operating income increased

significantly for the third quarter ended Feb. 28.

For the quarter, income before extraordinary gain increased to $1,142,000 (19 cents per share), compared to income before extraordinary gain of $634,000 (10 cents per share) for the comparable period last year. In last year's quarter ended Feb. 28, the company also reported an extraordinary gain of $675,000 (11 cents per share).

Revenues for the third quarter increased 9.5 percent to $23.1 million from $21.1 million last year.

For the nine months ended Feb. 28, the company's income before extraordinary gain was $2,109,000 (35 cents per share), compared to a loss before extraordinary gain of $1,836,000 (30 cents per share) last year. An extraordinary gain of $151,000 (3 cents per share) was recorded in the current period, compared to a gain of $2,516,000 (41 cents per share) recorded in last year's nine month period.

Revenues for the nine months were $64.9 million, 8.2 percent higher than last year's $60 million.

On-Line Software International is a NYSE company headquartered in Fort Lee N.J. The firm, celebrating its 20th anniversary, combines consulting and educational services with a full range of systems software designed to enhance the productivity of IBM computer systems users.

From 16 domestic and international offices, and a distribution network that services over 25 foreign countries, On-Line Software offers CICS and DB2 productivity software, and development systems products, combined with educational/consulting services that are designed to develop and maintain on-line and data base systems for IBM environments.

NEW HYDE PARK, NY (MARCH 20) BUSINESS WIRE - Bamberger Polymers Inc. (ASE:BPI) Tuesday announced sales and earnings for the fourth quarter and year ended Dec. 31, 1989.

Fourth quarter net income soared to $704,000 or 23 cents per share on sales of $38,085,000 as compared to $262,000 or 8 cents per share on sales of $52,153,000 for the corresponding period last year.

Year-end earnings were $12,000 or nil cents per share on sales of $183,829,000 vs. earnings of $3,744,000 or $1.10 per share on revenues of $209,650,000 reported in 1988.

In announcing the results, Bamberger Polymers Chairman, Herbert M. Pearlman, said, ''Fourth quarter performance returned to typical levels following a number of months of substantial price fluctations of thermoplastic resins. These market conditions adversely affected earnings during the first nine months of 1989.''

He added, ''The turnaround is most impressive since the company showed a $692,000 loss for the nine months, yet finished the year with a nominal profit.'' Pearlman noted that the wide price differentials experienced throughout the industry in 1989 are not present in today's market climate.

Bamberger Polymers is an international plastics merchant involved in compounding, distribution and sales of thermoplastic resins, the raw materials for a broad range of plastic products.

RICHARDSON, TX (MARCH 20) BUSINESS WIRE - Ericsson has been awarded a contract from Minerich Inc. for a CMS-8800/S cellular system that will serve the Illinois Rural Service Area (RSA) No. 2.

Illinois RSA 2 serves an eight county area on the south and west side of the Chicago MSA. It will complete the cellular coverage area between Chicago and the cities of Champaign, Bloomington, Peoria and the Quad Cities area.

The system will offer continous coverage in between those cities and provide initial coverage to Princeton, Peru, LaSalle, Ottawa, Pontiac and Streator, Ill.

The system will initially include and AXE digital switch and six cell sites and is scheduled to be put into service during May 1990.

The system will be one of the first A Block RSAs in the United States to go into commercial service. The system will potentially allow uninterrupted service to those callers driving between the major metropolitan areas that are also served by Ericsson systems.

''Our customers get the best quality service possible with the Ericsson cellular system, both in their home area and when they travel to their neighboring cities,'' said Russell Land, vice president, Technical Operations for the Minerich Cellular Management Group.

Minerich Inc. is a Kentucky based company that specializes in turn-key contruction and management of communications systems. They have recently added a management group for the operation of cellular businesses.

Headquartered in Richardson, Texas, Ericsson is the wholly owned subsidiary of LM Ericsson of Sweden, one of the world's leading manufacturers of telecommunications equipment.

PROVO, UT (MARCH 20) BUSINESS WIRE - Novell Inc. (NASDAQ: NOVL), developer of NetWare systems software products, Tuesday announced support for IBM's six new Personal System/2 computers in the NetWare network computing environment.

The announcement is the result of an effort by the two industry leaders under which IBM developed two SCSI (Small Computer Systems Interface) disk controllers while Novell developed the required software drivers.

NetWare customers will be able to use IBM's new class of PS/2 machines as high-performance NetWare servers. Supported NetWare versions include NetWare 386 v3.0, Advanced NetWare v2.1x and SFT NetWare.

"Novell is a leading systems software vendor, and its offerings are currently being used by many of our Personal System/2 customers," said Jim Cannavino, IBM vice president and general manager, personal systems. "This announcement provides additional advanced capabilities in the network environment in support of our new high-performance systems."

"As a result of this effort, customers can expect a tightly integrated combination of system software and high-performance hardware," said Darrell Miller, Novell executive vice president for marketing and services. "Historically, Novell has had software available when IBM introduces new products. This announcement is the latest example of a continuing strategic relationship between our two companies."

IBM's new PS/2 Micro Channel systems feature faster disk drive access than conventional AT-bus machines, giving NetWare users quicker server response. The SCSI bus-master disk controller interface allows access to up to seven additional devices through a single interface.

The SCSI disk also controller enables disk mirroring and duplexing, making the new machines optimum platforms for SFT (System Fault Tolerant) NetWare and for NetWare 386.

IBM's new machines, the SCSI disk controller and the Novell-developed driver were certified through Novell's Independent Manufacturers Support Program (IMSP), a product certification facility. To date, more than 400 LAN and system-level vendors have participated in the IMSP program.

"Novell's IMSP program assures our customers that they can buy network

components from a variety of vendors and integrate them with confidence within the NetWare environment," said Dave Owen, Novell vice president in charge of IMSP. The Novell SCSI driver will be part of the core NetWare 386, Advanced NetWare and SFT NetWare products, and will be available at no additional charge.

NEW YORK (MARCH 20) BUSINESS WIRE - The Continental Corp. (NYSE: CIC) Tuesday announced that it has agreed to sell the stock and licenses of its Harbor Insurance Co. subsidiary to a subsidiary of NAC Re Corp. (NASDAQ: NREC).

The proposed sale will have no impact on Harbor's clients. Continental Excess & Select currently manages accounts written by Harbor. It will continue to market such specialized casualty coverages - including medical stop loss, directors' and officers' liability, and specialty programs for select industries such as railroads - for Continental insurance subsidiaries.

Prior to the closing the the transaction, which is subject to regulatory approval, all of Harbor's in force business and its liability for expired business will be transferred to other subsidiaries of Continental.

"This step is consistent with our long term goals and objectives," said Bryan Reid, president of Continental Excess & Select. "It will have no effect on our clients. We will continue to offer them specialized underwriting and superior financial security."

The Continental Corp., headquartered in New York City, has over $6 billion in annual revenues and $13 billion in assets. Its insurance subsidiaries write property/casualty coverages through independent agents and major brokers, with an emphasis on commercial package policies and select specialized insurance products and services.

NASHUA, NH (MARCH 20) BUSINESS WIRE - Lockheed Sanders and the U.S. Navy have signed an agreement which will lead to a government validation demonstration of the Sanders Microelectronics Center (MEC) as a facility for producing Millimeter Wave and Microwave and Monolithic Integrated

Circuits (MIMIC).

These MIMIC devices are Gallium Arsenide (GaAs) microelectronic chips that contain complete microwave circuits and act as the ''electronic ears'' on modern DOD electronic systems. The agreement, called a Navy Potential Contractor Program (NPCP), provides a method for including Lockheed Sanders MEC efforts within the framework of the government's MIMIC Phase 1 program.

During 1989, Sanders began its own MIMIC Initiative Program (MIP) using Independent Research and Development (IRAD) funding. The Sanders effort includes four comprehensive tasks which are scheduled for completion by early 1991.

-- Develop the key building block MIMIC chips needed for Sanders electronic warfare systems.

-- Increase MIMIC fabrication line yield.

-- Improve MIMIC module assembly techniques by using advanced packaging and automation techniques.

-- The final task addresses Lockheed Sanders commitment to MIMIC insertion into DOD systems. It includes development of accurate yield and cost models for chips and modules for DoD programs. The models will be used with our yield enhancements to provide another effective measure of process line improvements.

The government has a major MIMIC program underway with other contractors which has funded additional tasks including the development of computer aided design tools, design workstations, and automated chip testing capabilities. The Sanders effort will benefit from these developments.

Lockheed Sanders is engaged in development, manufacture and sale of advanced electronic systems and products in a broad range of defense electronics markets. The company is a leading producer of electronic and infrared countermeasures for aircraft self-protection.

Other major product areas include radars, digital avionics, signal processing, ocean surveillance, antisubmarine warfare, air defense, training and simulation, automatic test systems, command and control, airspace management and high technology components.

LITTLE ROCK, AR. (MARCH 20) BUSINESS WIRE - Systematics Inc. (NASDAQ:SYST) achieved record quarterly and nine-month results for the period ended Feb. 28.

John E. Steuri, chairman and chief executive officer, commented, ''I am pleased with the continued progress in growing both our revenues and profits despite ongoing turmoil in the financial services industry. Clearly, banks and savings institutions are distracted by regulatory changes, new capital requirements, increased competition, profit pressures and increased merger and acquisition activity.''

Revenue for the quarter was $62,717,000, an increase of 17.5 percent over revenue of $53,363,000 in the third quarter last year. Net income was $5,833,000, compared to $5,129,000 in the like period last year, an increase of 13.7 percent. Earnings per share for the quarter were 53 cents, an increase of 15.2 percent from 46 cents per share last year.

For the nine months ended Feb. 28, revenues were $175,733,000 an increase of 15.3 percent. Net income rose 9.9 percent to $15,230,000 from $13,854,000 in the first nine months last year. Earnings per share increased to $1.36 from $1.24 last year, an increase of 9.7 percent.

''While domestic software sales continue to be depressed, our data processing services business and our international software activity are strong,'' said Steuri. ''Continued high interest in outsourcing bank data processing services is evidenced by the fact that we have achieved our full year new sales quota for this business segment during the past nine months.

''Additionally, we've had good success in expanding our partnerships with existing customers by assuming additional responsibility for providing branch automation, item processing and telecommunications services. Also, we have worked diligently to hold our operating costs in line with revenues.''

Systematics, based in Little Rock, is a leading provider of data processing outsourcing servics and software products to the financial industry. The company operates 60 U.S. data centers, has customers in 44 states, and in 15 countries outside the U.S.

#90079b0715 03/20/1990 ~Business Wire

WASHINGTON (MARCH 20) BUSINESS WIRE - Today, reporters who need quick access to vital information about the activities of Congressional lobbyists turn to public workstations located in the House of Representatives' Office of Records and Registration in the Office of the Clerk of the House.

The workstations are part of a FileNet image processing system that makes lobbyists' reports available within hours of filing, rather than the days or weeks it previously took.

The Congressional application was announced Tuesday by FileNet Corp., of Costa Mesa, Calif., at the federal government's Information Systems Conference and Exposition (FOSE) held at the Washington Convention Center from March 20-March 22. FileNet is exhibiting at Booth No. 1038.

''When lobbyists are involved in breaking news stories, the media come here for information,'' said Patricia Bias, director of the Office of Records and Registration. ''With our FileNet system, we can provide faster public access to lobbyists' reports, and users can find them more quickly.'' Fast and Easy Public Access

The office has three FileNet workstations available to the public in its reception area. The workstation prompts users through a simple request procedure and then puts them on-line to access information that has been filed under the Federal Regulation of Lobbying Act.

When a user requests information on a particular lobbyist's activities, FileNet's WorkFlo software automatically pulls together images of all documents associated with that lobbyist's name and makes them available to the user in minutes. Hard copies are available from a high-volume printer.

Previously public access to information was via a microfilm system. Users had to look up lobbyists' names on a printout, ask for the roll (or rolls) of microfilm that contained information on the lobbyist, scroll through reels of film to find what they were looking for, copy the information and hand the microfilm back.

About 10,000 users a year, most of them journalists, come to the office for information, while thousands of others make phone inquiries. Other users include researchers from public and private institutions, Congressional staffers, students and job seekers who want information on special interest groups.

FileNet Corp. is the worldwide leader in manufacturing and marketing image processing systems used in paper-intensive business applications. A pioneer in its field, FileNet today has more than 300 system installations in 27 countries. The image processing market is projected to generate U.S. sales of approximately $1.7 billion in 1993.

The company, which is headquartered in Costa Mesa, Calif., has sales offices in the United States, Canada, France and Germany. FileNet systems also are sold in 23 other countries by Ing. C. Olivetti & C., S.p.A. and other distributors.

#90079b0716 03/20/1990 ~Business Wire

NASHVILLE, TN. (MARCH 20) BUSINESS WIRE - First quarter earnings per share for Shoney's Inc. (NYSE:SHN) increased 50 percent and revenues were up 7 percent over the same period in 1989, Leonard H. Roberts, chairman of the board and chief executive officer, announced Tuesday.

The company has completed two quarters of comparative operating results since the company's 1988 recapitalization. In those quarters, earnings per share rose 50 percent, Roberts said.

''These results show our continuing commitment and dedication to achieving outstanding operating results. They also demonstrate the effectiveness of our increased emphasis on improving same-store sales,''
Roberts said.

Roberts also announced plans for one of the most aggressive franchising efforts in the restaurant industry. The plan calls for accelerating franchise growth to reach 500 new restaurants a year within five years, bringing its projected total number of restaurants to more than 3,300 in 1995.

Roberts, who left Arby's Inc. last year to assume leadership of Shoney's Inc., spearheaded Arby's dramatic increase in franchised locations and revenues during the late 1980s.

Specific highlights of the quarter included:

-- For the first quarter of 1990, revenues increased 7 percent from

$240,572,000 to $258,469,000.

-- Comparable store sales increased 3.9 percent for the first quarter. This resulted in a real sales gain of .4 percent after adjusting for menu price increases.

-- Net income increased 59 percent from $2,971,000 to $4,735,000. Earnings per share were up 50 percent from 8 cents in 1989 to 12 cents in 1990.

-- Pretax income, excluding the nonrecurring capital gain in the prior year, increased 316 percent from $1,806,000 to $7,516,000. Pretax income and net income for 1989 included a gain on the sale of the company's investment in Restaurant Management Services Inc. of $5,271,000 and $1,833,000 (5 cents per share), respectively.

-- During the first quarter, the company made $20 million of principal payments against the original $585 million of bank borrowings used to finance the recapitalization. The balance of such borrowings at the end of the first quarter was $390 million with a weighted average interest rate of 10.55 percent. Interest expense declined by $3,840,000 from $26,470,000 in 1989 to $22,630,000 in 1990.

-- During the first quarter of 1990, the company had a net increase of one franchised Shoney's Inn and 18 restaurants, including five company-owned and 13 franchised units. The new company-owned restaurants consisted of one Shoney's, three Captain D's and one Pargo's.

-- At the end of the first quarter of 1990, the company had a total of 1,603 restaurants in operation, including 697 company-owned and 906 franchised units. In addition, the company had a total of 55 Shoney's Inns in operation. During fiscal year 1990, the company plans to open 22 restaurants and expects franchisees to open 75 restaurants.

Shoney's Inc. operates and franchises more than 1,600 restaurants and lodging units, including Shoney's, Captain D's, Lee's Famous Recipe Chicken, Fifth Quarter Restaurants, Pargo's and Shoney's Inns. Shoney's Inc. is a publicly held company traded on the New York Stock Exchange under the symbol of SHN.

#90079b0734 03/20/1990 ~Business Wire

GALVESTON, TX (MARCH 20) BUSINESS WIRE - Hornbeck Offshore Services Inc. announced its fourth quarter and annual results for 1989 today.

Revenues for the quarter ended Dec. 31, 1989 totaled $2,688,000 and net income was $1,298,000 or 37 cents per share compared with revenues of $693,000 and a net income of $254,000 or 9 cents per share in the same period last year. Larry D. Hornbeck, chairman of the board, president and chief executive officer, noted that higher day rates and utilization for the company's fleet of vessels contributed significantly to the improvement in 1989. For the year ended Dec. 31, 1989 the company reported a net loss of $683,000 (24 cents per share) and revenues of $6,139,000. The loss was due principally to a one-time charge of $2,223,000 recorded in June 1989 for reorganization costs related to two partnerships in which the company served as the general partner. The company reported significantly higher revenues, costs, assets and liabilities for financial reporting purposes as compared to historical financial information. This change resulted from a significant restructuring of the company's operations whereby most of the company's fleet was consolidated under corporate ownership.

Hornbeck Offshore Services Inc. is a marine transportation and services company that owns, operates, manages and bareboat charters offshore supply tug supply, geophysical, utility, crew, container hauling and research vessels. The company operates 28 vessels from bases in Galveston and Morgan City, Louisiana. Hornbeck Offshore Services Inc. is traded on the over the counter market under the symbol ''HOSS.''

ROCHESTER, NY (MARCH 20) BUSINESS WIRE - Paychex Inc. (NASDAQ:PAYX) Tuesday reported net income of $1,343,000 or 10 cents per share for the third quarter ended Feb. 28, 1990, compared to $2,029,000 or 16 cents per share for the same year-earlier period.

Revenue for the third quarter rose by 20 percent to $31,003,000 from $25,774,000 the previous year.

For the nine-month period ended Feb. 28, 1990, net income was $6,764,000 or 52 cents per share, compared to $7,258,000 or 56 cents per share for the same nine months last year. Revenue for the period reached $88,987,000, an increase of 19 percent over the year-earlier total of $74,613,000.

Tom Golisano, chief executive officer, noted that although revenue for the

third quarter increased 20 percent, operating costs increased 32 percent primarily because of nonrecurring expenses associated with the installation of a new payroll software system in the company's branch processing centers.

''In addition, we continued to experience the cost impact of the expansion of our sales organization and our field operations management while new client additions were below expectations,'' Golisano added.

The company's branch offices are currently processing payrolls for nearly 118,000 clients.

A decline in the third quarter earnings was forecast by Paychex earlier this month at which time Golisano commented on the successful introduction of two new Paychex products, Taxpay and Personnel Services.

''We expect the continued acceptance of these new products, along with margin improvement in our basic payroll business, to contribute to improved profitability in the coming fiscal year,'' he concluded.

Paychex is primarily engaged in the preparation of payroll checks, internal accounting records, and all federal, state and local payroll tax returns for businesses with 1 to 200 employees.

PROVIDENCE, RI (MARCH 20) BUSINESS WIRE - Nortek Inc. (NYSE:NTK) announced Tuesday that its board of directors has authorized a stock repurchase program for up to 10 percent of its outstanding common stock, $1 par value, subject to market conditions, cash availability and other investment considerations.

The company stated that it expects to acquire from time to time shares of common stock or special common stock in open market transactions or in negotiated purchases and that the shares will be used for general corporate purposes. As at Feb. 28, 1990, the company had approximately 13,927,000 shares outstanding.

A company spokesman said, ''We consider the stock to be significantly undervalued at this time, and its current market price does not represent its true value.''

Nortek Inc. is a diversified Fortune 500 corporation, manufacturing and marketing residential and commercial building products and commercial ventilating and air conditioning systems.

TAMPA, FL. (MARCH 20) BUSINESS WIRE - Harvey Glassman, former Shearson SVP of Product Development, joined INVEST FINANCIAL Corp. as National Product Manager, it was announced Tuesday by D. Mark Olson, INVEST executive vice president.

Glassman, 55, will be in charge of INVEST's specific product areas including mutual funds, fixed income, equities and syndicate. He will also manage the financial services and research departments. ''With over 30 years in the industry,'' states Olson, ''Glassman brings a wealth of knowledge and experience with him to INVEST. We are very excited to have someone of his caliber join the firm.''

During his 10 years with Shearson Lehman Hutton, Glassman specialized in product development, managing the entire process from idea origination through the sales, marketing and operational phases.

''INVEST is going to be a mojor force in the future of the brokerage industry,'' asserts Glassman. ''It's the place to be in the '90s. I believe the growth of the INVEST network will outpace the accomplishments of the more traditional brokerage firms of the '80s.''

With the recent trend of deregulation, Glassman is excited to participate in the entry of banks into the brokerage industry. ''Brokerage products can meet only a portion of an individual's financial needs and the same is true of bank products.

''INVEST is a national bank distribution network for financial services and products,'' states Glassman. ''The wave of future for both the brokerage and banking industries is here today in INVEST.''

INVEST FINANCIAL CORP., one of the nation's largest full-service brokerage firms, offers customers of financial institutions a convenient way to own mutual funds, annuities, unit investment trusts, and other investment and insurannce products.

INVEST, a subsidiary of Kemper Financial Cos., provides financial services and products through a nationwide network of over 560 offices in more than

40 states through banks, credit unions and savings and loans.

BURLINGTON, MA. (MARCH 20) BUSINESS WIRE - Symbolics Inc. (OTC:SMBX) Tuesday made two major product announcements that could cut years from new product development cycles for scores of international firms banking on the future of HDTV-based technology.

The company unveiled the industry's first commercially available, high-definition videographics processor, called FrameThrower, and announced the availability of all-in-one, high-definition videographics workstation incorporating the new FrameThrower processor.

According to Symbolics, current efforts to develop and bring to market a broad range of high-definition applications are stymied by technology obstacles which the FrameThrower uniquely addresses. FrameThrower offers three primary and immediate advantages:

- Merges computer and high resolution video technologies enabling practical solutions for challenging applications ranging from medical imaging to remote diagnosis;

- Supports current and evolving industry standards with a programmable architecture configurable in real-time;

- Based on the VMEbus standard providing system integrators with a building block for delivering customized HDTV applications on a variety of workstations.

According to Tom McMahon, development director of Symbolics Graphics Center, FrameThrower allows developers, for the first time, to merge computer graphics and high-definition video in real-time, eliminating the technology barriers that have previously existed between these two traditionally separate worlds.

CINCINNATI (MARCH 20) BUSINESS WIRE - The United States Shoe Corp. Tuesday announced the election of David M. Browne to the position of president and chief executive officer of the LensCrafters optical retail division, succeeding Bannus B. Hudson, who has just been elected chief executive officer of the corporation.

Browne was formerly executive vice president of the division, responsible for the four U.S. operating divisions and Canada, a position he has held

since September 1989.

Michael B. Packard, senior vice president for product, store construction, new brand development, and legal & government relations, will assume Browne's executive vice president title, although the operating divisions will continue to report directly to Browne.

''It gives me great pleasure and confidence,'' said Hudson, ''to pass the LensCrafters reins to Dave Browne's capable hands. I've known Dave for ten years since he first came to work for me as a Procter & Gamble brand assistant. He is bright, energetic, and wise beyond his 30 years of age. Without a doubt, he has proven himself over the past three years at LensCrafters to warrant the promotion on merit. Moreover, he'll be supported by a strong, experienced top management team that has been in place for over two years.''

Browne, formerly a brand manager at Procter & Gamble, joined the LensCrafters division three and one-half years ago as vice president and chief operating officer for the Optica Group, where he nearly doubled its volume. For the two years prior to his recent promotion to executive vice president, Browne was vice president of marketing. He led strategic planning, marketing, and store development activities while LensCrafters was experiencing the most critical and challenging portions of its growth to over 350 stores and 1989 sales in excess of $500 million.

Browne is a native of Philadelphia and earned his BS in Economics in the Wharton undergraduate program of the University of Pennsylvania.

Packard, 42 years old, is a graduate of Bucknell and the University of Virginia's Colgate Darden Graduate School of Business. He joined LensCrafters almost three years ago and served as vice president of the product group, which includes purchasing, merchandising, manufacturing, distribution and systems, for one and one-half years prior to his promotion last fall. Packard's background includes 15 years with Procter & Gamble with positions in both manufacturing and marketing.

Rounding out the management team reporting to Dave Browne are Senior Vice President - Operations Paul Cashen, who came to LensCrafters in 1984 with extensive retailing experience in U.S. Shoe's Casual Corner women's wear division; Vice President - New Business Development, David B. Fox, who had 25 years with Merrell Dow before joining LensCrafters in early 1986; K. Brent Somers, CFO, with over 10 years financial experience at U.S. Shoe; and a LensCrafters management team member since late 1986, Chief Legal Counsel Wallace W. Lovejoy, formerly regional counsel for Pearle optical retailing and six years with the FTC before joining LensCrafters in 1987. William R. Zeeb, LensCrafters' first marketing executive and currently the division's vice president - international, will continue to report to Hudson.

#90079b0764 03/20/1990 ~Business Wire

SHERMAN OAKS, CA. (MARCH 20) BUSINESS WIRE - Larry Rembold, chief executive officer of Dolco Packaging Corp. (a 100 percent-owned subsidiary of Olson Industries Inc.) announced Tuesday what is considered to be a significant development in plastic recycling efforts.

Rembold stated that Dolco Packaging, a leading manufacturer of polystyrene food packaging, has received confirmation from the Food and Drug Administration that it may begin producing polystyrene egg cartons from recycled post-consumer polystyrene packaging.

''This marks the first time the FDA has given its consent for the use of previously used plastic packaging in the production of new egg packaging.''

Rembold praised the FDA's responsiveness to Dolco's request. ''Clearly, the FDA and other federal agencies, in their efforts to foster responsible solid waste management, have made the opening of new markets for recycled products a high priority.''

Dolco Packaging Corp., the nation's largest producer of polystyrene egg packaging, is at this time the only company to receive FDA clearance. Yet with manufacturing facilities in Pico Rivera, Calif.; Wenatchee, Wash.; Decatur, Ind.; Dallas; and Lawrenceville, Ga.; Dolco Packaging Corp. has the potential to become the impetus for increased polystyrene collection.

To date, uses for recycled post-consumer polystyrene have been limited to non-food applications such as VCR tape cases and office accessories. Also when combined with other plastics, recycled polystyrene has been used in the production of plastic lumber for park benches, traffic sign posts and car stops.

Rembold also stated that despite polystyrene food packaging's relatively small contribution to this nation's municipal solid waste stream (approximately half of 1 percent by volume), it has been, and will remain, a high priority of Dolco Packaging and the entire polystyrene industry to play an active role in developing responsible solid waste solutions. We view this development as only one more step in this process.

Within the guidelines set forth by the FDA, Dolco Packaging will be allowed to use reprocessed polystyrene products such as egg cartons, meat trays, fast food containers, school lunch trays and foam beverage cups in its egg carton production. At this time, Dolco plans to produce only a

one-dozen egg carton containing recycled material.

''Technically, utilizing this recycled material will not pose any difficulties. Dolco Packaging and other polystyrene manufacturers have always recycled its internal scrap to produce new products.''

Dolco has also been reviewing the possibilities for using post-industrial recycle in its production process.

Dolco expects that as an environmentally conscious American public becomes familiar with the advantages of an egg carton that is not only made from recycled material, but also can be recycled over and over again, demand for the product will significantly increase. Expansion of this program will be entirely dependent upon this demand and the availability of recycled material.

This availability should increase dramatically during the next few years as numerous polystyrene recycling plants have already been announced. For example, the National Polystyrene Recycling Co., a joint venture of several major polystyrene resin producers, has set a target date of Dec. 31, for beginning production from four new plants in the United States.

This group already operates a reprocessing plant in Leominster, Mass. Dolco Packaging will also be exploring new non-food products if availabillity of recycled materials exceeds demand for their egg packaging product.

With today's announcement, the plastics industry has proven that the types of markets available for utilizing our nation's plastic waste are growing and that the future of plastic recycling holds promise.

BROOKLYN, NY (MARCH 20) BUSINESS WIRE - L.J. Simone Inc. (NASDAQ: LJSI) announced its results of operations for the three months and the nine months ended Jan. 31.

Revenues for the three months ended Jan. 31, were approximately $5,046,000 as compared to $5,219,000 for the three months ended Jan. 31, 1989, a decline of approximately three percent.

Revenues for the nine months ended Jan. 31, were approximately $14,941,000

as compared to $14,542,000 for the nine months Jan. 31, 1989, an increase of approximately three percent.

The company reported net income of approximately $2,231,000, including extraordinary income of approximately $2,174,000, or net income of 71 cents per share, for the three months ended Jan. 31, as compared to a loss of approximately $820,000, or 28 cents per share, for the three months ended Jan. 31, 1989.

The company reported a net loss of approximately $734,000, after extraordinary income of approximately $2,075,000, or a net loss of 23 cents per share, for the nine months ended Jan. 31, as compared to a loss of approximately $964,000, or 35 cents per share, for the nine months ended Jan. 31, 1989.

A restructuring which took place in November, 1989 resulted in extraordinary income of approximately $2,174,000. Reductions in controllable expenses also contributed to the improved 1990 results.

Gross sales for imported shoes and handbags increased by 101 percent and 28 percent respectively when compared to the 1989 period, while gross sales for domestically produced shoes decreased by 62 percent when compared to the 1989 period.

HIGH POINT, NC (MARCH 20) BUSINESS WIRE - Culp Inc. (NASDAQ/NMS:CULP) Tuesday announced that Robert G. Culp Jr. does not intend to stand for re-election as chairman of Culp's board of directors following the annual meeting of the company's shareholders in September 1990.

Culp has also asked to be relieved effective May 1, 1990 of his current managerial responsibilities which include heading the company's contract sales division. Culp has indicated his plans to remain a member of Culp's board of directors on which he is serving the first year of a three-year term.

A special committee of outside directors was appointed today to recommend a successor to Culp as chairman of the board. The committee's report is expected to be completed by the next regular meeting of the board on June 19, 1990.

Culp is a founder of the company and served as its only chairman and chief executive officer until May 1988 when he retired as chief executive officer. He held the additional position as president from 1972 until 1981.

Culp said: "I am announcing my plans now to provide for an orderly transfer of the responsibilities I currently hold at Culp. The decision to retire is based on my confidence in the company's present management team and the sound competitive position which Culp has attained. At 73 years of age, I also am interested in pursuing various personal pursuits which have been deferred for the past several years."

Commenting on the announcement, Robert G. Culp III, chief executive officer, remarked: "My father is well known for his contributions in founding and managing this company which carries his name. We are firmly committed to continuing the tradition of providing to our customers quality products at reasonable prices and with excellent service. We look forward to my father's continuing association as a director of Culp."

Culp Inc. is a leading manufacturer and marketer of fabrics for the furniture, bedding, recreational vehicle, and institutional furnishings markets.

#90079b0785 03/20/1990 ~Business Wire

CAMBRIDGE, MA (MARCH 20) BUSINESS WIRE - Lotus Development Corp. Tuesday announced a reorganization plan that decentralizes operations into four independent business units.

The four business units are the Software Business Group, the International Business Group, the already established Information Services Group and a new Consulting Services Group.

''For several months, Lotus' senior management team has been discussing what we must do to be more successful in an increasingly competitive environment,'' said Jim Manzi, Lotus president and chief executive officer. ''We agreed that to gain greater focus on major business opportunities, and be even more responsive to customer needs and market forces, we needed to adjust our organization.''

Frank King will be senior vice president of the Software Business Group. King, formerly senior vice president of the Software Products Group, is responsible for the development, marketing and sales of products in North America. William Drummey, vice president of North American sales, will report to King. Drummey previously reported to Stephen Crummey, senior vice president of worldwide sales and service.

Crummey now will be senior vice president of the International Business Group. In this role, he is responsible for international product

development, sales and marketing efforts.

Larry Crume, who joined Lotus recently from AT&T in Japan and had reported to King, will be one of several executives reporting to Crummey. He will be responsible for international product development. International sales grew to about 40 percent of Lotus' revenue of $556 million in 1989; it is expected that international sales will account for more than 50 percent of the company's revenue by 1992.

David Roux continues as vice president of the company's Information Services Group. He directs the development, marketing and sales of the company's One Source family of business and financial databases delivered on compact disc read-only memory (CD-ROM). He also oversees the company's research and use of multimedia technology, and the recently announced real-time capability for Lotus 1-2-3.

Frank Moss will be vice president of the newly formed Consulting Services Group. Moss, formerly vice president of the Networked Applications Systems Division (NASD), which has announced and soon will deliver versions of Lotus 1-2-3 for Sun Microsystems workstations, IBM mainframes and Digital Equipment Corp.

VAX minicomputers, will continue to oversee NASD efforts until a replacement is named. The charter of the consulting services group is to help companies create computing architectures that allow information to move freely and rapidly across organizational boundaries.

''We believe service and support provide enormous opportunities for us to differentiate ourselves from our competitors,'' Manzi said. ''We also believe that we have unique knowledge of end-user computing requirements and have demonstrated success in helping companies change the way they work to achieve competitive advantages and be more responsive to their customers' needs.''

In addition to the heads of the four business groups, Robert Schechter, senior vice president and chief financial officer, and Heidi Sinclair, vice president of corporate communications, will report to Manzi.

Schechter continues to report to Manzi and now is responsible for a unified customer support and service function, part of which used to report under the sales and service organization. The finance and operations organization now includes product support, manufacturing and distribution, information systems and services, legal, publishing, plans and controls, human resources and corporate services.

Sinclair, who had reported to Rick Faulk, vice president of corporate

marketing, is responsible for overseeing corporate communications and strategy.

Lotus Development Corp. is the leading developer of application software for personal computers and information services delivered on CD-ROM.

TUSTIN, CA. (MARCH 20) BUSINESS WIRE - Trimedyne Inc. (NASDAQ:TMED) Tuesday announced it received approval from the U.S. Food and Drug Administration (FDA) to market its ''Smart'' temperature sensing Laserprobes-TS catheters for use in removing plaque from obstructed peripheral (leg) arteries. The company will commence marketing the improved devices immediately.

The Laserprobe-TS catheter utilizes laser energy, transmitted through an optical fiber, to vaporize plaque (fatty deposits) and clots in blood vessels as an alternative to bypass surgery or balloon angioplasty.

The Laserprobe-TS catheter contains a tiny temperature sensor which constantly monitors the temperature at the tip of the catheter and controls the laser to maintain the exact temperature selected by the physician to most safely vaporize the obstruction in the vessel.

The ability to accurately control the temperature of the device at its tip is designed to improve the safety and effectiveness of Trimedyne's laser devices.

''This FDA approval is a significant event for Trimedyne as smart, temperature sensing Laserprobe catheters address one of the most critical needs of physicians using lasers in the treatment of cardiovascular disease,'' stated Howard K. Cooper, president and CEO of Trimedyne.

''The improved safety and efficiency of these devices is tangible evidence of Trimedyne's expanded research and development efforts, as well as its commitment to bringing new, improved products to the marketplace,'' concluded Cooper.

Trimedyne is the leading manufacturer of proprietary lasers and laser catheters for removing blockages from blood vessels as an alternative to bypass surgery and balloon angioplasty.

#90079b0793 03/20/1990 ~Business Wire

NEW ORLEANS (MARCH 20) BUSINESS WIRE - Tidewater Inc. (NYSE:TDW) board of directors has declared a quarterly dividend of $1.50 per share on the company's outstanding shares of convertible adjustable preferred stock (CAPS), Series 494 for the period Feb. 1, 1990, through April 30, 1990.

The dividend is based upon the rate of 6.0 percent per annum on $100 per share and is payable May 1, 1990, to shareholders of record at the close of business on March 31, 1990.

The board of directors also approved a conversion of each of the outstanding 6,000 shares of CAPS Series 494 into one share of CAPS Series 981. The conversion will be effected on May 1, 1990. Each share of the current CAPS Series 494 is convertible into a maximum number of 14 Tidewater common shares.

Upon the May 1, 1990, conversion, each share of CAPS Series 981 will be convertible into a maximum number of one common share. The dividend rate adjustment percentage for CAPS Series 494 is 2.50 percent and the dividend rate adjustment percentage for CAPS Series 981 is 5.00 percent.

The increase in the dividend rate adjustment percentage could have the effect of reducing the variable interest rate on CAPS shares under certain circumstances.

Holders of CAPS Series 494 may surrender their shares of CAPS Series 494 to the conversion agent, Manufacturers Hanover Trust Co., for conversion into common shares during the conversion period that begins April 16, 1990 and ends April 20, 1990.

Each share of CAPS Series 494 so surrendered shall be converted as of the close of business on April 30, 1990, into common shares having an aggregate market value on such date of $100, subject to the limitation that such holder shall not be entitled to receive more than 14 common shares for each share of CAPS Series 494.

If holders of shares of CAPS Series 494 fail to surrender their shares of CAPS Series 494 for conversion into common shares by April 20, 1990, each of their shares of CAPS Series 494 will be converted into one share of CAPS Series 981 on May 1, 1990, and will thereafter be convertible into a maximum of one common share.

Whether or not holders of shares of CAPS Series 494 surrender their shares for conversion into common shares, such holders will receive the $1.50 per share dividend for the Feb. 1, 1990, to April 30, 1990, dividend period if such holders held their CAPS shares of record at the close of business on March 31, 1990.

Tidewater Inc. owns and operates one of the largest fleets of vessels supporting the international offshore oil and gas industry. The company is also active in natural gas compression and air compression services and has modest interests in domestic oil and gas operations, real estate and insurance.

NEW YORK (MARCH 20) BUSINESS WIRE - The following is a summary of a presentation Tuesday at the New York Society of Security Analysts by Ted Dimitriou, president, chairman and chief executive officer of Wallace Computer Services Inc.

Wallace Computer Services Inc. (NYSE:WCS) made a presentation before the New York Society of Security Analysts on March 20.

Wallace, located in Hillside, Illinois, is a diversified company in the computer services and supply industry. The company's products and services include business forms, commerical printing, computer hardware and software, computer labels and accessories, machine ribbons and other office products.

Ted Dimitriou, president, chairman and chief executive officer of the company, introduced Wallace by presenting its financial record of 28 consecutive years of sales and earnings growth.

In fiscal 1989, net sales were $429 million, up 12 percent; net income was $36.87 million, up 16.6 percent and net income per share was $1.76, up 15 percent.

For the second quarter ended Jan. 31, Wallace's net income was $10,198,000 net sales were $117,937,000 and net income per share was 48 cents.

For the six months ended Jan. 31, Wallace's net income increased 10.3 percent to $19,277,000, net sales were $228,148,000, a 7.0 percent increase, and net income per share was 91 cents.

Dimitriou was pleased with the first half results and expects business

conditions to remain the same for the remainder of the fiscal year.

Dimitriou also attributes the strong financial record to reinvestment in the company. Over the past five years Wallace has reinvested $137,761,000 in new plants and equipment. The company has also invested in increased marketing programs, expanded distribution networks, sales and management training and a state-of-the-art order entry, billing and finished goods inventory computer system.

Finally, Dimitriou stressed Wallace's commitment to quality, service and providing solutions, to information processing problems.

For additional information about Wallace Computer Services Inc., contact Michael Halloran, 708/449-8600.

NEW YORK (MARCH 20) BUSINESS WIRE - The following is a summary of a presentation Tuesday at the New York Society of Security Analysts by Torstein Bergem, executive vice president of Norsk Hydro.

New oil and gas discoveries in the North Sea and relatively low costs of oil exploration and production were highlighted in a presentation today by Norsk Hydro (NYSE: NHY), Norway's largest company, before the New York Society of Security Analysts (NYSSA).

Torstein Bergem, Norsk Hydro executive vice president, reported proven reserves of 1.55 billion barrels of oil equivalents with a reserve-to-production ratio of 27 years.

''Our proven reserves form the basis for increasing production in coming years,'' Bergem said. ''Our 1989 production was 7.2 million tons of oil equivalents. In a few years' time, we will be producing more than 9.0 million tons at a rate of close to 190,000 barrels a day of oil equivalents.''

Bergem also indicated that the ratio between oil and natural gas production was changing, with Norsk Hydro's oil share showing a continuing increase over the next few years.

He added that several new Norsk Hydro discoveries, some of which could be operated as satellites of existing fields, were currently under evaluation and could increase reserves over the next few years by up to 700 million barrels of oil equivalents. ''The costs of developing such satellite

fields might thus be very competitive,'' he said.

Bergem cited efforts by Norsk Hydro to further reduce costs in drilling and production. He outlined new methods of production including pre-drilling wells; use of a specially built test vessel; a deep water subsea gas production unit; and drilling of horizontal wells from semi-submersible rigs in Norwegian waters.

Norsk Hydro's non-oil business in fertilizers and light metals were also detailed at the presentation.

''Our acquisitions enabled us to play a leading role in the necessary restructuring of the Western European fertilizer industry,'' he said.

''In a global context, a growing demand for food as the world's population increases should lead to stronger emphasis on agricultural production and increased demand for fertilizer.

''Since the beginning of 1986, we have increased fertilizer production per employee by almost 50 percent,'' he said.

''In a global context, a growing demand for food as the world's population increases should lead to stronger emphasis on agricultural production and increased demand for fertilizer.

''Since the beginning of 1986, we have increased fertilizer production per employee by almost 50 percent,'' he said, commenting on productivity of the division.

In the light metals area, Bergem said that Norsk Hydro had created by merger one of Europe's leading aluminum companies with a well balanced system centered around five Norwegian smelters with a total capacity of 620,000 tons of primary metal.

''Our fabrication activities have a capacity equal to about 60 percent of our metal production. While many of our competitors have emphasized the rolled products sector, we have established a very efficient and profitable system of extrusion plants, which is now Europe's leading producer of aluminum profiles.''

In magnesium, he reported that Norsk Hydro's new plant in Quebec had begun production late in 1989, with the aim of reaching full capacity of 40,000 tons by midyear.

''In the light metals area, we plan to strengthen our downstream fabrication activities as a means to adding extra value to our metals products,'' he concluded.

Indicates meeting that will be videotaped and broadcast live on Institutional Research Network

#90079b0812 03/20/1990 ~Business Wire

NEW YORK (MARCH 20) BUSINESS WIRE - The following is a summary of a presentation Tuesday at the New York Society of Security Analysts by Michael J. Yomazzo, chief financial officer and senior vice president of finance and planning for Photronics Inc.

Michael J. Yomazzo, chief financial officer and senior vice president of finance and planning for Photronics Inc, Tuesday presented to the New York Society of Security Analysts, a review of the company's current operating conditions and an overview of semiconductor market trends that Photronics has profitably capitalized upon.

Photronics is a leading manufacturer of photomasks, which are ultra-high precision, lithographic glass plates containing microscopic images of electronic circuits. Photomasks, an integral element in the production of semiconductor devices, are used to reproduce ''chip'' patterns on semiconductor wafers. Although photomask demand is derived directly from the volume of semiconductor designs, Photronics has profitably capitalized on other photomask market dynamics as well.

It successfully markets its photomask services worldwide. As a result, recent marketin strategies have provided the company with continued and significant increases in revenues and net income. For the fiscal year ended Oct. 31, 1989, the company's revenues increased to $27.8 million, up 47 percent from a year earlier, with these revenues yielding net income of 27 cents per share. For the first quarter ended Jan. 31, 1990, the company reported record quarterly earnings of $631,000 or 19 cents per share, and a 40 percent increase in net revenues over the same period last year.

Yomazzo described a dynamic photomask market in which Photronics has been able to capture a greater market share. The company estimates the domestic photomask market to be about $450 million and it expects this market to grow to $1 billion by 1994.

Several significant trends within the photomask industry have created a dynamic climate for growth, Yomazzo said. An increasing number of new applications for integrated circuits will increase the demand for new photomasks. In addition, ASIC's (Application Specific Integrated Circuits) are becoming a larger percent of semiconductor production. ASIC

wafer foundries generally require three to five times more photomasks than non-ASIC producers.

This trend is primarily the result of increasing investment costs necessary to remain technically capable. Equally important is the fact that merchant suppliers -- those suppliers that produce photomasks for a broad external customer base -- are consolidating into fewer but larger sources. The final trend described by Yomazzo is the global growth projected for photomask sales.

SAN DIEGO (MARCH 20) BUSINESS WIRE - Stephen C. Eisold has joined Gensia Pharmaceuticals Inc. as vice president, marketing and business development.

Eisold will be responsible for investigating new product opportunities for Gensia, management of strategic partnership relationships, and pre-marketing activities for Gensia's products currently in development, according to David F. Hale, president and chief executive officer.

''Steve's background includes over 17 years of sales, marketing and business development in the pharmaceutical industry,'' Hale said. ''His experience in market research, market development and launch of pharmaceutical products will be very important to the successful commercialization of Gensia's future product introductions for the diagnosis and treatment of cardiovascular, cerebrovascular and neurological diseases.''

Prior to joining Gensia, Eisold was director of new product marketing for Marion Merrell Dow Inc. (MMDI) in Kansas City, Mo. Eisold also served as director, corporate development at MMDI and served in several marketing and sales positions with the company.

From 1986 to 1988 Eisold was vice president, marketing and sales at Nordic Laboratories, 50 percent owned by MMDI, located in Montreal. During his tenure at Nordic, sales grew from $38 million to $120 million.

''Steve was instrumental in the marketing of Cardizem in Canada, and is extremely knowledgeable about the market for cardiovascular products in the United States,'' Hale added. ''Steve's successful career with MMDI will be an asset to Gensia, as MMDI and Gensia work together on the development of products from our purine/pyrimidine research program.''

Gensia recently signed a strategic partnership agreement with MMDI for research and development of certain purine/pyrimidine compounds for cardiovascular and cerebrovascular diseases. Gensia's lead purine compound, ARA-100, is currently in Phase 2 clinical trials in Europe. Several other promising compounds are in pre-clinical development.

Gensia is a San Diego-based biopharmaceutical company formed to discover, develop, manufacture and market novel drugs for the diagnosis and treatment of human diseases.

GREENVILLE, SC (MARCH 20) BUSINESS WIRE - American Federal Bank (NASDAQ:AMFB) has announced the signing of an agreement in principle which upon completion, will increase the bank's capital by $13.7 million.

Under the terms of the agreement, the holders of American Federal Series B subordinated debentures will convert the debt into permanent preferred stock which will qualify as tangible capital. The conversion is expected to be completed within the next two to three months.

President Roy Abercrombie said, ''This conversion brings our regulatory capital to a positive tangible position and increases our stockholders' equity (GAAP capital) to nearly $50 million.

''The conversion will also improve the bank's earnings by eliminating more than $1.8 million in annual interest expense associated with the subordinated debt,'' Abercrombie said.

The Series B debentures were sold as part of American Federal's conversion to a public stock company in January 1989. The holders of the new preferred stock will have preference over common stockholders in the payment of dividends or in the distribution of proceeds in the event of sale or merger of the bank.

''The conversion of the debentures is American Federal's initial step in raising additional capital to meet new federal requirements that went into effect with the passage last year of the Financial Institutions Reform, Recovery and Enforecment Act,'' Abercrombie concluded.

American Federal, whose common stock is traded on the over-the-counter market under the NASDAQ symbol AMFB, has $1.1 billion in assets and 34 branch offices covering eight counties in the northwestern region of the state. It also owns Finance South, a consumer finance company with 25 branch offices throughout South Carolina.

#90079b0828 03/20/1990 ~Business Wire
NEW YORK (MARCH 20) BUSINESS WIRE - The industry's first horizontal-design 8mm camcorder has been announced by Fishers.

The unique design of the FVC-880 allows comfortable ''binocular-style'' operation for more stable video recording and it is the first camcorder to

offer ''Fuzzy Logic'' artificial intelligent circuitry for automatic iris and automatic focus control, all in an exceptionally light (approx. 1.7lb) 8mm camcorder.

The camcorder's horizontal design allows convenient two-hand-use for less picture blurring and easy access to all controls. This design allows the video head to be oriented on an almost vertical axis to improve stability even if the camcorder is moved up and down. The horizontal design also allows for more convenient access to all controls when dubbing tapes from the camcorder to another VCR.

One of the most revolutionary features of the FVC880 is the ''Fuzzy Logic'' artificial intelligence circuitry used to control the automatic iris and automatic focusing. Rather than the traditional digital ''yes/no'' circuitry used on most camcorders, Fuzzy Logic allows the camcorder to evaluate focus and lighting conditions to ensure the most accurate automatic operation possible over a wide range of conditions. This allows faster focusing in critical outdoor use and dramatically improved video reproduction in difficult back-lit situations. The result is optimum clarity automatically for both indoor and outdoor images.

In spite of the advanced features, it is one of the lightest camcorders available today (approx. 1.7 lb) due to the use of unique high-density technology. This camcorder uses a small 27mm video head assembly and a four layer printed circuit board for compact design.

In addition to the above, Fisher's camcorder also features a wireless remote control that allows the user to film unobtrusively or be in the picture themselves.

Other features include a 6 to 1 variable speed zoom lens with macro, auto focus in both normal and macro modes, 6 selectable shutter speeds, a low 4 lux light rating, digital title insertion and flying erase head for noise-free edits.

Fisher will begin delivering this model in the United States in June with a suggested retail of $1299.95.

''With the introduction of the FVC-880, Fisher is bringing its heritage of product innovation, performance and quality to the video camcorder market. It places Fisher firmly at the leading edge of video technology,'' stated Michael Shoemaker, vice president of marketing for Fisher.

Headquartered in Chatsworth, Calif. Fisher is a division of Sanyo Fisher (USA) Corp. (SFC) which markets a complete line of quality audio, video and home appliance products. SFC is a subsidiary of Sanyo Electric Co. Ltd., a major worldwide electronics manufacturer.

#90079b0829 03/20/1990 ~Business Wire

WALTHAM, MA (MARCH 20) BUSINESS WIRE - Meditrust (NYSE:MT) announced Tuesday that, after receiving the approval of its independent trustees, it has entered into a consent agreement with Diamond Health Care Acquisition Corp. (''Diamond'').

It had previously been announced that Diamond had signed a stock purchase agreement to acquire the stock of The Mediplex Group Inc. (''Mediplex'') from Avon Products Inc. (''Avon'') (NYSE:AVP) with the understanding by Diamond that such a transaction would require Meditrust's consent. Diamond is a private corporation owned by certain officers of Meditrust and its advisor, including its chairman and president.

A copy of the consent agreement will be filed later this week with the Securities and Exchange Commission. Under the terms of this consent agreement, Meditrust's consent is conditioned on Diamond's satisfaction of a number of detailed requirements. These requirements, which must be met prior to the proposed closing date scheduled for this summer, include, among other things, the following financial conditions:

- Credit enhancment for Mediplex's leases with Meditrust in the amount of $15 million, as additional security for those obligations:

- A minimum net worth of $20 million and maximum debt to equity ratio of 3:1 for Mediplex; and

- Meditrust's receipt of a satisfactory opinion as to the solvency, viability and adequate capitalization of Mediplex from an independent financial advisor selected by Meditrust.

In addition to addressing issues of Meditrust's creditworthiness, the independent trustees have included provisions in the consent agreement which

- Impose a moratorium on transactions between Meditrust and Mediplex regarding the financing of additional facilities;

- Require that the percentage of Meditrust's assets represented by Mediplex's facilities be reduced to not more than 35 percent , 30 percent and 25 percent respectively, as of Dec. 31, 1990, 1991 and 1992;

- Restrict certain key officers of Meditrust, including Jonathan Sherwin, Meditrust's president, from being involved in the management of Mediplex

and requires Abraham Gosman, chairman of Meditrust, to maintain his current level of involvement with Meditrust; and

- Require the resolution of all outstanding issues between Mediplex and Meditrust in a manner favorable and satisfactory to Meditrust. Aside from such resolutions, the consent agreement provides that there will be no changes made to the financial terms of the leases between Meditrust and Mediplex.

Meditrust, with headquarters in Waltham, Mass., is the nation's largest health care real estate investment trust, holding investments with 13 different operators of 96 health care facilities in 23 states totaling approximately $675 million of investments. The company specializes in the sub-acute sector of the health care industry, including investments in rehabilitation hospitals, long-term care facilities, alcohol and substance abuse treatment centers, psychiatric hospitals, and retirement living communities. A.M.A. Advisory Corp., a Delaware Corp., is engaged as the advisor to Meditrust.

ATLANTA (MARCH 20) BUSINESS WIRE - ''Pass the carrots, please.''

It's not a request to be taken lightly at Delta Air Lines' (NYSE:DAL) annual personnel awards banquet at the Georgia World Congress Center -- not when there is literally a ton of carrots to be served. The annual banquet for Delta on March 20 is one of the largest seated dinners in the country with an attendance of 7500 Delta Air Lines' personnel and spouses from around the world.

The airline holds this annual event to honor its personnel who have reached 20 years or increments of 5 years over 20 years of service with Delta.

What does it take to feed 7500 people? This year's menu calls for 60 tree's worth of fresh fruit, one ton of garden salad, two and one-half tons of tenderloin of beef, three and one-half tons of vegetables, 1000 pounds of pecans for Georgia pecan pie and 1500 gallons of beverages.

''We are the only facility in Atlanta, and one of the few in the country, which has the space, staff and kitchen operations to accommodate an event this size with this quantity of food,'' says Phil Noyes, president and owner of Food Services by MGR, the catering company for the Georgia World Congress Center. ''It takes months of planning and scheduling to prepare

for this banquet.''

In fact, three months before the event, the groundwork is begun as orders are placed for food from various markets and butchers throughout the state. It takes several days to get all of the utensils and plates organized, and on the evening of the event, 30,000 glasses and cups, 46,400 utensils, and 34,000 plates will be used.

Two days before the banquet, the Georgia World Congress Center lighting and sound technicians complete the work in the banquet halls, while 48 set-up staff members arrange thousands of tables and chairs over eleven hours. Twenty banquet staff members are assigned just to fold 7500 napkins.

In the kitchen, the culinary work begins three days before the banquet when Executive Chef Gerd Giesecke and a staff of six cut and trim the filets, clean and chop the vegetables, and prepare the fruit. The bakers work the ovens for two days to bake hundreds of pecan pies.

''Preparing a meal for a group this size is quite a challenge,'' explains Chef Gerd. ''We use all five kitchens to mix the salads, cook the vegetables and beef, and top all of the desserts. It's important that the meal is not only delicious but also that is is artfully presented.''

On the day of the event, 30 extra employees assist in plate preparation of the food. Hundreds of waiters and stewards push carts of salads and fruit cups the length of two football fields in preparation for serving 750 tables. ''The timing for this event must go like clockwork. With our staff working as a team, all 7500 guests can dine in about one hour,'' said Chef Gerd.

#90079b0837 03/20/1990 ~Business Wire

LIVERPOOL, NY (MARCH 20) BUSINESS WIRE - Pico Products Inc. (AMEX:PPI) Tuesday reported a net loss for the second quarter ended Jan. 31, of $446,341 or 13 cents per share compared with a net loss of $2,356,236, or 66 cents per share for the second quarter ended Jan. 31, 1989.

For the six months ended Jan. 31, the company reported a net loss of $729,558 or 21 cents per share vs. a net loss of $2,820,650 or 80 cents per share for the six months ended Jan. 31, 1989.

The weighted average common shares outstanding were 3,555,913 for the six months ended Jan. 31, 1990 and Jan. 31, 1989, respectively.

Consolidated operating results continued to be negatively impacted by the company's CATV division. During the second quarter, production of the company's new PT Trap ramped up slower than expected, although product quality and manufacturing costs have met expetations.

Several areas of automation and cost reduction have been identified and will be implemented in the next few months.

George Knapp, the company's president, has relocated from the company's headquarters in Syracuse, N.Y. to the company's Pico Macom Inc. subsidiary in California.

Knapp will focus his efforts on sales and marketing for Pico Macom Inc. His years of experience and expertise in cable television and related markets will strengthen the Pico Macom management team.

The company invested approximately $100,000 in its printed circuit board division during the second quarter for pollution control equipment and facility improvements. These improvements while negatively effecting second quarter results, should allow the printed circuit division to continue its sales and earning growth.

''These changes will help the company reverse its losses in the near future,'' said Bernard Hitchcock, chairman.

NATCHEZ, MI (MARCH 20) BUSINESS WIRE - Callon Consolidated Partners L.P. (NASDAQ/NMS:CCLPZ) reported a net income for the year ended Dec. 31, 1989, of $1,483,000, or 25 cents per unit of limited partnership interest, compared to $1,004,000, or 17 cents per unit, for 1988.

Operating results for 1989 reflect oil and gas sales of $13,614,000 from average daily production of 1,512 barrels of oil and 4.7 million cubic feet of natural gas. These amounts compare to 1988 oil and gas sales of $13,261,000 from average daily production of 1,700 barrels of oil and 5.7 million cubic feet of natural gas.

Oil and gas operating income for 1989 was substantially unchanged from the prior year as increased average oil prices offset declines in production volumes. General and administrative expense reductions of 13 percent, or $353,000, were primarily responsible for the increase in current year profits.

At Dec. 31, 1989, the partnership's independent petroleum engineers estimated that the partnership had proven crude oil reserves of 2.8 million barrels and proven natural gas reserves of 8.6 billion cubic feet. The independent engineers also estimated that the partnership had undiscounted future net revenues from these reserves, based on oil and gas prices in effect at Dec. 31, 1989, of $44.1 million.

The present value of the estimated future net revenues, discounted at 10 percent, was $29.3 million. Average oil prices at Dec. 31, 1989, were $19.90 per barrel and average natural gas prices were $1.71 per thousand cubic feet.

Callon Consolidated Partners L.P. was formed in 1987 by the consolidation of 27 oil and gas limited partnerships sponsored by Callon Petroleum Co. The partnership produces oil and natural gas from domestic onshore properties located primarily in the Gulf Coast region. The partnership's 5.9 million Units trade on the NASDAQ National Market System.

SAN FRANCISCO, CA (MARCH 20) BUSINESS WIRE - Homestake Mining Co. (NYSE: HM) announced Tuesday that Richard W. Stumbo Jr., vice president, finance, and chief financial officer, has resigned to pursue other interests.

Harry M. Conger, chairman and chief executive officer of Homestake, said Jonathan J. Williams, the company's treasurer and secretary, will assume Stumbo's duties on a temporary basis.

Conger expressed appreciation for Stumbo's contributions to the mining company's growth and heightened profile in the financial community during his tenure as chief financial officer.

''All of us at Homestake wish Dick Stumbo well in his future endeavors,'' Conger said.

Stumbo, 56, joined Homestake in 1983 as vice president, finance, and chief financial officer. Prior to that he was senior vice president, finance, and a corporate director of Western Pacific Railroad Co. in San Francisco.

Stumbo's previous business associations include division controller of the Agricultural Equipment Division of Allis-Chalmers Corp. in Milwaukee; assistant vice president, financial planning, at Burlington Northern Inc., of St. Paul; and division vice president, general manager and controller of Berry Industries, of Birmingham, Mich.

He is a civil engineering graduate of the University of Wisconsin at Madison and obtained a Masters Degree in Business Administration from the Wharton Graduate School of Business at the University of Pennsylvania in Philadelphia.

Homestake Mining Co. is an international gold mining company holding significant interests in the United States, Australia, Chile and Canada, in addition to other natural resource interests.

LONG BEACH, CA (MARCH 20) BUSINESS WIRE - PDA Engineering (NASDAQ:PDAS) and McDonnell Douglas announced a new, extended business partnership at the International Unigraphics User's Group meeting in Long Beach, Calif. earlier this month.

Building on the joint development partnership announced in 1988, PDA and McDonnell Douglas M&E have signed a contract that outlines an expanded business and marketing relationship.

''This partnership allows us to offer, in an integrated way, products that no one else has,'' said Louis Delmonico, president and chief executive officer for PDA Engineering. ''The new Unigraphics/PATRAN interface, also announced this week, is an excellent example of the kind of results this partnership will produce. Together, we will bring MCAE technology into the design and manufacturing environment.''

The contract calls for the development of integrated design, analysis and manufacturing technology which will be made available in McDonnell Douglas M&E software products. However, the jointly developed products will be maintained and supported by McDonnell Douglas in conjunction with PDA.

McDonnell Douglas Systems Integration Company is recognized worldwide as a leading systems integrator with total information systems solutions. With headquarters in St. Louis, the company is a division of McDonnell Douglas Corp. and sells information systems and services to a variety of markets, including the manufacturing, telecommunications and insurance industries and government agencies. 1989 revenue was $300 million.

PDA Engineering, based in Costa Mesa, Calif., specializes in analysis software, engineering services, materials science and training for mechanical engineers engaged in product design, analysis and manufacturing. PDA's leading MCAE software products, sold under the PATRAN brand name, provide pre- and post-processing, modeling, finite element analysis, and other specialty analysis capabilities for aerospace, automotive, commercial and government markets. The company distributes its products through sales offices in eight U.S. cities; company-owned subsidiaries in the U.K., France, Germany, Italy and the Netherlands; and independent distributors elsewhere.

VANCOUVER, BRITISH COLUMBIA (MARCH 20) BUSINESS WIRE - Beltec Enterprises Ltd. wishes to announce that it will not be proceeding with the acquisition to purchase 51 percent of Flexibrick Canada Inc.

The $25,000 forwarded to Flexibrick Canada Inc. will be returned to Beltec Enterprises immediately.

The company further announces it has received the resignation as president and director of Robert Zaba. Bryan Dear has been appointed president and Brian Eamor has been appointed as a director.

Beltec Enterprises advises that the company did not proceed with the grant of incentive directors stock options announced in the press release of Feb. 16, 1990.

The company has granted incentive directors stock options on 80,000 shares of the company's capital stock exercisable on or before March 20, 1992 at a price of 65 cents per share, which price is the average closing price of the company's shares on the 10 trading days immediately preceding March 20 1990.

The options granted may not be exercised until Vancouver Stock Exchange approval has been obtained.

- Milton C. Boesel Jr., counsel, Ritter, Robinson, McCready & James;
- Ronald A. Dauwe, executive vice president, Fifth Third Bancorp and The Fifth Third Bank;
- Thomas B. Donnell, chairman & CEO, The Fifth Third Bank of Northwestern Ohio, National Association;
- William G. Kagler, president & CEO, Skyline Chili Inc.;
- James D. Kiggen, chairman of the board & president, Xtek Inc.;

- Michael H. Norris, president, The Deerfield Manufacturing Co.;
- David B. Sharrock, executive vice president & COO, Marion

Merrell Dow Inc.;
- Dennis J. Sullivan Jr., executive vice president & CFO, Cincinnati Bell Inc.

Other directors serving in unexpired terms include:
- William D. Atteberry, retired chairman, Eagle-Picher Industries Inc.;
- John F. Barrett, president & COO, The Western-Southern Life Insurance Co.;
- Clement L. Buenger, chairman & CEO, Fifth Third Bancorp and The Fifth Third Bank;
- Nolan W. Carson, senior partner, Dinsmore & Shohl;
- Douglas G. Cowan, retired president & CEO, The Drackett Co.;
- Gerald V. Dirvin, executive vice president, The Procter & Gamble Co.;
- Richard T. Farmer, chairman & CEO, Cintas Corp.;
- John D. Geary, retired president, Midland Enterprises Inc.;
- Joseph H. Head Jr., senior partner, Graydon, Head & Ritchey;
- William J. Keating, president & CEO, Detroit Newspaper Agency; Chairman The Cincinnati Enquirer;
- Charles L. McKelvy Jr., president & CEO, The Fifth Third Bank of Toledo National Association;
- Robert B. Morgan, president, Cincinnati Financial Corp.;
- Brian H. Rowe, senior vice president, General Electric Co.;
- George A. Schaefer Jr., president & COO, Fifth Third Bancorp and The Fifth Third Bank;
- John J. Schiff Jr., chairman, John J. & Thomas R. Schiff & Co. Inc.;
- Stephen Stranahan, owner, Entelco Co.;
- Dudley S. Taft, president, Taft Broadcasting Co.;
- N. Beverley Tucker Jr., executive vice president, Fifth Third Bancorp and The Fifth Third Bank.

The stockholders also approved an increase in the number of authorized shares of common stock, without par value, from 60 million to 80 million shares, increased the authorized number of directors from 26 to 30, adopted a new stock option plan and selected Deloitte & Touche to serve as independent auditors for the Bancorp.

Clement L. Buenger, chairman and CEO of Fifth Third Bancorp, addressed the stockholders present; a copy of his speech is attached.

Following the annual stockholders' meeting, Fifth Third's board of directors declared a cash dividend of 24 cents per share on its common stock. The dividend is payable April 14, 1990, to shareholders of record as of the close of business, March 30, 1990.

The board of directors also promoted two officers today. Timothy D.

Ballinger was promoted to senior vice president of Fifth Third Bank and senior vice president and national sales manager of Midwest Payment Systems Inc. (MPS), Fifth Third Bank's data processing subsidiary. Ballinger earned his B.S. in business administration from University of Cincinnati and later received his MBA in finance from Xavier University. He is also a graduate of the Stonier Graduate School of Banking. Ballinger brings 16 years of experience dealing with electronic funds transfer (EFT) products and technical sales.

Fifth Third promoted Gerald L. Wissel to vice president and director of internal audit. A certified public accountant and a 1978 graduate of Thomas More College, Wissel previously served as senior manager at Deloitte & Touche. Wissel's civic associations include the Northern Kentucky Chamber of Commerce, the Cincinnati Historical Society and the Ohio Society of Certified Public Accountants.

Fifth Third Bancorp has assets of $7.1 billion. The Bancorp has 14 affiliate banks with 204 banking centers, including 20 Bank Marts located in Kroger stores, throughout Ohio, Kentucky and Indiana.

MELVILLE, NY (MARCH 20) BUSINESS WIRE - Kenneth M. Darby has been named chief operating officer of Vicon Industries Inc. (ASE:''VII''), a leading manufacturer of closed-circuit video systems (CCVS).

In this new position at the company, he will be responsible for all day to day operations, said Donald N. Horn, chairman and chief executive officer.

For the present time, Darby will retain his responsibilities as chief financial officer and senior vice president - finance. He will be succeeded as treasurer by Henry E. Zorn, who has been the company's controller for more than three years.

''Mr. Darby knows every aspect of Vicon's business having been with the company for more than 12 years serving in various financial-related capacities,'' Horn said. ''He will bring an even greater degree of financial discipline to all our operations and ensure that Vicon operates from a sound base.''

Darby joined Vicon in 1977 as Controller, having worked with the accounting firm of KPMG Peat Marwick from 1969-77. He is a graduate of The Citadel and holds an M.B.A. from Hofstra University.

Zorn has been with Vicon since 1986, following seven years with KPMG Peat Marwick. He received his B.A. and M.B.A. degrees from Hofstra University.

Vicon Industries Inc. designs, manufactures, assembles and markets a broad line of products and systems for video surveillance. These products are used for security, safety and control applications by a wide variety of end users.

FAIRFIELD, NJ (MARCH 20) BUSINESS WIRE - Cellcom Corp. (NASDAQ:CLCM), announced that it has entered into an exclusive agreement with Lechmere Inc. of Woburn, Mass., to be their exclusive supplier of cellular telephone service in Connecticut, Massachusetts, Rhode Island and New Hampshire.

Cellcom offers the cellular services of Cellular One and NYNEX in Massachusetts, Metro Mobile and NYNEX in Rhode Island, Metro Mobile and SNET in Connecticut, and NYNEX in New Hampshire through Cellcom's local Cellular Dynamics Telephone Company Subsidiaries.

''Cellcom, an organization dedicated to customer service and satisfaction, is uniquely qualified to service the needs of Lechmere's New England and New York based customers,'' said Steven Sugarman, sales manager of Cellular Dynamics Telephone Company of Connecticut Inc.

''Cellcom has the experience necessary to seek out the same high quality service for all of Lechmere's retail locations,'' said Sugarman. In addition, Cellcom will provide Lechmere with such brand name quality Cellular prodcuts as OKI, NEC, Audiovox, Mitsubishi, Noki-Mobira and Panasonic.

Lechmere currently has 18 stores located throughout New England and New York and specializes in home electronics and appliances, housewares and leisure and sporting goods.

Cellcom Corp. is a leading reseller of cellular telephone services with operations in several major regional areas, including the nation's two largest cellular markets, Metropolitan New York/Northern New Jersey and Los Angeles.

The company also sells and installs a wide variety of cellular telephone equipment through an extensive base of over 600 retail service agents nationwide.

BURLINGTON, MA. (MARCH 20) BUSINESS WIRE - M/A-COM Inc. (NYSE:MAI) announced Tuesday that M/A-COM President and Chief Operating Officer John J. Lynch has resigned from the company effective March 30, 1990.

Upon Mr. Lynch's departure, M/A-COM Chairman and Chief Executive Officer

Thomas A. Vanderslice will assume the responsibilities of acting president and chief operating officer.

In announcing his resignation, Mr. Lynch stated, ''My decision to leave M/A-COM was a difficult one to reach, but I am looking forward to pursuing some of my other interests at this time.''

Commenting on Mr. Lynch's resignation Dr. Thomas A. Vanderslice stated, ''Jack Lynch has been a valuable member of the M/A-COM management team. His contributions, experience and insight have been essential to easing M/A-COM through recent challenging times. We certainly extend our best wishes to him in his future endeavors.''

Mr. Lynch has been M/A-COM's president and chief operating officer since July, 1989, following the company's acquisition of Adams-Russell Inc. Before the acquisition, Mr. Lynch had been chairman and chief executive officer of Adams-Russell Inc. He had been with Adams-Russell for more than 28 years and held several senior management positions.

M/A-COM is a leading producer of radio frequency, microwave and millimeter wave semiconductors, components and subsystems for applications in telecommunications, radar, navigation, missile guidance, electronic warfare, surveillance and command-control- communications-intelligence (C3I) systems. M/A-COM also supplies surveillance products used in intelligence collection applications.

The company's products are used primarily in defense electronics systems, but also have numerous commercial applications.

-30- 614

#90079c0046 03/20/1990 ~Comtex

WASHINGTON (MARCH 20) COMTEX - The 8-K report filed at the SEC shows on Feb. 8, 1990, Trilos Corp. and its wholly owned subsidiary, Standun Inc., filed suit against the former shareholders of Standun and against the former independent auditor of Standun, Arthur Anderson & Co. The suit requested that either Trilos's purchase of Standun be recinded or that the defendants be liable to Trilos and Standun for over $18 million in damages.

File in the U.S. District Court for the Central District of California, the suit claims that some of the defendants violated federal and state securities laws and federal racketeering statutes. The suit also claims that Arthur Anderson is guilty of professional malpractice. At issue were liabilites and penalties owed by Standun that were not reported prior to the sale.

Trilos expects the litigation to be complex and drawn out, and is uncertain of a beneficial outcome.

-30- 1096

#90079c0047 03/20/1990 ~Comtex

WASHINGTON (MARCH 20) COMTEX - The 8-K report filed at the SEC shows at a special shareholder's meeting on March 14, 1990, shareholders approved a one-for-four reverse stock split of Comstock Resources' stock. The company proposed the reverse split in order to reduce the number of shares outstanding. Cash payments will be made to shareholders in lieu of fractional shares.

-30- 545

#90079c0048 03/20/1990 ~Comtex

WASHINGTON (MARCH 20) COMTEX - The 8-K report filed at the SEC shows on March 8, 1990, Liberty Military Sales dismissed its independent public accountants of Arthur Anderson & Co. Arthur Anderson was no longer independent due to its status as an unsecured creditor upon Liberty Military's Bankruptcy filing, dated Nov. 15, 1989.

For the previous two years, audits performed by Arthur Anderson contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between those former auditors and the company.

For the fiscal year ended Dec. 31, 1988, however, Arthur Anderson's audit report did contain a modifying paragraph containing opinions as to the uncertainty of the company's continuation as a going concern.

Liberty Military engaged the firm of Hein & Associates as its new independent auditors to replace the services of Arthur Anderson. Hein & Associates did not consult with Liberty Military or someone on Liberty's behalf during the previous two fiscal years.

WASHINGTON (MARCH 20) COMTEX - The 8-K report filed at the SEC shows effective March 7, 1990, Ross Lyndon-James resigned from his posts as Chairman and CEO of Ramtron International Corp. He is to continue as vice chairman.

Effective the same date, Dr. Steward S. Flaschen and Mr. Samuel R. Freeman resigned as company directors. These resignations did not relate to any disagreements with the company with regard to company operations, policies and practices.

Also on March 7, the board of Ramtron appointed Mr. George J. Stathakis as Chairman and CEO and appointed Mr. Robert T. Hanfling as a director. The executive office of Ramtron International is located at 1873 Austin Bluffs Parkway, Colorado Springs, CO 80918, and its telephone number is (719) 594-4455.

TOKYO (MARCH 20) - Japan's money supply grew 11.8 percent in the year to February, the fastest rate in 16 months, the Bank of Japan said Tuesday.

The latest figure marked the third increase of more than 10 percent in nine

months and compared with 11.5 percent in the year to January.

The central bank said its broad money measure - combining cash in circulation and demand and time deposits (M-2) with certificates of deposit - stood at 466,700 billion yen (3,111 billion dollars) at the end of February.

PARIS (MARCH 20) - France recorded a foreign trade deficit of 961 million francs (nearly 170 million dollars) in February after seasonal adjustments the state customs authority said Tuesday.

The deficit was more than twice that of January which totalled 411 million francs (72.1 million dollars).

Exports in February totalled 97.88 billion francs (17.1 billion dollars) compared with 105.45 billion (18.4 billion dollars) in January. Imports in February reached 98.85 billion francs (17.3 billion dollars) compared with 105.86 billion (18.5 billion dollars) the previous month.

French military sales surplus reached 1.77 billion francs (300 million dollars) in February, sharply down from January's 4.28 billion francs.

France also benefitted in February from the sale of 13 Airbus aircraft for 3.35 billion francs (500 million dollars).

France's trade surplus in the agro-food sector was 5.26 billion francs (922 million dollars). But the energy deficit rose to 8.13 billion francs (1.4 billion dollars) from 7.6 billion francs in January.

France's trade deficit with the EEC was narrowed to 2.5 billion francs (438 million dollars) from 4.25 billion francs in January but the trade deficit with Japan remained stable at 2.7 billion francs (473 million dollars)

#90079d3190 03/20/1990 ~French/German News Agency

TOKYO (MARCH 20) - The Bank of Japan said Tuesday it was raising its discount rate from 4.25 percent to 5.25 percent, putting an end to weeks of speculation but offering little relief to Japan's battered financial markets.

The decision, taken at a meeting of the central bank's policy board, took effect immediately and marked the fourth increase in less than 10 months. The rate, charged on central bank loans to financial institutions, now stands at its highest level since October 1983.

The move follows investor uncertainty which has slashed share prices by more than 20 percent since January, driven 10-year government bond yields to more than seven percent and depressed the yen to its lowest level in three years.

"The decision was taken to ensure appropriate and flexible management of monetary policy," Bank of Japan governor Yasushi Mieno said.

Mr. Mieno said the move took into account "recent developments of domestic business activity, prices, the money supply, foreign exchange rates, interest rates abroad as well as a rise in market interest rates."

"The Bank of Japan expects that this decision will contribute to pre-emptively maintaining price stability under the present circumstances " he added. "The bank hopes that this measure will also contribute to sustainable growth led by domestic demand while maintaining market stability."

Prime Minister Toshiki Kaifu said he hoped the discount rate hike would "help to stabilise the yen's exchange rate and stock prices even if only by a small degree." Mr. Kaifu added that the timing of the move was "appropriate" and reflected the widening interest rate gap between Japan and abroad.

Japan's financial markets were, however, anything but stable after the central bank's lunchtime announcement.

SEOUL (MARCH 20) - South Korea banned Tuesday the import of Japanese color television sets with screens measuring 21 inches (52 centimeters) or more, a government official said.

Also banned are Japanese motorcycles of less than 50 cc and Digital Audio Tape (DAT) recorders, the Trade and Industry Ministry official said.

The move to ban large-screen Japanese color televisions and the other items was aimed at reducing Japan's large trade surplus with South Korea, which was four billion dollars last year, 100 million dollars more than in 1988.

Though the action is the first taken by the new trade minister installed Saturday in a cabinet reshuffle which saw a complete change in the economic portfolios, the bans were "under discussions for two or three months," the official said.

The list of Japanese items which are not allowed to be imported to South Korea now stands at 258, four fewer than before the just-completed revision, said the official.

Twenty-two items were dropped from the ban list and and 18 were added, he said.

"Recently there's been an upsurge in the consumption of color televisions from Japan," said the official. Growing consumption of foreign goods, especially luxury items, is frowned upon by many here.

The import of color televisions from Japan last year grew by 200 per cent, and it had grown by 400 percent in 1988, he said.

South Korea has encouraged firms here to stop importing other items from Japan and switch to buying them from the United States, West Germany and other countries with which Seoul has a trade surplus.

#90079d3730 03/20/1990 ~French/German News Agency

BRUSSELS (MARCH 20) - Swiss-Swedish electrotechnical group Asea Brown Boveri (ABB) said here Tuesday that its net consolidated profit rose 53 per cent last year over the 1988 level to 589 million dollars from 386 million.

Consolidated turnover was up 15 percent at 20.56 billion dollars from 17.83 billion in 1988, the group said in a statement.

The group's order book stood at 18.1 billion dollars at the end of last year, up from 15.9 billion at the end of 1988.

-30- 639

#90079d4270 03/20/1990 ~French/German News Agency

LONDON (MARCH 20) - British bank Standard Chartered said Tuesday its taxable profit plunged almost 79 percent in 1989 to 67.1 million pounds (111.8 million dollars) from 313.3 million (522 million dollars) the previous year.

After tax, the bank showed a loss of 31.3 million pounds (52.1 million dollars) against a profit of 274.1 million in 1988.

The bank, which has major overseas interests, particularly in Canada, the United States, Australia and Hong Kong, said that the profit fall was largely due to an exceptional provision of 427 million pounds (711 million dollars) for loans to developing countries excluding Mexico and South Africa.

Provision for bad or doubtful debt was increased from 98.3 million pounds to 167.9 million, and reorganisation costs totalled 27.7 million pounds.

The pre-tax profit was aided by 289.5 million pounds in exceptional revenue following the sale of assets, notably property.

Operating profit was down to 222.1 million pounds, from 304.5 million the previous year.

But the results were in line with market expectations of profit of between nothing and 100 million pounds, and Standard Chartered shares were up five pence to 548 in late morning trading in London.

Final dividend was unchanged at 22.5 pence, making a total for te year of 35 pence, up from 33.9.

The group, which began a sweeping reorganisation programme nine months ago, said the results were expected to improve in 1990, noting that the first half of 1989 had been the most difficult period, with pre-tax losses of 48 million pounds following an exceptional provision of 208 million pounds for Third World debt.

Standard Chartered, like Britain's four major high street banks - Midland, Natwest, Lloyds and Barclays - had problems last year over problems faced by some Third World countries in meeting their debt servicing payments.

It was particularly affected by Brazil's decision to suspend debt interest payments, and was also faced with problems due to high interest rates in Britain and troubles for some Australian companies.

The new provisions mean that the bank has now covered 79 percent of its Latin American debt, which represents less than 40 percent of Standard Chartered's Third World exposure, and 88 percent of African debt.

#90079d4280 03/20/1990 ~French/German News Agency

LONDON (MARCH 20) - British bank lending rose by 7.3 billion pounds (12.1

billion dollars) in February against a 5.8 billion (9.6 billion dollars) rise in January, while M4 money supply increased 0.9 percent, the Bank of England said Tuesday.

M4 money supply had risen 1.2 percent in January.

The provisional figures released Tuesday put the year on year rise in M4 at 17.9 percent, down from 18.2 percent in January.

MO, which includes only banknotes and coins, was up 0.2 percent in February, down from a 0.3 percent rise in January, but on a year-on-year basis it was up to 6.4 percent from 5.8 percent in January.

The figures, released hours before the presentation of the 1990-91 budget, confirmed that inflationary pressure was continuing despite current high interest rates.

The bank lending figures given by the Bank of England included mortgage loans by building societies.

#90079d4310 03/20/1990 ~French/German News Agency

Accra (MARCH 20) - Ghana's mining and mineral production, the second largest foreign exchange earner after cocoa, saw a strong rise in 1989, according to figures released here Tuesday.

Gold, the country's second largest foreign exchange earner, rose to 430,151 fine ounces, up 15 percent from the 1988 output.

Manganese production surged 40.5 percent from 259,614 tons in 1988 to 364,862 tones last year.

Bauxite output rose by 30.6 percent from 284,524 tons in 1988 to 371,576 tons, while diamond production inched up to 279,280 carats, from 277,966 carats.

#90079d4840 03/20/1990 ~French/German News Agency

ROME (MARCH 20) - Bangladesh President Hussain Mohammad Ershad arrived here Tuesday for an official two-day visit, including talks with Italian officials and an audience with Pope John Paul II.

Several cooperation and development accords are expected to be signed during his stay.

Mr. Ershad, who is accompanied by his wife Begum Raushan Ershad and Foreign

Minister Anisul Islam Mahmud, was met at the airport by Tourism Minister Carlo Tognoli.

A private audience with Pope John Paul was scheduled for Tuesday morning, followed by a meeting with Italian President Francesco Cossiga.

Economic talks will start late Tuesday when the delegation meets with Prime Minister Giulio Andreotti.

Italy has been among Bangladesh's prime economic supporters, and is one of Bangladesh's top European trading partners even if the volume of trade is "stil negligible," the foreign ministry here said.

On Wednesday, Mr. Ershad will meet with Italian parliamentary leaders and United Nations officials here. It is his third visit to Italy since taking over in Dhaka in 1982.

The official Bangladesh BSS news agency said prior to the visit that three accords were to be signed during Mr. Ershad's stay, dealing with technical assistance, economic cooperation and avoidance of double taxation.

#90079d6790 03/20/1990 ~French/German News Agency

BERLIN (MARCH 20) - Crafted as the legal basis for the Communist Party's grip on power and the state's control of the economy, the East German constitution seems to be the last major obstacle to early unification of Germany and German monetary union.

In Bonn Tuesday, West German Interior Minister Wolfgang Schaeuble said his government wanted to launch currency union "by the summer."

"It could happen three weeks before July 1 or a month later, we can't say yet," he told a press conference.

But political sources in East Berlin cautioned that changes to the constitution seem inevitable if the newly-elected government wants to legally replace the Ostmark, the soft East German currency, with a Deutsche mark issued by Bonn.

Article Nine of the constitution stipulates that control of the national currency lies "with the competence of the Socialist state," which shall conduct a "planned economy... whose aim is the consolidation of socialism."

Constitutional revisions are also needed if the Alliance for Germany, the conservative coalition that swept to victory in Sunday's elections, wants to take the quick path to political unification.

To modify the constitution, the government will need the votes of at least two-thirds of the 400-member parliament, the first democratically-elected assembly in East Germany's 40-year history.

If, as seemed likely Tuesday, the 193 Alliance deputies join in a coalition with the 21 Free Democrats, the conservatives will have a good working majority.

But they will need the tacit or formal support of the Social Democratic Party (SPD), which has 87 deputies, to reach the 267-seat threshold in order to change the constitution. The SPD has so far ruled out joining any government that includes the most rightwing Alliance party, the German Social Union (DSU).

The Communist Party, which has been shunned as a coalition choice by all the other mainstream parties, gave early notice on Monday that its 65 deputies would look to the SPD to help it veto any unwanted constitutional changes.

That prospect drew a warning shot Tuesday from Volker Ruehe, the secretary of West Germany's Christian Democratic Union (CDU).

Pointing to an election result that endorsed early unity, he warned the SPD: "Whoever blocks the way to a market economy and German unification will be sidelined politically in East Germany."

The constitution also looms as an obstacle in the two options to political unification, analysts say.

East German CDU leader Lothar de Maiziere, expected to be the next prime minister, favors unification under Article 23 of the West German

constitution.

The article says the West German constitution will apply to "other parts of Germany" when they "enter" the Federal Republic.

It was used to admit the Saarland, then attached to France in an economic union, in 1957.

The big advantage of Article 23, the conservatives say, is that it would immediately place East Germany's tottering economy and young democracy under the shelter of its powerful neighbor.

The other option, favored by the SPD, is longer and more complicated, but involves an indirect referendum on unification.

It is based on Article 146 of the West German constitution, which in effect calls for the election of a special assembly from East and West Germany that would then decide a new constitution for the united country.

In either case, the transition must be kept politically smooth in what, for West Germany, is also an election year.

It means that the government will have to set up Laender, or states, that can simply join the other states in the West German federal structure -- a move, again, that requires constitutional change.

#90079d7080 03/20/1990 ~French/German News Agency

TAIPEI (MARCH 20) - Protesters went into their fifth night in front of Chiang Kai-Shek memorial Hall Tuesday as students arriving from schools around the island increased to an estimated 5,000.

The students are calling for the dissolving of the National Assembly, which has not had to stand for re-election since the Kuomintang lost the mainland to the Chinese Communists in 1949.

The National Assembly meets every six years to elect the president and will meet early Wednesday to decide who will lead the country over the next six years.

The students also demand the establishment of a national affairs conference to solve problems facing the nation, a timetable for political reforms, and the lifting of a set of temporary provisions which restrict the powers of the constitution.

''The leaders have never had a chance to hear what the people want,'' said Chang Chung-Tung, professor of history at National Taiwan University, one

of the professors staying in the square with the students. ''This time they can hear what the people want and they must pay attention to these demands.''

President Lee agreed Monday to hold a national affairs conference, but so far has not responded to the other demands. Student leaders Tuesday vowed to continue to protest and said that they will adopt more radical methods if their demands are not met.

BUCHAREST (MARCH 20) - Romanian Defense Minister Victor Stanculescu solemnly pledged Tuesday that the army would defend the integrity of the nation after government officials said that troops would be used to quash ethnic clashes in the west of the country.

Speaking on television in full dress uniform, General Stanculescu said: "Backward elements, hostile to our revolution and our ideals, tried to sow discord between the Romanian population and the people of Hungarian origin."

Earlier, Carol Kiraly, vice-president of the executive bureau of the provisional council of national unity, said that some people had been injured in further violence Tuesday between Romanians and ethnic Hungarians in the Transylvanian town of Tirgu Mures and that troops were to be sent in.

"The Romanian army is determined to defend the integrity of our free country," Gen. Stanculescu said. "The army is now increasingly powerful and more united than ever."

The defense minister appealed to the population "not to heed calls to discord and immediately to cease acts of personal vengeance and to refrain from any irresponsible actions."

Up to 15 people were reported injured Monday in Tirgu Mures when Romanian nationalists attacked the offices of an ethnic Hungarian association. Some two million ethnic Hungarians live in Transylvania.

PIETERSBURG, SOUTH AFRICA (MARCH 20) - The government of South Africa's nominally self-ruling Lebowa tribal homeland Tuesday night called for the scrapping of the entire homeland system, in a direct challenge to apartheid policy.

The call is the most explicit condemnation yet of the homelands from one of their governments and is in defiance of Pretoria's policy of "grand apartheid" tribal separation.

The system, which was proposed in 1959 to divide the country's blacks into separate areas, was "illegitimate, promotes ethnicity and is a weapon of divide and rule," the government said in a statement.

The Lebowa statement, issued in this northern town at the center of the four-part homeland, called for the restructuring of regional and local authorities on a "non-racial" basis under one government.

Lebowa is one of 10 homelands, but not one of the four which have a nominal form of independence.

Two of the four, Transkei and Ciskei, have experienced coups and the Ciskei military takeover, on March 4, sparked off widespread public violence which spread to Gazankulu, Lebowa and Bophuthatswana.

Scores died and hundreds were hurt in the protests, directed mainly against governments seen as collaborating with Pretoria's apartheid policies.

The Ciskei and Transkei governments have indicated they would favor reintegration into South Africa, saying the homeland system is artificial.

The African National Congress, operating mainly out of Lusaka, and a de facto internal wing, the United Democratic Front, are reportedly behind much of the homeland protest.

The ANC, which openly rejects the system, is said to be strongly pressuring homeland leaders also publicly to do so.

More than half of South Africa's 25 million blacks live in the homelands -- two million in Lebowa -- the first of which, Transkei, accepted "independence" in 1976.

This "independence" is not recognised outside South Africa.

President Frederik de Klerk has since taking office in September last year hinted that the homeland system is not sacrosanct and that its future could be negotiable.

But Mr. De Klerk has added that "hasty" and "unthinking" moves by homeland leaders would not be welcome.

Pretoria's relations with Transkei military leader Major-General Bantu Holomisa have reportedly been rapidly cooling as a result of his firmly-worded anti-homeland statements.

A South African Foreign Affairs spokesman would not immediately comment Tuesday on the Lebowa government statement.

WINDHOEK (MARCH 20) - Thousands of excited Namibians gathered at the Independence Stadium here late Tuesday to celebrate the birth of their new nation at midnight.

By 10 p.m. (2000 GMT) some 8,000 people, many dressed in the blue, red, green, gold and white of the new Namibia, had flocked to the stadium despite torrential summer showers.

Dominating the scene are two flagpoles -- one holding the South Africa flag which is to be lowered at midnight, the other temporarily bare in anticipation of the new Namibian flag being unfurled the moment the territory is transformed into a nation.

Cultural and musical groups entertained the crowd as they awaited the arrival of Namibian President-Elect Sam Nujoma and some 200 guests invited from around the world.

Earlier Tuesday, South Africa's Administrator General Louis Pienaar hosted a banquet for Mr. Nujoma and his visitors, among them scores of heads of state and foreign diplomats.

Topping the guest of honor list are Soviet Foreign Minister Eduard Shevardnadze, American Secretary of State James Baker, British Foreign Secretary Douglas Hurd and United Nations Secretary-General Javier Perez de Cuellar.

At midnight (2200 GMT), South African President Frederik de Klerk will hand over Pretoria's 75-year control of Namibia to Mr. Perez de Cuellar, who will then swear in Mr. Nujoma as new president.

Speaking to South African state-run television, Mr. De Klerk said Tuesday that "everything looks positive" for a sound relationship between his country and an independent Namibia.

South Africa, which occupied the former German colony in World War I, would be looking forward to bilateral agreements with the country once it reached statehood, Mr. De Klerk said.

The birth of a new neighbor marked "the end of a chapter and the beginning of a new era ... an era in which Namibia will be part of greater southern Africa," said Mr. De Klerk, who arrived in Windhoek Tuesday.

A fireworks display will round the evening off here when independence has been declared. Festivities will continue into Wednesday and Thursday, both of which have been declared public holidays.

Mr. Nujoma's South West Africa People's Organization (SWAPO) from 1966 fought a 23-year bush war against South African occupation.

Namibia's future was sealed by the New York Treaty of December 1988, when tripartite talks between South Africa, Angola and Cuba resulted in an accord on independence and a Cuban troop withdrawal from neighboring Angola.

WASHINGTON (MARCH 20) - Treasury Secretary Nicholas Brady will meet with Japanese Finance Minister Ryutaro Hashimoto later this week, a Treasury spokesman said Tuesday.

Questioned on rumors indicating an upcoming meeting of the Group of Seven (G-7), the world's seven richest countries, the spokesman merely said that Mr. Brady and Mr. Hashimoto would meet "later this week," time and place unspecified.

Sources said San Francisco was a likely site.

Quoting government officials, the Japanese daily Nihon Keizaid recently reported the G-7 -- Britain, Canada, France, Italy, Japan, United States and West Germany -- would hold a non-ministerial meeting March 23 in San Francisco.

The newspaper said Japanese Deputy Foreign Minister Hisashi Owada would attend the meeting, which would focus on Eastern Europe, possible trade

sanctions against China and the situation in the Soviet Union.

No government has officially confirmed the meeting mentioned by Nihon Keizaid.

The next formal G-7 meeting is scheduled for April 6 and 7 in Paris.

WASHINGTON (MARCH 20) - President George Bush, issuing his annual security report to Congress, said Tuesday he feels ''means other than military capabilities'' can meet the dangers to American security posed by new insecurities worldwide.

While continuing to maintain military preparedness and nuclear deterrence, Bush said the negotiating table and economic alliances offered a positive alternative to the threat of armed confrontation.

''The potential that exists for instability, uncertainties and new dangers still threaten American interests and values which risks can be ameliorated by means other than military capabilities - means like negotiations, economic and security assistance, economic leverage and political leadership,'' the president said in his 34-page report.

The democratization process in Eastern Europe and the resulting reduced threat from the East Bloc would permit a reduction in U.S. military forces he said. America in the future must use a more flexible military power to react to potential crisis situations.

Bush repeated his hopes that a unified Germany will be a full member of Nato, including its military structure.

He added, ''We will work toward a fuller integration of the Soviet Union into the broader community of nations.''

SAN DIEGO (MARCH 20) PR NEWSWIRE - Synbiotics Corp. (NASDAQ: SBIO) announced today the completion of its acquisition of Cryschem Inc. of Riverside, Calif., effective Feb. 28, 1990. Cryschem will be merged with ImmunoPharmaceutics Inc. (IPI), a wholly owned subsidiary of Synbiotics. IPI was formed in 1989 to build upon Synbiotics' core technologies in idiotypic and anti- idiotypic monoclonal antibodies.

Combined, IPI and Cryschem provide a fully integrated drug design and development capability utilizing the latest technological offerings including X-ray crystallography, molecular graphics, recombinant DNA, protein engineering and immunological methods. This portfolio of technologies represents the foundation for IPI's innovative approach to the development of new therapeutic agents.

Overall, the most important benefit of the acquisition to IPI will be the long-term commitment and availability of Professor Alexander McPherson, chairman of the Biochemistry Department at UC Riverside and president of Cryschem. McPherson is recognized as one of the world's leading crystallographers. This methodology is an essential tool in the development of new drugs.

Synbiotics Corp. of San Diego is a leading developer and manufacturer of products that prevent, diagnose and treat animal and human diseases. Synbiotics common stock is traded on the NASDAQ National Market System.

#90079p0027 03/20/1990 ~PR Newswire

PALO ALTO, CA (MARCH 20) PR NEWSWIRE - Action Technologies today announced MHS tools, a group of software programs designed to significantly increase the productivity of MHS users and reduce costs. MHS Tools consist of Remote Administration Service, MHS Redirector, MHS Librarian and MHS BulletinBoard.

Each of the products dramatically increases functionality and reduces both administration and communication costs.

Remote Administration Services will, for the first time, allow the administrative user of a distributed MHS network to manage the entire network from a single source. Businesses will be able to maintain one, central support staff which can administer a worldwide network. Typically, when a remote site required additional work such as an upgrade from 10 to 15 users, an administrator would have to go to the site to make the necessary modifications. Businesses will now be able to save a significant amount in travel, training, administrative and telephone costs.

The program will be available in the third quarter 1990. Services for central installation and two remote hosts will be priced at $2,500 and $995 for each additional five hosts.

MHS Redirector allows users to redirect and copy mail automatically through a simple message request. Because the software will perform the copying and rerouting that end users and their administrators once performed, the time needed to complete tasks and the resulting costs will be greatly reduced.

For the first time, MHS-based electronic mail users can redirect electronic messages in a manner similar to telephone call forwarding. For example, a busy manager can have his messages automatically sent to his assistant for screening and delegation. Messages can be redirected to alternate electronic mail addresses within and between local area networks. They also can be sent and received regardless of their host location and without knowing the specific addresses of each user.

Redirector will be available in May 1990 and will be priced at $500 for basic installation serving 10 users, $195 for each additional 10 users.

Action Technologies is a privately held company founded in 1983. The company provides work management and communications software to the business user and enabling technologies to the original equipment manufacturer (OEM) markets.

PALO ALTO, CA (MARCH 20) PR NEWSWIRE - CompuServe Inc. and Action Technologies Inc. today announced the interconnection of CompuServe Mail with Action Technologies' Message Handling Service (MHS).

MHS is a widely-used software product that performs message management and transfer services for local area network (LAN)-based electronic messaging systems. CompuServe's MHS connection will provide a transparent link between the estimated three quarters of a million users of MHS-compatible LAN messaging systems and the 553,000 members of the CompuServe Information Service. Corporations using CompuServe's private E-mail service have had an MHS link since June 1989.

In addition, CompuServe will provide hub service for the exchange of messages between MHS-compatible systems. MHS users will send their messages through CompuServe, which will facilitate the exchange of messages with recipients on other LANs through a store and forward process.

Using their own software and familiar commands, MHS-compatible LAN users will have access to the same enhanced messaging services provided to all other CompuServe Mail customers, including links to MCI Mail (100,000 members), Internet (500,000 users), Telex (1.5 million machines), facsimile (4.2 million machines) and postal service delivery.

The MHS connection will be available in mid-May, with pricing to be determined.

Action Technologies Inc., of Emeryville, Calif., is a privately held company founded in 1983. The company provides work management and communications software to the business user and enabling technologies to the original equipment manufacturer (OEM) markets. Its products include The Coordinator II, a work management and communications software application, and MHS, a message handling software product.

CompuServe Inc. provides electronic mail, database access, software and value-added packet data network services to major U.S. corporations and government agencies. CompuServe also provides communications and information services to 553,000 personal computer owners through the CompuServe Information Service, the world's largest information service for microcomputer users.

CompuServe is an H&R Block company.

CONTACT: David J. Kishler of CompuServe, 614-457-8600; or Julie Karbo or Cynthia Stirling both of Regis McKenna, 415-494-2030, for CompuServe.

PALO ALTO, CA (MARCH 20) PR NEWSWIRE - Action Technologies and Ashton-Tate Corp. (NASDAQ: TATE) today announced an agreement under which Ashton-Tate is licensing "MHS By Action Technologies" for inclusion in future products. Initially this will include MultiMate(R) Version 4.0 and Framework III LAN(R). The announcement is a result of each company's strategy to help end users increase productivity while supporting existing user environments and applications.

MHS is a widely used store and forward messaging technology that allows people using dissimilar computers, applications and protocols to perform inter- and intra-network messaging in the most cost effective and efficient time frame. MultiMate 4.0 is Ashton-Tate's new DOS word processing software that provides power and ease of use. It includes an integrated grammar checker, graphics, transparent file conversion and a number of other new features.

MultiMate 4.0 with MHS capability is now available through the Ashton-Tate authorized reseller network. The product has a suggested retail price of $565 and includes free, unlimited support. Upgrades for previous versions of MultiMate are available for $75 from Ashton-Tate customer service at 1-800-2-ASHTON.

Action Technologies is a privately held company founded in 1983. The company provides work management and communications software to the business user and enabling technologies to the original equipment manufacturer (OEM) markets. Its products include the Coordinator Version II, a work management and communications software application that offers scheduling and calendaring features along with sophisticated electronic mail capabilities, and "MHS by Action Technologies," a message handling software product that provides transparent store and transfer services for application to application communications, either within a single local area network environment, or between systems.

Based in Torrance, Calif., Ashton-Tate markets microcomputer business applications for DOS and Macintosh operating systems. Products are available in five major categories: database management systems, word processing, integrated decision support, spreadsheets and graphics. Ashton-Tate also markets a comprehensive line of service and support programs for individuals, corporations and government agencies.

#90079p0030 03/20/1990 ~PR Newswire

ATLANTA (MARCH 20) PR NEWSWIRE - The fast food chicken war pitting independent fast food chicken chain Chick-fil-A against giant hamburger chain Wendy's continued today as a Chick-fil-A maintained its cease and desist position by beginning to contact the three national networks and the major cable outlets to bring the charge of false and misleading advertising to their attention.

In its March 16 response to Chick-fil-A's cease and desist letter, Wendy's cites their own research and "a recent Gallup Poll of fast food hamburger consumers" as confirming Wendy's "chicken sandwich superiority."

"Using this research Wendy's makes a categorical statement in their ads that their chicken sandwiches are the best in the business," said Steve Robinson, vice president of marketing for Chick-fil-A. "That statement implies that the 'business' is the fast food business when, in fact, they are talking about a limited segment of the industry -- the fast food hamburger business. That misrepresentation is what we are citing as false and misleading and a cause of concern for Chick-fil-A, as it would be for any chicken chain that has a superior product."

Chick-fil-A originally sent the cease and desist letter accusing Wendy's of false and misleading advertising last Thursday, saying that it was concerned the television campaign confuses the consumer while damaging the reputation of Chick-fil-A.

Robinson said that in eight consecutive years of semi-annual third-party research comissioned by Chick-fil-A, the Chick-fil-A(R) Chicken Sandwich has been confirmed by all fast food consumers as number one in taste and overall quality. The study, by Marketing and Research Counselors Inc. (MARC), interviews customers who have eaten at all major types of chain restaurants.

Atlanta-based Chick-fil-A is the country's fourth largest chicken chain, currently operating 413 locations in 31 states. The chain reported 1989 sales of $263.8 million.

LANGHORNE, PA (MARCH 20) PR NEWSWIRE - Ecogen Inc. (NASDAQ: EECN) today announced it has given exclusive distribution rights for its existing Bacillus thuringiensis (Bt)-based biopesticides in Taiwan to Jia Non Enterprise Co., Ltd., Hsinchun City, Taiwan.

Under an agreement signed today, Jia Non will pay Ecogen a $300,000 licensing fee when the first Ecogen product is registered for sale in Taiwan. During the seven-year term of the contract, Jia Non will pay Ecogen royalties of up to $2.7 million, based on product sales, and purchase all of its Bt insecticides from Ecogen.

In addition, Jia Non purchased from Ecogen $500,000 of unregistered common stock at a price of $3.32 per share. The price represents a 20 percent premium to the average market price for the 30 days preceding the agreement.

Ecogen also has the option to sell to Jia Non, under specific conditions, an additional $500,000 of Ecogen common stock later this year. The price is to be based on a 20 percent premium to the market price at the time of sale.

Ecogen Chairman John E. Davies said the agreement reflects Ecogen's strategy of linking non-U.S. distribution rights with equity purchases. "We see this as one way of raising the money necessary to finance the development of a new generation of biopesticides," he said.

Davies said tests of several of Ecogen's products, including Cutlass(note) vegetable bioinsecticide, were conducted in Taiwan last year with excellent results. Davies expects a vegetable bioinsecticide to be the first Ecogen product marketed by Jia Non.

Davies noted that Jia Non is one of the fastest growing agricultural chemical distributors in Taiwan. He said, "We are extremely pleased to

have Jia Non as our distributor in the important Taiwanese market and as an investor in Ecogen."

Ecogen Inc. is an agricultural biotechnology company, specializing in biological pest control. In addition to Cutlass, Ecogen's products include Condor(note) forestry bioinsecticide, Dagger(note) G cotton biofungicide and Collego(note) rice bioherbicide. The company is also developing biopesticides for cotton, corn, potatoes and other vegetables, and home and garden use.

#90079p0035 03/20/1990 ~PR Newswire

LANGHORNE, PA (MARCH 20) PR NEWSWIRE - Ecogen Inc. (NASDAQ: EECN) announced today that it has filed a U.S. patent application for a purified crystalline protein that has insecticidal activity against the corn rootworm. The insecticidal crystal protein (ICP) was isolated from a novel strain of the bacterium Bacillus thuringiensis (Bt). The patent application covers the ICP, the gene which governs the production of the ICP, and Bt strains that contain the gene.

The Bt strain in which the corn rootworm ICP was found was isolated as part of Ecogen's worldwide effort to identify naturally occurring micro-organisms with commercially useful pesticide activity.

Ecogen researchers discovered the corn rootworm activity of the Bt strain as part of a research collaboration with the Monsanto Company (NYSE: MTC) of St. Louis, and subsequently cloned and sequenced the ICP encoding gene. Ecogen has granted Monsanto an exclusive license to use this gene in corn plants and certain bacteria.

According to John L. McIntyre, Ph.D., vice president of commercial development for Ecogen, the corn rootworm activity of the bacillus thuringiensis strain is significant since Bt is best known for its insecticidal activity against the larval or caterpillar stage of moths (lepidopteran insects). The corn rootworm is the larva of a beetle (coleopteran insect).

McIntyre believes that Ecogen's discovery is an important step toward the development of an effective biopesticide against corn rootworm. "There have been previous reports of Bt strains with corn rootworm activity," he said, "but none appear to have the consistenly measurable performance which we have observed. This research may lead to alternative products which could reduce chemical insecticide usage in corn production."

According to United States Department of Agriculture estimates, pesticides used to control corn rootworm comprise the single largest insecticide market in the United States. The insecticides are applied to the soil at planting time to prevent the corn rootworm from feeding on the underground stem and root system of the corn plant.

Monsanto Company is a research, manufacturing and marketing company with a diversified line of products, including chemical and agricultural products pharmaceuticals, low-calorie sweeteners, process controls, man-made fibers and biotechnology research products.

Ecogen Inc. is an agricultural biotechnology company, specializing in biological pest control. Ecogen's products include Cutlass vegetable bioinsecticide, Condor forestry bioinsecticide, Dagger G cotton biofungicide and Collego rice bioherbicide. Additional biopesticides for cotton, corn, potatoes and other vegetables, and home and garden use are under development at Ecogen.

NORTH WHITE PLAINS, NY (MARCH 20) PR NEWSWIRE - Fingermatrix, Inc. (NASDAQ: FINX) announced today that it has delivered, installed and received payment for a $108,000 contract to provide a live scan, fingerprint-based visitor ID system for the Federal Bureau of Prisons.

The system will be used to read and record the fingerprints of prison visitors at Marion Prison, a maximum security prison in Illinois, so that their identity can be confirmed upon entrance and departure from the facility. To provide additional integrity to visitor processing, the system will also ensure that no visitor is registered under a second false identity, by performing an identification check against the entire visitor data base for each new addition to the data base.

According to Dr. Jerry Prather, acting chief for security technology for the Federal Bureau of Prisons, "Identifying visitors is critical, and widespread use of fingerprint ID systems will give us a high-tech edge to effective prison management."

This is the first and only successful contract award using live scan fingerprints in the prison system. The second such award, for $407,000, was recently made to Fingermatrix to provide a central automatic fingerprint matching system and 32 live scan finger readers at several locations within Suffolk County, N.Y. Fingermatrix equipment will be used to identify incoming prisoners, verify their identities whenever they are

transferred from one area to another, and to verify their identities when they are released.

Successful performance of such systems has already provided the company with widespread sales opportunities in this market.

Fingermatrix, Inc. is a world leader in state-of-the-art, automated fingerprint technologies, with system applications ranging from access control to law enforcement.

CONTACT: Scott G. Schiller of Fingermatrix, 914-428-5441, or Morgan Molthrop of Georgeson & Company, 212-440-9803, for Fingermatrix.

SAUSALITO, CA (MARCH 20) PR NEWSWIRE - Phoenix Network Inc. (NASDAQ: PHXN), a long distance network management company based here, and Westinghouse Communications, today announced they have completed a three-year agreement under which Westinghouse will assist in the provisioning and management of services from the other carriers including AT&T, Sprint and MCI.

Under the terms of the agreement, Westinghouse will manage the sophisticated dedicated line services which will now be available to all Phoenix clients. With this service Phoenix will be able to use its marketing channels to acquire new commercial accounts which can be placed on any one of several national long distance carriers.

"We are excited about our new relationship with Westinghouse Communications and believe the value of this contract to be in excess of $20 million," said Thomas H. Bell, president of Phoenix Network. "Phoenix Network is in the process of making arrangements for Westinghouse to participate in the management of our current client base in addition to our backlog of over $2 million in annualized billings from new clients."

"Westinghouse will provide value-added services which will allow Phoenix Network to provide its customers with state-of-the-art services not currently available," said Harlan J. Rosenzweig, president of Westinghouse Communications.

Phoenix Network trades over the counter on NASDAQ under the symbol PHXN.

EL SEGUNDO, CA (MARCH 20) PR NEWSWIRE - Advanced Software Technologies Inc. (ASTI) announced today it has appointed Robert V. Adams to its board of directors. Adams is chief executive officer and president of Xerox Technology Ventures located in El Segundo.

Present board members of ASTI include Patrick Panzarella, president of ASTI, and Sandy Panzarella, the chairman of the board, Adams and others.

"With his management and marketing experience at Xerox Corp., Adams brings a great deal of strategic expertise to bear at ASTI," said Patrick Panzarella, president at ASTI. "This will assist us in continuing to establish market presence for MAGIX and aligning MAGIX with a comprehensive distribution channel."

Adams background includes over 25 years at Xerox, where he held a number of positions. Most recently, Adams was executive vice president of Xerox, responsible for Corporate Strategy and Business Development. Adams also was group vice president of Xerox Systems Group and vice president of the Business Systems Division.

Adams received a bachelor's degree in mechanical engineering from Purdue University, and a master's of business administration from the University of Chicago. He is a member of the board of directors of Teradata Corp. and Tandon Corp., and is on the board of counselors of the University of Southern California School of Engineering, and the University of Chicago School of Business.

Advanced Software Technologies is the sole manufacturer and supplier of MAGIX, the only software package that combines the ease-of- use of a 4th generation language with mainframe-class transaction processing -- using standard PC local area network hardware. MAGIX is at use in at over 1,000 installations worldwide in industries ranging from banking and other financial services to government, retail, medical and telecommunications.

ROGERS, AR (MARCH 20) PR NEWSWIRE - Hudson Foods, Inc. (NYSE: HFI), announced today that it has reached an agreement in principle to acquire the product lines and brand names of the Roegelein Company of San Antonio, Texas. The Roegelein Company produces a full line of further-processed beef and pork products marketed primarily in the San Antonio area under the "Roegelein's" trademark.

Hudson intends to produce the Roegelein product lines at Hudson's existing facilities for sale under Roegelein's brand names. Marketing of those products will be directed primarily at supermarket chains and other customers currently served by the Roegelein Company.

"We believe that purchase of the well-known Roegelein brands will give us a strong presence in the Texas and surrounding market area," said James T. Hudson, founder and chairman of Hudson Foods. "The Roegelein brands enjoy wide distribution and a devoted customer base in south Texas. We are dedicated to providing Roegelein's distributors and customers with quality service and products."

The assets to be purchased will include some packaging supplies and part or all of the Roegelein Company's trade receivables. The purchase will be for cash; the price is not expected to exceed $1.5 million. Negotiations are under way on a definitive purchase agreement between the parties.

Hudson Foods, Inc., one of the nation's largest poultry producers, sells a variety of chicken and turkey products under the "Hudson" and "Flavor Fresh" brand names as well as poultry, beef and pork products under the "Ohse," "Schweigert" and "Pierre" brand names.

DAVIS, CA (MARCH 20) PR NEWSWIRE - The following statement was released today by Calgene Inc. (NASDAQ: CGNE):

Certain allegations were made by representatives of several environmental groups here today regarding the development of seeds safened for use with the herbicide bromoxynil. While Calgene Inc. shares a concern for the environment, we regret the dissemination of misinformation about the health and environmental impact of bromoxynil safened cottonseed by the Environmental Defense Fund and National Toxics Campaign Fund, among others.

Calgene's commitment to the use of more environmentally compatible and less expensive herbicides is deeply rooted in bromoxynil research. A genetic engineering-based seed, food and specialty chemical company headquartered here, Calgene has pioneered significant work in the area of herbicide safened crops to reduce usage of herbicides and help reduce chemical loading of the environment. As a world leader in agribusiness biotechnology, the company has worked to develop technology to permit the application of the biodegradable herbicide bromoxynil to cotton as an alternative to the heavier doses of highly persistent herbicides currently used.

According to Calgene's chairman and chief executive officer, Roger H. Salquist, "Using recombinant DNA technology to facilitate the use of bromoxynil on cotton will achieve significant environmental benefits both in the reduction of persistent herbicide application and the improvement of groundwater protection."

Despite spending over $150 million annually for weed control in cotton, U.S. cotton farmers currently suffer yield and quality losses due to weed infestation, according to Calgene. Use of bromoxynil safened cottonseed is expected to increase growers' yields at significant cost savings resulting in higher farmer income. In addition, the introduction of bromoxynil safened cottonseed is consistent with the national effort to move to more sustainable agriculture and will bring benefits to both large and small farmers.

Contrary to the allegations made by this group, Calgene does not conduct research on atrazine or phenmedipham, does not advocate the use of more herbicides, and is not working on herbicide resistance in canola, cereals, sugarbeets, sunflower, turnip rape or forest trees.

Salquist is available to discuss the unfounded claims of the environmental coalition and share information substantiating the benefits of bromoxynil safened cottonseed.

WEST LONG BRANCH, NJ (MARCH 20) PR NEWSWIRE - An initial production contract for the manufacture of electronic components for Yaskawa Electric America, Inc., of Northbrook, Ill., was announced today by Electronic

Associates, Inc. (NYSE: EA). The Illinois-based company is the sales/service subsidiary in the United States of Yaskawa Electric Mfg. Co. Ltd. of Yahata, Kitakyushu, Japan.

The contract is in the amount of $1.5 million. Deliveries will begin in the second quarter of 1990. Follow-up contracts could be at a rate of more than $3 million a year, according to Robert G. Finney, president and chief executive officer of Electronic Associates, Inc.

Electronic Associates will manufacture electronic controllers for numerical controlled (NC) machinery. The controllers will be marketed by Yaskawa to NC equipment producers in the United States.

"We are pleased that this first American-Japanese relationship is with such an excellent company as Yaskawa," said Finney. "We believe our contract manufacturing service provides an excellent solution for many Japanese companies who want their products made in the U.S. We hope this is the beginning of a significant new area of business between EAI and other Japanese companies."

"Yaskawa's contract with EAI will make a significant contribution to the U.S.-made proportion of manufactured value of the finished product," said Gary L. Long, vice president, contract manufacturing, for Electronic Associates. "This reflects a gradual trend toward increased U.S. manufacture of components for equipment made largely overseas. This trend has been a factor in the growth of EAI's contract manufacturing business."

Contract manufacturing is the largest of EAI's three businesses. It accounted for $16 million or 36 percent of EAI's total revenues of $45 million in 1989.

Electronic Associates, Inc., sells services of two principal types: manufacturing for products designed and marketed by customers, and independent maintenance of electronic equipment. The company also designs manufactures and sells specialized computers for complex simulation applications and real-time data handling products.

#90079p0048 03/20/1990 ~PR Newswire

ATLANTA (MARCH 20) PR NEWSWIRE - One hundred and fifty million times a year U.S. business people trudge to the bank to deposit federal taxes withheld from their employees' paychecks.

Many of the banks accepting these deposits actually lose money on the

transaction.

But thanks to a new service announced today by National Data Corp. (NASDAQ: NDTA), businesses will now be able to make these deposits without leaving the office, and their banks will make a profit.

Dubbed Enact, an acronym for Electronic Network for the Automated Collection of Taxes, the new service will be marketed through banks. It will enable businesses to deposit withholding taxes electronically by simply making a phone call or an entry on a personal computer, eliminating the need to make deposits over the counter using federal tax coupons.

After National Data receives this information, it automatically transmits the deposit to the bank, then at the appropriate time files it electronically with the Internal Revenue Service.

As Treasury, Tax and Loan Depositaries, banks that accept these deposits are required to do so at every branch. And while bank personnel costs have risen steadily during the past decade, the IRS continues to reduce compensation to the point where some banks lose as much as $2 per tax coupon, said Mark L. Braunstein, NDC president.

"The average bank processes thousands of these coupons every month," Braunstein pointed out. "By converting businesses from the paper-intensive coupon system to Enact, banks can turn those losses into profits," he said. "Enact also does away with the manual handling of coupons and reduces unproductive branch traffic," Braunstein added.

NDC and its partner banks already handle electronic payment of corporate state taxes for Indiana, New Mexico, Tennessee, Idaho, and Florida.

National Data Corp. provides business solutions requiring timely access to critical information to the retail, healthcare, financial and communications markets worldwide.

CONTACT: Bob Murphy of NDC, 404-728-2502.

STAMFORD, CT (MARCH 20) PR NEWSWIRE - Asea Brown Boveri Inc. reported today that Gerhard Schulmeyer has been appointed president and chief executive officer, replacing George S. Kimmel, who has resigned from the company.

Schulmeyer continues as executive vice president of ABB Asea Brown Boveri Ltd., Zurich, and as head of the company's industry business segment, which is being relocated from Zurich to Stamford. Schulmeyer will be

based here in his new assignment.

Schulmeyer joined ABB in August 1989 as head of the company's worldwide industry business segment, which includes process automation, drives, metallurgy, engineering services and products for oil and gas and marine applications.

Prior to joining ABB, he served for ten years at Motorola Inc., most recently as executive vice president and deputy to the CEO, with responsibility for Europe, in Chicago. Prior to that he was general manager of a wholly owned subsidiary of the Sony Corporation.

Schulmeyer earned a master of science degree in management from the Massachusetts Institute of Technology. He received two bachelor of science degrees, in business and electronics, from German universities.

Asea Brown Boveri Inc., with sales of approximately $7 billion and some 35,000 employees in the United States, provides products and services for the power, automation, environmental control, mass transit and other markets. The company is part of the global ABB Group, the world's leading supplier of electrical equipment with total sales of about $25 billion and 215,000 employees in 140 countries.

NEW YORK (MARCH 20) PR NEWSWIRE - Centurion Gold Ltd. (NASDAQ: CEUMF; VSE TSE: CEU) today announced it expects to receive record royalty revenues in excess of US$1 million this year, due, in part, to recent start-up activities at the Good Hope claims located in Newmont's Gold Quarry pit. Centurion owns 51 percent of a private company which holds an eight percent net smelter royalty on these claims. The company also expects future royalty revenues on additional claims to be mined by Newmont according to John A. Chapman, president and chief executive officer.

"Centurion's reserve estimates for the Good Hope claims are approximately 30,000 ounces of gold," said Chapman. "Moreover, our 51 percent controlled subsidiary holds an eight percent royalty on additional claims to the north of the Gold Quarry pit. These additional claims contain an estimated 100,000 ounces of gold slated for production by Newmont in late 1993 or 1994."

Centurion Gold Ltd. is engaged in the business of acquiring, exploring and developing gold properties in the western United States. Although primarily focused on gold, Centurion also holds interests in or controls properties containing significant deposits of copper and cobalt.

Centurion's holdings include royalty interests in three producing gold mines, joint venture interests with major mining companies and projects owned and operated by Centurion.

#90079p0058 03/20/1990 ~PR Newswire

WASHINGTON (MARCH 20) PR NEWSWIRE -- MCI Communications Corporation (NASDAQ-NMS: MCIC) will join the U.S. Census Bureau in offering U.S. residents a nationwide toll-free number for the first time ever, for assistance in completing their questionnaires, obtaining forms and answering general inquiries about the census process.

The U.S. Department of Commerce's Bureau of the Census and MCI today announced the availability of toll-free 800 service for the 1990 census. MCI will provide a general number -- 1-800-999-1990 -- and seven foreign language numbers for citizens posing questions in Chinese, Thai, Korean, Cambodian, Vietnamese, Laotian or Spanish. In addition, MCI will provide a specially-equipped 800 number for the hearing impaire (1-800-777-0978).

A census is required by the U.S. Constitution every 10 years. Census statistics are used extensively by the government for determining federal funding and redistricting needs.

The 1990 Census effort will be one of the largest and most complex projects ever undertaken by the U.S. government. One of the biggest differences will be the innovation of using toll-free 800 numbers. The use of toll-free telecommunications technology is expected to result in a higher percentage of respondents and a lower cost of obtaining the necessary information, according to Peter Bounpane, assistant director for the Bureau of Census.

"This innovative approach to conducting the census should improve the quality and quantity of the data collected," Bounpane said. "While the census is in progress, the general public can contact us at their convenience for answers to their questions regarding the census form."

The 800 numbers will be in service from March 23 through July 31, 1990. Before April 15, census participants may use any of the 800 numbers between 9 a.m. and 9 p.m., EST, seven days a week. From April 15 through July 31, the 800 numbers will be in service from 9 a.m. to 5 p.m. (EST) Monday through Friday.

MCI, headquartered in Washington, provides a full-range of global telecommunications services to businesses, residences and government agencies. The company owns and operates the world's second-largest

communications network, employing advanced fiber optics, digital microwave satellite and digital-switching technologies. MCI has previous experience in providing large-scale, toll-free networks for government customers.

NEW YORK (MARCH 20) PR NEWSWIRE - Hallmark Cards, Inc., announced today that it is extending the cash tender offers made through a wholly owned subsidiary for two series of debt securities of Univision Holdings, Inc., to 12:01 a.m. on Thursday, March 29, 1990. Hallmark also said discussions with bondholders are continuing. No assurance can be given that any agreements or understandings with the bondholders will be reached.

The tender offers are for all Univision senior subordinated discount notes due 1998 for 45 percent of their principal amount (approximately 55 percent of their accreted value) and for all Univision 13-3/8 percent subordinated debentures due 1999 for 30 percent of their principal amount.

The tender offers were previously scheduled to expire at 12:01 a.m. on Tuesday, March 20, 1990. As of midnight on Monday, March 19, 1990, $13.896 million principal amount, or approximately 8 percent, of the discount notes and $3.625 million principal amount, or approximately 3 percent, of the debentures had been tendered and not withdrawn.

Univision Holdings, Inc., is a privately held company, based in New York, which owns and operates a Spanish-language television network in the United States and a group of television stations.

MALVERN, PA (MARCH 20) PR NEWSWIRE - Surgical Laser Technologies, Inc. (NASDAQ-NMS: SLTI) ("SLT"), said today it has settled its suit against Living Technology, initiated late last year in response to an inaccurate press release issued by Living Technology and the latter's continuing infringement of SLT contact laser probes patents.

The press release announced that Living Technology had entered into a technology license agreement with Siber Kikai KK of Japan concerning contact laser probe/scalpel technology and, further, challenged SLT's

ownership rights to certain of SLT's earliest contact probe/scalpel patents.

Following an investigation of the facts, Living Technology now concedes that certain items contained in its press release were inaccurate. Specifically, Living Technology admits that no license agreement was ever consummated with Siber Kikai and retracts any statement it has made challenging SLT's patent ownership position.

Living Technology additionally conceded the validity and infringement of the SLT-owned contact probe/scalpel patents and has, along with its parent companies, the BOC and Pilkington Groups, agreed to be permanently enjoined by the Federal District Court from further infringement. Living Technology has terminated its business operations both in Europe and the United States.

"This action clearly validates SLT's strong patent position and puts a halt to false and defamatory statements that attempted to damage our reputation in the industry," stated David S. Joseph, chairman, president and chief executive officer of SLT. "SLT has vigorously defended our proprietary technology in the past, and we will continue to do so in the future."

Surgical Laser Technologies manufactures and markets a proprietary contact laser technology that has been cleared by the U.S. Food and Drug Administration for use in virtually all general and specialty surgical procedures.

ELK GROVE VILLAGE, IL (MARCH 20) PR NEWSWIRE - AAR Corp. (NYSE: AIR) announced today that one of its operating units, AAR Financial Services Corp. (AARFSC), has leased two Boeing 727-200 aircraft to Key Airways, Inc., a subsidiary of World Corp. The airline primarily provides passenger and cargo charter services to other airlines and the military. The aircraft carry a base lease term of up to five years and will be delivered to the carrier during the fourth quarter of AAR's fiscal 1990 year.

Ira A. Eichner, chairman of the board and chief executive officer of AAR, commenting on the transaction, said "The lease of these two aircraft, in conjunction with the six sold to DHL Airways last week, concludes the disposition of the package of eight 727s operated by Air France that were

acquired by AARFSC under a forward purchase agreement."

AAR Corp. is a leading supplier of aerospace/aviation products and services. The company primarily distributes parts and equipment, performs technical services and manufactures proprietary products for the aviation industry in the United States and abroad.

ZANESVILLE, OH (MARCH 20) PR NEWSWIRE - Park National Corporation of Newark, Ohio ("Park") and Mutual Federal Savings Bank (NASDAQ: MFBZ) of Zanesville, Ohio ("Mutual Federal") announced today that they have signed a definitive agreement which provides for the acquisition of Mutual Federal by Park. Under the terms of the definitive agreement, Mutual Federal will merge with an interim institution subsidiary to be formed by Park.

In the proposed transaction, Mutual Federal's shareholders will receive a minimum of 166,582 shares of Park stock. The number of shares could increase to 180,000 if Mutual Federal meets certain revenue objectives set forth in the definitive agreement before a determination date, which is tied to the mailing of definitive proxy material for Mutual Federal stockholders, and which is expected to be in about two months. Park plans to make application for listing on the National Association of Securities Dealers Automated Quotations System in connection with the transaction. Mutual Federal shareholders would receive a minimum of approximately .1931 and a maximum of approximately .2086 of a share of Park stock for each share of Mutual Federal common stock. There is currently no active market in the stock of Park but a recent sale of which Park's management is aware occurred at $57 a share.

William A. Phillips, chairman and chief executive officer of Mutual Federal, said of the transaction, "A merger with Park will be good for our shareholders, our employees, and our customers in southeastern Ohio. Mutual Federal will continue to operate under its present name with its present board of directors and management as a subsidiary of Park. The merger will allow us to expand the products and services we offer to our customers in all the communities we serve."

William T. McConnell, president and chief executive officer of Park National Corporation, said, "The merger with Mutual Federal is a natural extension of Park's present market into six new counties in southeastern Ohio. In addition, Mutual Federal is a profitable and well-managed institution. We have known and respected the management of this fine institution for many years, and we look forward to being associated with

them."

Park National Corporation is a multi-bank holding company with assets totaling $812 million at Dec. 31, 1989. Park's subsidiary banks are headquartered in Licking, Fairfield and Richland Counties in Ohio. Mutual Federal, with assets of $309 million on Dec. 31, 1989, is headquartered in Muskingum County and operates ten branches in a six county area.

#90079p0065 03/20/1990 ~PR Newswire

DETROIT (MARCH 20) PR NEWSWIRE - The Greater Detroit Foreign Trade Zone, Inc. (GDFTZ) is initiating a two-year Canadian marketing project to educate Canadian manufacturing companies on the benefits of establishing operations in Greater Detroit Foreign Trade Zone locations. The program will capitalize on new opportunities under the U.S.-Canadian Free Trade Agreement.

The program will focus on attracting specific firms located in the provinces of Ontario and Quebec, whose operations involve the processing or assembly of imported components and who are entering or expanding sales to the U.S. market. These firms can obtain customs duty savings by locating in a Detroit-area foreign trade zone.

Funding for the initial two years of the program has been provided by the following sources: $50,000 a year from the Hudson-Webber Foundation; $25,000 a year from the Detroit Edison Foundation; $15,000 a year from the MichCon Foundation; and additional funding from the Ford Fund and Greater Detroit Foreign Trade Zone, Inc.

The advantages for Canadian firms in the foreign trade zone program were identified by research efforts of the GDFTZ and Stephen W. Guittard, a partner in the law firm of Clark, Klein and Beaumont. A Canadian company that manufactures goods adding less than 50-percent North American content must pay both Canadian duty on the imported parts and U.S. duty on the goods when selling to U.S. markets. By locating in a Detroit-area foreign trade zone, the company may delay duty during assembly and pay only U.S. duty on the imported components when they leave the zone. Generally, Canadian duty rates are higher than U.S. duty rates.

By the end of the initial two-year period, the Canadian Marketing Project hopes to locate at least six Canadian firms in Detroit-area foreign trade zone locations.

Greater Detroit Foreign Trade Zone, Inc. is a Michigan non-profit corporation authorized by the Federal Foreign Trade Zones Board to

establish and provide general administration to foreign trade zones in Southeast Michigan. Foreign trade zones are areas considered for customs purposes to be outside U.S. commerce. Imported goods may be stored, inspected, packaged, processed or assembled in a zone without duty payment. Duty is paid only when the goods are shipped from the zone into U.S. commerce.

The Greater Detroit Foreign Trade Zone is the largest foreign trade zone in the U.S. in terms of dollar volume and employment. In fiscal year 1989 ending Sept. 30, goods totaling $23 billion where shipped from Detroit zones.

LOWELL, MA (MARCH 20) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) today announced that the Stop & Shop Company, New England's largest supermarket chain, has purchased Wang VS computer systems and services valued at $4.3 million. Wang's VS systems were chosen after an extensive competitive selection process that included several other leading computer vendors.

The contract calls for Wang to deliver up to 125 VS 5440s to replace Stop & Shop's existing VS 65 systems. Related peripherals and communications products are also included in the purchase.

The VS 5440s will allow Stop & Shop to run integrated applications more quickly and at a lower total cost to Stop & Shop than any other system. They will also provide the company with a flexible architecture that can accomodate a wide range of advanced technologies.

The new systems will support over 50 current and future data processing applications. The existing applications will be migrated transparently from the VS 65s, thereby allowing Stop & Shop to continue its business operations with minimal disruption during the installation of the new system.

Prior to shipping, Wang will configure the hardware and software and perform systems integration testing to enable a smooth installation process.

The Stop & Shop Supermarket Co., one of the Stop & Shop Companies Inc., is the largest Supermarket chain in New England. The company operates 117 stores, including 59 super stores throughout Massachusetts, Connecticut, Rhode Island and New York.

Wang Laboratories Inc., headquartered in Lowell, Mass., is a leading worldwide supplier of computer-based information processing systems including text, image, and voice processing, as well as telecommunications and networking products.

CLEVELAND (MARCH 20) PR NEWSWIRE - Premier Industrial Corporation (NYSE: PRE) reported record third quarter and nine month results today.

For the three months ended Feb. 28, 1990, earnings per share rose to $.29 from $.26 a share reported last year, an increase of 12 percent. Net earnings were $16,947,000 compared with $15,639,000 in the prior period. Revenues for the quarter of $149,312,000 increased 2 percent compared with the $146,167,000 in revenues for last year.

For the nine months, record revenues of $458,396,000 were up 5 percent from the prior year amount. Record earnings per share of $.94 were 18 percent above the $.80 earned last year. Net earnings were $54,551,000, an increae of $4,141,000 over the first nine months of 1989.

Commenting on the record results, Premier Chairman Morton L. Mandel said, "We are generating good returns from our business. We continue to experience a lower rate of gain in our incoming order rate, and are watching operating expenses carefully. At the same time, we continue to invest in business-building moves to assure the profitable growth of the business." With regard to the full fiscal year, Mandel said, "Premier expects revenues and earnings in fiscal 1990 to set new records once again."

Premier Industrial Corporation (NYSE symbol PRE) is a broad line distributor of electronic components used in the production and maintenance of equipment, a supplier of maintenance products for industrial, commercial and institutional applications, and a manufacturer of high-performance fire-fighting accessories.

BOSTON (MARCH 20) PR NEWSWIRE - Gulf Resources & Chemical Corporation (NYSE: GRE) announced today that at an extraordinary general meeting held yesterday the shareholders of City Realties Limited (CRL) approved the acquisition of the 25 commercial New Zealand properties from GRE for $148.8 million by assuming indebtedness against the properties of $66 million and issuing 230 million shares of CRL (representing approximately 62 percent) to GRE at approximately $0.36 each. In addition the shareholders confirmed the appointment of David Rowland and Jeremy James, directors and officers of GRE, as directors of CRL.

The Securities Commission in New Zealand recently instituted proceedings against, among others, GRE and CRL, alleging that GRE did not report, in a timely manner, a relevant interest in a controlling shareholding of CRL. After a full hearing on the matter, the court ruled in favor of GRE.

The annual meeting of stockholders of GRE will be held on April 12, 1990. The proxy material and 1989 Annual Report to Shareholders are expected to be mailed shortly.

BRECKSVILLE, OH (MARCH 20) PR NEWSWIRE - The BFGoodrich Company (NYSE: GR) has increased its investment in DTM Corp. and now holds a majority position.

DTM has developed a DeskTop Manufacturing process called "Selective Laser Sintering" (SLS) that can be used for rapid prototype production.

SLS technology transforms computer-based images into solid, three-dimensional objects using a high-powered laser that sinters a powdered material. Compared with conventional methods, this process dramatically shortens the time required to produce prototype parts.

Various materials, including investment casting wax and engineering thermoplastic compounds, are suitable for use in this process, and BFGoodrich is managing a materials- development program for DTM.

"BFG brings extensive expertise in materials development, particularly in polymer technology, to this project," said Dr. David C. Bonner, vice president, research and development for BFGoodrich. "It also meshes with our goal of reducing the time required to design, test and commercialize new products."

In mid-1990, DTM will open two service bureaus to provide machine time or produce prototypes for customers. One will be located at DTM's Austin, Texas, facility and the other at BFG's research and development center in Brecksville. DTM will evaluate SLS technology through the service bureaus and plans to make SLS systems available to customers through a rental program.

BFGoodrich produces vinyl resins and compounds, specialty chemical products and supplies components and services to the aviation industry. Sales in 1989 totaled $2.4 billion.

MEDFORD, MA (MARCH 16) PR NEWSWIRE - Delta Dental Plan of Massachusetts, the largest group dental benefits provider in Massachusetts, has introduced the state's first -- and the nation's most comprehensive -- service guarantee in the insurance industry.

The seven-point guarantee ensures employers resolution of problems within one business day. Delta Dental Plan also guarantees cost savings of at least 10 percent for all claims paid during the policy year, and promises to send accurate ID cards within 15 calendar days. The guarantee program also includes a refund policy, a first for the industry.

Service guarantees can generate breakthrough service and change an industry, according to Christopher W.L. Hart, assistant professor at the Harvard Business School, where he teaches a course on service management.

Delta Dental Plan's Guarantee of Service Excellence encompasses seven major points:

1. Resolution of problems or at least a status update within one business day or $50 refund.

2. Cost savings of at least 10 percent for all claims paid during the

year or accounts will be paid the difference in savings.

3. Accurate I.D. cards for subscribers within 15 calendar days or $25 refund.

4. At least 85 percent of claims will be accurately processed within 15 calendar days or one month's administration fee will be free.

5. Smooth conversion or start-up for new accounts or one month's administration fee will be free.

6. Covered individuals will not be balance billed, i.e., billed for any differences between services provided and Delta Dental Plan's contract allowances or a $50 refund.

7. Monthly management reports within 10 calendar days following the end of the month or a $50 refund.

Founded in 1966, Delta Dental Plan is the largest provider of group dental benefits in Massachusetts. The company is committed to improving access to quality dental care, while controlling dental costs. A member of the national Delta Dental Plans Association, the company is headquartered in Medford, Mass.

CONTACT: Julie Laukkanen or Lisa Strawbridge, both of Cone Communications for Delta Dental Plan, 617-227-2111.

NEW YORK (MARCH 20) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) announced today it has agreed to sell its refining and fuels marketing business in Italy as part of its continuing worldwide strategy to concentrate resources in its most competitive businesses.

Under the agreement, an affiliate of Kuwait Petroleum Corporation will purchase the shares of Mobil Oil Italiana, S.p.A., which owns a refinery and associated aromatics plant in Naples as well as a service station network selling fuels and motor oils, and other fuels businesses. Mobil will form a new affiliate to continue its sales of lubricants in Italy, other than those associated with the former service stations.

The agreement does not include Mobil Chemical Company's operations in Italy, consisting of a films plant in Brindisi and offices in Milan. Mobil will continue to develop its other refining and marketing operations in Europe.

"Mobil is building a strongly competitive marketing and refining network

around the world based on highly efficient assets," Allen E. Murray, Mobil chairman and chief executive, said. "The outlook for Mobil achieving a fully competitive fuels business in Italy is uncertain. This move will enable Mobil to redeploy in areas where we are more strongly situated."

Included in the sale are Mobil's 100,000 barrels-a-day fuels refinery in Naples, an adjoining aromatics plant and about 2,000 branded service stations.

The total amount to be paid will reflect inventory, other working capital items and third party debt and will depend on the balance sheet as of the closing date, but is expected to be about $300 million.

The sale should be completed by May 31.

CONTACT: John Lord of Mobil, 212-883-3232.

WILMINGTON, DE (MARCH 20) PR NEWSWIRE - Du Pont (NYSE: DD) today announced the development of a high-strength polyamide fiber that will improve the performance and durability of tires and mechanical rubber goods.

"Hyten" monofilament fiber is 38 percent stronger than polyester cord and 10 percent stronger than conventional nylon cord. "Hyten" is used as a sidewall reinforcement for tires as a replacement of conventional twisted tire cords.

The company said most major tire manufacturers worldwide have tested the fiber, which is expected to be used in several high-performance tires this

year.

The fiber's shape simplifies the tire manufacturing process, and permits a five to 15 percent material savings, depending on the construction and type of tire.

"These properties allow designers to build tires that handle better and are safer, lighter and more durable than conventional tires," said Cas Chaban, new products venture manager for Du Pont industrial nylon. "Because of the monofilament design, tire running temperatures also are reduced."

"'Hyten' also has specialized applications such as hoses, belting and ropes, as well as sporting goods applications like fishing lines and tennis racket strings," Chaban said.

Du Pont is manufacturing "Hyten" in a market development facility at its Chattanooga, Tenn., plant. The facility has capacity for several million pounds a year.

In addition to its Chattanooga plant, Du Pont manufactures industrial nylon at Richmond, Va., Kingston, Canada, and Berazategui, Argentina. Later this year, the company will start up a plant in Izmit, Turkey, through DUSA, its joint venture with the Sabanci Holding Co.

Du Pont also has formed a joint venture, Thapar Du Pont Limited, with the Ballarpur Industries Ltd. to manufacture industrial nylon in India and recently announced plans to build plants for nylon intermediates and downstream manufacturing in the Asia Pacific region.

SPOKANE (MARCH 20) PR NEWSWIRE - Montana Precision Mining Ltd. (NASDAQ: MPML) announced today that it has entered into a general agreement with Smogless S.p.A. and Xytel Corp. for the purpose of commercializing the Skygas process.

Skygas is a photo-electrokinetic process for converting solid and semi-solid wastes into a clean-burning medium BTU gas that can be used for producing steam or electric power. The composition of this gas also offers the potential for conversion into valuable chemicals such as methanol and ammonia.

According to Serge Randhava, chairman of Xytel, Skygas overcomes many of the problems associated with other disposal processes. "Skygas welcomes

wet feedstocks which have proven to be a major stumbling block for mass incineration," Randhave explained. "Plus, even when we spiked the feed with PVC, we found no evidence of dioxins in either the product gas or ash."

Under the terms of the agreement, Smogless will finance, engineer, build and operate a commercial Skygas unit in Italy. "Our first plant will be designed for the disposal of municipal sewage sludge," said Dr. Gilberto Cominetta, president of Smogless. "After that, we intend to address other problems such as refuse derived fuel (RDF), medical and infectious wastes, industrial sludges, and various types of biomass," adds Dr. Cominetta.

Xytel will continue to handle all promotional work, public relations, advertising, marketing and licensing activities associated with Skygas. "We have already fielded more than 250 Skygas inquiries," said Randhava. "However, for the time being, we're going to focus our attention on the most promising applications only."

Smogless S.p.A., headquartered in Milan, Italy, specializes in designing and constructing plants for treating municipal and industrial wastes and effluents. With over 30 years of experience in the field of environmental protection engineering, Smogless is well recognized in Europe as a leader in the fields of air, water and soil pollution control.

Xytel Corp., Mt. Prospect, Ill., is the world's leading designer and manufacturer of advanced process and product research systems for the petroleum, petrochemical, chemical, pulp and paper, and food industries. In its 15-year history, Xytel has completed 600-plus projects for 168 customers in 21 countries. Xytel has joint ventures and affiliations in the United States, Europe, Japan and the People's Republic of China.

Montana Precision Mining Ltd., with offices in Spokane and Eureka, Mont., is involved in waste-to-energy projects and in exploration and development of mining properties.

LOS ANGELES (MARCH 20) PR NEWSWIRE - Capitol/Nashville and Curb Records have entered into a joint venture to release product under the Curb/Capitol Nashville label, it was announced today by Jimmy Bowen, president, Capitol/Nashville and Dick Whitehouse, president, Curb Records Country Division.

The joint venture will allow Capitol/Nashville to benefit from Curb Records' proven skills at developing top country talent, while giving Curb

the resources of Capitol's marketing and promotion team.

This agreement extends Capitol/Nashville's relationship with recording artist Sawyer Brown (who were previously signed to Capitol/ Nashville through a production deal with Curb Records) for five years. The popular country band will now be released on the Curb/ Capitol Nashville label. Additional artists who will be released on the joint label include two new female country vocalists, Cee Cee Chapman (who will be produced by Bowen) and Jara Lane. Other country artists will be announced in the near future.

Additionally, the new agreement establishes a relationship between Curb and Capitol for Curb to license select Capitol Records master recordings (subject to Capitol's own release plans) for inclusion on Curb Records or Curb/Capitol Nashville compilation albums.

Commenting on the joint venture, Bowen said, "Curb Records has continually demonstrated its ability to be a major creative force in country music, discovering and developing a number of the industry's top artists. I feel the combined strengths of Curb and Capitol Nashville will further enhance our position in the country field."

Added Waterhouse, "We've worked successfully with Bowen and with Capitol over the years, and the Curb/Capitol Nashville relationship permits us to start the '90s with the best of both worlds."

CINCINNATI (MARCH 20) PR NEWSWIRE - The United Brands Company (NYSE: UB) announced that its name officially becomes Chiquita Brands International, Inc. today. Its new stock symbol is "CQB."

Stock for Chiquita Brands International is listed on the New York, Boston and Pacific Exchanges.

"We are adopting our universally recognized brand name for the corporation " said Keith E. Lindner, president and chief operating officer, "because as our name-change notice states, 'People Know Our New Name Better Than Our Old One.'

"We believe it is in the company's best interest to increase its visibility in order to maximize opportunities for expansion and long- term growth in shareholder value. Over the last six years, we have made significant changes to improve our consumer marketing thrust, in our effort to become a global leader in premium branded foods," Lindner said.

The company's performance has benefited from this value-added marketing philosophy, achieving more than a 15-percent annual growth in earnings per share since 1984.

Today, the company is the world's premier marketer of fresh fruits and vegetables. "We offer a broad line, but bananas are our foundation. They create the pipeline for us in the fresh produce business and can lead to more profitable expansion. The Chiquita brand is known globally for superior quality and good nutrition," Lindner explained.

Due to recent world changes, the company is preparing for new market opportunities. Lindner said management has been implementing strategies to benefit from the European Community becoming a single market in 1992. In addition, he sees unprecedented sales potential in the underdeveloped Eastern-block nations. "Eastern Europeans have shown a strong demand for our fresh fruit. We have already entered into agreements with the Soviet Union and Czechoslovakia, which allow for the successful sale of our products," Lindner said.

He pointed out that the new name does not change the strategic direction of the company. "We plan to continue growing all our brands such as Pascual in Europe, John Morrell and Rath Black Hawk in the United States and Numar in Latin America," Lindner explained.

Chiquita Brands International's heritage spans more than 100 years in both its fruit and meat businesses. Total worldwide sales were $3.8 billion in 1989. The company markets, distributes, processes and produces fresh and prepared foods in approximately 40 countries in the Americas, Europe, the Middle East and the Far East.

BRANCHBURG, NJ (MARCH 20) PR NEWSWIRE - Air & Water Technologies Corporation (AMEX: AWT) announced today that its Research-Cottrell Companies has entered into an agreement with Noell GmbH and KRC Umwelttechnik GmbH to cooperate on an exclusive basis in the marketing and sale of Research-Cottrell's proprietary wet flue gas desulfurization systems in the United States, Canada and elsewhere in the world. Noell-KRC is a preeminent environmental engineering and construction company headquartered in Wurzburg, Germany. Noell-KRC is owned by the Salzgitter Group, a leading European conglomerate.

Under the agreement, Research-Cottrell will receive substantial license fees, commissions and royalties. Noell-KRC is exclusively responsible for project execution and all legal and commercial risks associated herewith. Further, Noell-KRC is obligated to bid responsively all projects identified by Research-Cottrell and to provide bonding or other financial requirments stipulated in such bids. On a case-by-case basis,

Research-Cotrell and Noell-KRC may agree upon participation by Research-Cottrell in project management, construction, start-up and other phases of project execution. Research-Cottrell retains exclusive rights to provide other technologies that often accompany the installation of FGD systems.

Research-Cottrell's proprietary Double-Loop(tm) Wet Flue Gas Desulfurization Scrubber is the world leader in wet limestone sulfur dioxide control technology with more installed and operating capacity than operating than any other. Since its Double-Loop Scrubber was introduced in the mid-1970s, Research-Cottrell has designed and installed sixteen scrubbers in the United States. An additional twelve systems have been designed and installed in West Germany by Noell-KRC pursuant to license from Research-Cottrell. Several of these installations in each country represent current reference technology.

The Double-Loop Scrubber is a technologically superior, highly efficient desulfurization system which produces high-grade gypsum as a byproduct. This byproduct gypsum has replaced natural gypsum in the manufacture of wallboard in both the U.S. and West Germany. Considering its favoraable chemical and fire resistant properties, the potential for increased use of the byproduct gypsum in the construction and waste management industries is profound.

Air & Water Technologies Corporation, through its operating units, Research-Cottrell, Metcalf & Eddy Companies Inc. (NASDAQ: METC), and Residuals Management provides a broad range of environmental services in the areas of air pollution control, water resource management, and waste by-product disposal and reuse.

WYOMISSING, PA (MARCH 20) PR NEWSWIRE - VF Corporation (NYSE: VFC) today announced that the Lee Company would be closing two plants located in Georgia and Alabama. According to Lawrence R. Pugh, chairman and chief executive officer, the closings were required to bring Lee's production capacity more in line with projected demand.

"Although we regret the necessity for taking this action, the closings are part of our overall program to improve operations and financial results at the Lee Company. We still expect shipments by Lee during 1990 to approximate those of 1989 and we believe that, with increased plant efficiencies, we can deliver those shipments with fewer plants," said Pugh.

As a consequence of this action, VF will report a one-time charge in its first quarter in excess of $3 million. Because of this charge, plus a first quarter sales shortfall and continued operating deficiencies at Lee, and a sales decline at Jantzen, consolidate earnings per share for VF Corporation are expected to be down approximately 35 percent from those reported in the first quarter of 1989.

"Despite this obviously disappointing result," said Pugh, "we are still anticipating an increase in net income for the year and, as I have previously stated, earnings per share should increase in excess of 10 percent of 1989. Our other companies are performing well and we expect

substantial gains in third and fourth quarter results over last year."

PLANT CITY, FL (MARCH 20) PR NEWSWIRE - Paradise Fruit Company, Inc. (NASDAQ: PAF) announced after-tax earnings for the year ended Dec. 31, 1989, of $881,503, or $1.76 per share, as compared to $738,003, or $1.49 per share, for the prior year.

Included in the 1989 earnings is an extraordinary item of $114,076, or $.13 per share, arising from insurance payments of a storm damage claim during the year. There were no extraordinary items in the 1988 earnings report.

Sales for 1989 were $21,326,841, as compared to $21,123,671 for the prior year.

Paradise is regarded as the world's largest producer of glace candied fruits and peels, which are primary ingredients of many confections and are sold both to commercial bakers, and packaged for retail sale in supermarkets to homemakers. The company also operates a plastics molding division, which accounts for nearly 20 percent of sales.

Paradise Fruit Company, Inc. has over 350,000 square feet of office and manufacturing facilities at its 12-acre headquarters complex located in Plant City, Fla.

ST. LOUIS (MARCH 19) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) today conducted its first flight test of an aircraft part made of superplastically formed aluminum-lithium, an alloy that is about 10 percent lighter than conventional aluminum.

McDonnell Douglas is using the air refueling receptacle fairing of an F-15 Eagle fighter aircraft for the tests. The forward half of the fairing, normally composed of three aluminum parts, was replaced with one aluminum-lithium part shaped through superplastic forming.

Flight testing is expected to lead to further use of the alloy in McDonnell Douglas combat aircraft.

Advanced manufacturing facilities used in making aircraft parts from the alloy are in place at the McDonnell Aircraft division here.

The Aluminum Company of Canada (ALCAN) produced the aluminum- lithium alloy being used in the test program. A new press at McDonnell Aircraft Co. designed specifically for superplastic forming was used to shape the alloy into the test fairing. An ALCAN subsidiary, Superform USA of Riverside, Calif., designed the press.

The F-15 used in the test program is leased by McDonnell Douglas from the U.S. Air Force. The aircraft serves as a flying testbed for new materials and technologies.

#90079p0122 03/20/1990 ~PR Newswire
JACKSON, MI (MARCH 20) PR NEWSWIRE - Patrick Petroleum Company (NYSE: PPC) today announced net earnings for its fiscal year and fourth quarter ended Dec. 31, 1989. The company also reported for its third consecutive year strong gains in its gas reserve and production levels, oil and gas sales and general operating position.

The company reported a net earnings increase of 11 percent to $861,997, or 8 cents a share on 11,332,492 weighted average shares outstanding, vs. $776,544, or 10 cents a share on 7,824,786 shares a year ago. The 45-percent increase in weighted average shares outstanding in 1989 resulted primarily from conversions of the company's remaining $16.3 million of 8 percent convertible subordinated debentures.

Total 1989 revenues rose 9 percent to $13,283,762 from $12,234,893 the

year before. Oil and gas sales improved 19 percent to $10,441,106, or 79 percent of total revenues, vs. $8,763,347, or 72 percent of revenues, a year ago, reflecting increasing contributions from Patrick's primary business. Expenses of $12,421,765, vs. $11,458,349, primarily reflected increased levels of operations.

Net earnings for the fourth quarter of 1989 were $266,082, or 2 cents a share, vs. $349,846, or 4 cents a share on fewer shares a year ago. Fourth-quarter revenues for 1989 decreased 6 percent to $3,588,781, vs. $3,800,003 in 1988, due to certain non-recurring items in the year-ago quarter. Expenses were $3,322,699, vs. $3,450,157 in the year-ago fourth quarter.

Company President U.E. (Pat) Patrick stated, "Among our most significant developments of the year, the company's common equity position was increased 54 percent to $54,151,198, primarily as a result of the debenture conversions. Total assets were $87,851,181, up 5 percent. Gas and oil production levels were up 51 percent and 21 percent, respectively, primarily due to acquisitions. Our total proved reserves rose 7 percent to 5.9 million barrels, on an equivalent barrel basis (using a 6 Mcf per barrel ratio), again, largely due to acquisitions."

Patrick Petroleum Company is an independent exploration and production company listed on the New York Stock Exchange since 1976 (symbol -- PPC). The company has interests in producing properties and undeveloped acreage in 13 states, including various interests in approximately 549 oil and gas wells located primarily in Michigan, North Dakota, Texas, Oklahoma and Louisiana.

CONTACT: Phillip J. McAndrews or Skip LaRoe of Patrick Petroleum Company, 517-787-6633; or Woody Wallace of The Investor Relations Company, 708-564-5610, for Patrick Petroleum Company.

#90079p0125 03/20/1990 ~PR Newswire

NEW YORK (MARCH 20) PR NEWSWIRE - A W. R. Grace & Co. (NYSE: GRA) subsidiary today announced that its Davison Chemical Division of Baltimore Md. will spend $10.5 million to build a second specialty catalyst plant in Curtis Bay, Md.

This new plant will increase Davison's capacity by 50 percent for the Magnapore catalyst, which is used in the production of polyethylene. The facility is scheduled to be operational by the end of this year.

Davison is a unit of Grace Specialty Chemicals Co., the world's largest specialty chemicals company, with 1989 sales of $3.3 billion. The expansion of this plant is part of Grace Specialty Chemicals' 1990 capital

expenditure program of $300 million.

"The catalysts produced by Grace are critical to the production of high-density polyethylene, and it is our intention to make certain that the requirements of that industry are served all over the world," according to Donald H. Kohnken, president of Grace Specialty Chemicals.

Magnapore catalyst is used in Phillips Process polyethylene plants, which operate around the world. Resins produced from the Magnapore catalyst are used in a wide variety of products including pipes, bags for food and consumer use and blow-molded materials such as automobile gas tanks. Because of these resins' superior strength and rigidity, as well as improved resistance to environmental aging, they are also increasingly used in landfills as plastic liners and caps.

The new facility has been designed with a state-of-the-art emission control system so that there will be no increase in the total discharge of regulated substances at the Curtis Bay complex.

Davison has developed proprietary catalytic know-how for petroleum refining and other chemical processes and provides its customers with full technical support.

Grace is an international specialty chemical company with interests in energy, manufacturing and services businesses with sales exceeding $6 billion.

#90079p0126 03/20/1990 ~PR Newswire

ROCKVILLE, MD (MARCH 20) PR NEWSWIRE - Contel ASC today announced the signing of a contract with Tass, the news agency of the Soviet Union, to provide a satellite based data communications network.

The contract is valued at approximately $3 million. Tass will use the privately owned and operated data communications network to exchange news dispatches with bureaus both inside the Soviet Union and abroad. The new network will support the data broadcast requirements of Tass, as well as two-way data, fax and voice requirements. The data broadcast segment enables subscribers to receive text, facsimile, and photo information at a speed of 9.6 kilobits per second, which is 10 times faster than their existing system.

"The democratic reforms currently taking place in the Soviet Union and the improved relations with the United States have enabled Tass to cooperate fruitfully with American companies. One example of this cooperation is

the signing of a contract with Contel ASC," said Igor Yershov, Tass deputy general director, who took part in concluding the contract between Tass and Contel ASC.

The data network will enable Tass to transmit its news services via a global satellite communications network provided by Intelsat. The network will cover the Soviet Union, Europe, Africa, Asia, South America, and most of North America. Initial system delivery is scheduled for the end of 1990.

Contel ASC will provide two master uplink stations to transmit two- way data services to 48 Tass bureaus located all over the world. In addition, Contel ASC will also provide a master uplink station, to provide one-way data broadcast, and small satellite dishes at 30 to 40 remote sites so that smaller bureaus and customer locations can receive newswire broadcasts. The contract also provides for the training of Tass personnel both on site and at Contel ASC facilities in the United States.

Contel ASC provides similar data networks for the transmission of news services to the Associated Press, Reuters, and Agencia EFE, Spain's leading news agency.

Contel ASC, a subsidiary of Contel Corporation (NYSE: CTC), provides data communications networks using satellite-based technology to domestic and international customers. Contel Corporation, a company with $3 billion in annual revenues and sales, provides a broad range of telecommunications products and services.

RICHMOND, VA (MARCH 20) PR NEWSWIRE - In an effort to help preserve some of the country's most significant historic buildings, Orkin Exterminating Co. is making a national commitment to donate termite treatments for selected sites, including Richmond's John Marshall House.

Chief Justice John Marshall, who served on the Supreme Court for nearly half a century, built the home for his family in the late 1700s. The house still holds Marshall's personal possessions including books, furniture, silver and other early 19th Century objects.

"The John Marshall House symbolizes our local heritage and pride. We want to do everything we can to ensure it remains in excellent condition," said Charlie Thomas, branch manager for Orkin.

"Unfortunately, nature can impose costly and often irreversible damage if

preventive steps aren't taken. Orkin's donation will ensure termites don't become one of nature's culprits," Thomas said.

According to Orkin's consumer specialist, Judy Donner, termites can cause thousands of dollar's worth of damage before they are discovered.

"The John Marshall House has undergone remarkably few changes since Marshall's ownership. The Association for the Preservation of Virginia Antiquities has done an outstanding job in maintaining the home," said Donner.

In addition to Richmond, other cities receiving the company's services include: Los Angeles, Atlanta, St. Louis, Miami, Tampa, Fla., Orlando, Fla., Norfolk, Va., Greensboro, N.C., and Raleigh, N. C.

"The warm, moist climates these cities offer provide termites with the ideal conditions to breed and survive. Each city was included on Orkin's listing of the nation's 'Top 20 Termite Cities' for 1989. Richmond is ranked no. 19 on the list," she added.

Donner said the only way to deter termites is to keep on top of the situation -- look for infestation signs and call in a professional to inspect areas the untrained eye would miss.

"Once a termite colony gets into a building, they will eat nonstop -- literally working 24 hours a day, 365 days a year,."

Because termites work from the inside of the wood, they can cause severe internal damage before it is obvious externally.

Orkin is the world's largest pest control and termite control company, with more than 330 branches throughout the U.S. Its parent company, Rollins Inc., is headquartered in Atlanta.

DALLAS (MARCH 20) PR NEWSWIRE - International Telecharge, Inc. (AMEX: ITI) announced today that it had net income of $206,000, or 1 cent per share (both primary and fully diluted), on revenues of $68,037,000 for the fourth quarter ended Dec. 31, 1989.

This compares with net income of $835,000, or 5 cents per share, on revenues of $77,924,000 for the third quarter ended Sept. 30, 1989, and with net income of $177,000, or 1 cent per share, on revenues of

$54,714,000 for the fourth quarter ended Dec. 31, 1988.

The company reported a net loss of $7,135,000, or 46 cents per share, on revenues of $274,513,000 for the 12 months ended Dec. 31, 1989, compared with net income of $6,266,000, or 35 cents per share, on revenues of $184,158,000 for the 12 months ended Dec. 31, 1988.

The company has now reported two consecutive profitable quarters following the $8,680,000 loss reported for the second quarter of 1989. The second quarter loss was attributed to one-time adjustments to certain of the company's receivables, an inventory write-down for a discontinued telephone equipment product line, and to a slower than expected increase in revenues and traffic from public pay-phones.

Fourth-quarter 1989 results of operations were favorably impacted by the company's cost reduction efforts. Sales, general and administrative expenses totaled $11,768,000 in the fourth quarter, a decline of 23 percent from third-quarter expenses of $15,286,000. Fourth-quarter 1989 net income also includes federal income tax carry-backs of $294,000, and certain other infrequently occurring items that have a net positive impact of $961,000.

ITI is a leading national telecommunications supplier of network- based operator and information services primarily to hotels, hospitals, pay-phone owners, and other interexchange carriers. The company's headquarters are located in Dallas.

#90079p0139 03/20/1990 ~PR Newswire

DALLAS (MARCH 20) PR NEWSWIRE - Selected 7-Eleven stores across the country will be made available as "census information centers" for the upcoming U.S. Census Bureau's "Census '90," the nation's most extensive population count.

Approximately 1,200 stores will provide space for volunteers from a number of minority organizations who will answer consumer questions about the Census '90 effort. Another 5,000 U.S. 7-Eleven stores not serving as information centers will post signs encouraging customers to complete a census questionnaire.

"We're pleased to be working with the Census Bureau and minority organizations to help make people more aware of how important the census can be to them," said Dick Dole, executive vice president and chief operating officer of The Southland Corporation, operator and franchiser of 7-Eleven stores.

"7-Eleven is doing its part to help let our customers know the importance of Census '90 so that they and their communities may benefit from an accurate, complete count," Dole said.

7-Eleven is working with national and local branches of the National Association for the Advancement of Colored People (NAACP), the League of Latin American Citizens (LULAC), the National Black Congress of Political Women (NBCPW), the National Black Caucus of State Legislators (NBCSL), Mexican-American Legal Defense and Education Fund (MALDEF), U.S. Hispanic Chamber of Commerce (USHCC), and the National Puerto Rican Coalition, Inc. in the Census '90 campaign.

7-Eleven has joined with these minority organizations as part of an effort to increase the number of minorities who complete the census questionnaire.

In past years, the minority population has clearly been undercounted. For example, the Census Bureau reports that the 1980 Census failed to count 4 to 6 percent of the African-American population. And estimates of the Hispanic population undercount are even higher.

"A large portion of those missed during the 1980 Census were those most in need of public services," said Benjamin Hooks, NAACP executive director. "We cannot afford another substantial census undercount. A complete, accurate count is essential to ensure proper public services and government representation."

Tony Bonilla, chairman of the National Hispanic Leadership Conference, agrees. "We must show the benefits of being counted. Public funds for schools, hospitals and other services, as well as government representation are impacted by information gathered in the census. It is our community responsibility to be counted."

Fear is the primary reason many people don't complete the census questionnaire.

"Some people believe that we share information we gather with other departments like immigration or welfare," said Peter Bounpane, assistant director of the Census Bureau. "That is not true. Census personnel take an oath to uphold the confidentiality of the information they gather. Failure to do so can mean five years in prison and $5,000 in fines.

"We are committed to providing the nation with an accurate census count. And with the help of community organizations and businesses, our job of educating the public about the importance of the census and gathering information will be made much easier," Bounpane said.

Southland, with approximately $8 billion in annual sales, is the world's

largest convenience retailer. The company includes approximately 7,000 7-Eleven and other convenience units in the United States and Canada that are supported by five Southland distribution centers and the Southland foods division's six food centers. In addition, area licensees and affiliates operate over 5,900 7-Eleven stores in the United States and 21 foreign countries.

#90079p0140 03/20/1990 ~PR Newswire

ANCHORAGE, AL (MARCH 20) PR NEWSWIRE - Martech USA, Inc. (NASDAQ: MUSA) today reported results for the quarter ended Feb. 28, 1990.

Revenue for the quarter was $9,508,218, more than triple the $2,513,087 reported for the same period one year ago. Net income was $1,453,738, or 17 cents per share, as compared to a loss of $395,429, or 3 cents per share, during the same three-month period in fiscal 1989.

For the six months, revenue was $22,169,053 vs. $8,024,270. Net income for the period was $3,991,795, or 41 cents per share, vs. a loss of $667,939, or 6 cents per share.

"Our results for the quarter reflect our participation in the cleanup of the recent oil spill of Huntington Beach, Calif., as well as strong demand for the company's hazardous waste control services," said Ben C. Tisdale, president and chief executive officer. "We are particularly gratified by the performance as the second quarter of our fiscal year is traditionally our slowest."

Tisdale noted that the company's revenues during the first six months of fiscal 1990 demonstrates the diversification of Martech's business. Approximately 42 percent of revenues were derived from marine construction and service activities, while another 31 percent was generated from hazardous waste cleanup projects. The final 27 percent was generated from marine oil-pollution control.

"We have been able to maintain operating margins in excess of 20 percent during the first half of 1990 and continue to contain overhead expenses," Tisdale added. "We are highly confident that results for the year will meet or exceed analysts expectations."

Martech USA provides a comprehensive range of marine pollution control services, specialized marine services and on-shore field-related environmental remediation services.

#90079p0144 03/20/1990 ~PR Newswire

LANDOVER, MD (MARCH 20) PR NEWSWIRE - Hechinger Company (NASDAQ-NMS: HECHA, HECHB), which operates a chain of specialty, retail, do-it-yourself home centers, today announced sales and earnings for the year and for the fourth quarter ended Feb. 3, 1990.

Sales for the year were up 21 percent to $1.23 billion from $1.02 billion last year. Earnings, after adoption of SFAS 96, Accounting for Income Taxes, which added $3.2 million ($.07 per share), were $34.2 million, $.95 per fully diluted share, down from $48.8 million, $1.30 per fully diluted share. Comparable store sales were ahead 2 percent for the year just ended.

Sales for the fourth quarter ended February 3, 1990, were $310.9 million, up 26% from $245.9 million last year. Net earnings were $8.5 million, $.24 per fully diluted share, compared to $12.9 million, $.34 per fully diluted share, in last year's fourth quarter. Comparable store sales were up 3 percent for the fourth quarter.

In commenting on the year, John W. Hechinger, Jr., President and Chief Executive Officer stated, "The year just ended was a difficult one for the company in that earnings were down for the first time since we became a public company in 1972. Early in 1989 a number of long-term strategic decisions were made that adversely impacted short-term earnings, but which better positioned the company to move into the 1990's as a stronger, more

competitive force. During 1989, 67 stores were remodelled to accommodate the company's most recent thinking on merchandise presentation.

"Improved merchandise handling techniques enabled us to consolidate our total warehouse requirements and close our Charlotte distribution center. The success of this major effort allowed us to dramatically reduce warehouse space, while improving service levels to our stores. Costs associated with these and other related efforts amounted to approximately $8.0 million in 1989, and approximately $3.0 million in the fourth quarter. We expect the benefits of these efforts to be realized in 1990 and later years.

"The company also announced consummation of the merger transaction, of HECO, Inc., a company wholly owned by members of the families of John W. Hechinger, Sr. and Richard England, with Hechinger Company. The transaction was approved by stockholders of the Company at a Special Meeting on Nov. 20, 1989. As a result of the merger, Hechinger Company stock previously held by HECO is now owned directly by the members of the Hechinger and England families.

The company plans to open three Hechinger stores and twelve Home Quarters Warehouse stores in 1990. The major expansion thrust will be the Boston market where four HQ stores are scheduled for fiscal 1990, with initial openings in the summer as previously announced. Ultimate plans call for twelve to fifteen stores in the Greater Boston Region.

#90079p0158 03/20/1990 ~PR Newswire

OMAHA, NE (MARCH 20) PR NEWSWIRE - ConAgra Inc. (NYSE: CAG) today reported record earnings for fiscal year 1990's third quarter and first nine months ended Feb. 25.

Third quarter earnings per share rose 16 percent to 36 cents from 31 cents in the previous year's third quarter. Net income was up 18 percent to $44.2 million from $37.6 million. Pretax earnings increased 9 percent to $67.1 million from $61.3 million. Net sales gained 33 percent to $3.63 billion from $2.72 billion.

Nine month earnings per share rose 16 percent to $1.28 from $1.10 in last year's first nine months. Net income was up 19 percent to $158.2 million from $132.5 million. Pretax earnings increased 18 percent to $246.2 million from $208.9 million.

Third quarter and nine month per share results reflect a three-for-two

split of ConAgra's common stock effective Dec. 1, 1989.

Charles M. Harper, ConAgra's chairman and chief executive officer, commented: "We've often emphasized the strength ConAgra derives from our strategy to grow across the food chain. This year our company has abundant evidence of exciting food chain activity ranging from successful new consumer products to international growth. Moreover, ConAgra's results this year once again underscore the balance food chain participation gives our company as we enter the home stretch toward our tenth straight year of record earnings."

During the third quarter and nine months, ConAgra's largest industry segment, Prepared Foods, had a significant operating profit gain.

The consumer frozen foods business registered a healthy gain in third quarter operating profit, and earnings were up through nine months. The very successful Healthy Choice dinner line continued to enjoy volume growth; the new Healthy Choice entree line and Kid Cuisine both are now near national distribution.

The center-of-the-plate businesses, fresh meat and poultry products, in total achieved excellent third quarter and nine month operating profit growth led by gains in the beef business. The chicken products business had good earnings, though behind last year's strong results due to lower selling prices and margins in the third quarter. Earnings were down in the turkey products business. Pork results were weak for ConAgra and the industry.

Lamb-Weston, a frozen potato products business 50-percent owned by ConAgra was an important contributor to third quarter and nine month earnings growth in the Prepared Foods segment. Other businesses contributing to the segment's operating profit increase included pet accessories, dairy and food oils, and the foodservice products business. Branded processed meats' results were down in the third quarter but ahead through nine months. Seafood earnings declined due to difficult industry conditions.

Third quarter and nine month operating profit rose in ConAgra's Trading and Processing segment. Sources of the gain included grain merchandising, processing operations in Spain and Portugal, and sharp improvement in an industrial foods trading business. Oat processing earnings were substantial in the third quarter, although trailing last year, and were well ahead through nine months. Flour milling results were below last year's strong levels.

In ConAgra's Agri-Products industry segment, operating profit was up through nine months and down in the third quarter. Specialty retailing third quarter and nine month earnings were up significantly. The crop protection chemicals business had a good nine month operating profit gain;

earnings were down in the third quarter which is seasonally less significant for this business. Fertilizer margins and results are tracking lower this fiscal year due to excess industry supply earlier in the year.

ConAgra's Finance Companies also contributed to the company's third quarter and nine month earnings growth.

Fiscal 1990 nine month results include two nonrecurring items previously reported for the first quarter. The items were a $26.9 million after-tax gain from settlement of litigation related to Holly Farms Corp. and a $24.8 million after-tax provision for realigning processed meats operations. The net gain from these items was $2.1 million after tax and 2 cents per share.

The fiscal 1990 third quarter effective tax rate was 34 percent versus 38.7 percent the prior year. Equity in earnings of unconsolidated subsidiaries are much higher this year. Most taxes on these earnings are provided for before the earnings are included in ConAgra's results.

The major source of ConAgra's third quarter and nine month sales growth was SIPCO, formerly known as Swift Independent Packing Co. No SIPCO sales were included in ConAgra's results during fiscal 1989 when ConAgra owned 50 percent of the business. ConAgra acquired the remaining 50 percent of SIPCO effective the beginning of fiscal 1990, and all SIPCO sales are included in this year's results. SIPCO also was the main source of the rise in interest expense.

#90079p0162 03/20/1990 ~PR Newswire

LOUISVILLE, KY (MARCH 20) PR NEWSWIRE - Noting improved performance by both its hospitals and its health plans, Humana Inc. (NYSE: HUM) reported a 22 percent increase in net income for the three months ended February 28 the company's fiscal second quarter.

Net income advanced to $75,861,000 or 75 cents per share from $62,430,000 or 63 cents a year ago. Revenues for the quarter grew 19 percent to $1,192,501,000 from $1,005,512,000.

Humana's hospitals had operating income of $159,378,000 in the quarter, up from $144,911,000, while revenues grew to $889,167,000 from $774,468,000. On a same-hospital basis admissions rose 5 percent, bolstered by a 27 percent advance in admissions of Humana health plan members and an increase in flu-related cases.

Humana's health plans posted their best quarter since they began operating profitably in the second quarter last year. Their operating income reached $12,827,000, compared with $1,904,000 a year ago. Revenues advanced 34 percent, to $359,808,000 from $267,795,000 a year ago. Hospital revenues paid by Humana health plans, eliminated in the consolidated total, stood at $56,474,000, up from $36,751,000. Membership in Humana health plans increased to 1,069,900 at the end of the quarter from 884,000 a year earlier.

For the six months ended February 28, net income increased to $139,241,000 or $1.38 per share from $116,990,000 or $1.18 a year ago, and revenues grew to $2,299,953,000 from $1,944,002,000.

Humana operates 85 hospitals, having completed the acquisition of the 301-bed Pembroke Pines General Hospital, Pembroke Pines, Fla., and the 112-bed Village Oaks Regional Hospital, San Antonio, Tex., after the end of the quarter. The integrated health care company also offers a variety of health benefit plans for employee groups and Medicare beneficiaries.

PLANT CITY, FL (MARCH 20) PR NEWSWIRE - Paradise Fruit Company, Inc. (NASDAQ: PAF) announced after-tax earnings for the year ended Dec. 31, 1989, of $881,503, or $1.76 per share, as compared to $738,003, or $1.49 per share, for the prior year. Included in the 1989 earnings is an extraordinary item of $114,076, or $.13 per share, arising from insurance payments of a storm damage claim during the year. There were no extraordinary items in the 1988 earnings report.

Sales for 1989 were $21,326,841, as compared to $21,123,671 for the prior year.

Paradise is regarded as the world's largest producer of glace candied fruits and peels, which are primary ingredients of many confections and are sold both to commercial bakers, and packaged for retail sale in

supermarkets to homemakers. The company also operates a plastics molding division, which accounts for nearly 20 percent of sales.

Paradise Fruit Company, Inc. has over 350,000 square feet of office and manufacturing facilities at its 12-acre headquarters complex located in Plant City, Fla.

WASHINGTON (MARCH 20) PR NEWSWIRE - United Press International today announced a new broadcast marketing alliance with BASYS, Inc., the international leader in radio and television newsroom computer systems.

UPI will market PC NewsDesk, a computer software product developed by BASYS, within the United States.

"This joint UPI and BASYS offering will help advance broadcast journalism, making reporting in greater depth easier and faster," said UPI Vice Chairman Joe Taussig.

"The UPI/BASYS NewsTeam offers media customers the competitive edge in newsroom computerization at a low additional cost per newsroom user," said Taussig.

"BASYS now supplies the majority of broadcast newsroom automation systems worldwide," said BASYS Vice President Barry Goldsmith.

"In terms of service to the broadcasting industry, our alliance with UPI makes strong business sense. U.S. broadcasters will be the ultimate beneficiaries of UPI's pioneering contributions to broadcast news and BASYS' state-of-the-art newsroom technology."

Goldsmith noted: "Broadcasters worldwide struggle to manage the continuous increase in the flow of information and to make it more meaningful to their audiences. PC NewsDesk has multi-user, multi-newswire capabilities not found in other newsroom computer software. Further, PC NewsDesk has many unique scheduling, word processing and security features " he explained.

Taussig said: "Now UPI can offer a product that will reduce or eliminate broadcast stations' costly dependence on ribbons and paper, in addition to improving the newsgathering effort. UPI pioneered wire reports tailored for broadcasters in 1935. Now, we are proud to team with another industry leader in support of broadcasting in the 1990s."

PC NewsDesk, in radio or television formats, has many of the features of the BASYS mainframe computer system, of which almost 300 are installed worldwide. The PC NewsDesk is designed to run on IBM and IBM-compatible computers.

BASYS, founded in 1978, is a broadcast automation computer company. It is a wholly owned subsidiary of Independent Television Network.

United Press International, founded in 1907, has more than 180 bureaus and is represented in nearly 100 nations. UPI has more than 1,150 employees, and UPI is owned by Infotechnology, Inc. (NASDAQ-NMS: ITCH), an information and communications company.

#90079p0172 03/20/1990 ~PR Newswire

HURST, TX (MARCH 20) PR NEWSWIRE - Surety Capital Corporation (NASDAQ: LOAN) of Hurst announced today the signing of a letter of intent to acquire the Bank of East Texas, Chester, Texas, from Bancwell Financial Corporation of Wells, Texas. The Bank of East Texas has total assets of approximately $8 million.

Upon completion of its due diligence review of the bank, Surety Capital intends to enter into a formal contract to acquire the bank. Approval for the purchase must be received from all applicable regulatory agencies prior to the consummating of the purchase transaction. It is anticipated that the acquisition will be completed on or about Aug. 30, 1990.

C. Jack Bean,. chairman of the board of Surety Capital, said, "The purchase of the Bank of East Texas will broaden our existing banking base in East Texas, allowing us to better serve the financial needs of this area of the state." Bean also stated, "We believe that our strategy of combining traditional banking with consumer credit lending will allow our banking organization to realize a return to our shareholders which will be among the state's highest."

Surety Capital Corporation, a one-bank holding company which owns Texas Bank, N.A., Lufkin, Texas, was previously in the business of making casualty insurance premium financing loans. Surety Capital now conducts the insurance premium financing business through its subsidiary, Texas Bank, N.A., at its full service branch banking facility in Hurst.

HOUSTON (MARCH 20) PR NEWSWIRE - Vallen Corporation (NASDAQ: VALN) today announced record third-quarter sales and earnings for the period ended Feb. 28, 1990.

Net sales increased 34.3 percent to $32,865,000, compared with $24,467,000 recorded in the prior year's third quarter.

Net earnings increased 78.4 percent to $1,818,000, or $0.42 per share, compared with $1,019,000, or $0.23 per share, for the prior year's third quarter.

For the nine months ended Feb. 28, 1990, net sales were $87,369,000, up from $70,204,000 in the prior year, an increase of 24.5 percent. Net earnings increased 39.7 percent to $4,283,000, or $0.98 per share, compared with $3,066,000, or $0.70 per share reported for the prior year.

According to J.M. Wayne Code, president: "The third quarter was an outstanding one for the company. Sales increased at all locations, reflecting our aggressive marketing programs."

In addition, unusual freezing temperatures in the Gulf Coast area resulted in damage to a large number of emergency showers and eye wash fountains in industrial plants. The company's operations were able to respond very rapidly with replacement units and parts to enable its customers to maintain these important safety devices for their workers' protection.

The company's acquisition on Oct. 16, 1989, of the business and assets of four locations in Tennessee contributed approximately 8 percent of the increase in sales for the third quarter.

Vallen Safety Supply Company, the distribution subsidiary, sells a wide variety of industrial safety and health products designed for the protection of the individual worker, his work place and the environment. A new branch will be opened in Anchorage, Alaska, during the quarter ended May 31, 1990. Vallen Safety now operates from 30 locations throughout the United States.

Encon Safety Products, Inc., the manufacturing subsidiary headquartered in Houston, is the leading producer of emergency showers and eye wash fountains for industrial use. Encon also molds optical quality protective eyewear at its plant in Coudersport, Pa. During the quarter, Encon completed the purchase of the business and assets of Custom Plastics Manufacturing, Inc., a company that molds and vacuum forms products on a contract basis for various customers, including Encon.

JACKSONVILLE, FL (MARCH 20) PR NEWSWIRE - AT&T has announced that it has been awarded a $30 million, three-year contract by the CSX Technology Group, an operating unit of CSX Corporation which supports CSX companies with leading-edge information and communication systems.

Under terms of the contract AT&T will provide an integrated voice and data network for more than 500 nationwide locations of the CSX Corporation.

"The CSX Technology Group believes the selection of AT&T will allow it to offer superior communications services," said John Brockett, assistant vice president-telecommunication services for the CSX Technology Group. "Each of the companies of the CSX Corporation depend on our division for reliable, cost effective and efficient services, and this contract with AT&T will ensure that we can meet our clients' expectations."

Based in Richmond, Va., CSX Corporation is a leading international transportation company, with interests in rail, ocean container shipping, barging, trucking, warehousing and distribution. Its non- transportation businesses include real estate, resorts and technology.

"AT&T is delighted to enter into this agreement with CSX Technology Group, an innovative user of information technology," said Lynn Jewell, national account manager for AT&T. "Together, AT&T and CSX can provide benefits of superior communications technology to CSX's business operations and its customers."

CONTACT: Shelly London of AT&T, 404-873-8657 or (home) 404-933-8099, or John DuBose of CSX, 904-359-4975.

LOS ANGELES (MARCH 20) PR NEWSWIRE - Arco has awarded a five-year contract to AT&T (NYSE: T) to provide network telecommunications services, the company announced today.

Under the agreement, AT&T will provide Arco with a customized, integrated voice and data network. The service will link seven domestic and international Arco divisions, including locations in the United Kingdom, Europe, and the Far East.

"The AT&T custom network will provide us with new and streamlined services that will allow us to better meet our internal needs and enhance our external services," said John Coman, manager of networks and information services for Arco. "The new network will improve Arco telecommunications services and cost structures, resulting in overall savings and operational efficiencies."

AT&T will provide Arco with a state-of-the-art network management center to oversee network remote access, custom billing and network maintenance, among other functions.

"We're pleased that Arco selected AT&T," said AT&T Sales Vice President Lew Chakrin. "This contract indicates that AT&T continues to be the choice of large corporations on the basis of our commitment to provide superior technology and service as well as competitive pricing." Arco selected AT&T in a competitive bidding process.

TAMPA, FL (MARCH 20) PR NEWSWIRE - Harvey Glassman, former Shearson SVP of Product Development, joined Invest Financial Corporation as National Product Manager, it was announced today by D. Mark Olson, Invest Executive

Vice President.

Glassman, 55, will be in charge of Invest's specific product areas including mutual funds, fixed income, equities and syndicate. He will also manage the financial services and research departments. "With over 30 years in the industry," states Olson, "Glassman brings a wealth of knowledge and experience with him to Invest. We are very excited to have someone of his calibre join the firm."

During his 10 years with Shearson Lehman Hutton, Glassman specialized in product development, managing the entire process from idea origination through the sales, marketing and operational phases.

"Invest is going to be a major force in the future of the brokerage industry," asserts Glassman. "It's the place to be in the '90s. I believe the growth of the Invest network will outpace the accomplishments of the more traditional brokerage firms of the '80s."

With the recent trend of deregulation, Glassman is excited to participate in the entry of banks into the brokerage industry. "Brokerage products can meet only a portion of an individual's financial needs and the same is true of bank products. Invest is a national bank distribution network for financial services and products," states Glassman. "The wave of future for both the brokerage and banking industries is here today in Invest."

Invest Financial Corporation, one of the nation's largest full-service brokerage firms, offers customers of financial institutions a convenient way to own mutual funds, annuities, unit investment trusts, and other investment and insurance products. Invest, a subsidiary of Kemper Financial Companies, provides financial services and products through a nationwide network of over 560 offices in more than 40 states through banks, credit union and savings and loans.

#90079p0194 03/20/1990 ~PR Newswire

NEW YORK (MARCH 20) PR NEWSWIRE - United Capital Corp. (AMEX: ICU) today reported results for 1989 (see Table "A"). Total revenue for 1989 was $53,113,000 which includes the results of Metex Corporation since its acquisition on March 3, 1989, vs. $21,038,000 in 1988. Net income for 1988 was $4,615,000, or $.46 per share.

Total revenues for the fourth quarter of 1989 were $14,723,000 resulting in net income of $185,000, or $.02 per share. Comparable results for the same period in 1988 reflect net income of $411,000 ($.04 per share) on revenue of $4,912,000.

In commenting on the results, Mason N. Carter, president and chief operating officer of United Capital Corp., noted that the operating results for 1989 include those of Metex Corporation, a manufacturer of engineered products for aviation, industrial and automotive markets, since the date of its acquisition. United Capital Corp.'s pre-tax income of $5,823,000 includes $4,113,000 relating to the operations of Metex.

The lower 1989 results over 1988 are principally due to the reduction in number of properties sold and gains recognized, as well as a decrease in income from net investment activities. Such amounts aggregated $2,607,000 and $9,304,000 in 1989 and 1988, respectively. These decreases were offset by an increase in rental revenues of $534,000 and a decrease in operating expenses of $1,297,000 in 1989 vs. 1988.

Had the merger with Metex occurred on Jan. 1, 1989, United Capital Corp.'s consolidated net income for 1989 would have been approximately $3,024,000, or $.28 per share, on revenues of $58,861,000 (see Table "B").

United Capital Corp. owns and manages real estate assets and through its subsidiary, Metex Corporation, provides engineered products to aviation, industrial and automotive markets worldwide.

ATLANTA (MARCH 20) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) will seek authority to serve Moscow, Leningrad, and Tbilisi in the Soviet Union as soon as a proposed air agreement between the United States and the U.S.S.R. is finalized.

A tentative agreement negotiated by U.S. and Soviet delegations in late February, if adopted by the two governments, would provide significantly expanded route opportunities between the two nations. Under this agreement Delta will propose to operate from Atlanta via Frankfurt, West Germany, with continuing service to Moscow and Leningrad, or Tbilisi.

"We are very hopeful that Delta will be able to begin this service as early as next spring," said Ronald W. Allen, Delta's Chairman of the Board and Chief Executive Officer. "The improvement of relations between our two nations heightens the importance of expanded air service and creates new demands for transportation. And Atlanta, now emerging as one of the world's key international gateways, is a very logical point for this service expansion."

Currently, Delta flies to 175 cities in 13 nations and operates more than 2,400 flights each day. The airline plans significant increases in its service to both Europe and Asia, with 65 new international-range aircraft on order or option for delivery within the next 10 years.

ALLENTOWN, PA (MARCH 20) PR NEWSWIRE - Penn Treaty American Corp. (NASDAQ: PTAC) today reported that net income for the year ended Dec. 31,

1989, increased to $4,635,091, equal to $1.82 per share, compared with $3,389,011 or $1.35 per share for the year ended Dec. 31, 1988.

Total revenues for the year rose to $30,779,346 from $19,413,496 in 1988. Net income for the three months ended Dec. 31, 1989, increased to $1,211,344, equal to 45 cents per share, compared with $930,461 or 37 cents per share for the same three-month period in 1988. Total revenues for the quarter rose to $8,667,759 from $5,265,566 for the same period of the previous year. Included in net income for the year is an after-tax gain of $220,274 or 8.8 cents per share resulting from the sale of the company's former home office building.

Penn Treaty American Corp., through its wholly owned direct and indirect subsidiaries, Penn Treaty Life Insurance Co., Network America Life Insurance Co. and Cher-Britt Service Co., is primarily engaged in the underwriting, marketing and sale of individual fixed defined benefit accident and health insurance policies covering principally long-term skilled, intermediate and custodial nursing home care and home health care. The company is currently licensed to conduct business in 43 states and the District of Columbia.

BIRMINGHAM, AL (MARCH 20) PR NEWSWIRE - Big B, Inc. (NASDAQ: BIGB) announced today record sales for the fiscal year and quarter ended Feb. 3.

Sales for the year rose to $417,717,000, up 54 percent, while fourth quarter sales rose 59.9 percent to $132,667,000.

Earnings for the year declined to $3,715,000 from $7,216,000 in the prior year and declined to $820,000 from $2,269,000 for the fourth quarter. The prior year income included a $503,000 ($.06 per share) credit for the cumulative effect of the change in the method of accounting for income taxes. The declines resulted primarily from financing costs and other expenses relating to Big B's acquisition of 85 drug stores during the year and the subsequent costs associated with their conversion to the Big B format. Pre-tax operating income (before interest, depreciation and gain on sale of property) rose 31.0 percent for the year and 22.8 percent for the fourth quarter.

The company's board of directors as an expression of confidence in the future outlook for Big B declared a $.04 per share dividend payble April 20, to shareholders of record on April 6.

During the fourth quarter the company opened stores in Milledgeville and Mapleton, Ga. and Murfreesboro, Tenn. Subsequent to year end stores were opened in Smyrna, Ga.; Birmingham, Ala.; and the company's 300th store in Stone Mountain, Ga.

Big B, Inc. operates stores in Alabama (143), Florida (20), Georgia (113), Mississippi (7), and Tennessee (17).

#90079p0226 03/20/1990 ~PR Newswire

WYOMISSING, Pa. (MARCH 20) PR NEWSWIRE - VF Corporation (NYSE: VFC) today announced that the Lee Company would be closing two plants located in Georgia and Alabama. According to Lawrence R. Pugh, chairman and chief executive officer, the closings were required to bring Lee's production capacity more in line with projected demand. "Although we regret the necessity for taking this action, the closings are part of our overall program to improve operations and financial results at the Lee Company. We still expect shipments by Lee during 1990 to approximate those of 1989 and we believe that, with increased plant efficiencies, we can deliver those shipments with fewer plants," said Pugh.

As a consequence of this action, VF will report a one-time charge in its first quarter in excess of $3 million. Because of this charge, plus a first quarter sales shortfall and continued operating deficiencies at Lee, and a sales decline at Jantzen, consolidate earnings per share for VF Corporation are expected to be down approximately 35 percent from those

reported in the first quarter of 1989. "Despite this obviously disappointing result," said Pugh, "we are still anticipating an increase in net income for the year and, as I have previously stated, earnings per share should increase in excess of 10 percent of 1989. Our other companies are performing well and we expect substantial gains in third and fourth quarter results over last year."

NEW YORK (MARCH 20) PR NEWSWIRE - Moody's Investors Service today announced the implementation of a new billing procedure to simplify the fee structure for issues insured by the following insurers: AMBAC Indemnity Corporation (AMBAC), Financial Guaranty Insurance Company (FGIC) and Municipal Bond Investors Assurance Corporation (MBIA).

Effective March 26, Moody's will assess an individual rating fee for each new issue insured. The insurer will collect separately the Moody's rating fee at the closing and remit it to Moody's. Municipal issues currently under review with the insurers for which commitments have been issued prior to March 26 will not be subject to the new system.

The per-issue rating fee for insured issues will be determined on the same basis as the rating fees for non-insured issues. A single per- issue fee will be assessed for all insured issues whether fully or partially insured.

#90079p0235 03/20/1990 ~PR Newswire

BRIDGEPORT, Conn. (MARCH 20) PR NEWSWIRE - The board of directors of the Hydraulic Company (NYSE: THC) today declared a quarterly dividend of 40 cents per share on the outstanding common stock of THC, payable April 15, 1990, to stockholders of record April 3.

The dividend represents an increase of 2 cents in THC's indicated annual dividend payment rate to $1.60 per share from the $1.58 paid over the previous 12 months. The quarterly dividend is a half-cent higher than the 39-1/2 cents per share paid last year, and marks the 12th consecutive year of increased dividends, continuing the record of THC and its predecessor company of uninterrupted payments of dividends dating back to 1890.

The rate of increase is somewhat less than that of recent years, as a

result of reduced operating profits due, in part, to adverse weather conditions and to a disappointing utility rate case decision in mid- 1989, the company said.

THC reiterated that it will change the quarterly dividend payment date from the 15th to the 30th of the month, commencing with the second-quarter dividend payment, in July 1990. The change will facilitate compliance with stock exchange reporting requirements.

THC is a diversified corporation whose core business is public water supply. Through THC's Bridgeport Hydraulic Company (BHC) subsidiary, which is one of the 10 largest investor-owned water companies in the nation, and BHC's Stamford Water Company subsidiary, it serves a population of some 460,000 in 18 communities in Fairfield, New Haven and Litchfield counties.

THC is engaged in non-utility enterprises through its Hydrocorp, Inc. subsidiary, which is involved in diversified water management services; through its Timco, Inc. subsidiary, which has forest products and electricity cogeneration facilities in New Hampshire; and through its Main Street South Corporation real estate subsidiary.

NORTH MIAMI BEACH, FL (MARCH 20) PR NEWSWIRE - Pro-Med Capital, Inc. (AMEX: PMC), an American Stock Exchange Company, based in North Miami Beach, Fla., announced that the regular quarterly dividend was declared by the board of directors on March 20, 1990. This dividend of 10 1/2 cents per share for shareholders of record March 30, 1990 is payable on April 11 1990.

Pro-Med also announced that based on the projected increased earnings for the year 1990, the dividend will be increased 10 percent (4.2 cents per share). This additional dividend will be paid as a year-end extra. Pro-Med Capital has paid 24 consecutive dividends since its initial public offering in 1983.

The company also announced that effective April 1, 1990 Fred Rosemore has been named chairman of the board of directors. Lance Rosemore has been named president of Pro-Med Capital and Dr. Andrew Rosemore, executive vice president. Incoming President Lance Rosemore stated, "As we have previously announced, our business has been steadily improving. We anticipate Pro-Med's strong investment income growth to continue in 1990 as we expand our operating parameters."

Pro-Med Capital, Inc. is based in North Miami Beach, Fla. and Dallas. The company operates in 48 states.

SAN FRANCISCO (MARCH 20) PR NEWSWIRE - Pacific Bell today named three firms to administer new health care programs resulting from 1989 labor contract negotiations.

CIGNA was chosen to administer a health care network; U.S. Behavioral Health will administer a mental health and substance abuse network; and The Prudential will administer a dental maintenance organization (DMO).

"The vendors were chosen through competitive bidding and after extensive research. They offer the best systems for meeting the needs of approximately 70,000 employees," said Jim Beck, director of the company's health and welfare plans.

In addition to Pacific Bell, the programs will also cover Pacific Telesis Group, Nevada Bell and Pacific Bell Directory.

Beck said that the company hires outside firms to handle administrative details such as: claims processing, network development, quality assurance and utilization review.

Beck said Pacific Bell is adopting medical and dental networks because it enables the company to continue offering employees quality health care coverage while gaining more control over rising health care costs. Costs are controlled because network providers agree to contracted rates and adhere to utilization controls, such as second opinions on recommended surgery.

"We're spending over $250 million annually on medical care," said Beck, "and we feel these new programs will help us contain those costs."

All participants in the company's health care network, effective January 1991, will select a primary care doctor to direct their health care. This feature is similar to that of a health maintenance organization (HMO). Unlike HMOs, employees in the health care network can also choose to use non-network providers.

As an alternative to the health care network, employees will still be given the option to join one of the HMOs the company will offer.

Beck said the company's mental health and substance abuse network will consist of health care providers in such areas as substance abuse, mental health and family issues. Like the health care network, employees also will have the option of choosing providers not in the specialized network.

"Employees who use the medical network providers will have less out-of-pocket expense than those who do not use the network," he said.

The company also will continue its current dental plan which allows employees to use dentists outside the DMO.

ALLENTOWN, PA (MARCH 20) PR NEWSWIRE - Air Products and Chemicals Inc. (NYSE: APD) reported that in the last twelve months the company has signed contracts to provide on-site tonnage supply of industrial gases to nearly 50 locations around the world, serving a diversity of industries and customers.

These orders for gaseous nitrogen, oxygen, hydrogen, and carbon monoxide will generate total revenues of approximately $2.0 billion over the life of the contracts, which are generally 15 years in length. Nearly 40% of these revenues will come from international locations. To support these new contracts, Air Products expects to invest approximately $250 million over the next few years.

"Our tonnage gas business enters the 1990's after 10 years of exciting growth that has established Air Products as the largest supplier of tonnage gases in the United States," said Bob Gadomski, vice president of the company's process systems group.

The terms "tonnage gas" and "on-site" industrial gases refer to the supply of gaseous product from a plant located on or near the customer's location or to the supply of more than one customer by pipeline. The "on-site" plant is owned and operated by the industrial gas company and the customer pays for the gas under long-term contract in a manner similar to the purchase of industrial electricity. The revenue generated from these firm or "take or pay" contracts provides a stable profit year after year. Air Products pioneered the on-site supply concept in the 1950's and owns and operates approximately 180 on-site plants around the world as well as 6 major pipeline networks.

The development of new non-cryogenic gas separation techniques is expanding the market for on-site supply by reducing both the cost of the gas and the parameters under which on-site supply is economically

feasible. New adsorption and membrane technologies have made it possible to provide on-site supply for smaller volume users. Adsorption and membrane technologies can also achieve steady-state operation in a relatively short period which increases the flexibility of use compared to traditional cryogenic air separation plants which must run continuously for peak efficiency.

Air Products is one of the leading industrial gas companies in the world with investments in 22 countries. In the company's latest fiscal year ended Sept. 30, 1989, industrial gas sales, including both merchant and on-site methods of supply, exceeded $1.5 billion. The company's other major businesses include chemicals and environmental/energy systems.

#90079p0246 03/20/1990 ~PR Newswire

NEW YORK (MARCH 20) PR NEWSWIRE - MediaQuote, the first service to offer advertising agencies and media buyers a complete electronic system for buying and selling media, was formally introduced today by its parent company, Telmar Group, Inc.

For more than 20 years, Telmar has served the advertising industry's computer needs, particularly in the area of developing programming used in media planning, buying and analysis. In addition to New York, Telmar has offices in Chicago, Los Angeles, Toronto and London.

Developed under the guidance of Telmar's chairman, Stanley P. Federman, MediaQuote's new system "TRANSACT" provides marketers as well as advertising agencies and all sellers of media with a "dramatically effective cost and operationally efficient computer based system to handle virtually all of their transactions."

As of March 19, MediaQuote was carrying listings for more than $5 million of advertising space and was immediately accessible to over 250 advertising agencies. It was estimated that by the year end, MediaQuote's listings would total $125 million with accessibilities growing to over 500 agencies.

"Most important, MediaQuote will enable buyers to see special buying opportunities (or 'avails') quickly, do an almost immediate cost comparison and negotiate their buys in a matter of minutes without ever leaving their desks," Federman explained.

"In addition, buyers will be exposed to a menu of ideas and opportunities that they might not have otherwise had knowledge of," Federman continued.

One of the most significant benefits to the sellers of media, both time and space, is the ability to gain "immediate" access to gather leads from the widest range of potential buyers. Federman noted, too, that "just the time savings for media salespeople in being able to transact business over the computer, should significantly enhance their productivity."

The system is so designed that media sellers will be able to list their avails, quote rates and, importantly, describe the benefits or comparative advantages of particular buys, special editions or value added packaging. This information will be real-time viewing via computer by agency executives, media buyers and planners, and marketing executives worldwide.

"Think of MediaQuote as a 'stock exchange' for the negotiating, buying and selling of all forms of media," Federman suggested.

A $50 monthly subscription to the MediaQuote service allows sellers to list their availabilities and buyers to view and respond. When buyers respond, a $35 transaction fee is charged to the seller for the lead. There is no charge to the buyer for viewing, responding or buying the listing and there is no extra charge to the seller if the lead turns into a buy.

The TRANSACT system provides a listing of the media opportunity, including description, rate, date, and contact. The listing will remain active on the system until sold or the offer expires. In addition, an electronic media directory provides value added information about each particular seller.

Because it is a time system, buyer and seller will be able to negotiate a purchase in a "paperless" transaction. Importantly, MediaQuote TRANSACT will offer buyers "real" media opportunities, 24 hours a day, seven days a week, from anywhere in the world.

Although media buying and selling remains one of the last bastions of business-to-business personal selling, with the rapid increases in the number of media, the cost of making sales calls as well as the limited number of calls that can be made, the introduction of a service like MediaQuote is almost a necessity.

As Federman explained, "MediaQuote will enable media sellers to make their personal calls more of relationship building, taking time to really get to know their customers, their needs and how he can better service the account."

The heart of the TRANSACT system will be MediaQuote's state-of-the- art computer and nationwide communications network centered at its midtown Manhattan offices.

Initially, it is expected that MediaQuote's TRANSACT will be extensively used by sellers to gather leads from new markets and by buyers to gain knowledge of special buyers' situations formally limited to only the largest purchasers. "As experience and comfort with the system increases more day-to-day, buying will be executed through the MediaQuote service," Federman said.

#90079p0247 03/20/1990 ~PR Newswire

PRINCETON, NJ (MARCH 20) PR NEWSWIRE - The Liposome Company (NASDAQ: LIPO) today reported financial results for the fiscal year ended Dec. 31, 1989. Total revenues for 1989 were $3,760,678, a decrease of 16 percent compared to year-end 1988, primarily reflecting a decrease in collaborative research and development revenues. During 1989 the company focused its efforts on the development of its proprietary products, while de-emphasizing contract research.

Total expenses for 1989 were $11,380,770, a 3 percent decrease compared to 1988. During 1989 a proposed merger between the Liposome Company, Inc. and Liposome Technology, Inc. was terminated, resulting in merger and reorganization expenses of approximately $875,000. Removing the impact of the merger-related costs, total expenses would have decreased 10 percent over 1988. The decrease in expenses is due to the company's efforts to reduce internal costs while external expenses for testing and development of the company's products continue to rise.

Net loss for 1989 was $7,620,092, or $.54 per common share of stock, as compared to $6,354,204, or $.47 per share, in 1988. Weighted average number of common shares outstanding was 14,153,818 and 13,624,975, respectively.

During 1989, the Liposome Company named Charles A. Baker, a former group vice president of Squibb Corporation and president of Squibb International as chairman and chief executive officer. The company also made considerable progress in the development of its most advanced products: Liposomal Doxorubicin (TLC-D99), Gentamicin Liposome Injection (TLC-G65), and Amphotericin B Lipid Complex (ABLC), which is being developed with Bristol-Myers Squibb. These products are all in various stages of human clinical testing.

The largest company dedicated exclusively to the development of liposome-based pharmaceutical products, the Liposome Company is developing pharmaceutical products designed to enhance the therapeutic benefit of existing drugs. The company is primarily focused on developing products to treat cancer and serious infectious diseases.

GAITHERSBURG, Md. (MARCH 20) PR NEWSWIRE - Penril Corp. (AMEX: PNL) announced that its board of directors has today declared a stock split paid in the form of a 25 percent common stock dividend to shareholders of record on April 5, 1990.

Penril shareholders will receive one additional share of Penril common

stock for every four shares held on the record date.

Henry Epstein, the company's chairman, stated: "At Penril's annual meeting held today, we announced an ambitious three-year growth strategy to double the size of our business and become a major participant in the data communication network market. The stock dividend is meant to underscore the continuing improvement in Penril's financial performance. After an excellent fiscal 1988, Penril's earnings performance in 1989 set an all-time record. We think it best to continue to invest all of our cash in long-term growth of the company, and our board of directors felt a stock dividend would be an appropriate and tangible reward for our shareholders' confidence and support."

The company expects to mail the certificates for the common stock dividend and checks for cash payment in lieu of fractional shares on or about May 2 1990. Cash payment will be based on the last sale price of Penril's common stock on the record date and will be made in lieu of the issuance of fractional shares. Continental Stock Transfer & Trust Company, Penril's transfer agent, located at 72 Reade Street, New York, N.Y. 10007, will accept instructions from brokers until April 27, 1990. On March 20, 1990, Penril had 2,770,879 shares of common stock outstanding.

Penril Corp is listed on the American Stock Exchange and manufactures data communications equipment and test and measurement instruments.

#90079p0258 03/20/1990 ~PR Newswire

SAN FRANCISCO (MARCH 20) PR NEWSWIRE - Chevron U.S.A. Inc. today announced that most Chevron stations will begin charging the same price for gasoline on cash and credit purchases in Chevron's marketing areas west of the Rockies and in Hawaii, Alaska, Kentucky, Indiana and Ohio. Stations will begin converting to the single price policy starting today, and this change should be completed by April 2.

"Quality products, convenient stations and excellent service are hallmarks of the Chevron brand," said Dave Smith, vice president of marketing. "Changing to a single price is another part of our long-term strategy to make the Chevron brand even more valuable to our customers."

Participating stations will charge customers the same price whether they pay in cash or use credit cards, ending a program of differing prices that began in 1982. Chevron is eliminating the 3 percent credit card processing fee that has been in effect since 1982 and is suggesting that all of its independent dealers adopt the new program.

"Times have changed," Smith said. "The business environment is different today than it was in 1982, and converting to the single price at the pump makes sense, both for our customers - many of whom have asked for this policy change - and for the company.

"We are continually reevaluating our long-term outlook, capital expenditures and marketing strategy, including the desirability of making this change in our other markets," Smith added.

Chevron is among the nation's top three marketers of gasoline, with 12,000 stations nationwide. Chevron U.S.A., which is the domestic petroleum subsidiary of Chevron Corporation, is about midway through a $1 billion-plus program to upgrade its service station network. In addition, the company has modernized many of its refining facilities, including those at El Segundo, Calif., and Port Arthur, Texas. Plans are under consideration to modernize Chevron's Richmond, Calif., refinery in a $1 billion project.

SAUSALITO, CA (MARCH 20) PR NEWSWIRE - Phoenix Network Inc. (NASDAQ: PHXN) today announced results for its third quarter ended Jan. 31, 1990. Revenues were $1,465,797 compared with $1,195,459 for the year earlier period, an increase of 23 percent. Net loss was $168,245 versus a profit of $10,411.

For the nine months ended Jan. 31, 1990, revenues rose to $4,752,845 from $2,219,348 in the first nine months of fiscal 1989 or an increase of 114 percent. The net loss for the nine months ended Jan. 31, 1990 was $182,609 compared to net income in the comparable prior year period of $50,216.

Commenting on the results, Thomas H. Bell, president and CEO, noted that implementation of the company's long-term strategic plans has affected current revenues and profitability. During the previous three quarters the company has spent heavily on marketing, outside services and promotional items in anticipation of additional volume. The corporate staff has increased 150 percent and the distributor base has more than doubled. The company has recently submitted new customer orders with estimated annualized billings of $2 million to its carriers for activation and is processing a backlog of additional orders for submission in the near future.

"We are beginning to see the benefits of our recent efforts," Bell added.

"Our new agreement with Westinghouse will improve our gross margin. Telemarketing arrangements recently signed combined with our expanded distributor network are generating significant increases in new business every week. Although the full effect of all this will not be felt until early in fiscal 1991, we believe the framework is now in place to generate dynamic growth in the coming year."

Phoenix Network Inc. markets network managed long distance services on a nationwide basis. The common stock of Phoenix Network Inc. is traded on NASDAQ under the symbol PHXN.

RICHMOND, VA (MARCH 20) PR NEWSWIRE - An inaccurate story that appeared on the front page of the March 18 Los Angeles Times has needlessly panicked thousands of Dalkon Shield Claimants, Michael M. Sheppard, Director of the Dalkon Shield Claimants Trust said today.

The story, written by Linda Williams, stated that "women have 30 days to inform the Trust of the option they choose."

"Claimants have one year to select an option," said Sheppard. "That is clearly stated in the packet mailed to claimants. Ms. Williams had evidently not seen the claim packet before writing the story.

"The choice of an option is an important decision. We want claimants to weigh all factors carefully before deciding which option to use to settle their claims."

Sheppard was also concerned that the inaccurate information was causing claimants to rush to attorneys' offices in order to get their claim submitted quickly.

"The Trust has worked hard to make its materials understandable to all claimants. If a claimant needs legal advice, she or he should seek it. Many claimants who can obtain their own medical records and fill out the forms can settle their claims without the assistance of an attorney.

"Claimants should be aware that some lawyers' public statements to the press about the complexity of the claims process may be self-serving."

When asked about the negative reaction of a few California claimants to the Option 2 settlement amounts that was also reported in the article,

Sheppard commented that the women who felt the Option 2 amounts were too low clearly did not understand the purpose of Option 2 and that seriously injured women with medical records that prove injury caused by Dalkon Shield use could recover substantially more under Option 3.

"In Option 2 the claimant does not have to prove that the Dalkon Shield caused her injuries. In a court of law that claimant could get little or no compensation.

"The Trust hopes that claimants with the medical records to prove that the Dalkon Shield caused their injuries will select Option 3.

"The Dalkon Shield Claimants Trust will fairly compensate claimants for their injuries. Unfortunately, when inaccurate information is circulated, claimants cannot make an informed and careful choice about the settlement option best suited to their circumstances.

Claimants with questions about their claims should call their Personal Contact at the Trust who is named in their claim packet.

LOS ANGELES (MARCH 20) PR NEWSWIRE - Capitol/Nashville and Curb Records have entered into a joint venture to release product under the Curb/Capitol Nashville label, it was announced today by Jimmy Bowen, president, Capitol/Nashville and Dick Whitehouse, president, Curb Records Country Division.

The joint venture will allow Capitol/Nashville to benefit from Curb Records' proven skills at developing top country talent, while giving Curb the resources of Capitol's marketing and promotion team.

This agreement extends Capitol/Nashville's relationship with recording

artist Sawyer Brown (who were previously signed to Capitol/ Nashville through a production deal with Curb Records) for five years. The popular country band will now be released on the Curb/ Capitol Nashville label. Additional artists who will be released on the joint label include two new female country vocalists, Cee Cee Chapman (who will be produced by Bowen) and Jara Lane. Other country artists will be announced in the near future.

Additionally, the new agreement establishes a relationship between Curb and Capitol for Curb to license select Capitol Records master recordings (subject to Capitol's own release plans) for inclusion on Curb Records or Curb/Capitol Nashville compilation albums.

Commenting on the joint venture, Bowen said, "Curb Records has continually demonstrated its ability to be a major creative force in country music, discovering and developing a number of the industry's top artists. I feel the combined strengths of Curb and Capitol Nashville will further enhance our position in the country field."

Added Waterhouse, "We've worked successfully with Bowen and with Capitol over the years, and the Curb/Capitol Nashville relationship permits us to start the '90s with the best of both worlds."

HARRISBURG, PA (MARCH 20) PR NEWSWIRE - Harsco Corp. (NYSE: HSC) has acquired Universal Granule Inc. (UGI), a producer of roofing shingle granules based in Pawnee, Ill.

UGI will be operated by Harsco's Reed Minerals division located in Highland, Ind.

Reed specializes in granular products manufactured from coal slag obtained from electric utilities. Currently, those products include abrasives used for surface blasting and granules for roofing shingles. In 1988, the division opened a plant in Drakesboro, Ky., to convert utility coal slag into color granules. As an established source for quality roofing granules, UGI is expected to strengthen Reed's presence in the roofing granule industry.

Harsco Corporation, a diversified industrial company, conducts its business through 13 divisions and has 21 varied classes of products and services, principally for defense, industrial, commercial and construction applications.

CONTACT: Herbert R. McIlvaine Jr. of Harsco, 717-763-7064.

CHICAGO (MARCH 20) PR NEWSWIRE - Chicago-based Allied Products Corp. (NYSE: ADP) has reported final 1989 results that confirm a preliminary estimate issued March 9, 1990, indicating the company would show a loss of approximately $22 million for the year, $12 million of which is of a non-recurring nature.

Final figures reveal that for 1989 the company recorded a loss of $22,423,000 ($5.13 per common share) on sales of $564,614,000. This compares to 1988 net income of $6,541,000 ($0.95 per common share) on sales of $577,515,000.

The non-recurring charges of $12,000,000 primarily reflected a writedown in the value of inventory at one of the company's divisions.

In the company's March 9 announcement, Richard A. Drexler, president and chief executive officer of Allied Products, said:

Allied Products Corp. is a diversified manufacturing company involved in producing agricultural equipment, transportation/industrial products and chemical specialties.

Income (loss) before income taxes in 1989 includes a $10,000,000 ($947,000 in 1988) charge associated with the writedown of inventories and estimated consolidation/shutdown expenses for certain operations within the Transportation/Industrial Products Group.

Income (loss) before income taxes in 1989 includes a charge of approximately $1,600,000 associated with expenses incurred in connection with entering into a credit and debt restructuring agreement in early 1990.

Income (loss) before income taxes in 1989 includes a gain of approximately $700,000 resulting from the termination of a pension plan associated with an operation sold in a prior year.

Income (loss) before income taxes in 1989 includes gains of approximately $1,900,000 (no significant amount in 1988) arising from the sales of operating and non-operating assets.

Income (loss) before income taxes in 1988 includes the effects of charging $3,350,000 of costs to a restructuring/consolidation reserve which was established in a prior year.

The company recorded no income tax benefit in 1989 since the company did not have tax loss carrybacks available to reduce the pre-tax loss of this

year.

WIXOM, MI (MARCH 20) PR NEWSWIRE - The first 1990 Lincoln Town Car destined for Korea was produced recently at Ford's Wixom Assembly Plant.

"Ford is the leading exporter of vehicles to Korea, and the addition of the Motor Trend Car of the Year to our lineup there will be a significant boost for us," said Ford International Export Sales (FIES) General Manager Robert Sparvero. "The Lincoln Town Car has an ideal blend of style, technical sophistication and luxury to lead our 1990 sales efforts in Korea."

On hand to take delivery of the first Town Car export for Korea from Sparvero and Wixom Plant Manager Paul Nolan was Park Hong, manager of the Detroit-based Engineering Liaison office of Kia Motors Corporation, which, together with its subsidiary Kia Service, is the importer of Ford Motor Company vehicles into Korea.

In addition to the Lincoln Town Car, Kia also sells the Lincoln Continental and Mercury Sable in Korea. Shipments of these vehicles to Korea in 1989 totaled 1,100, exceeding the 1988 combined sales of all North American-produced vehicle imports in that market. More than 1,000 Mercury Sables were shipped to Korea following that vehicle line's introduction in May 1989.

Since the 1990 model year launch in November, Kia Motors has already taken 1,660 retail orders for Sable.

FIES is responsible for the sale of Ford-branded vehicles and parts produced by all Ford-owned and Ford-associated companies to markets where Ford has no operating affiliates. Currently FIES has 250 dealers selling in 180 countries, territories or island nations. FIES also supports North American-sourced sales to major affiliate markets (e.g. Europe and Taiwan) and to Japan.

#90079p0278 03/20/1990 ~PR Newswire

VINELAND, NJ (MARCH 20) PR NEWSWIRE - IGI, Inc. (AMEX: IG) today reported 1989 revenues of $18.3 million, up 14 percent from $16.0 million in 1988.

After-tax earnings were $40,199, or 1 cent a share, versus $221,269, or 3 cents a share, in 1988.

The company said that the entire decrease in earnings was expected and attributed to a planned continued major research and development program. These expenditures were mainly for IGI's majority-owned subsidiary, Micro Vesicular Systems, Inc. (MVS), which has pioneered the creation of two new technologies, Novasome(TM), a lipid vesicle (liposome) microencapsulation technology, and Ultrasponge(TM), a biodegradable superabsorbent.

IGI said its core business turned in record revenue performances for the year. Sales at Vineland Laboratories (poultry vaccine) were up 18 percent for the year, and its two pet care products divisions, Tomlyn Products and Evsco Pharmaceuticals, posted gains of 11 percent and 9 percent, respectively. International division sales were up 27 percent for the year.

Gross profit increased from $8,434,303 in 1988 to $9,592,998 in 1989. Operating profit fell from $919,359 to $709,608 or from 5.74 percent to 3.88 percent as a percentage of sales.

MVS Unit Gets Biodegradable Diaper Patent Approval Separately, IGI announced that MVS has received a Notice of Allowance from the United States Patent Office covering the design and composition of a rapidly biodegradable diaper. The design features biodegradable enhancer granules which release enzymes that degrade the diaper material. Preferably, the design uses MVS' Ultrasponge superabsorbers as well, making the diaper completely biodegradable.

The company emphasized that MVS itself does not intend to produce diapers, but expects to deal with industry partners who already have such capability. This patent allowance is a natural outgrowth and extension of the company's work on the Ultrasponge technology -- an efficient, completely biodegradable superabsorber.

IGI is a diversified biotechnology company. Its majority-owned subsidiary, Micro Vesicular Systems, Inc. has created novel technologies for lipid vesicle microencapsulation (often called "liposomes") and biodegradable superabsorbents. These are being developed for a variety of commercial applications.

IGI's Vineland Laboratories, EVSCO Pharmaceuticals and Tomlyn Products divisions produce and sell poultry vaccines, small animal pharmaceuticals and pet care products worldwide.

Novasome and Ultrasponge are trademarks of a majority-owned subsidiary of IGI, Inc.

NEW YORK (MARCH 20) PR NEWSWIRE - Citicorp (NYSE: CCI) announced today that it is changing the names of its savings and loan subsidiaries in California, Florida, Illinois and the District of Columbia to "Citibank, Federal Savings Bank."

Heron noted that the introduction of Citibanking will include three basic initiatives focused on serving consumers: establishing a common identification for Citibank branch banking activities nationally; maintaining a consistent level of quality service and financial products in all markets; and increasing opportunities to provide customers with products, services, and capabilities developed within all areas of the corporation.

The four institutions will now use the name Citibank after having received approval to change their charters from savings and loans to federal savings banks. The name change will be implemented at the four S&L's 252 branch locations over the next few months. Previously, the institutions operated under the name "Citicorp Savings." In addition to the four savings banks, Citicorp conducts banking activities in Arizona, Florida, Maine, Maryland, New York, Nevada and Utah.

Citicorp had been restricted from using the Citibank name in identifying the four savings and loan institutions it had acquired during the 1980s. But with differences between banks and savings and loan institutions narrowing in recent years, and a number of savings institutions now using the word "bank" in their identification, those limitations were removed as part of the FIRREA legislation passed by Congress last year. Shortly thereafter, the Federal Reserve Board modified its order that had restricted offering products and services of other Citibank businesses to customers of the four institutions and sharing resources with other units of the company.

As an example, Heron noted that the savings banks will now be able to provide a wide range of banking services through its branches to almost 2 million Citibank credit card customers who live within five miles of a branch of the four institutions. Previously, the Federal Reserve had prevented Citibank from offering branch services to those credit card customers.

With restrictions now eliminated, he said, over time Citibank's branches in nine states and the District of Columbia will offer customers a wide range of similar products, such as the Citi-One account, state-of-the-art banking machines using a Citicard, and Citibank MasterCard and Visa, as well as a number of common service- oriented programs, such as CitiPhone, a telephone account management service.

NEW YORK (MARCH 20) PR NEWSWIRE - Bristol-Myers Squibb Company (NYSE: BMY) today announced the appointment of Edgar Haber, M. D., to president, Bristol-Myers Squibb Pharmaceutical Research Institute (consisting of Bristol-Myers Pharmaceutical Research and Development Division, Oncogen and The Squibb Institute for Medical Research).

Dr. Haber, a member of the board of directors of Bristol-Myers Squibb Company, will continue to report directly to Richard M. Furlaud, president Bristol-Myers Squibb Company.

Since January, 1988, Dr. Haber has been president of The Squibb Institute for Medical Research. Prior to joining the Squibb Institute, Dr. Haber held positions as Chief of Cardiology, Massachusetts General Hospital, and as Higgins Professor of Medicine, Harvard Medical School. He held these positions for 24 and 15 years, respectively.

Dr. Haber earned his A. B. from Columbia College and his M.D. from

Columbia College of Physicians and Surgeons. He went on to receive extensive medical and scientific training at Massachusetts General Hospital, the National Heart Institute's Laboratory of Cellular Physiology and the Cardiac Department at St. George's Hospital in London. After completing his postdoctoral training, Dr. Haber held a series of positions of increasing responsibility at both Harvard Medical School and Massachusetts General Hospital.

Dr. Haber is a diplomate of the American Board of Internal Medicine, a Fellow of the American College of Cardiology and the American College of Physicians, and a member of 22 distinguished scientific societies. He has, over the past 25 years, served on 40 national committees on topics ranging from allergy and immunology to tissue and organ biology, has published more than 400 papers in the fields of cardiology and basic immunology, and has served on the boards of 11 major scientific journals. Dr. Haber is a fellow of the American Academy of Arts and Sciences and the American Association for the Advancement of Science, and is a recipient of numerous other honors and awards, including the Franz Volhard Award of the International Society of Hypertension and the Research Achievement Award of the American Heart Association.

The company said that the currently separate pharmaceutical research and development functions within the operating units of the Bristol- Myers Squibb Pharmaceutical Research Institute will be integrated more completely during the second quarter of this year. The following senior research executives will form, with Dr. Haber, the operating committee of the Pharmaceutical Research Institute, and will assume the responsibilities indicated when a fully integrated organization is defined:

-- Stephen K. Carter, M.D., president of Bristol-Myers Pharmaceutical Research and Development Division, who will be responsible for worldwide clinical development; -- George J. Todaro, M.D., president of Oncogen, who will retain his current responsibility and assume new responsibilities for exploratory pharmaceutical research; -- Andrew G. Bodnar, M.D., J.D., senior vice president and chief operating officer of The Squibb Institute for Medical Research, who will be responsible for administrative and planning functions; -- Kenneth M. Given, M.D., senior vice president of worldwide medical and regulatory affairs, The Squibb Institute for Medical Research, who will be responsible for worldwide regulatory affairs; -- William A. Scott, Ph.D., senior vice president of molecular and cellular biology, The Squibb Institute for Medical Research, who will be responsible for drug discovery.

TORONTO (MARCH 20) PR NEWSWIRE - Customer of Canada Post Corporation are in store for improved service, thanks to Retail Point-of-Service (POS) Systems for postal counter automation supplied by Nixdorf Computer Canada Ltd.

The POS systems, complete with specialized printers, weigh scales and bar code scanners, will be installed across the country over the next five years. The terminals will funtion as bilingual interactive workstations allowing counter personnel to handle selling the entire range of Canada Post retail outlet products and services. Once installed, many of today's time consuming manual tasks, such as calculating postal rates, printing money orders, postage labels and customer receipts, will be automated.

"Nixdorf has been working on joint research and development projects together with Canada Post. We believe we won the business because of our ability to provide systems designed specifically to meet Canada Post's needs rather than simply attempting to customize 'off the shelf' hardware and software," Nixdorf's vice president, Dr. Joan Ridley, said.

Nixdorf Computer Canada Ltd., headquartered in Toronto, is the Canadian subsidiary of the international systems integrator, Nixdorf Computer AG and is the affiliate of Nixdorf Computer Corporation is the United States.

Canada Post Corporation is a Canadian Crown Corporation with the mandate to provide National postal services on a financially self-sufficient basis.

Canada Post Corporation is the fourth national post office body to install Nixdorf systems, following England, Norway and Germany. For example Nixdorf is currently installing 680 terminals, worth $18,480,000, for the post office in England.

Nixdorf is using similar technology in the United States for other industries, including retailiers like Montgomery Ward, Nordstrom and Marshall Field, as well as government.

Nixdorf is also currently installing the fully networked Canada Post National Time and Attendance system in over 400 locations across Canada.

Nixdorf Computer Corporation, based in Waltham, Mass., is a leading marketer of business system solutions incorporating hardware, software and communications. The company serves customers primarily in the retailing, government, image/data capture, manufacturing, distribution, and insurance sectors through more than 91 sales and service locations in the United

States and Canada. Nixdorf's parent company, Nixdorf Computer AG of West Germany, is one of the world's largest computer and communications companies, with 1988 sales of over $3 billion in 46 countries.

BALTIMORE (MARCH 20) PR NEWSWIRE - MNC Financial (NYSE: MNC) announced today that it will offer $500 million of triple-A rated securities backed by credit card receivables.

This is the seventh public transaction by MBNA America Bank N.A. (MBNA), formerly known as Maryland Bank N.A., MNC's Delaware-based consumer lending subsidiary. As of Dec. 31, 1989, MBNA managed more than $5.3 billion in assets representing a national base of more than 7 million customers. The offering of certificates backed by MasterCard and Visa receivables will be underwritten by Merrill Lynch Capital Markets and Prudential Bache Capital Funding.

Alan P. Hoblitzell Jr., chairman and chief executive officer of MNC Financial, said "This transaction is part of MNC's continuing program to increase capacity for growth while bolstering sources of noninterest income."

The 9.30 percent Certificates were priced today at 99.65625 percent to yield 9.476 percent and were priced at 73 basis points over the current 7-5/8 of 12/93, 4 year Treasury. The certificates are expected to be rated Aaa by Moody's Investors Service, AAA by Standard and Poor's Corporation and AAA by Duff & Phelps Inc.

The certificates will have an average life of four years and an expected maturity of four and a half years and be partially supported by a letter of credit issued by the Industrial Bank of Japan. Commencing May 1990, investors will receive monthly interest payments at a fixed rate, while payments will be reinvested in other receivables. Twelve equal monthly principal payments are scheduled to begin in October 1993.

No offerings are made except pursuant to the prospectus for MBNA Credit Card Trust 1990-A.

MBNA America is a leading marketer of credit cards to affinity groups and ranks fourth amongst all bank credit card issuers. MNC Financial is a diversified financial services company which delivers a broad range of commercial and consumer banking products in the Washington/Baltimore common market and in the mid-Atlantic states. In addition, MNC is a pioneer in asset securitization and sales, and a leader in specialty

consumer finance products. Total market capitalization was $1.4 billion on Dec. 31, 1989, and total assets were $20.3 billion.

NEW YORK (MARCH 20) PR NEWSWIRE - Cable and Wireless plc (Cable & Wireless) and one of its wholly owned subsidiaries have today signed a sale and purchase agreement with certain associate companies of China International Trust & Investment Corporation Holdings (Hong Kong) Limited (CITIC Hong Kong) and with CITIC Hong Kong itself relating to the sale by Cable & Wireless' subsidiary of a total of 2,230,557,173 shares in Hong Kong Telecommunications Limited (Hong Kong Telecom), for a consideration of approximately HK$10 billion. The shares represent approximately 20 percent of the current issued share capital of Hong Kong Telecom.

This agreement remains conditional on the associates of CITIC Hong Kong completing the documentation relating to their financing arrangements for the transaction and on the drawdown conditions for such financing arrangements being fulfilled. In the absence of unforeseen circumstances, it is expected that the finance documentation will be signed later this week and, subject to the various drawdown conditions being fulfilled, completed about a week thereafter.

As part of the financing arrangements, one of CITIC Hong Kong's associates

is making an issue of covered warrants in respect of 669,164,000 shares. CITIC Hong Kong has confirmed that the shares in Hong Kong Telecom being acquired by its associate companies are intended to be held as a long-term investment and undertakings have been given that except in respect of such covered warrants and pursuant to the financing arrangements mentioned above, none of the shares will be sold to third parties before Jan. 1, 1993.

Cable & Wireless announced on March 12 that agreement in principle had been reached for a wholly owned subsidiary of Cable & Wireless to purchase from The Financial Secretary Incorporated (FSI) shares in Hong Kong Telecom representing approximately 3.4 percent of its current issued share capital for a consideration of approximately HK$1.7 billion. This transaction is separate from the arrangements with CITIC Hong Kong referred to above. It is intended that this transaction will be entered into at or about the same time that the sale of shares to associates of CITIC Hong Kong becomes unconditional.

Assuming that both transactions are completed, Cable & Wireless' interest in Hong Kong Telecom will be 58.6 percent (currently 72.2 percent) and FSI's 3.4 percent (currently 6.8 percent).

As stated in the announcement of March 12, Cable & Wireless does not contemplate any further public offering or widespread institutional placing of shares or securities convertible or exchangeable into shares in Hong Kong Telecom in the foreseeable future and has undertaken to CITIC Hong Kong that no such offering or placing will be made during the 12 months following completion of the CITIC transaction.

CONTACT: Rod Olsen, director of finance of Cable and Wireless plc, 011-441-315-4405, or Felicia Vonella of Dewe Rogerson, 212-688-6840, for Cable and Wireless.

MEMPHIS (MARCH 20) PR NEWSWIRE - Embassy Suites, Inc. today announced the sale of a 90-percent interest in EPT La Jolla Limited Partnership, which owns the Embassy Suites hotel in La Jolla, Calif., to U.S. subsidiaries of offshore investors for $57,960,000.

Embassy Suites, Inc. will continue to manage the hotel and an affiliate of Embassy Suites, Inc. will retain a 10 percent general partnership interest valued at $6,440,000. The partnership will be renamed Embassy La Jolla Partners Limited Partnership.

Embassy Suites, Inc. is owned by The Promus Companies Incorporated (NYSE: PRI). Sale of the 335-suite property represents a continuation of Promus

Companies' policy of developing hotels for sale to investors while retaining a management or franchise interest in the properties.

Proceeds from the sale will be used to pay off the hotel's mortgage debt and for general corporate purposes. Embassy Suites, Inc. will recognize a gain from the sale of its interest.

In addition to Embassy Suites, Promus is the parent company of Harrah's casino/hotels and Hampton Inn and Homewood Suites hotels.

NEW CANAAN, CT (MARCH 20) PR NEWSWIRE - Smith Corona Corporation (NYSE: SCO) announced today that in response to the market shift to lower priced products resulting from the economic downturn in the U.S. and continuing softness at the retail level, it will realign its current production levels at its Cortland, N.Y., and Singapore manufacturing facilities. This action will result in an additional reduction of approximately 350 employees at Cortland offset by increases of approximately 300 employees in Singapore. The previously announced shortened work-week at Cortland will also continue.

According to G. Lee Thompson, chairman and chief executive officer, "Our overall U.S. market position remains stable and strong and our international business continues to grow, but as frequently happens during an economic downturn, demand for higher priced products, such as those produced at the Cortland facility weakens and demand for lower priced products increases."

"Any cut in the workforce is regrettable," Thompson said, "but it is necessary to meet the changing market conditions and to balance inventories, enabling the company to make a smooth transition to our new product line which will be introduced this summer."

Smith Corona, based in New Canaan, Conn., is the world's largest manufacturer of portable electronic typewriters and one of the largest manufacturers of personal word processors. The company also markets office supplies, including hanging file folders, file folders, paper, pads office forms and customized printed products.

DAYTON, OH (MARCH 20) PR NEWSWIRE - The Duriron Company, Inc. (NASDAQ: DURI) will receive a 1990 Technology Achievement Award from the Dayton Area Technology Network (DATN) on March 20 at award ceremonies in Dayton, Ohio. DATN is presenting awards to organizations who have made the most significant contributions to the advancement of technology and economic growth in Southwest Ohio. The award categories included: large business, small business and not-for-profit organizations such as government, universities and other research and development centers.

The 1990 Technology Achievement Award recognizes two Duriron materials oriented achievements:

1) Development and use of a patented Induction Skull Melting (ISM) process for the melting of titanium, zirconium and other reactive alloys; and

2) Invention of a new, patented process for making lightweight foamed ceramics (ceramic foam). Eight patents have been granted covering this material and its manufacturing process.

The Induction Skull Melting process produces titanium, zirconium and other

reactive alloy castings of higher quality and with more homogeneity than conventional processes. Duriron and the Consarc Corporation, a leading producer of melting equipment, are developing an upscaled furnace to permit production of larger castings and ingots. Shelby W. Scott, manager of the project, states that, "Groups with diverse concerns, ranging from laboratory scale research heats of titanium to production of titanium aluminide ingots for aerospace applications, have expressed an interest in the process."

Duriron's ceramic foam material has a number of applications in the areas of energy conservation and environmental protection. Kiln furniture which is used to support ceramic articles while they are being fired, high temperature insulation blocks, and diesel particulate filter elements are product applications being actively pursued. Robert C. Schenck, President of Duriron's Cercona, Inc. subsidiary says, "The potential for commercialization of this technology is immense."

WAUKEGAN, IL (MARCH 20) PR NEWSWIRE - Outboard Marine Corp. (NYSE: OM) ("OMC") today announced that it had reached an agreement in principle to acquire certain assets of the Grumman Boats Division of Grumman Allied Industries, Inc., a subsidiary of Grumman Corp. (NYSE: GQ).

The Grumman Boats Division is an established manufacturer of a variety of aluminum recreational boats, ranging from canoes and small fishing and utility boats to larger pontoon boats. OMC is the world's largest manufacturer of outboard motors and a leading manufacturer of pleasure boats.

Under the terms of agreement, OMC would acquire boat manufacturing plants and equipment in Marathon, N.Y., and Arkadelphia, Ark., and could acquire a plant in Minong, Wis. OMC would also obtain all current inventory of Grumman boats and the exclusive license to use the Grumman name on a worldwide basis to market aluminum recreational boats.

"This acquisition provides us with additional manufacturing capacity for aluminum boats in the northeastern and southern regions of the country," said OMC President and Chief Executive Officer James C. Chapman. "It also gives us another brand of outboard powered aluminum boats to satisfy demand for these products among our Johnson and Evinrude outboard motor dealers," Chapman said.

OMC currently manufactures Lowe, Sea Nymph and Suncruiser aluminum boats in the United States, along with eight brands of fiberglass boats.

According to Chapman, the newly acquired boat unit will report to Dennis E. McArdle, vice president of OMC and president of the OMC Boat Group. McArdle said Robert N. Anderson would be named president of the new unit at the finalization of the agreement. Anderson currently is director of outboard sales at OMC.

"Bob Anderson's knowledge of our outboard dealer network and his understanding of our dealers' needs make him an ideal candidate to take over the task of establishing Grumman boats within our dealer distribution system," McArdle said.

With 1989 net sales of $1.5 billion, OMC is a major, worldwide manufacturer and marketer of boats, marine engines, marine accessories and services.

CONTACT: Ronald C. Kuykendall of OMC, 708-689-5642.

ATLANTA (MARCH 20) PR NEWSWIRE - William A. Schwartz, president and chief executive officer of Cannell Communications Inc., today announced the company's planned acquisition of television station WUAB in Lorain/Cleveland, Ohio. The station is the leading independent in the market, which ranks 11th in terms of television households. Gaylord Broadcasting Company of Ohio Inc. is the current owner of the station and was represented in the transaction by Howard Stark.

In addition to the acquisition of WUAB, Schwartz announced that Saratoga Parnters II, L.P. has joined the Cannell Studios and Scwhartz as a joint venture partner in the Cannell broadcast venture. Saratoga is a leveraged buy-out fund managed by Dillon, Read & Company Inc., which also acted as a financial adviser to the company in the transaction.

The proposed purchase of WUAB is subject to approval by the Federal Communications Commission.

WUAB went on the air in September, 1968, and was owned at the time by United Artists Broadcasting. Schwartz was part of the management team responsible for building WUAB from inception through 1973, and was General Manager of the station during much of that period. Although the station was not the first independent on the air in Cleveland, it became, within one year, the leading independent in the market and has remained so throughout its history.

"WUAB represents a truly unique opportunity and clearly indicates the type of properties we are looking to acquire," according to Scwhartz. "This is

a powerhouse independent in a large market which is in the midst of an economic resurgence. We believe strongly in the future of the station as well as the market. I am looking forward to working with the excellent management and staff that has been built over a period of many years, including some who were there during my tenure at the station."

In November, 1989, the company announced its plan to acquire television station WHNS which serves the tri-city market of Greenville, S.C., Spartanburg, S.C., and Asheville, N.C. That market currently ranks 35th nationally in terms of television households. The total acquisition cost of WUAB and WHNS, including the retirement of certain program liabilities, represents an aggregate investment by Cannell Communications of over $100,000,000.

Cannell Communications was formed in November, 1989, and is headquartered in Atlanta. The company is the newly formed broadcasting affiliate of The Cannell Studios. Founded by Stephen J. Cannell, who serves as chairman of the board and chief executive officer, The Cannell Studios was formed in 1986 as the parent company for all Cannell owned/operated entities, including Stephen J. Cannell Productions Inc., one of the leading independent producers of primetime television programming; Cannell Films of Canada Ltd.., a Vancouver-based production company; North Shore Studios the largest film and television studio in Canada, which opened its doors in July, 1989, and Image Point Productions Inc., which principally produces commercials for the national advertising market.

Stephen J. Cannell Productions has four shows that are currently in production: "Wiseguy" (CBS), "Hunter" (NBC), "21 Jump Street" (FBC) and "Booker" (FBC).

CONTACT: Maryann Ridini, VP-Publicity, Advertising, Promotion of Stephen J. Cannell Productions, 213-465-5800, ext. 7894.

CHICAGO (MARCH 20) PR NEWSWIRE - EdgeMark Financial Corp. today announced 1989 net income of $3,564,742, up from the $1,248,726 posted for 1988.

The 1989 results include the acquisitions of three banks on Dec. 30, 1988, and the opening of a new bank, EdgeMark Bank Rosemont, in January 1989. The newly acquired banks are Merchandise National Bank, Chicago, EdgeMark Bank Lombard and the First National Bank of Lockport.

According to Charles A. Bruning, EdgeMark Financial Corp.'s president and chief executive officer, the corporation's 1989 performance was bolstered by a significant turnaround at its Merchandise National unit. "When we acquired Merchandise National it had reported an $874,000 loss. After one

year of operation as part of EdgeMark Financial Corp., the bank reported net income of $1,664,000, which represented a 1.15 percent return on average assets and a 17.79 percent return on equity. With the exception of our new bank in Rosemont, which was ahead of budget, all of our other banks had a record year," said Bruning.

Year and deposits for EdgeMark Financial were $388,523,857, and assets as of Dec. 31, 1989 were $447,710,463.

EdgeMark Financial Corp. is a $450-million multibank holding company that owns and operates Merchandise National Bank in the Merchandise Mart, NBC Tower and Germania Place; Edgewood Bank in Countryside and Woodridge; EdgeMark Bank Lombard; First National Bank of Lockport; and EdgeMark Bank Rosemont.

#90079p0307 03/20/1990 ~PR Newswire

DALLAS (MARCH 20) PR NEWSWIRE - Sterling Software Inc. (AMEX: SSW) announced that the General Services Board of Contract Appeals (GSBCA) upheld Sterling's second protest of the proposed award of a contract at the NASA/Ames Research Center and directed NASA to award the contract to Sterling Software.

The board disqualified Computer Sciences Corp. from further participation in the procurement for making a material misrepresentation in its proposal

to NASA. The board further held that the third bidder on the contract was not in line for an award because its proposal was not competitive with respect to either technical merit or cost and found that Sterling's Federal Systems Group was the only bidder eligible to negotiate with NASA for award of the contract.

Sterling had been told in November 1988 that it was the unsuccessful bidder on the contract based solely on price. After attending a debriefing at NASA/Ames, Sterling filed a protest of the proposed award to CSC saying that Sterling had, in fact, submitted the lowest cost bid. In March 1989, the GSBCA upheld Sterling's protest and directed NASA/Ames to reopen negotiations with Sterling and the other bidders consistent with the board's findings.

Following another formal review of the competing proposals, NASA notified Sterling in October 1989 that it had again selected CSC based on NASA's determination that CSC's proposal offered the lowest cost. Sterling again protested that determination to the GSBCA. Sterling L. Williams, president of Sterling Software, said, "The Board's decision today vindicates our belief that our proposal offered NASA the highest quality technical performance and the lowest cost. We look forward to continuing to provide software services in support of NASA's research efforts and data processing requirements in accordance with the same high standards under which we've been performing at NASA/Ames for the past 20 years."

The contract is for a three-year base period and two one-year options and is a recompetition of a previous five-year contract held by Sterling. Based on Sterling's proposal, the value of the first 12 months of the contract is estimated to be in excess of $24 million in revenue. Sterling also continues to provide other services to NASA/Ames under seven separate contracts.

Sterling Software, headquartered in Dallas, specializes in systems and applications software products for industry and government in the United States and internationally, and in specialized technical services for the United States federal government.

BERKELEY HEIGHTS, NJ (MARCH 20) PR NEWSWIRE - Customedix Corporation (AMEX: CUS) announced today that based on an internal review at one of its medical subsidiaries, it may be required to make an accounting adjustment which could have a negative impact on its second half earnings.

"While management believes that there could be a one-time reduction of earnings of approximately $390,000, the company expects to be profitable for the second-half ending June 30, 1990.

"The problem is located in one subsidiary and does not affect the other four operating entities which are profitable. Customedix is financially healthy, recently voluntarily called senior debentures, partially prepaid junior debentures and bank debt, in the last quarter, and has positively increased its financial ratios. It has accomplished the foregoing without resort to any new borrowings," Gordon S. Cohen, chairman and chief executive officer, said.

"The company's new dental product introductions are being greeted with considerable market enthusiasm on a worldwide basis. While we regret this temporary third quarter event, we believe the future is very bright for the company's products and prospects, and will report additional news when available." Cohen said.

CONTACT: Gordon S. Cohen, chairman and chief executive officer, or Barry Kosowsky, assistant treasurer, 203-265-7397, or Andrew A. Miller, chief financial officer, 201-464-2214, all of Customedix.

DETROIT (MARCH 20) PR NEWSWIRE - General Motors today honored Delta College on the 10th anniversary of what GM President Robert C. Stempel called "one of the most productive alliances ever forged between a manufacturer and higher education."

At campus ceremonies in University Center, Mich., GM executives joined with school officials to mark Delta College's 10th anniversary as the premier institution in GM's innovative Automotive Service Educational Program (ASEP).

In a special letter to Delta College President Donald J. Carlyon, Stempel praised the school for its pioneer role in ASEP and added:

"Because of your willingness to embark on a new endeavor, we now have a nationwide program providing GM dealers with new generations of automotive service technicians."

Stempel's letter and a commemorative plaque were presented to President Carlyon by Arvin F. Mueller, vice president and group director of engineering for GM's Chevrolet-Pontiac-GM of Canada Group.

GM's ASEP is a two-year associate's degree program that prepares new service technicians for GM dealerships. Prospective students are sponsored by a participating GM dealer. Students split time between the classroom and the service department at their GM dealer sponsor.

GM's ASEP was an industry first when it was started by Delta College. Today, the program is offered at 50 colleges and universities nationwide, including Michigan sites at Macomb Community College in Warren and Ferris State University in Big Rapids. Equally impressive is the fact that most of GM's competitors now have service technician training programs patterned after GM's ASEP.

The well-rounded ASEP curriculum features courses not only in automotive technology and electronics, but also in math, reading and communication skills. GM helps train the college instructors and monitors school performance to assure compliance with the highest standards. The company also provides instructor updates, new vehicles, components and diagnostic equipment to keep prospective technicians abreast of the latest advancements.

During its first 10 years, ASEP has produced nearly 2,400 graduates who have earned an associate's degree. With enrollment on the upswing, the forecast is for 1,000 graduates annually by 1992.

Delta College's ASEP success has led to other cooperative opportunities. In the last three years alone, the college has provided GM and its employees more than 60,000 man-hours of training. This includes electronics courses for assembly plant employees, product training for GM marketing centers, and even personal money-management seminars for GM-UAW employees.

WILMINGTON, DE. (MARCH 20) PR NEWSWIRE - A Du Pont (NYSE: DD) grant will enable 260 teachers to attend the annual meeting of the National Science Teachers Association (NSTA) in Atlanta April 4-8.

Fifty-eight of the attendees teach in 44 Delaware schools. The remaining teachers represent 62 communities in 28 states where Du Pont has major sites.

"Du Pont's primary goal is to stimulate new ideas to make science teaching more interesting to both student and teacher," said John R. Malloy, Du Pont senior vice president-external affairs.

This is the seventh year the company has sponsored attendance at NSTA meetings. Each year Du Pont sites work closely with their school districts. The company provides financial and program support so elementary and secondary science teachers can attend NSTA meetings. Teacher selection is based on merit as determined by school administrators.

Early in the 1980s, a series of national reports focused attention on the startling decrease in the number of teachers and students in science at the pre-college level. Business and industry were asked to help.

Du Pont determined that activities in direct support of teachers would have the greatest impact, and that attendance at NSTA meetings provided access to ideas, materials and other resources. It also helps to reinforce the status of the science teacher and the science agenda in the school.

"Du Pont has supported education in science and engineering for more than 70 years," Malloy said. "The company believes quality science education at all levels is the lifeblood on which its business is built, and that a basic understanding of the sciences enables people to make intelligent decisions about the role technology will play in their lives."

The NSTA sponsorship program is part of a corporate aid-to-education program which distributes more than $15 million worldwide annually. In 1990, Du Pont said it expects to contribute $2 million to support programs aimed at enhancing the quality of science and math education for pre-college students. The remaining funds primarily support colleges and universities.

WHITE PLAINS, NY (MARCH 20) PR NEWSWIRE - NYNEX Corporation (NYSE: NYN) yesterday announced the offering of $450 million 20-year debentures due May 1, 2010.

The non-callable debentures are priced at par to yield 9.55 percent. Annual principal installments are payable May 1, beginning May 1, 1991. The amortizing debentures have an average life of 11 years.

The issue will be sold through a group of underwriters led by The First Boston Corporation.

The debentures are being sold pursuant to a shelf registration filed with the Securities and Exchange Commission covering $500 million in debt securities. Net proceeds of this offering will be used exclusively to finance the repurchase of shares of NYNEX common stock in connection with the creation of a leveraged employee stock ownership plan.

The issue has been rated Single A-2 by Moody's Investor Service, Inc., and Single A by Standard & Poor's Corp.

RIDGEFIELD, NJ (MARCH 20) PR NEWSWIRE - Kane Industries, Inc. announced today the successful completion of its restructuring transactions. As part of the restructuring, approximately 99.9 percent of Kane's outstanding 12-3/4 percent senior subordinated debentures due 2001 were exchanged for a combination of cash, senior subordinated discount notes due 1998 and warrants to purchase its common stock. All of Kane's junior subordinated debentures due 2001 were either exchanged for a combination of its preferred stock and common stock or purchased by Kane for cash. Kane also repaid its existing bank debt and repurchased a majority of its outstanding common stock.

Lancer Industries, Inc., formerly known as McLean Industries, Inc., purchased newly issued common stock and preferred stock of Kane for an aggregate purchase price of $6.5 million. Kane also entered into a new senior credit agreement that provides for borrowings of up to $47 million.

Kane management believes that this restructuring will result in lower cash

debt service requirements and will enable it to fund capital expenditures and working capital necessary to strengthen future operations.

Kane Industries, through its principal operating subsidiary, Alford Industries Inc., is a leading manufacturer and marketer of high quality packaging for the consumer products industry.

Lancer Industries, Inc.'s principal operating subsidiaries include Fairfield Manufacturing Company, Inc., North America's leading producer and supplier of high precision custom gears and gear systems, and Golding Industries, Inc., the leading manufacturer of printed mattress ticking in the United States and Canada, which is also engaged in the textile contract printing business.

#90079p0339 03/20/1990 ~PR Newswire

HARRISBURG, PA (MARCH 20) PR NEWSWIRE - Nationwide Insurance late yesterday asked a federal court to bar enforcement of various sections of Pennsylvania's auto insurance law because, the company said, they violate the U.S. Constitution.

The request was made in a motion for a preliminary injunction filed with the Middle District Federal Court in Harrisburg, the city where Nationwide has a major regional office headquarters.

Nationwide Insurance, the second largest auto insurer in Pennsylvania, on Feb. 26 filed in the same court a lawsuit against the Commonwealth's new law.

And on March 15, Nationwide, State Farm, and Allstate filed an "amici curiae" (friends of the court) brief in support of Keystone Insurance's federal court appeal to block the controversial law.

The law was passed hastily the afternoon of Feb. 7 by both houses of the legislature, signed by the governor, and announced in time for the 6 o'clock news.

In its request for the injunction, Nationwide is asking the court to block: 1) the rate freeze, 2) the rate rollback, 3) the one-year ban on any needed rate increases, and 4) the restriction that rates after July 1, 1991 can be increased only by the amount of cost of living indices.

Nationwide, which insures 800,000 cars in Pennsylvania, declared that its current auto insurance rates are inadequate. The company had a request for a 6.9 percent rate increase pending with the state insurance department when the law was passed.

Nationwide said the rate rollback, rate freeze, and rate increase restrictions will aggravate the company's chronic auto insurance losses in Pennsylvania.

The company argues that the rate freezes and rate reductions mandated in Pennsylvania's new law "are arbitrary, capricious, and in violation of due process and equal protection under the United States Consitution."

Because of the company's current inadequate rates, Nationwide argued that the law's projected cost savings will be too little to offset losses even if the mandated rate rollbacks of 10 percent and 22 percent were reduced to zero.

#90079p0343 03/20/1990 ~PR Newswire

ENGLEWOOD, CO (MARCH 20) PR NEWSWIRE - Big O Tires, Inc. (NASDAQ/NMS: BIGO) today reported net income of $556,600, or $.03 per share for the quarter ended Dec. 31, 1989, compared to net income of $97,400, or $.01 per share for the corresponding quarter in 1988. Net income for the fourth quarter of 1989 includes year-end adjustments amounting to $325,200 due primarily to previously accrued expenses that were not incurred. Sales in the fourth quarter of 1989 were $27,072,500, representing an increase of $2,819,100, when compared to sales of $24,253,400 for the same period in 1988.

Net income for the year ended Dec. 31, 1989, was $1,611,800, or $.10 per share, compared to net income of $1,530,200, or $.10 per share in 1988. Sales for 1989 of $108,227,600 representing an increase of $14,704,800 as compared to sales of $93,522,800 for 1988.

Steven P. Cloward, president and chief executive officer of Big O Tires, Inc. stated, "The growth of the company's sales has exceeded our initial projections. Certain expense and gross profit levels were negatively impacted by a number of factors beyond the control of the company. The supply of Big O's private brand tires did not meet the company's demand during 1989. Total expenses associated with Big O's full tire warranty program was substantially higher than projections and well above 1988 expenses. Although management of the company has taken a number of steps to rectify these situations, we expect the warranty expense to increase during 1990."

During 1989, the company sold three of its company-owned retail stores located in Arizona and southern California to Big O franchisees for cash and notes. This resulted in a net gain of $314,800 from the sale of these stores. Sales through the company's distribution centers were $95,866,900 in 1989, representing an increase of $12,314,700 as compared to $83,552,200 in 1988. This increase can be attributed to increased sales

by existing Big O dealers and the addition of 31 new stores during 1989.

The actual expense associated with the company's full warranty program amounted to $3,883,800, representing an increase of $1,462,800 as compared to 1988. The company's gross profit, expressed as a percentage of sales, decreased by 1.0 percent as a result of the increased warranty expense. A second factor impacting gross profit was the inability of the company to acquire and sell the Big O brand tire units that it had originally expected. Gross profit from the sales of Big O brand tires is the single largest source of gross profit to the company. This situation was rectified during the fourth quarter of the year and Big O brand tires have remained in good supply through the first quarter.

Selling, general and administrative expenses increased by $1,697,300 in 1989 as compared to 1988. Interest expense increased by $99,300 in 1989. The expense control measures that were instituted in 1989 ensured that the company's operating expenses only increased at a rate that was consistent with its growth during the year.

Cloward further stated, "In 1989, the company made a number of tremendous strides including improving its distribution system, establishing a supply agreement with General Tires, opening 31 new retail stores, and improving the quality and breadth of the Big O brand tire line. Each of these factors will contribute to the continued growth of Big O Tires, Inc. in 1990."

Big O Tires, Inc., headquartered in Englewood, Colo., provides quality tires and automotive service through 335 company and independently owned stores in 15 states.

LOS ANGELES (MARCH 20) PR NEWSWIRE - Automundo, the nation's only Spanish language automotive enthusiast magazine, named the 1991-model Ford Explorer as its "Truck of the Year."

In announcing the award at ceremonies here today, Enrique Kogan, Automundo editor and publisher, said, "Explorer fits the active lifestyle of today's Hispanic buyer. It provides car-like comfort and conveniences and truck-like versatility for family and recreational transportation."

The Ford Explorer, which went on sale last week at Ford dealerships, replaces the Bronco II in Ford's truck lineup. It comes in two- and four-door and two-wheel- and four-wheel-drive models, all with a 4.0-liter electronically fuel-injected V-6 engine.

Accepting the award on behalf of Ford Motor Company was Roger Simpson, Explorer program manager. "We are truly grateful for the award," Simpson said. "It affirms our goal of being customer driven -- offering customers a quality vehicle that meets their transportation needs at an affordable price."

Four-door models, which can seat up to six passengers, are expected to appeal to families who want the added adventure and versatility a utility vehicle brings. The two-door model should suit the younger buyer who wants this Explorer's versatility along with unique and bolder styling cues.

Explorer sheet metal is virtually all new. Its aerodynamic styling results in a 0.43 coefficient of air drag -- the lowest ever for a Ford

utility vehicle -- contributing to better fuel economy and less wind noise. Windows are flush-mounted using advanced sealing techniques to help improve air flow.

Limo-style doors contribute significantly to Explorer's contemporary looks. They wrap over the roof and incorporate side-intrusion beams and flush-mounted glass.

The liftgate has pneumatic cylinders to help raise and support the gate in the open position. There is a "grab" handle to make it easier to lower the gate and the liftgate flips open with the assistance of pneumatic struts. Two-door models offer a flip-open quarter window.

Ease of entry and exit is designed to be best-in-class. A longer, wider and lower stance results in a lower step-in height than many other compact utility vehicles. On two-door models, a wider door and driver and passenger tip-and-slide seats create more front-to-rear pass-through space making it easier to get into the rear seats. Explorer's interior offers spacious passenger and cargo capabilities.

The instrument panel is "user friendly," with all controls close at hand. Gauges, tachometer and trip odometer are standard equipment.

Four-door models have bucket or split bench front seats and a 60/40 three-passenger split rear bench seat that folds down completely for a flat load floor, creating a spacious 79.7 cubic feet of load-hauling space.

Cargo capacity on two-door models with its 50/50 split rear seat down is 65.8 cubic feet. There are four tie-down hooks in the rear compartment of all models, with an optional cargo net available.

A forced-air heater and air conditioning system has four registers and front-door window demisters, plus a rear floor heat duct for rear passengers.

Explorer's 4.0-liter V-6 engine generates 155 horsepower at 4,200 rpm and 220 foot pounds of torque at 2,400 rpm. It is teamed with a standard five-speed manual overdrive or optional four-speed automatic overdrive transmission.

Other standard equipment includes Ford's rear anti-lock brake system; Touch Drive transfer case that lets drivers shift in and out of four-wheel drive "on the fly;" 19-gallon fuel tank; transfer case and fuel tank skid plates on 4x4 models; gas-pressurized shock absorbers; front and rear stabilizer bars; rear-step bumper that can handle trailers or boats weighing up to 3,500 pounds; a frame-mounted full- sized spare tire; 2.5 mph bumper system; large P225 P-Metric radial black sidewall tires; and an upgraded tandem brake booster/master cylinder for higher gross vehicle

weight (GVW) applications.

The Ford Explorer will be the first Ford light truck to offer the premium Ford JBL Audio System, which features an electronic AM/FM stereo radio and cassette or CD player. Switchable Dolby B and DNR noise reduction and seek and scan capability are provided for both the radio and cassette tape.

In the Ford JBL system, nine speakers are strategically placed for full sound reproduction. A tweeter and mid-range speaker are paired in sealed enclosures in four locations for controlled system performance and a subwoofer, sealed in a special 10-liter enclosure and powered by its own amplifier, provides strong bass performance.

The bi-amplified system has a total of 145 watts of power. Voltage-limiting circuitry prevents amplifier clipping distortion at high volume levels, and as with all the Ford JBL Audio Systems, it is custom-equalized to the Ford Explorer interior, providing the best sound reproduction possible.

Major Explorer options also include leather trim seats with map pockets, power equipment group, sun roof, luggage rack and cast aluminum wheels.

The Explorer is being built at Ford's Louisville (Ky.) Assembly Plant.

PHILADELPHIA (MARCH 20) PR NEWSWIRE - For the third year, the Rohm and Haas Co. is sponsoring HOME-AID, a concert to benefit the homeless, on Sunday, March 25, at historic St. Mark's Church in Philadelphia.

Maestro Riccardo Muti will conduct the Academy Chamber Players in an all-Mozart program featuring internationally acclaimed soprano Barbara Hendricks.

All proceeds from the concert will be donated to the Philadelphia Committee for the Homeless, St. Mark's Food Cupboard, My Brother's House and Winter Shelter. The performance will be broadcast live on WFLN-FM, during which the HOME-AID III HOTLINE will be open so that listeners can phone in their contributions. The hotline number will be announced on the air during the program.

WCAU-TV news anchor Diane Allen is hostess and spokesperson for this year's concert and is an active volunteer with a number of charitable organizations including the Philadelphia Committee for the Homeless.

"Most homeless people are bright, vital people who just happened to be the victim of some type of personal disaster like fire in their home, mental or physical abuse, or an addiction," said Allen. "These people don't need a handout, they need a hand up, and HOME-AID is just that. We need to commit every resource and every dollar we can to solving this problem."

Muti's work on behalf of refugees world-wide earned him the title of Honorary Ambassador to the United Nations High Commissioner for Refugees. He has performed benefit concerts with both the Philadelphia Orchestra, and La Scala in his native Italy.

"Artists have always been known to speak out about conditions in society they feel should be changed," said Muti. "The homeless have become refugees in their own country. Now, that must change. By performing this concert to benefit the homeless, the Academy Chamber Players are using their talents and skills to help not only those in need, but all of us who live in this world together."

Combined, HOME-AID I and II raised more than $55,000 for area charities. "The number of homeless keeps increasing each year and so does the cost of getting help to them, so each year the money doesn't seem to go quite as far," said Barbara Govatos, music director for the Academy Chamber Players.

"This year, with increasing public awareness, the continued support of Rohm and Haas and their help in encouraging other corporations to become involved, we hope to top last year's total."

SALT LAKE CITY (MARCH 20) PR NEWSWIRE - GCI Industries, Inc. (NASDAQ: GCI) announced today that PG Acquisition, Inc. ("PG") has purchased 2,003,011 shares of common stock of the company from seven shareholders and has entered into covenant not to compete agreements with such persons for a total consideration of $4,495,119. PG now owns 2,198,011 shares of the company's common stock which represents approximately 55 percent of the total stock outstanding.

As a result of the purchase of the shares, PG and the company believe that the proposed merger agreement previously announced will be consummated in accordance with its terms. Under the terms of the merger agreement, as amended, the public shareholders of the company will receive a cash price at $2.537 for each share of common stock held by them.

Shareholders of the company will be asked to approve the merger at the company's next regularly scheduled annual meeting of its shareholders expected to be held in May 1990. Closing of the merger is scheduled for May 31, 1990, unless extended by the parties.

GCI's Golf Card subsidiary provides its membership, for an annual fee, the opportunity to play two 18-hole rounds of golf, without payment of green fees, at each of over 1,650 golf courses in the United States and abroad and to stay at over 360 country club golf resorts throughout the United States at special rates discounted from the resorts' regular golf packages.

FREMONT, CA (MARCH 20) PR NEWSWIRE - Everex Systems Inc. (NASDAQ: EVRX) today announced the promotion of two of its corporate staff members to vice president positions.

Mark Marlow, formerly general manager of Ingram Micro-D's Macintosh division, has been named vice president of marketing. In his new position Marlow will be in charge of all marketing functions for each of Everex's divisions and subsidiaries. "The appointment of Mark will allow Everex to plan its marketing efforts for its multiple products and multiple channels of distribution in a cohesive manner," said Steve Hui, president of Everex.

Robert Hayes has been appointed to the newly created position of vice president of quality and services. "The creation of the new position underscores Everex's commitment to customer satisfaction," said Hui. Hayes has been with Everex for the past two years, during which time he has held various management responsibilities in the areas of technical support, customer service, information systems and material planning, in addition to managing the Network Products division.

"The appointments of Mark Marlow and Robert Hayes round out our senior management team to reflect the current size of our operation," said John Lee, executive vice president and co-founder of Everex. "Both Mark and Robert have made substantial contributions as members of corporate management, and we are confident that they will continue to be highly effective in their new roles as corporate officers," continued Lee.

Everex Systems, headquartered in Fremont, is a leading manufacturer of personal computers and peripheral and enhancement products for the personal computer marketplace. Founded in 1983, Everex markets its products worldwide through a network of value-added dealers and resellers. Everex stock is traded on the National Market System under the NASDAQ symbol EVRX.

CONTACT: John Lee, 415-683-2160, or Anne Butler, 415-683-2491, both of Everex.

TEL AVIV, Israel (MARCH 20) PR NEWSWIRE - Aryt Optronics Industries Ltd. (NASDAQ: ARYTF) today announced results of operations for the third quarter and nine months ended Dec. 31, 1989.

Net sales for the first nine months of the current fiscal year amounted to $6,441,000, compared with $8,467,000 in the same period last year. Net loss for the current nine-month period amounted to $951,000, or 19 cents per share, compared with a net income of $10,000 in the same period ended Dec. 31, 1988.

Net sales for the third quarter of the current fiscal year amounted to $1,335,000, compared with sales of $2,840,000 in the corresponding period last year. Net loss for the three-month period amounted to $1,147,000, or 23 cents per share, compared with a loss of $82,000, or 2 cents per share, in the same period a year ago.

The company reported that its working capital on Dec. 31, 1989, was $6,691,000, and its liquid financial resources on the same date were $7,546,000. Shareholders' equity on Dec. 31, 1989, amounted to $10,371,000, which represents 74 percent of equity to total assets.

As previously announced, during the third quarter, Aryt's subsidiary in the United States, D.T. Industries Ltd. (formerly Diamond Electro- Optics Inc.), reached an agreement to sell its operating assets, business, goodwill and know-how to an unaffiliated U.S. company. This accounted for a decrease in the company's sales, and resulted in a one- time expense of $815,000.

Subsequent to Dec. 31, 1989, Aryt reached an agreement with its subsidiary Ophir Optics Jerusalem Ltd., to sell to Ophir Aryt's Jerusalem-based operating assets for production of diamond-turned optical elements. This production line will be fully integrated into the Ophir Optics firm. This sale will result in a one-time loss of $130,000.

Aryt Optronics Industries Ltd. is a leading independent designer and manufacturer of diamond-turned optical elements, coatings, specialized instrumentation and subsystems for electro-optical systems. The company also produces a line of laser power meters. Aryt's products are used in precision-guided weapons, scientific instruments, night vision systems, observation and navigation devices, flight simulators and a range of electro-optical and optical subsystems. The company's diversified product line meets the ever-growing demand for electro-optical elements for commercial applications, and includes ultra-low scatter technology and X-ray optics. Aryt is headquartered in Tel Aviv, with production facilities located in Jerusalem and a sales office in the United States.

RICHMOND, VA (MARCH 20) PR NEWSWIRE - CSX Corp. (NYSE: CSX) today announced it has asked the special committee of the board of directors of RF&P Corp. to agree to mutually terminate the RF&P/CSX merger agreement announced on Feb. 20, 1990.

"Our intention," said Hays T. Watkins, chairman of CSX, "was to merge the two companies only with the full and unanimous support of the directors of

RF&P who are not affiliated with CSX and only with the support of the Virginia Supplemental Retirement System (VSRS) which had been represented on the special committee and the RF&P board of directors. Events since announcement of the proposed merger, culminating with the replacement by the VSRS of those of its representatives on the RF&P board who negotiated and endorsed the proposed transaction, indicate the transaction no longer enjoys the unanimous support of the RF&P directors or the VSRS.

"It is absolutely clear," said Watkins, "that the proposed merger is in serious conflict with a wide variety of competing external interests, that it has been the subject of substantial amounts of misinformation, and that the likelihood of the VSRS and the General Assembly favorably ratifying it is in serious question. While we regret this assessment, we must face reality.

"We believe the transaction agreed upon by CSX and the independent RF&P directors is fair and in the best interests of the shareholders of both corporations and represents top dollar for the RF&P minority interest," he said.

"However, in light of the changed circumstances," Watkins added, "it is apparent now that the best interests of the shareholders of both RF&P and CSX will be best served by mutual termination of the agreement. This should be followed," he said, "by the prompt public release by RF&P and CSX of all opinions and evaluations on the merger by their respective advisors."

CSX proposed to the Special Committee that it be reconstituted to include all non-CSX directors, including the two new directors from VSRS. CSX also indicated it would not object if a market test were conducted to determine if there exists a third-party purchaser for the RF&P shares not owned by CSX at a price in excess of $34.50 per share.

"We should now move on," he said. "We see no alternative other than termination to end the disruptive influences of the current situation with respect to RF&P's ongoing business operations and the continuing, and obviously futile, spending of shareholders' funds on a merger which seems impossible to accomplish under the circumstances," Watkins said.

"We feel a sense of great disappointment over these developments which prevent fair and informed consideration of our proposal. We know the many RF&P shareholders who support the merger will share these sentiments. While we do not intend to make a tender offer for RF&P stock, we may, after termination of the merger agreement and depending on market and other conditions, purchase additional shares of RF&P Corp. in the market through local brokerage houses or otherwise," he concluded.

#90079p0376 03/20/1990 ~PR Newswire
COLUMBUS, OH (MARCH 20) PR NEWSWIRE - The Securities and Exchange Commission has approved a long-term financing program of up to $250 million for Columbus Southern Power (CSP), an operating company subsidiary of American Electric Power (NYSE: AEP).

The program is to consist of the issuance and sale of one or more new series of first mortgage bonds, unsecured long-term notes and one or more series of cumulative preferred shares.

A portion of the proceeds from the issuance and sale of these securities may be used to redeem all outstanding series of CSP's cumulative preference shares and cumulative preferred shares or to retire short-term indebtedness issued for such redemptions.

CSP's board of directors has not yet authorized such redemptions. If approved, such redemptions would occur after and would be in addition to the sinking fund redemptions at par already scheduled for May 1, 1990, of 60,000, 32,000 and 54,834 shares of CSP's cumulative preferred shares in the $3.75 Series and 9.50 percent Series and cumulative preference shares in the $15.25 Series, respectively.

After May 1, 1990, the cumulative preferred shares anticipated to be redeemed are as follows:

$3.45 Series, par value $25.00 at $27.59 per share, $3.75 Series, par value $25.00 at $27.82 per share, 10 percent Series, par value $100.00 at $104.00 per share, 9.50 percent Series, par value $100.00 at $104.75 per

share, $2.42 Series, par value $25.00 at $28.355 per share, 8.52 percent Series, par value $100.00 at $102.00 per share, 7.52 percent Series, par value $100.00 at $104.00 per share, 4.65 percent Series, par value $100.00 at $101.00 per share, 4-1/4 percent Series, par value $100.00 at $110.00 per share. The outstanding $15.25 Series of cumulative preference shares may be redeemed at $105.00 per share. The aggregate cost of the redemptions of the preference and preferred shares will be approximately $81 million plus accrued dividends.

In addition, CSP may also redeem in 1990 all of its outstanding 13-3/8 percent first mortgage bonds due 1995 and its 11-7/8 percent first mortgage bonds due 1992. CSP will not enter into such long-term financings or make such redemptions unless market conditions are favorable.

ENGLEWOOD CLIFFS, NJ (MARCH 20) PR NEWSWIRE - The board of directors of CPC International Inc. (NYSE: CPC) today increased the quarterly dividend on the company's common stock by 11 percent to $.50 per share, payable April 25 to stockholders of record on March 30.

The previous dividend of $.45 per share has been paid quarterly since July 1989. Becoming effective just nine months after the previous dividend increase, the new dividend rate therefore amounts to an increase of close to 15 percent on an annualized basis.

James R. Eiszner, chairman and chief executive officer of CPC International, said, "The increase reflects the company's strong earnings progress in 1989 and our commitment to provide increasing returns to our shareholders."

This will be CPC's 283rd consecutive quarterly dividend since 1919. With sales in 1989 of $5.1 billion, CPC International Inc. ranks as one of the largest and most international food companies in the United States. CPC's worldwide consumer foods business accounts for approximately 80 percent of the company's total sales, and its products are household favorites throughout North America, Europe, Latin America, and Asia. Best-known among its U.S. brands are Hellmann's and Best Foods mayonnaise, Mazola corn oil and margarine, Skippy peanut butter, Thomas' English muffins, Arnold breads, Mueller's pasta products, Karo and Golden Griddle syrups, and Knorr soups sauces and bouillons. CPC is also one of the largest corn

refiners, with operations in North America and Latin America. Worldwide, CPC International has operations in 47 countries, including 112 plants.

CHARLOTTE, NC (MARCH 20) PR NEWSWIRE - The Office of the Comptroller of the Currency has completed its review of First Union Corporation's (NYSE: FTU) Florida real estate portfolio.

First Union said today that no special provision will be made related to Florida real estate in the first quarter, and no special provision related to Florida real estate is expected for the remainder of 1990.

Non-performing assets will increase modestly to about $500 million in the first quarter from the $460 million, on a pro-forma basis at the end of last year, prior to the completion of the acquisition of Florida National Banks of Florida, Inc.

Reserves in the first quarter will be about $420 million, about 1.55 percent of total loans of $27 billion, compared with $425 million, or 1.63 percent of total loans of $26.2 billion at the end of 1989, on a pro-forma basis.

Following its acquisition of Florida National Banks of Florida, Inc., on January 29, 1990, First Union Corporation now has assets of approximately $40 billion.

#90079p0380 03/20/1990 ~PR Newswire

NEW YORK (MARCH 20) PR NEWSWIRE - ARCO (NYSE: ARC) Chairman and Chief Executive Officer Lodwrick M. Cook told a meeting of industry analysts here today that ARCO expects crude oil prices to remain within current ranges over the long-run despite an expected increase in OPEC production.

Referring to a 1988 ARCO forecast that prices for benchmark West Texas crude would continue to hover in the $18 per barrel range, adjusted for inflation ($20 in 1990), Cook said: "We are not raising our long-range price forecast even though we are raising our forecast of volume calls on OPEC oil.

"Our fundamental belief is that there are plenty of oil resources in Saudi Arabia and Iraq, and they will be developed and brought to market in an orderly manner in the general price range we've suggested. Prices could spike for short times, but we don't believe these spikes should drive long-run investment decisions."

Analysts were also told that although operating earnings for first quarter 1990 will be up somewhat compared to the same period last year, quarterly net income will be down compared to the $704 million reported in first quarter 1989 which included a $634 million gain from the Lyondell Petrochemical Company public offering partially offset by a $345 million charge for future environmental expenses and other provisions.

In the first quarter 1990, the company plans to implement Financial Accounting Standard No. 96 and expects to increase reserves associated with certain probable future liabilities, said Chief Financial Officer Ronald J. Arnault. "Current estimates are that the net of these items will favorably impact the quarter by about $100 million," he said.

Arnault also told analysts that ARCO has repurchased 1,895,000 shares of its common stock this year at a cost of $209 million.

Other ARCO executives outlined features of a five-year, $16 billion capital program to develop ARCO's worldwide oil, gas, refining, marketing, chemical, and coal assets. In 1990 alone, ARCO's capital program of $2.9 billion will represent a 16 percent increase over the $2.5 billion spent in 1989.

Although international oil and gas exploration and production (E&P) will warrant a much larger investment of ARCO capital during the '90s, the focus between 1990 and 1994 will remain domestic, with approximately $7 billion projected to be spent on E&P in the United States. In 1990, E&P capital spending in the Lower 48 and Alaska will total $800 million and $320 million respectively. This compares to $750 million and $260 million spent last year in ARCO's two domestic regions.

The five-year projection for international E&P capital spending is more than $2.7 billion, including $530 million budgeted for 1990 as compared to $370 million spent in 1989.

#90079p0381 03/20/1990 ~PR Newswire

HOUSTON (MARCH 20) PR NEWSWIRE - Tel Offshore Trust (NASDAQ: TELOZ) announced the trust's quarterly income distribution for the first quarter of 1990. The amount available for distribution will be $2,193,052.20 or

$.461549 per unit. The first quarter distribution will be payable on April 10, 1990, to unit holders of record on March 30, 1990.

The current estimate of future capital costs to be incurred resulted in a refund from the special cost escrow account amounting to $796,000 in the first quarter of 1990.

Chevron currently anticipates drilling the West Cameron 643 B-8 well in the first half of 1990 as previously planned but has postponed drilling of the West Cameron 643 No. 6 well until late 1990. Additional deposits could be required in further quarters in connection with drilling projects and other capital expenditures.

Revenues attributable to production for the first quarter of 1990 increased approximately 30 percent compared to the fourth quarter of 1989. Gas revenues increased due to higher prices received and increased production on Eugene Island 339, East Cameron 353, Ship Shoal 182/183 and Eugene Island 348. Gas prices averaged $2.07 per mcf compared to $1.82 per mcf in the previous quarter.

Crude oil and condensate revenues decreased slightly as production fell from 239,000 barrels in the fourth quarter of 1989 to 219,000 barrels in the first quarter of 1990. This decline in production was partially offset by an increase in the average price of crude oil and condensate from $17.88 per barrel in the fourth quarter of 1989 to $19.21 per barrel in the first quarter of 1990.

Operating expenses during the first quarter decreased approximately 15 percent due primarily to the completion of workover activity and platform maintenance expenses on West Cameron 643.

NEW YORK (MARCH 20) PR NEWSWIRE - In an effort to further improve Citibank's already strong position in the private placement market, and in anticipation of an increased market interest in privates as a result of the expected passage of Rule 144(a), Citibank announced today that it will expand its focus in this area by establishing a unit dedicated exclusively to this key product.

Tim Conway has been named head of this unit. Conway is a two-year veteran of Citibank's capital markets division where he has been active in providing private placement and other capital markets products to the energy industry. Prior to joining Citicorp, Conway was an investment

director in the private placement department of Aetna Life and Casualty.

Last year Citibank placed over $1.3 billion in the private placement market, and ranked eighth among the leading agents and advisers in privates with a 5.6 percent share.

#90079p0390 03/20/1990 ~PR Newswire

NEW YORK (MARCH 20) PR NEWSWIRE - Wolters Kluwer recorded favorable results in 1989, in line with what was expected, the company announced today. Sales and operating income were up and the margin improved. The financial goals for 1990 -- as announced in 1987 -- were principally already achieved in 1989.

Net income went up 25 percent from Dfl. 112 million in 1988 to Dfl. 140 million in 1989. The margin (net income as percentage of sales) improved from 6.4 percent to 7.4 percent.

Earnings per ordinary share were up 22 percent from Dfl. 2.37 in 1988 to Dfl. 2.89 in 1989.

Sales (Dfl. 1,883 million in 1989) were up 8 percent as compared to the previous year. Divestment of non-core activities (minus 3 percent) and acquisitions (plus 3 percent) balanced out, so the increase is organic growth.

Operating income went up 17 percent from Dfl. 193 million in 1988 to Dfl. 226 million in 1989. In the Netherlands, the increase was for the greater part generated by the publishing companies. Operating income in the United Kingdom and in the United States remained stable. Operating income in Belgium was again very satisfactory, and also in West Germany developments were favorable. The French and Spanish results rose substantially, mainly from the acquisitions of the French publisher Lamy and the Spanish publisher CISS.

A sum of more than Dfl. 10 million (before taxation) was charged to the results of 1989 (1988: more than Dfl. 12 million), mainly connected with divestments and reorganizations.

Pre-tax operating income in the year under review went up approximately 21 percent from Dfl. 189 million in 1988 to approximately Dfl. 228 million in 1989.

Liquidity, despite considerable expenditure on acquisitions, remained at the same level as the year before, approximately Dfl. 225 million.

Wolters Kluwer said it expects sustained growth of sales and profits in 1990. The increase will be in line with financial goals for 1992, one of which is that operating income will then be 15 percent of sales (1989: 12 percent).

At the annual general meeting of shareholders on May 8, a dividend will be proposed of Dfl. 0.88 in cash per ordinary share/redeemable certificate or alternatively as elected by the shareholder in the form of ordinary shares/redeemable certificates charged to the fiscally exempt share premium reserve, or, if so desired, to the other reserves. The conversion rate will be announced on April 19.

#90079p0396 03/20/1990 ~PR Newswire

GOLDEN, CO (MARCH 20) PR NEWSWIRE - Imex Medical Systems Inc. (NASDAQ: IMEX) today announced the introduction of an automated instrument that family physicians have praised as an important advancement in the diagnosis of peripheral vascular disease as well as in cost-effective patient management for office-based primary care physicians.

The Imex Lab 9000, released after several years of development, makes sophisticated, lab-quality exams practical and affordable for doctors' offices, group practices, clinics and community hospitals. Three computer-based testing modes enable the doctor to screen for peripheral vascular disease more quickly and easily than ever before.

According to the American Heart Association, millions of Americans with high blood pressure, hardened arteries, obesity and diabetes are at risk for vascular disease. Strokes, amputations, varicose veins and leg pain can result.

The United Stroke Foundation has also noted that one-half million or more Americans will suffer a stroke this year, and up to a third of those could be avoided by using medical technology such as the new Imex instrument.

"With this system available in many doctors' offices today, its early-warning diagnostic features make it possible to identify a high percentage of certain circulatory conditions soon enough to take preventive, non-invasive measures that could minimize problems later on," according to Jerry Donahue, Imex president and CEO.

He added that current demographic and medical trends for early detection and treatment of diseases associated with aging assure a growing market

for vascular diagnostic products such as those developed by Imex. "This new system is a giant step forward in simplicity of use, but we've been using such proven doppler ultrasound and related technologies for years," Donahue noted.

Dr. Stephen M. Johs, a general and peripheral vascular surgeon at the 40-physician Boulder Medical Center group practice in Colorado, was one of several clinicians who participated in the field evaluation of the Imex Lab 9000. "This system enables us to provide more comprehensive patient care and conduct hospital lab-quality vascular screening tests conveniently with our existing staff," he observed.

The new Imex product also features simultaneous testing of both legs for venous reflux (backflow of venous blood in the legs), which Johs described as a "dramatic improvement," and it can be expanded to meet the growing needs of a physician's practice.

Headquartered in Golden, Imex specializes in "user friendly" and cost-effective instrumentation for the primary care and office-based physician. The company produces several diagnostic instruments for fetal monitoring and early detection of disease conditions which may lead to stroke, heart attack and other vascular problems.

CONTACT: John Etter or Jerry Donahue, 800-525-2519, both of Imex; or Gary Strumpfer of Communications Resources Inc., 612-631-0071, for Imex.

#90079p0399 03/20/1990 ~PR Newswire

PORTLAND, OR. (MARCH 20) PR NEWSWIRE - Frederick M. Stevens, chairman and chief executive officer of Fred Meyer Inc. (NASDAQ: MEYR), said today the company is taking approximately $49 million in pre-tax write-offs in 1989 for conversion of its management information system ("MIS") hardware from Honeywell to IBM, and for costs and non-cash charges being reserved in connection with the company's ongoing program for remodeling, replacing and closing stores.

Stevens said, "In retailing, management information systems are a critical element of any company's competitive advantage. The company's long-term ability to increase sales and lower expenses requires a state-of-the-art MIS. We are therefore committing approximately $60 million in our endeavor to upgrade all systems, including the conversion of all stores to IBM 4680 registers. The register conversion should be completed by early 1991.

"The decision to change MIS hardware platforms from Honeywell to IBM was based on both the availability of systems to support the company's merchandising, logistics, store and finance requirements, as well as lower

future costs associated with operating the new systems. The new hardware will be installed beginning in 1990, with the entire conversion to be completed by the end of 1992."

Stevens added, "Beginning in 1989 Fred Meyer accelerated its new store construction and remodeling program. We opened four multidepartment stores during the year, including two in the fourth quarter. We also completed 10 remodels, including five in the four quarter. In 1990 the company plans to open five additional multidepartment stores as well as update or remodel approximately 10 existing units.

"In our efforts to commit additional dollars and resources to this expanded program of new multidepartment stores and remodels, we also focused our efforts on stores that are not providing the company with a reasonable return on its investment. Stores considered for closure are generally those that cannot provide Fred Meyer customers with a full line of goods and services, and which cannot be expanded in a efficient manner to add these items. In addition, certain stores will be closed and replaced by large multidepartment stores. New sites have either been acquired, or are in the process of being acquired, to replace these units.

"Our income results this year will show a loss, after accounting for the writeoffs described above, and are also reflective of a number of major strategic initiative undertaken. We believe these decisions will ensure the long-term success of Fred Meyer, even though they have resulted in a negative impact on current results. The development of new management information systems, the reorganization of our management structure, the settlement of labor disputes experienced this past year, and the acceleration of new store construction and remodeling plans, all accomplished during 1989, are positioning us for the future," Stevens said.

The company expects to report its 1989 fourth quarter and year-end earnings on March 22.

Fred Meyer Inc., headquartered in Portland, is a leading regional retailer of a wide range of general merchandise, food, apparel, fine jewelry and home improvement products. The company employs more than 20,000 people and currently operates 126 stores, including 95 large multidepartment stores in Oregon, Washington, Utah, Idaho, Alaska, Montana and California.

#90079p0401 03/20/1990 ~PR Newswire

MORRIS PLAINS, NJ (MARCH 20) PR NEWSWIRE - Warwick Insurance Managers, Inc. (NASDAQ: WIMI) stated that it currently does not expect to be able to meet its scheduled $750,000 principal installment obligation due March 31,

1990, on its existing $12 million bank debt.

The company relies primarily on dividends from Warwick Insurance Company, its wholly owned operating insurance company, for funds to meet principal installment obligations under its bank debt, and due to the 1989 financial results of Warwick Insurance Company and its statutory surplus position, no dividends from Warwick Insurance are expected to be made. The company has not yet released its 1989 year-end financial results and is currently reviewing its year-end loss reserves, but will show a substantial loss for the 1989 fourth quarter including substantial additional reserve strengthening.

The company announced on March 7, 1990, an agreement in principle with G.F.A. International concerning a proposed $12 million capital investment by G.F.A. in the company, and G.F.A. is currently continuing its due diligence investigation of the company. Under the terms of the agreement in principle, G.F.A. is to complete its investigation of the company and a definitive stock purchase agreement is to be negotiated and executed as promptly as practicable and at least within 90 days of the signing of the agreement in principle.

The G.F.A. investment is subject to various conditions, including the restructuring of the company's bank debt. While preliminary discussions with the company's bank lenders have occurred, no loan restructuring has yet been agreed to and it is unlikely that any agreement with the bank lenders will be reached prior to March 31 allowing a suspension or waiver of the March 31 principal installment obligation as part of any proposed loan restructuring.

The company presently is current on all principal and interest obligations under its bank loan, although it continues to be in default of various loan covenants. The banks have not waived any loan defaults and have reserved all default rights, but have not at this point accelerated the loan.

The banks have also advised the company that they will not waive any failure by the company to pay its March 31 principal installment, would consider a failure to pay such principal installment a serious event of default, and will reserve all default rights should the company not meet its March 31 principal payment obligation. The company is continuing its discussions of a loan restructuring with the banks in connection with the proposed G.F.A. investment.

The New Jersey Insurance Department has also discussed with Warwick the department's view that Warwick Insurance has a need for substantial additional capital. The company said it believes that the proposed G.F.A. investment, if consummated in the near future, will respond to the immediate concerns of the New Jersey Insurance Department. There can be

no assurance, however, that such proposed capital will be sufficient for such needs or that the proposed G.F.A. investment in fact will be consummated.

NEW YORK (MARCH 20) PR NEWSWIRE - The Carter Organization announced that Donald C. Carter, the founder of The Carter Organization, has today entered guilty pleas to two felonies of grand larceny and personal tax evasion. Mr. Carter has been fired.

Until yesterday's statement in the press that he was planning to plead guilty to grand larceny, Mr. Carter had denied that he stole from some of the clients of The Carter Organization. The Carter Organization, as Mr.

Carter's former employer, said it is committed to cooperating with those clients to remedy any damage caused by Mr. Carter's criminality. The company is also committed to ensuring that this kind of conduct can never reoccur.

Mr. Carter was also convicted of evading personal New York State income taxes and falsifying his 1986 New York State tax return. The Carter Organization understands that Mr. Carter charged personal expenses to the company and, if it proves that the company has been in any way defrauded, it will take appropriate action.

CONTACT: Angus Maitland, chairman of the VPI Group PLC, 011-441-730-3456, or Arthur S. Ross, president, or Dennis Mensch, executive vice president, of the Carter Organization, 212-883-8900.

MINNEAPOLIS (MARCH 20) PR NEWSWIRE - Robert A. Sander, 65, president and chief operating officer of Golden Valley Microwave Foods, Inc., (NYSE: GVF) suffered cardiac arrest and died Monday evening, March 19, it was announced today by James D. Watkins, chairman and chief executive officer of the company.

Mr. Sander had recently undergone radiation treatment for thyroid cancer, a Golden Valley spokesperson added.

Mr. Sander, who had been a consultant to the company since August 1988, had served as chief operating officer of Golden Valley Microwave Foods since that time and as president since February 1989. Mr. Sander had been the president of Robert A. Sander, Inc., a sales and marketing consulting firm since 1979. Prior to 1985, when he retired from Pepsi U.S.A., Mr. Sander served in various capacities at Pepsi U.S.A., a soft drink beverage business, including, most recently, senior vice president.

Watkins, a friend as well as business associate, said: "Bob was a valued member of the Golden Valley team, as well as a close personal friend. He was instrumental in refining and implementing the marketing programs and management staff of the company. His contributions, particularly in the key area of sales and marketing, will be greatly missed. He was a fine man and a solid citizen and his brief time with us was a positive force in the development of Golden Valley."

Watkins stated that until the board of directors has time to consider a replacement for Mr. Sander, he would assume the duties of president and chief operating officer.

A memorial service will be held at St. Luke's Episcopal Church, Darien,

Conn., on Friday, March 23, at 1 p.m. The family has asked that in lieu of flowers, a contribution be made to the American Cancer Society, 19 W. 56th St., New York, N.Y., 10019.

Golden Valley Microwave Foods markets food products that it develops and produces specifically for preparation in microwave ovens. The company's products use proprietary formulation, manufacturing processes and packaging technology. The products are distributed through the vending industry, mass-merchandising outlets and grocery stores.

CARROLLTON, TX (MARCH 20) PR NEWSWIRE - EMS Systems, Ltd. (EMS) (NASDAQ: EMSIF), headquartered in Dallas, announced today that further funding from CCDC Financial Corporation (CCDC) (a subsidiary of American Consolidated Financial Corporation), a lender with whom EMS entered into certain agreements in early February 1990, appears to be unlikely on the terms previously agreed upon.

CCDC has in recent days notified EMS of its intent not to continue funding under existing agreements in place with EMS, has demanded payments for amounts advanced by CCDC to EMS, and has elected not to exercise its option to acquire EMS stock under the agreements.

Further, affiliates of CCDC which agreed to provide to EMS certain support services have advised that they are no longer willing to provide said services at this time on the terms previously agreed upon and have demanded payment for early termination of the support services agreements.

If the agreements with CCDC and its affiliates cannot be restructured, EMS will retain the option of resorting to litigation for its remedies. If litigation becomes necessary and efforts to go forward with CCDC and its affiliates are unsuccessful, EMS plans to locate a replacement credit facility.

RICHMOND, VA (MARCH 20) PR NEWSWIRE - CSX Corp. (NYSE: CSX) today announced that after an extensive two-week hearing brought about by an action of dissenting shareholders, three appraisers appointed by the Circuit Court for Baltimore, for the purpose of determining the fair value

of the common shares of the Baltimore & Ohio Railroad (B&O) as of the close of business on March 27, 1987, concluded the fair value was $112.44 per share.

The $112.44 price compares with the $124 per share price offered to B&O shareholders as recommended by Morgan Stanley, B&O financial advisors, as the fair value of B&O common stock at the time of the merger.

"We are pleased the appraisers found our offer more than fair and are optimistic the court will accept the report of the appraisers recommendation. In that case, the dissenting shareholders will receive $11.56 per share less than they were originally offered at the time the merger was proposed," said Mark G. Aron, senior vice president-law and public affairs, CSX Corp.

After the merger, the C&O was merged into CSX Transportation Inc., the rail unit of CSX Corp.

CSX Corp., headquartered in Richmond, Va., is an international transportation company that offers a variety of rail, container- shipping, intermodal, trucking and barge services.

OKLAHOMA CITY (MARCH 20) PR NEWSWIRE - Devon Energy (AMEX: DVN) has determined that the likelihood of liability in connection with the previously announced August 1989 notice from the Environmental Protection Agency (EPA) is remote.

Based upon documentation recently obtained, the alleged contamination of a waste disposal site in Louisiana discussed in the EPA letter occurred more than five years after Devon Energy's possible association with the site.

Devon Energy previously disclosed its receipt of a letter from the EPA addressed to Kirby Petroleum Co. (Kirby) and approximately 240 other companies requesting information regarding the disposal of potentially hazardous oilfield fluids at a waste disposal site in Louisiana. Devon Energy is the successor to Kirby, having acquired Kirby's assets in 1975.

At the time of the August 1989 press release, no documentation was readily available to determine the extent of Devon Energy's potential liability, if any, as successor to Kirby. However, based upon information recently obtained under the Freedom of Information Act, Devon Energy believes that the incidents resulting in the alleged contamination of the disposal site

occurred more than five years after Kirby was dissolved. Based upon these facts, it appears that neither Devon Energy nor its predecessor Kirby could have participated in waste disposal at the Louisiana site.

Devon Energy Corp. is an independent energy company engaged primarily in oil and gas property acquisitions, exploration and production activities, and oil and natural gas remarketing.

CONTACT: Marian J. Moon of Devon Energy, 405-235-3611; or Gary Strong or Nick Farina, 312-266-7800, or Kathy Phelan, 212-661-8030, all of The Financial Relations Board, for Devon Energy.

HOUSTON (MARCH 20) PR NEWSWIRE - Coastal (NYSE: CGP) announced today that it has decided not to proceed with its previously announced proposed sale of ANR Freight Systems, Inc. to Transcon Incorporated (NYSE: TCL).

Coastal has determined that the sale to Transcon would not be in the best interest of Coastal, ANR Freight Systems, its customers or employees, and, as a result, intends to pursue other alternatives.

Coastal said it believes that its subsidiary trucking operations can be more successful through a re-focusing on ANR Freight's traditional market areas. Such an operation will offer quality services to customers and be attractive to qualified investors.

A Coastal spokesperson said, "In the meantime, Coastal, ANR Freight Systems and its employees remain committed to providing quality service to ANR Freight's shippers."

ANR Freight Systems, Inc. was acquired by Coastal in 1985 as part of its merger with American Natural Resources Company.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

#90079p0444 03/20/1990 ~PR Newswire

IRVINE, CA (MARCH 20) PR NEWSWIRE - Comparator Systems Corp.'s common stock was listed on NASDAQ under the symbol "IDID" on Feb. 28, 1990. Trading opened at: 1/32 bid; 1/16 ask.

Historically, this Irvine-based, high-tech biometrics identification corporation has always held something of a mystique for the market. In 1984, when the present executive team took over management of the company, a bold decision was made to withdraw Comparator Systems Corp. from NASDAQ and seclude it from public attention. (Prior to the withdrawal this company had frequently been actively traded stock on NASDAQ.)

At the time of their withdrawal from NASDAQ identification unit, Model ID-1 is presently the only known absolutely accurate fingerprint identification system on the market, and is currently in use in numerous law enforcement agencies and correctional institutions across the nation.

Over the following six-year period, the company maintained a low profile and media silence while quietly acquiring the patents and licensing for a variety of bio-metric identification technology.

With a scientific advisory committee that reads like a who's who among the scientific community, and a product line that 10 years ago would have seemed like science fiction, the company's strategy for acquisition and development of new technologies has been with broad commercial and industrial applications in mind. Some examples of the projected markets for these sophisticated, new bio-metric identification technologies are:

(Banking) automatic teller machines, electronic transfer of funds. (Retail) credit card and check verification. (Medical) medical insurance verification, blood bank control and pharmaceutical acccess control.

(Industrial) restriction of data base access, time clock verification and entrance and egress control.

On Feb. 19, 1990, Comparator Systems Corp. moved their corporate offices into a 13,400-square-foot manufacturing facility in Irvine. The company expects to being manufacturing by the end of March 1990.

SEATTLE (MARCH 20) PR NEWSWIRE - Louis H. Pepper, an authority on banking and real estate law who guided Washington Mutual Savings Bank (NASDAQ: WAMU) through the period of its greatest growth and diversification, will step down as chief executive officer as of the annual meeting on Apr. 17, the bank said today.

New chief executive officer will be Kerry K. Killinger, 40, president of the bank since 1988. At that time, Pepper said Killinger's appointment was part of the bank's plan for an orderly transition and would position it well for future growth and development.

Pepper, 65, who will continue as chairman of the board and will consult on bank matters, stated that as chief executive officer, Killinger will assume overall management of the institution. "Our leadership will be in the hands of a strong financial professional who, as president, has been responsible for all operational decision-making," Pepper said. "We have a solid team in place for the '90s."

Washington Mutual has a history of longevity in its executive management. Killinger will be only the 10th chief executive officer since the founding of the institution in 1889.

Killinger came to Washington Mutual in 1982 from Spokane with the acquisition of Murphey Favre Inc. and Composite Research & Management Co. where he had been executive vice president. He has an MBA from the University of Iowa.

Pepper, longtime legal counsel to the bank and the thrift industry, was drafted to be president and chief executive officer in 1981 during a severe downturn for Washington Mutual. He directed the institution, now 101 years old, as it became publicly owned and expanded its financial services to include securities brokerage, mutual funds, portfolio management, travel, insurance and benefits consulting and management.

The bank had reported net losses in 1981 and 1982, then began its return to profitability in 1983, the year it went public. Assets grew from $2.6 billion to $6.7 billion between 1981 and 1990, today making Washington Mutual by far the largest independently owned banking institution in the state.

#90079u0117 03/20/1990 ~United Press International

Vanderbilt is winning the hard way in the National Invitation Tournament.

The Commodores rallied from 17 points behind for the second time in the NIT, beating Southeastern Conference rival Tennessee 89-85 behind a career-high 26 points from senior Derrick Wilcox.

''It's a good thing there are two halves to a game. It helped our team the last two games,'' said Vanderbilt coach Eddie Fogler, whose team plays in Nashville Wednesday night in the NIT's third round against an opponent that had yet to be determined.

''It was an unbelievable game,'' Fogler said. ''The first half, we can't stop them. The second half, our offense was unstoppable. It was fun.''

Vanderbilt, 18-14, trailed by 17 in the first half and by 16 at halftime. But the Commodores started the second half by outscoring Tennessee 21-4 to go ahead 52-51 on a 3-pointer by Todd Milholland.

They built their advantage to 60-53 before Tennessee rallied, taking back the lead at 77-76 on Ian Lockhart's dunk with 2:57 to play. Wilcox then hit a 15-footer and a 3-pointer to put Vanderbilt ahead 81-77. The

5-foot-11 guard sank all six of his free throws in the final 1:07 to preserve the victory.

Wilcox, who also had six assists, paced five players scoring in double figures for Vanderbilt, which came from 17 points behind to beat Louisiana Tech 98-90 in overtime Thursday. Milholland scored 18, Kevin Anglin 11 and Steve Grant and Eric Reid 10 each.

Allan Houston led Tennessee, 16-14, with 31 points, but he missed three straight 3-point attempts in the last minute as the Volunteers tried to overtake Vanderbilt. Lockhart had 23 and Greg Bell 14.

''This was a tough loss for us,'' Tennessee Coach Wade Houston said. ''We played extremely well in the first half. I thought after we lost the lead and came back and tied the score that we had a chance to win the game.

''Obviously, it didn't turn out that way. We hit a lull there in the second half and Vandy made a run and made some good shots. They increased their lead and we couldn't pull it out.''

Allan Houston scored 19 points in the first half, and the Volunteers shot 70 percent from the field to take a 47-31 halftime advantage. Tennessee built its lead by outscoring Vanderbilt 14-4 to go ahead 24-10 on Houston's 3-pointer midway through the first half. Lockhart's layup made it 37-20 four minutes later.

The Commodores made three straight steals to start a 10-2 run that cut the deficit to 39-30, but Bell hit two 3-pointers and Houston drove the baseline for a layup to push Tennessee's lead to 16 at halftime.

The second round concludes Tuesday. Wisconsin-Green Bay plays at St. Louis Oklahoma State visits New Mexico, Long Beach State plays at Hawaii, and Cincinnati travels to DePaul.

-- AROUND THE NCAA --

In other second round action Monday night, Rutgers defeated Fordham 81-74, New Orleans downed Mississippi State 65-61 and Penn State dumped Maryland 80-78.

At University Park, Pa., sophomore guard Freddie Barnes scored six of his 14 points in the final 1:18 to lead the Nittany Lions. Center Ed Fogell scored 20 points for Penn State, while DeRon Hayes added 13 and Monroe Brown had 12. For the Terrapins, three players scored 62 of the team's 78 points. Tony Massenberg scored 26 points, Jerrod Mustaf contributed 22 points and Walt Williams added 14. Penn State will play at Rutgers in quarterfinal action Wednesday night.

#90079u0128 03/20/1990 ~United Press International
WESTON, WV (MARCH 20) UPI - It had nothing to do with overdrawing thousands of dollars or defaulting on a loan. Farmer John Body lost his bank account because he tracked mud ''or some other substance'' on the bank's carpet.

Body and his wife, Sonia, were informed they were no longer welcome at the Citizens Bank of Weston by chief executive officer Lewis Pellegrin, who closed their account March 6 and returned a balance of $1,335.29.

Recalling two of the farmer's recent visits: ''On both occasions, Mr. Body tracked in mud, or some other substance, onto the bank's carpet with his deep cleated boots.

''This appears to have been done either maliciously, or in a totally thoughtless manner. Several man hours were required to clean the carpet because of Mr. Body's thoughtless actions,'' the bank officer wrote.

It was decided to close the account because the bank cannot afford to clean the carpet after each visit by Body, said Pellegrin, who sent copies of the letter to Lewis County Sheriff Mike Gissy and Police Chief George Blake.

''If Mr. Body returns to the bank and again tracks in on the carpet, we will charge him with willful destruction of property,'' he wrote.

Body complained to The Weston Democrat he was never warned about soiling the carpet.

''I am a small farmer and raise chickens, ducks and goats,'' he said.

''Invariably, during my day's work of feeding and caring for my animals, I am working in the mud, since we have had such a wet year past.''

Body said he has since been ''invited to bring my money and mud'' to other banks in town ''where they care more about people than the carpet on the floor.''

#90079u0135 03/20/1990 ~United Press International
ELIZABETH, NJ (MARCH 20) UPI - The case against John Emil List, accused of killing his wife, mother and three teenage children, remains strong in spite of the lapse of more than 18 years since police found the bodies in their Victorian home, the prosecutor said.

''Time hasn't done anything to our case,'' Assistant Prosecutor Eleanor Clark said Monday.

Jury selection was to begin Tuesday in List's trial on five counts of murder. To protect the pool of potential jurors from pre-trial publicity, Union County Superior Court Judge William Wertheimer plans to deal with motions after the jury is picked.

List, 64, who disappeared in December 1971, a few weeks before Westfield police broke into the house and found the bodies, was arrested last year in Richmond, Va., where he was working as an accountant, his former profession, under the name Robert Clark. He was married to a woman he met through a Lutheran singles group while he was living in Denver.

In spite of the extraordinary publicity generated by the case, which included a feature film, ''The Stepfather,'' prosecutors believe an unbiased jury can be selected with little difficulty. Jurors will be asked whether they are familiar with the case, Clark said, but will undergo no extraordinary questioning.

Assistant Trial Court Administrator Donald Firestone said he hopes jury selection will be completed this week. The first four days of next week have been set aside for pre-trial motions and discovery.

Wertheimer refused a motion by List's lawyer, Public Defender Elijah Miller Jr., to move the trial out of Union County or to bring in jurors from outside. But he told Miller the request can be made again during jury selection if jurors with open minds prove hard to come by.

List, who faces consecutive life sentences if convicted, has been held in the Union County Jail since June. He was arrested by the FBI after a friend of his wife from Colorado called in a tip to Fox Network's ''America's Most Wanted.''

The evidence in the case, including a letter to List's pastor that police found in 1971, remained locked for years in evidence lockers in the Westfield police headquarters, police Chief Anthony J. Scutti said. It was turned over to the prosecutor's office last year when List was returned from Virginia.

Some items, including the clothes the victims were wearing, had to be destroyed because they had become a health hazard.

Firestone said he has received a ''constant, unending'' stream of press inquiries recently, especially from around New Jersey, New York and Pennsylvania and from Richmond and Denver.

''It's generated a great deal of interest, more than any other case we've

had,'' he said.

Firestone has set aside 48 seats for the press, and another 100 will be available for the public, including Scutti, who plans to attend some of the trial.

#90079u0180 03/20/1990 ~United Press International
(MARCH 20) UPI - Moscow turned up the heat on Lithuania Monday. In a bid to pressure the Baltic republic into rescinding its declaration of independence, the Soviet government ordered direct federal control over a wide range of installations in Lithuania deemed vital to national interest. The statement puts teeth into a resolution passed Thursday by the Soviet parliament that said Soviet laws still cover the republic.

A mistrial was declared Monday in the case of the first federal judge in the nation to be charged with racketeering. A jury in San Francisco acquitted U-S District Judge Robert Aguilar of a single count of obstruction of justice but was unable to reach a verdict on the seven remaining counts against him. Prosecutors say they're prepared to retry Aguilar and his two co-defendants on the remaining charges.

Agriculture officials in California are rejecting the advice of scientists. They announced Monday that the spraying of malathion to combat an infestation of the Mediterranean fruit fly in southern California will end in May... one month earlier than planned. Instead, the strategy will shift from pesticide to the release of sterile medflies in a bid to breed the crop-threatening pest out of existance.

A federally funded computer alert center in Washington, D-C, said Monday that NO serious damage has been done so far by an intruder penetrating a nationwide computer network. Officials at the Computer Emergency Response Team believe the intruder is a person and NOT a program, like the destructive ''worm'' that got into the same network in 1988. They say government investigators are still searching for the hacker behind the intrusion.

(MARCH 20) UPI - A stalemate over the use of non-sexist language in referring to the deity has developed among members of a panel revising the United Methodist Church's book of worship services. The committee appealed Monday to a higher power... in this case, the church's Judicial Council, or supreme court... to decide whether the phrase ''Father, Son and Holy Spirit'' must be used in all liturgical references to God. The panel also wants a ruling on whether the phrase ''Almightly God'' may be substituted for ''Almightly Father.''

Better wipe those feet when visiting the Citizens Bank of Weston, West Virginia. A newspaper says bank officials closed out the account of John Body after the farmer tracked- quote- ''mud or some other sustance'' on the carpet. The bankers decided asking Body to do business elsewhere was cheaper than cleaning the carpet every time he visited. Body says he'll look for a bank where- in his words- ''the little guy with the dirty shoes is appreciated.''

#90079u0209 03/20/1990 ~United Press International

CAPE TOWN, SOUTH AFRICA (MARCH 20) UPI - British Foreign Secretary Douglas Hurd, following talks with President Frederik de Klerk, said he was impressed by the ''sea change'' in South African politics brought about by

de Klerk's racial reform program.

It was the first high-level Western contact with the white government since de Klerk unveiled his reforms six weeks ago. Hurd is on a two-day South African stopover en route to represent Britain at neighboring Namibia's independence celebrations Tuesday in Windhoek.

Hurd and de Klerk Monday discussed a meeting between the government and an African National Congress delegation planned for April 11.

In continuing signs of reforms Monday, six more political prisoners received an early release from Robben Island prison and the Supreme Court acquitted eight anti-apartheid political activists.

''We believe that the bold steps taken by President de Klerk and his colleagues make negotiations now a very real possibility. There has been a sea change in South African positions and it's realistic now to plan for a South Africa which can fulfill its real potential as the democratic and economic powerhouse of the region,'' Hurd said.

''The pace of scope of change in (the) thinking of the government here, not just on the dismantling of apartheid, but on this very sensitive issue of how you move to a more democratic government as a whole, is impressive. It's not complete but it's impressive.''

Hurd's arrival coincided with continuing unrest in the country. Police said at least 17 people died Sunday, including 15 blacks, in a bloody tribal battle in the strife-torn province of Natal.

The visit started a week of diplomatic coups for de Klerk, whose Feb. 2 reform package included lifting a 30-year ban on the ANC and releasing black nationalist leader Nelson Mandela from 27 years imprisonment.

South African Foreign Minister Roelof ''Pik'' Botha, who also met with Hurd, said Pretoria and Washington were trying to agree on a ''mutually acceptable date'' for de Klerk to meet with President Bush.

When Mandela was released from prison, Bush invited him and de Klerk to separately visit the United States.

Secretary of State James Baker will meet de Klerk in Cape Town Thursday after the Namibian independence celebratons. The meeting will be the highest-level contact between Washington and Pretoria since 1978.

Mandela objected to the Baker-de Klerk meeting on his return from an overseas tour Saturday, saying it threatened to send a wrong signal to the international community that de Klerk had implemented ''fundamental'' changes to South Africa's apartheid policies.

Hurd defended British Prime Minister Margaret Thatcher's decision to break with other commonwealth countries last month and reward de Klerk for his reform porgram by lifting some voluntary economic sanctions against Pretoria.

''We don't believe that isolation is the way to end apartheid. Although the steps taken by de Klerk are not a full dismantling of apartheid, nevertheless they were such an important first start that some recognition in practical terms was deserved, and, indeed, required by the situation,'' Hurd said.

''Sanctions are a whole series of measures harnessed to a whole series of requirements. As these requirements begin to be met in real life, it makes sense to begin to respond.''

Hurd also said Thatcher had invited de Klerk to Britain for talks expected to take place in May and Britain had increased its assistance to black South Africans by $1.61 million.

In addition, Britain this year will provide about 1,000 scholarships for black South African students, and 250 community projects in black townships and rural areas.

''We want to call not only for an end to apartheid, we want to give serious help to some of the victims of apartheid,'' he said.

Botha said the government welcomed the ''very useful'' talk with Hurd, ''as we believe there's no substitute for direct discussion.''

Hurd also met with Gerrit Viljoen, Pretoria's chief negotiator in power-sharing talks with the ANC.

Prison authorities Monday freed six political prisoners held on Robben Island apparently in a program of staggered releases intended to meet demands that all political prisoners be freed before black leaders accept de Klerk's call for power-sharing negotiations.

(MARCH 20) UPI - Shh! Charles Barkley has a secret that he doesn't want the rest of his team to know.

Barkley collected a triple-double with 29 points, 15 rebounds and 10 assists Monday night to lead the Philadelphia 76ers to a 108-94 win over the New Jersey Nets.

The victory moved the Sixers into first place in the Atlantic Division, a half-game ahead of the idle New York Knicks.

''I know we are in first place now,'' Barkley said, ''but I am going to tell the guys we are still in second and hope they don't look at the papers.''

New Jersey has lost 26 of its last 29 games.

''It's tough going through the losing,'' said Nets Coach Bill Fitch. ''They've been humiliated in previous games. They are fighting tough and that's all I can ask of them.''

Hersey Hawkins scored 21 points for Philadelphia with Derek Smith finishing with 15. New Jersey was paced by Chris Morris, who scored 17 of his 19 points in the third quarter. Lester Conner finished with 18.

''We did what we could, we've just got to give them credit,'' Morris said.

The Nets staged a 26-9 run in the third quarter to pull within 84-80 heading into the final period. But Philadelphia shut New Jersey down in the final period, allowing the Nets just 14 points.

New Jersey scored just got one basket, a jumper by Conner, and was outscored 13-2 to trail 97-82 with 4:53 remaining in the game. Barkley scored 11 of Philadelphia's 24 fourth-quarter points.

''They looked confused out there,'' Barkley said. ''They argue with each other and it's really a shame. But I'm not going to cry for them, because when we played that way nobody cried any tears for me.''

The Nets lead 11-10 with 7:25 left in the first quarter when Philadelphia went on a 17-0 surge that made the score 27-11 with 3:34 left. The Sixers led 39-19 after one period.

The Nets cut the deficit to 55-45, when Dennis Hopson hit a layup with 2:30 remaining. However, the Sixers led 61-47 at the half.

-- AROUND THE NBA --

In other games, Dallas dumped Atlanta 117-110, San Atonio topped Phoenix 113-102, and Utah dumped Sacramento 105-97.

MAVERICKS 117, HAWKS 110

At Atlanta, Sam Perkins and Roy Tarpley combined for 20 points in the fourth period to lift Dallas. The Mavericks led by as many as nine points five times in the final quarter.

SPURS 113, SUNS 102

At Phoenix, David Robinson scored 34 points, grabbed 14 rebounds and blocked eight shots for San Antonio. The Spurs' third win over the Suns this year snapped a 19-game home win streak for Phoenix. Kevin Johnson had 36 points and 12 assists to pace the Suns.

JAZZ 105, KINGS 97

At Salt Lake City, Karl Malone scored 32 points to lead Utah. The Jazz, 47-19, posted their 22nd win in their past 23 home games to raise their home record to 30-4. Wayman Tisdale led Sacramento with 24 points.

PARIS (MARCH 20) UPI - Skin-hugging body tights dethroned the traditional buttoned Chanel jacket and skirt in the veteran salon's super-young, ready-to-wear fashion show for fall and winter.

But the excited atmosphere at the shows was dampened Monday by the announcement that Yves Saint Laurent, widely regarded as the king of the Paris fashion world, had been hospitalized.

A salon spokesman said Saint Laurent would miss Wednesday's showing, the first he has missed in 30 years. The spokesman said the designer was ''suffering from extreme fatigue caused by the strain of preparing his collection, a problem that has plagued him before.''

''It's not cancer, and it's not AIDS,'' Pierre Berge, the president of the Saint Laurent salon, told reporters. ''It's serious, but let's not panic.''

Buyers and press, in the exhibition tent for the 10-day shows in the Louvre Museum courtyard, exuberantly applauded Chanel designer Carl Lagerfeld's fun show for youthful bodies.

The program summed it up with a rhyme, ''Skirts are on their way out, but there is something always new about. Tights are the height of fashion, they give all looks a new passion.''

Less-than-thin customers could find little in the parade. And many young women could scarcely afford to buy Chanel fashions.

But for those who can, the talented Lagerfeld showed stretch body suits with only traditional Chanel gold chains added. Sometimes Lagerfeld threw in an entire girdle of gold chains.

In fact, Lagerfeld spoofed all the old Chanel accessories.

The usual Chanel gold buttons marched down the backs of some skin-clutching body suits. The old quilted Chanel handbag with the shoulder chain turned up as a hat. Some real handbags were as small as cigarette packages or as long as cigarette cartons.

An entire bib of gold chains drooped down the front of one black dress.

White Chanel camellias dotted the wisps of black chiffon and satin that served as mini evening dresses.

Tight black or purple velvet jeans teamed with Chanel gold belts. More conservative were sleek long jackets over mini skirts and little black suits or dresses edged with black satin.

Indeed, wearable was the final lineup of short black dresses with low pleats on the flippy skirts, some with gold chains and white camellias.

Jean-Louis Scherrer's daughter opened his top-flight show by leading her new huge dog down the runway. Lutetia Scherrer, a dog devotee, has said she wanted to be a veterinarian but now prefers being his chief model.

Short skirts, boleros and fringed capes in wool printed like Oriental carpets opened the luxurious show. Another theme was vividly colored Mexican folklore prints for long jackets, skirts, the popular duffle and trenchcoats and evening suits in gleaming lame.

His third idea was repeating his popular panther, cobra and zebra prints for filmy mousseline draped evening dresses, short trenchcoats, suits and pullovers.

Scherrer wisely showed some draped jersey maxi dresses, sometimes with sheer leopard printed mousseline tops - a welcome change from the super-short skirts in all the shows.

The Christian Dior show by Gianfranco Ferre opened with flaming red coats over red belted dresses. The rest of the collection sidestepped the bright colors of the other houses. Black leather camel or black trenchcoats trimmed in mink over cigarette trousers were applauded. Another good number was a gray flannel side-wrapped coat dress with white cuffs.

Japanese designer Hanae Mori celebrated her 35th year in business with a more youthful line than usual, shown to loud rock music, unusual for her. Applauded were black or gold leather suits and black and white striped satin or black lame evening suits.

Although Paris houses several Japanese designers, Mori is the only one to make custom haute couture as well as ready-to-wear and to have been awarded the French government's legion of honor medal.

Sonia Rykiel, the queen of knitwear, also included above-ankle lengths - slim knitted dresses and skirts with hooded pullovers dotted with gold sequins. Her fake leopard coats should cheer the ecologists.

#90079u0320 03/20/1990 ~United Press International
(MARCH 20) UPI - The Calgary Flames, riding a 9-game unbeaten streak after topping the St. Louis Blues 5-2 Monday night, solidified their Smythe Division lead and set their sights on the best overall regular-season record, which guarantees home-ice advantage through the playoffs.

Joe Nieuwendyk scored a pair of third-period goals 15 seconds apart to break open a close game and pull the Flames to within one point of the Boston Bruins for the overall point lead.

''We're going to take a shot at this thing,'' said Nieuwendyk. ''It's good to have a streak going now. It's at the right time of the year. Our focus is to play good, solid hockey from here on in.''

Brian MacLellen snapped a 2-2 tie at 3:27 of the final period when he deflected Joe Mullen's 15-foot screened slap shot into the net on the power play for his 18th goal of the season.

Nieuwendyk scored his 41st and 42nd goals just over a minute after MacLellen's goal.

Nieuwendyk received credit for his 41st of the season at 4:53 when his rebound off the boards bounced off Blues' netminder Vincent Riendeau in

the crease and trickled over the goal line.

Nieuwendyk made the score 5-2 when he tipped defenseman Al MacInnis' point shot in the slot for his 42nd of the season 17 seconds later at 5:08.

Mullen opened the scoring when he fired MacLellan's rebound into the net at the edge of the crease with just ten seconds remaining in a Calgary power play at 3:33 of the first.

Paul MacLean tied the score 1-1 at 9:29 when he snapped a 35-foot wrist shot by Calgary goalie Rick Wamsley for his 29th of the season.

MacInnis drilled a slapshot at the top of the faceoff circle by Riendeau high on the stick side for his 26th goal of the season to give Calgary a 2-1 lead at 13:56.

The goal for MacInnis set a club record for goals by a defenseman in a single season.

Calgary continued their domination in the second period, outshooting the Blues 15-4, but Brett Hull tied the score 2-2 with his 69th goal of the season.

Hull snapped a 35-foot shot past Wamsley on the glove side 10 seconds into the period with Calgary's Sergei Makarov in the penalty box.

-- AROUND THE NHL --

In the only other NHL game, Chicago beat Toronto 3-2.

BLACKHAWKS 3, MAPLE LEAFS 2

At Toronto, Denis Savard scored a pair of goals, including the game-winner at 11:57 of the second period, and Greg Millen faced 29 shots. The victory enabled the Blackhawks to clinch a playoff berth for the 21st consecutive season, second only to the Boston Bruins' record of 23 straight.

#90079u0329 03/20/1990 ~United Press International

ANNAPOLIS, MD (MARCH 20) UPI - Leaders of the Maryland Senate, entering the sixth day of a filibuster, argued whether abortion restrictions could be tightened if voters reject a law that would keep the procedure widely available.

Abortion opponents walked away from talks Monday to end the extended debate when they made no headway on a proposal that would limit abortions to instances of rape, incest or when the mother's life was in danger.

Senate leaders sent weary legislators home around midnight, ordering the debate and closed-door negotiations to resume Tuesday.

Anti-abortion senators wanted to add a restrictive section to the bill that would take effect if the legislation passed the General Assembly but Maryland voters rejected it in a threatened fall referendum.

Legislators have also discussed tempering language in the far-reaching bill that has troubled abortion opponents - namely provisions allowing viable fetuses to be aborted solely because the mother's mental health was in danger.

Senate President Thomas ''Mike'' Miller, who has depended on negotiations to end the debate rather than pressure from keeping legislators in the chamber round the clock, said the talks had to continue.

''You could filibuster this issue for the next 10 years, no problem,'' Miller said, explaining that abortion opponents remain confident they have the 16 votes needed to block a cloture motion.

Miller needs 32 votes, or two-thirds of the Senate membership, to end the filibuster, which started Thursday.

Senators have had breaks to sleep each night since the debate began Thursday, prompting one member to dub it a ''limousine filibuster.''

Senate Majority Leader Clarence Blount said both sides were close to resolving their differences, including the mental health provision.

''Nothing has been approved yet but that is still a major issue,'' said Blount. ''We have a good feeling about it but a snag can develop on any issue at any time.''

Abortion opponents have waged a campaign to write out of the bill the mental health provision, which they believe is equal to having no restrictions at all.

''It's a choice between more death and less death,'' said Sen. Patrick O'Reilly, a Prince George's County Democrat who opposes abortions.

In addition to mental health question, three other issues have been at the heart of talks over a possible compromise, including parental notification reporting abortions and testing to determine the viability of the fetus.

The bill before the Senate is designed to guarantee that abortions remain widely available in Maryland even if the U.S. Supreme Court eventually overturns its landmark Roe vs. Wade decision, which in 1973 created a

constitutional right to abortion.

The measure was introduced after Maryland's attorney general determined that a 1968 state law restricting abortions would become enforceable if the Supreme Court ever overturned Roe vs. Wade.

If passed by the Senate, the bill would still need approval from the House of Delegates and from Gov. William Donald Schaefer, who has not taken a position.

Abortion rights advocates in the Senate who have maintained all along that they could eventually muster enough votes to end the filibuster opened negotiations with anti-abortion legislators Sunday afternoon.

As drafted, the legislation would allow unrestricted abortions until a fetus is determined to be viable by a doctor. After that, abortions would be allowed when the mental or physical health of the mother or the physical health of the child was in danger.

Senators conducting the filibuster, usually addressing a near-empty chamber, have read aloud from books, constituent letters and legal briefs in their extended attempt to obstruct the bill and preserve the 1968 law.

The 1968 law, which became unenforceable after Roe vs. Wade, allowed abortions only during the first three months of pregnancy and only in cases of rape, incest or where the mother's life was in danger. It also provided that abortions must be performed in accredited hospitals and approved by a medical board.

#90079u0333 03/20/1990 ~United Press International

NEW YORK (MARCH 20) UPI - A 70-foot tanker car loaded with highly explosive propane gas derailed in a Long Island Rail Road freight yard, causing a commuter nightmare as technicians worked to right the car, officials said.

The tanker, loaded with 33,000 gallons of liquified petroleum gas, derailed at about 1:50 p.m. Monday at a Queens freight yard, said Efrain Parrilla, a fire department spokesman. Officials were unsure who owned the car.

While the tanker was not leaking, the listing rail car filled with explosive liquid was dangerously close to a stanchion of a busy overpass used by a subway line and vehicular traffic, officials said.

Firefighters inflated an air bag between the tanker and the bridge support and waited until after the evening rush hour to right the 120-ton car, a

delicate job made more difficult because the car was partially under the bridge, Parrilla said.

Subway and LIRR service in and out of Penn Station was not halted until about 8 p.m., when workers began hoisting the tanker back onto the tracks, officials said.

Fire officials said the car was righted about 9:40 p.m. and LIRR service was restored by midnight, after 57 trains were canceled because of the outage, affecting some 25,000 to 30,000 passengers, said LIRR spokesman Brian Dolan.

Transit Authority spokesman Bob Previdi said the operation to rerail the tanker forced authorities to halt virtually all subway service between Manhattan and Queens on six subway lines from about 8 p.m. until 11:58 p.m. Monday.

Fire department and LIRR officials were unsure what caused the tanker car's derailment and said the incident was under investigation.

Assistant Fire Commissioner John Mulligan said the car was righted by technicians from the Metro North Commuter Railroad, which along with the LIRR is overseen by the Metropolitan Transportation Authority.

He added that 150 firefighters assisted in the operation and stood by in case of an explosion.

''We evacuated 2,500 feet in each direction,'' Mulligan said. He described the freight yard as one of the largest passenger train yards in the world and the intersection the busiest train and subway intersection in Queens.

(MARCH 20) UPI - Sheriff's officials in Jacksonville, Florida, say a 70-year-old man was killed Monday night when a package bomb left on his doorstep exploded. Local bomb experts and agents from the federal Bureau of Alcohol, Tobacco and Firearms are searching for clues... but so far, NO motive has been found in the attack that killed Sherwin Finley. Sheriff's Sergeant Steve Weintraub says officials know of NO connection between the explosion and a series of deadly mail bombings that terrorized the South in December.

Romania's interim President Ion Iliescu appealed for calm late Monday following ethnic rioting in a provincial city in Transylvania. Witnesses say one man was beaten to death and several other people injured in the unrest. The violence followed a week of tension in the province between Romanian nationalists and ethnic Hungarians, who are demanding separate

schools and a university.

Panama's Vice President Ford says he'll press U-S officials for speedy approval of a one-BILLION-dollar aid package for his country during his three-day visit to Washington, which begins Tuesday. President Bush has requested one-BILLION dollars in aid to help Panama recover from the December 20th invasion and two years of U-S economic sanctions aimed at toppling Manuel Noriega.

Closing arguments are scheduled for Tuesday in an Anchorage, Alaska, courtroom in the trial of fired Exxon Valdez skipper Joseph Hazelwood. Jury deliberations are expected to begin Wednesday. Jurors must decide whether Hazelwood is criminally responsible for the tanker's grounding March 24th that caused the worst oil spill in U-S history.

-30- 1817

#90079u0356 03/20/1990 ~United Press International

(MARCH 20) UPI - The environmental group Wilderness Society marked the upcoming first anniversary of the Exxon Valdez spill with a report, saying there have been more than 10-thousand oil spills nationwide since then. Altogether, the report says that, including the Exxon Valdez, an estimated 15-Million to 20-Million gallons of oil have been spilled in the United States during the past year.

The racketeering trial of former Philippines first lady Imelda Marcos opens Tuesday in New York federal court. Marcos is accused of conspiring to loot the Philippines treasury and, with the help of co-defendant Saudi Arabian businessman Adnan Khashoggi, hiding the money in U-S investments. Marcos's lawyer said Monday he may call former President Reagan or his wife, Nancy, as defense witnesses. A Reagan spokesman had NO comment.

#90079u0442 03/20/1990 ~United Press International

CHICAGO (MARCH 20) UPI - Twentieth Century-Fox has indefinitely banned film critics Roger Ebert and Gene Siskel from screening previews of its movies, a published report said Tuesday.

Fox officials gave the two a ''thumbs down'' on their review of the new Fox comedy ''Nuns on the Run,'' the Chicago Sun-Times reported.

''I guess you could call it thumbs on the run,'' said Ebert, a Pulitzer Prize-winning critic for the Sun-Times.

Ebert and Siskel, a Chicago Tribune film critic, were guests last week on the ''Live - Regis & Kathie Lee'' television show and panned the Fox movie by saying it didn't contain a single laugh.

''If you can find a laugh in this film, I'll give you a shiny new dime for every one,'' Ebert said. ''And you'll not become a rich man.''

What really caused the Fox fur to fly was when Ebert held up a newspaper ad for the movie with a quote from the Village Voice calling it ''the funniest anti-clerical transvestite comedy of the decade.''

''I know you're a very clever man - I wonder if you can spot the fallacy '' Ebert quipped.

''How many others have there been?'' asked Siskel.

''Yes, this is 1990. How many other transvestite, anti-clerical comedies have there been so far in this decade?'' Ebert continued.

Fox officials refused to comment Monday but earlier Thomas Sherak, president of domestic distribution and marketing, defended the ban.

''I defend their right to be critics and to review films as they see them '' Sherak said. ''But what they did on 'Live - Regis & Kathie Lee' crossed over the line of being critics. They became performers.''

Ebert wondered what happened to everyone's sense of humor.

''The people who ran the ad obviously knew it was funny. They got the joke. I got the joke. On the show we were joking about the joke.''

Ebert said moviemakers generally respond to negative reviews by ''telling us what we can do with our thumbs.''

In 1962 Fox banished critic Judith Crist for panning the movie ''Cleopatra.''

''Time proved her (Crist) right on that one and it didn't do her career any noticeable harm,'' Ebert said. ''It won't really affect us either. We'll just buy tickets and go to the movies for our newspaper reviews.''

Siskel and Ebert said they would still review Fox movies on their syndicated televison show. The only difference will be that viewers will not be able to see the film clips.

#90079u0468 03/20/1990 ~United Press International

(MARCH 20) UPI - Around the world... around the clock... the latest news from the wires of United Press International.

New York authorities say transit service in the Big Apple is back on track following yesterday's de-railment of a 70-foot tanker car in a Long Island Rail Road freight yard. Officials were forced to shut down six subway lines between Queens and Manhattan as well as suburban commuter trains until about midnight, eastern time.

The Kremlin has issued get-tough measures designed to bring Lithuania back under the Soviet umbrella of rule. The Soviet news agency Tass reports that Moscow has declared that it will take control over all matters considered of national rather than republican nature. This allows Moscow to control communications, sea lanes and other properties.

The five-member crew of the shuttle Discovery is scheduled to board the craft this morning for the final hours of a mock countdown. The all-veteran crew is slated to guide Discovery into space April 12th in one of NASA's most important scientific missions. Discovery will launch the one-point-five BILLION-dollar Hubble Space Telescope.

Peruvian police say they suspect members of the left-wing Shining Path guerrilla group in the killing of two politicians and a pair of campaign workers yesterday. The assailants left a note on two bodies saying ''We do NOT threaten any more. Now we execute propogandists.''

Polish Prime Minister Tadeusz Mazowiecki is scheduled to meet with President Bush tomorrow in Washington. They are expected to discuss Poland's security worries regarding German re-unification. Mazowiecki is also slated to travel to Canada during his stay in North America.

#90079u0498 03/20/1990 ~United Press International

BY UNITED PRESS INTERNATIONAL

(MARCH 20) UPI - Independence of the sprawling territory of Namibia Wednesday closes out more than a century of colonial rule in a settlement made possible through the linkage of protracted regional conflicts in Namibia and Angola.

Following are important dates in the history of the conflicts:

-1884: Germany, asserting its position among world powers, declares South West Africa a protectorate, beginning modest influx of German settlers.

-July 9, 1915: South Africa, fighting with allied powers during World War I, conquers South West Africa. German forces surrender.

-Dec. 17, 1920: South Africa receives right to rule the territory under a mandate of the Council of the League of Nations.

-Oct. 24, 1945: United Nations charter comes into force, but South Africa refuses to accept transfer of supervision of former mandated territories to the world body.

-Dec. 10, 1959: Fledgling indpendence organizations, including precursor of Sam Nujoma's South West Africa People's Organization, oppose black resettlements, prompting clash with police, leaving 13 dead, 52 wounded. Nujoma goes into exile rather than face trial.

-Aug. 26, 1966: First armed confrontation reported between South African forces and SWAPO fighters.

-June 21, 1971: International Court of Justice finds South Africa in illegal occupation of South West Africa, intensifying U.N. efforts to settle dispute over control.

-Nov. 11, 1975: Neighboring Angola achieves independence from Portugal, installing Soviet-backed MPLA government. Cuban troop buildup begins in war against UNITA rebels of Jonas Savimbi.

-Aug. 18, 1976: South African-organized constitutional conference held in Windhoek sets Dec. 31, 1978, as target date for independence.

-April 27, 1977: U.N.-sponsored Western group involving West Germany, Canada, Britain, the United States and France starts talks on Namibian independence.

-Sept. 29, 1978: U.N. Security Council approves Resolution 435 settlement plan for Namibian independence that calls for cease-fire, U.N.-supervised election and peacekeeping force.

-Dec. 8, 1978: South African-sponsored Constituent Assembly elections are held, but SWAPO boycotts proceedings.

-Jan. 18, 1983: South Africa dissolves local national assembly and reimposes direct rule. In same year, U.S. Assistant Secretary of State for African Affairs Chester Crocker accepts South African demands that Cuban withdrawal from Angola be linked to acceptance of Resolution 435.

-Oct. 3, 1987: Amid South African troop buildup in southern Angola to support UNITA, Cuban-backed Angolan forces launch massive offensive. Heavy casualties reported on all sides.

-Feb. 19, 1988: In worst guerrilla attack, 20 are killed, 47 wounded in bombing of bank in northern garrison town of Oshakati. South Africa launches retalitory strikes on SWAPO bases in Angola.

-Dec. 22, 1988: Foreign Minister of South Africa, Cuba and Angola endorse agreement paving way for implementation of Resolution 435 in exchange for South African pullout from Angola and withdrawal of 50,000 Cuban troops in Angola by July 30, 1991.

-April 1, 1989: Resolution 435 is implemented under U.N. supervision. Heavy fighting erupts as SWAPO guerrillas cross border in violation of U.N. accord. More than 300 SWAPO fighters and 27 South African troops are killed in next three weeks.

-Sept. 14, 1989: Sam Nujoma returns from exile.

-Nov. 7, 1989: Five-day elections begin for a 72-seat constituent assembly. SWAPO is declared the winner, but falls short of two-thirds majority needed to gain overwhelming control.

-Feb. 9, 1989: Consensus constitution is approved unanimously providing a

bill of rights, bicameral Parliament and strong executive presidency.

-Feb. 16, 1989: Sam Nujoma designated president.

-March 21, 1990: Namibian independence.

-30- 4081

#90079u0522 03/20/1990 ~United Press International

(MARCH 20) UPI - Flood waters that forced thousands to flee their homes and led to 13 deaths across the South were cresting Tuesday, but a cold front added to the misery as temperatures plunged near freezing on the first day of spring.

Wet snow and cold rain, meanwhile, fell along the Atlantic Coast just a week after record-high temperatures blazed over the region, and the Midwest settled into another period of sub-freezing weather.

Much of the rain that wreaked havoc throughout the South was ending, except for some scattered light rain in western North Carolina and north Georgia. Temperatures dipped into the 20s in many sections overnight.

Runoff from as much as 18 inches of rain last week drove the Alabama River more than 20 feet above flood stage in the state capital of Montgomery, authorities said. Downstream in Selma, the river was already 18 feet beyond its banks and expected to rise another 2 feet before cresting Tuesday.

The latest evacuations around the two cities Monday left as many as 800 people out of their homes in the immediate area, authorities said. The total number of evacuations in Alabama alone since last week exceeded 4,000, and more were possible, authorities said.

''There are a lot more people who are going to have to move'' if the forecasts of the Alabama River's crest pan out, Dallas County Chief Deputy John Howell said.

Further south, in Florida's Panhandle, an estimated 1,000 people were evacuated. About 80 percent of families in the town of Caryville, on the banks of the Choctawhatchee River, were out of their homes, authorities said.

Residents in 12 counties were told to prepare for more of the same as Georgia and Alabama floodwaters rampaged downstream, swelling Florida rivers.

The flooding across southern Alabama since late last week was blamed for 10 deaths, eight in two accidents in which motorists drove around

barricades and were swept into flooded creeks. Three Georgia deaths were also blamed on the stormy weather.

Snow and rain fell over most of Pennsylvania early Tuesday, laying several inches of snow in the state's western mountains. Eastern Pennsylvania saw mostly wet snow in the north and rain in the south. Lows were in the 20s in the western part of the state and the 30s in the east.

West Virginia and parts of Maryland also received some snow overnight. Lows were in the 20s in West Virginia and in the 30s to low 40s in Maryland.

Southern New Jersey saw rain and even thunderstorms in some parts. Lows were in the 40s.

The National Weather Service issued a winter storm watch for much of western New England as snow and rain were expected over a region that saw record-setting warmth just one week earlier.

Rain and fog were already covering Rhode Island, Connecticut and Massachusetts, and forecasters said snow would develop as a low-pressure area moved into the three northern states and their mountains.

Temperatures cooled in the Midwestern states, dropping to the high 20s with clear skies through much of Illinois and Indiana, while southern Missouri was warmer with readings in the low to mid-30s.

Scattered patches of clouds drifted over Minnesota, Wisconsin and lower Michigan, with temperatures ranging from the upper teens to the mid-20s.

Fair skies prevailed in the Southwest, as high pressure moved into Texas, Louisiana, New Mexico and Arkansas.

The weather service warned late Monday that the warm weather of late February and early March may cause plants to bloom early. As a result, some parts of central and eastern Oklahoma were advised to expect some damage to trees and shrubs because of an overnight freeze.

In the West, high pressure across the Pacific Coast brought continued dry weather to northern and central California. But a southerly flow in the upper atmosphere carried high clouds into the state and blocked the sun in many areas for much of Monday.

The subtropical clouds that covered much of the state were expected to shift eastward Tuesday and promote increasing sunshine. A storm track will remain north of California for the next several days and rain, which is badly needed in the state, was not forecast.

#90079u0549 03/20/1990 ~United Press International

NEW CANAAN, CT (MARCH 20) UPI - A female fan obsessed with late night television host David Letterman was arrested Monday at the celebrity's home just three days after completing a prison term for similar offenses, police said.

Margaret Ray, 38, of Paonia, Colo. - who once claimed to be Letterman's wife and took his Porsche sports car - was charged with first-degree criminal trespass after Letterman called police at 12:45 a.m. Monday.

Ray had been released Friday from the state's prison for women in Niantic, where she was serving a sentence for repeatedly breaking into Letterman's home in the affluent suburb not far from New York City.

She was held again on $1,000 bond pending a hearing in Norwalk Superior Court on the latest charges filed Monday. Ray was to be returned to the Niantic prison, a spokeswoman said.

Letterman also had called to complain early Sunday that Ray was trespassing on his property, police said.

''Officers responded early Sunday and escorted Margaret Ray from the property and ordered her not to return,'' a police dispatcher said.

Last August, Ray was ordered to spend nine months at the Niantic prison when she violated parole by wandering around the tennis courts at Letterman's home. She was on probation for earlier harassment of Letterman.

In May 1989, Ray had received a one-year suspended sentence and three years probation after pleading guilty to two previous counts of criminal trespass and one count of using a motor vehicle without permission.

As a condition of probation, she was ordered to return to her home state of Colorado and continue psychiatric treatment.

Ray gained notoriety in May 1988 when she was caught driving Letterman's midnight blue Porsche on the New Jersey side of the Lincoln Tunnel heading into New York City with her 3-year-old son.

Ray told a toll collector she was Letterman's wife and introduced her son as David Letterman Jr. Letterman, who was not married, has said he does not know Ray.

BY UNITED PRESS INTERNATIONAL

(MARCH 20) UPI - History: A German protectorate since 1884 during Europe's colonial expansion in Africa, Namibia fell to South African control in 1915 after the defeat of German forces.

South Africa received a mandate to govern in 1920 by the League of Nations but it refused to recognize the transfer of the mandate to United Nations after its founding in 1945.

Amid early efforts to negotiate independence, the South West Africa People's Organization launched a guerrilla war in 1966. The U.N. Security Council approved Resolution 435, an independence plan, in 1978. South Africa refused to surrender control and proceeded with an internal settlement, demanding that independence be linked to Cuban troop withdrawal from neighboring Angola.

Fighting in Angola intensified, involving South African forces in the late 1980s. Amid warming of superpower relations, mounting economic and political pressure on Pretoria, South Africa accepted Resolution 435 Dec. 22, 1988 in a U.S.-brokered deal that also called for Cuban withdrawal from Angola.

Full independence is reached Wednesday.

Geography: Twice the size of South Africa with less than 4 percent of South Africa's population, Namibian territory placed over a map of Europe would touch London, Rome and Moscow.

Sparsely populated with the bulk of people in the north, Namibia is on the South Atlantic coast of southern Africa with a 930-mile coastline. Walvis Bay, the only deep-water port, is a South African enclave. The continent's 15th-largest country, approximately 1 percent of the total land is arable. Its neighbors are Angola to the north, Zambia and Zimbabwe to the northeast, Botswana to the east and South Africa to the south.

People: The population of 1.3 million is made up of 11 major ethnic groups the largest of which is the Ovambos, followed by the Kavango, and includes 100,000 whites, mainly German and South African descendants, as the fifth-largest group. Upon independence Wednesday, Afrikaans will be dropped, leaving only English as the official language.

Economy: Heavily dependent on South Africa for its economy, Namibia boasts the world's largest uranium mine. Chiefly British and South African controlled mining of uranium, diamonds, copper and zinc makes Namibia Africa's fourth-largest exporter of minerals, which account for 73 percent of export earnings. The territory's first gold mine opened in November 1989. Fishing, cattle and sheep raising are major industries. Namibia has

a well-developed infrastructure. The only railroad to Namibia runs from South Africa.

Government: The independence government will be installed under a constitution drafted by a 72-seat constituent assembly that vests power in a national assembly created from the constituent assembly, a strong executive presidency and an independent judiciary. The president, commander-in-chief of the defense forces, is elected by simple majority of the assembly for a maximum of two five-year terms.

Future: Despite a smooth transition to independence under U.N. supervision and calls for reconciliation that have produced an army comprised of former SWAPO guerrillas and South African-backed troops, Namibia faces an uncertain future. SWAPO's early calls for nationalization have fallen away and the private sector's mining industry will continue to drive the economy. Facing certain budget shortfalls, the country will need mass infusions of foreign aid and continue to depend on South African investment.

#90079u0583 03/20/1990 ~United Press International

(MARCH 20) UPI - Former Philippine first lady Imelda Marcos and Saudi Arabian businessman Adnan Khashoggi are scheduled to go on trial today in New York in a complex conspiracy case.

A lawyer for Marcos says he fully intends to call former President Reagan or his wife, Nancy, to the witness stand. In the words of Attorney Gerry Spence- ''Much of the defense information will come from the lips of the President.''

Marcos is charged with fraud and obstruction of justice in a racketeering scheme to siphon more than 100-Million dollars from the Philippines treasury to invest in New York real estate and art. If convicted of the charges, Marcos could be sentenced to 50 years in prison.

A spokesman for Reagan declined to comment on the possible subpoena. If Reagan is successfully called to the witness stand, it would mark the second time he was forced to appear at a criminal trial since he left office in 1989.

Today's congressional races in New York feature a battle for the seat of convicted Wedtech scandal defendant Robert Garcia... while in Illinois, voter turnout is expected to have the most effect on the primary races.

Voters will elect candidates from the South Bronx... Garcia's former district and one of the poorest in the nation... as well as Staten Island, where Republican Guy Molinari resigned to become borough president.

The Staten Island campaign has become a bitter battle between Molinari's 31-year-old daughter, Susan, the lone Republican on the City Council, and county Democratic Party lawyer Robert Gigante.

It also has been a test of wills between the national Republicans, who are anxious to hold onto the seat. The Democrats hope to win it back for the first time since the elder Molinari was first elected in 1981.

In Illinois, Democratic Senator Paul Simon and his likely G-O-P challenger Representative Lynn Martin, face NO primary opposition. Their November battle is expected to be one of the hottest Senate contests nationally.

Voter turnout today in Illinois by the G-O-P party faithful is seen as the key for Republican gubernatorial front-runner Jim Edgar. He faces a primary battle before the November campaign against the Democratic gubernatorial contender.

The state Board of Elections predicted only 25 to 27 percent of the state's more than six-Million registered voters would cast ballots.

-30- 2555

#90079u0592 03/20/1990 ~United Press International

(MARCH 20) UPI - Authorities in New York say workers were able to right a 70-foot tanker car loaded with highly explosive propane gas that derailed yesterday afternoon in a Long Island Rail Road freight yard.

Fire officials say the car was righted last night and Long Island Rail Road service was restored by midnight.

The tanker was loaded with 33-thousand gallons of liquified petroleum gas. The tanker was NOT leaking... but officials say the explosive-filled car was dangerously close to a busy overpass used by a subway line and auto traffic.

Firefighters inflated an air bag between the tanker and the bridge support to right the 120-ton car. Officials say the delicate job was made more difficult because the car was partially under the bridge.

The derailment caused a rush-hour nightmare last night in New York. Officials say 57 trains were canceled because of the derailment... affecting some 25-thousand to 30-thousand passengers.

Fire department and L-I-R-R officials are unsure what caused the tanker car's derailment and say the incident is under investigation.

A subcommittee of the House Armed Forces Committee will open hearings

today on proposal offered by Colorado Democrat Patricia Schroeder to let women assume combat roles.

Shroeder's proposal has the backing of the National Organization for Women which yesterday kicked off a campaign in favor of the Army conducting a four-year study using women in infantry, artillery and armored units.

Siding with Schroeder and NOW are two retired female officers, both of whom argue that a woman should be judged by her qualifications, NOT her gender.

When asked why women can train Navy F-14 pilots, and fly electronic surveillance planes but canNOT fly F-16 fighters, retired Air Force Colonel Diane Ordes replied that decision-makers practice what he called ''Neanderthal thinking.''

Retired Army Brigadeer General Pat Foote says the armed forces women have been short-changed in getting key military policy jobs because they lack combat experience.

#90079u0614 03/20/1990 ~United Press International

HANOI, Vietnam (MARCH 20) UPI - The Communist Party's leadership was meeting in secret to consider how fast and how far to go with political reform in the wake of communism's decline in Eastern Europe, officials said Tuesday.

Although not expected to allow the introduction of a multi-party system or the emergence of any formal opposition, the meeting of the 150-member party Central Committee comes when the party's performance is being challenged internally and externally.

The meeting, which began March 12, was expected to last at least 10 days, but little information has been made public on the progress of the talks.

''This plenum has to come out with some credible position to satisfy the large proportion of the population which is becoming involved in political issues,'' said a Western political analyst in Hanoi.

Party leaders, in particular, did not want to deal with the popular unrest that has spread through Hanoi's East European allies.

''The party has been encouraging political discussion, but it may have opened up a can of worms,'' the Western analyst said. ''The people have seen the benefits of economic reform and now they want political reform.''

Le Mai, assistant foreign minister, said the party has already taken tentative steps toward political change.

''We have separation of powers, so now the party just gives basic guidelines, the national assembly should work out the laws, and the government should carry out daily affairs,'' Mai said in an interview.

He said multiple candidates were allowed to stand for each post in recent local elections. Province chiefs and the directors of various institutes are freely elected, he said.

But for many people, including some party leaders, more must be done.

In a departure from the past, the draft political reform plan was made public in advance of the party meeting.

To the surprise of many, the plan emphasized the party must improve its performance and ethical standards.

It also proposed that the party start handing over power to the younger generation, and the government make greater use of expertise outside the party.

This liberalism contrasts with the hard line taken at the previous Central Committee meeting last July, in which the party bitterly attacked capitalism, pluralistic politics and liberalism.

The draft plan, however, has drawn public criticism because it does not go far enough.

Government radio and official newspapers have given free range to complaints and demands for change.

Most telling may be criticism of the party unleashed at nationwide meetings of the 1 million-strong armed forces.

According to Hanoi radio, military officers said the party leaders produced ''too much talk and too little action.''

The military also complained about corruption, millions of dollars in bad loans by state banks, sex scandals involving party members and the ''luxurious lifestyles'' of party leaders.

Adding to the pressure for political liberalization is the success of new free-market economic policies that sharply curtailed government subsidies and government economic control.

Agricultural and manufacturing production has increased. Far more food and consumer goods are available. Most people agree the standard of living has improved.

Foreign Minister Nguyen Co Thach has called for political as well as economic reform, saying one is not possible without the other.

But the elderly party leadership has drawn the line at allowing opposition political parties, arguing that only the Communist Party has the legitimacy of leading the country through its armed struggles against the French, the Americans and the Chinese.

MOSCOW (MARCH 20) UPI - President Mikhail Gorbachev met with two members of a Lithuanian delegation in the first talks between Moscow and the secession-bent republic, a participant said Tuesday.

Egidius Bichkauskas, a lawmaker chosen Saturday to represent Lithuania in Moscow, said he and another delegate met with Gorbachev in his Kremlin office Monday evening about the time the Kremlin ordered direct ministerial control of all federal enterprises in the Baltic republic.

''In the course of a half hour, much was said, both good and bad,'' Bichkauskas told United Press International by telephone from his Moscow hotel room.

In Vilnius, an aide to Lithuanian President Vytautas Landsbergis said the new nationalist-controlled Parliament would likely devote its afternoon session Tuesday to discussing Moscow's decree applying economic pressures to slow down the Baltic republic's rush to secession.

Estonian President Arnol Ruttel said he also met Monday with Gorbachev, who is trying to stem the tide of independence sweeping the northern Baltic region. Also in attendance were Estonian Premier Indrek Toome and Estonian Communist Party leader Vaino Valyas.

The meeting coincided with the release of partial election returns showing that nationalists swept to victory Sunday in Estonian and Latvian parliamentary elections.

Ruttel said Gorbachev appointed Soviet Parliament chairman Anatoli Lukyanov to negotiate with the Estonians in their move toward freedom, which Toome pledged will not be as abrupt as the March 11 declaration of independence by Lithuania's new Parliament.

The Kremlin visit by the two Lithuanian lawmakers, part of a seven-person delegation to the Soviet capital, began what Gorbachev last week said would be a ''respectful dialogue'' with the fractious republic.

Bichkauskas, who declined to provide further details of the meeting with Gorbachev, described the session's atmosphere as ''completely normal.''

But the meeting appeared to be part of a carrot-and-stick approach by Moscow that also included Monday's order tightening control over Lithuania in an effort to force the republic to rescind its independence declaration.

Bichkauskas said he and fellow Lithuanian legislator Vaitotas Anatanaitis had not read the decree signed by Soviet Premier Ryzhkov when they met

with Gorbachev, but Bichkauskas said the newly elected Soviet president briefed them on it.

The government order was the first use of the sweeping powers of the executive presidency Gorbachev claimed ne needed last week to act quickly in a time of crisis.

The decree, released by the official Tass news agency late Monday, amounts to a declaration of direct rule by Soviet ministries over the communications, sea lanes and property Moscow deems to be of national, as opposed to republican, character.

The order came less than a week after the new government in Vilnius said it had placed all enterprises under Lithuanian control and announced plans to set up 37 border checkpoints to stop the ''uncontrolled'' flow of goods to the rest of the Soviet Union.

''Administration of these installations, which are part of federal property, will be carried out directly by U.S.S.R. ministries,'' the statement said. ''The U.S.S.R. Customs Administration, the U.S.S.R. Interior Ministry and the KGB have been instructed to ensure the appropriate customs order on the territory of the Lithuanian Soviet Socialist republic.

''The government of the U.S.S.R. has made it incumbent on the ministries of railways, sea fleet, fisheries and civil aviation to ensure the continuous work of federal transportation in the interests of the population of the Lithuanian Soviet Socialist Republic,'' it said.

The statement warned Lithuanians that adoption of laws disrupting the finance and credit system of the U.S.S.R. and foreign economic relations will be viewed as illegal.

Gorbachev traveled to Lithuania in January, imploring the Lithuanians in vain to wait until his promised law of secession is passed before deciding on a break with Moscow.

Lithuania's March 11 declaration of independence is an attempt to regain the national sovereignty it lost when it was annexed by the Soviet Union in 1940 in a deal between Soviet dictator Josef Stalin and Nazi Germany despot Adolf Hitler.

The measures ordered Monday put teeth into a resolution by the Congress of People's Deputies last Thursday that said Soviet laws still covered the republic. That resolution declared the declaration of independence by Lithuania's Parliament ''null and void.''

Earlier Monday, the Kremlin denied Lithuania's claims of unusual Soviet

troop maneuvers in the Baltic republic and warned foreign countries against recognizing Lithuania's declaration of independence.

The Soviet Parliament has on its agenda consideration of a vital law on secession. Parliament began meeting Monday amid reports from Vilnius that Soviet aircraft buzzed the Lithuanian capital Sunday and that Soviet army troops and tanks were on the move in various parts of the republic.

But Soviet Foreign Ministry spokesman Gennady Gerasimov quoted the Defense Ministry as saying: ''There are no major maneuvers under way in Lithuania. Armed forces activities are in accordance with current military training plans.''

(MARCH 20) UPI - Secretary of State Baker is in Namibia to take part in the Southern African nation's independence ceremony today. At midnight Namibian time, Namibia's flag will be raised in place of South Africa's banner, ending colonialism on the African continent. Baker is slated to meet with his Soviet counterpart tonight. Tomorrow he's scheduled to see South African black nationalist Neslon Mandela .

Former President Carter is scheduled to conclude the Israeli-leg of his Middle East fact-finding mission today. Carter issued harsh criticism of the Israeli government and military for what he says is their ''abuse of the Palestinians.'' Carter urged Israeli news agencies to continue reporting human rights abuses by authorities.

Panamanian Vice President Guillermo Ford is scheduled to arrive in Washington today. Ford says he'll use his three-day visit to press lawmakers and the Bush administration to approve a one-BILLION-dollar aid package for his country. The December 20th U-S invasion of Panama and the looting that occurred afterward caused an estimated one-BILLION dollars in damage.

Chinese Premier Li Peng opened a two-week session of the National People's Congress today by saying the Communist Party will NEVER relax its grip on power. Li used his three-hour speech to refer to last year's crushing of the democracy movement as a ''great victory.'' He also used the forum to call for renewed campaigns to emphasize economic austerity and social stability.

(MARCH 20) UPI - Romanian interim President Ion Iliescu is appealing for calm following reports of ethnic violence in Transylvania. Witnesses say

one man was beaten to death and several others were wounded during a protest by about two-thousand ethnic Romanians in the city of Tirgomures. The protest follows a week of increasing tensions between Romanians and ethnic Hungarians.

Officials at the Boston art museum which lost 12 masterworks to theft during the weekend say the paintings were NOT insured because the cost would have wiped out the museum's budget. Experts say the heist may be the most lucrative art theft in history, with estimates ranging in the hundreds of Millons of dollars. Authorities around the world are on the lookout for the loot.

A group of 20 leading marine scientists has issued a warning that the status of the world's oceans could decline rapidly unless international legislation is introduced to reduce wastes. The warning was contained in a 104-page report released in London. Among the groups findings is that development of coastal regions and land-based pollutants form the greatest threat to oceans.

Officials in Texas say a plastic house being built in El Paso County may be the answer to the housing shortage. The 980-square-foot home is made of plastic lumber and costs about 10-thousand dollars. The maker of the home is a San Diego NON-profit group called Worldcare. The head of the organization says the cheap houses also benifit the environment because it does NOT cause de-forestation of the world's forests.

#90079u0840 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - The U.S. merchandise trade deficit shot up 20.5 percent in January to $9.3 billion, boosted by a jump in petroleum imports, the government said Tuesday.

The January deficit was an increase of $1.6 billion over December, the Commerce Department said. Private economists had expected a deficit of between $9 billion and $9.6 billion for January.

The Commerce Department said January exports totaled $41.3 billion, an increase of $1.2 billion or 4 percent, while imports hit $32.1 billion, up $2.8 billion or 7.3 percent.

The January level of exports set a new monthly record and was the highest since $31.5 billion in October 1989, according to the monthly report compiled by the department's Census Bureau.

But the main reason for the huge increase in the U.S. merchandise trade deficit for January was the $5.9 billion in petroleum imports, an increase of $1.8 billion over December's imports, the Commerce Department said.

The United States imported a record number of barrels of petroleum products, 291,278, for a single month in January, the department said. The previous high was 268,891 barrels in August 1989, officials said.

In December, the United States imported 226,268 barrels of petroleum products.

The change in January imports also reflected increases in industrial supplies and materials, consumer goods, foods, feeds and beverages, the Commerce Department said.

With the month's dramatic increase in petroleum imports, the merchandise trade deficit with the Organization of Petroleum Exporting Countries, OPEC totaled $2.6 billion in January after $1.2 billion in December.

On a nation-by-nation basis, the January trade deficit with Japan, $2.9 billion, was the lowest since $2 billion December in 1984. It totaled $3.5 billion in December.

But the trade deficit with the nations of western Europe hit $300 million in January after a surplus of $600 million.

The deficit with South Korea was $500 million in January versus $300 million in December, with China $800 million versus $500 million, Taiwan $1.1 billion versus $700 million, Hong Kong $500 million versus $200 million.

January's deficit with neighboring Canada was $600 million versus $900 million, and $200 million with Mexico, virtually unchanged from December's trade statistics.

#90079u0847 03/20/1990 ~United Press International

BEIJING (MARCH 20) UPI - Premier Li Peng, opening the Chinese legislature's first session since last year's violent suppression of the pro-democracy movement, declared Tuesday the nation's Communist Party will never relax its grip on power and warned further dissent would be crushed.

In a hard-line keynote address to the National People's Congress, the rubber-stamp legislature, Li also called for renewed emphasis on Marxism but said the government would ease an economic austerity program to avoid a deep recession.

''Upholding socialism is inseparable from upholding leadership by the Communist Party,'' Li told 2,705 delegates at the opening of the annual two-week parliament session in the auditorium of the cavernous Great Hall

of the People on Tiananmen Square, the center of last spring's pro-democracy demonstrations and the bloody crackdown that followed.

''As we confront pressure from abroad and difficulties at home, preservation of the country's stability is of paramount importance,'' Li said. ''If we do not uphold socialism and leadership by the Communist Party, we can expect no stability.''

Li's reading of a so-called work report, the legislative session's major document, was broadcast for more than two hours live on national television and in English and Chinese on state radio.

The session is the first after last year's bloody repression of the protests for freedom and the biggest political gathering in China since then. The address, which reflects the views of the leadership, illustrated the conservative swing of the government since then.

Li warned police and judicial authorities to ''be on the alert to promptly crush infiltration and subversion'' from abroad and to ''crack down on all sabotage by hostile elements at home.''

The report sounded long-unheard strains of xenophobia. Li expressed ''concern'' over reforms in the Soviet Union and Eastern Europe, and suggested they were destabilizing.

''Diverse forces in the world are realigning and regrouping ... bringing greater unrest and turbulence,'' he said, but added: ''Come what may, socialist China will stand rock firm in the East.''

Minimizing the impact of Western sanctions against Beijing, he warned that ''no one can succeed in isolating China'' and said relations with the United States would improve only when Washington stopped interfering in China's internal affairs.

Chinese leaders sat at a dais bedecked with flowers and red bunting to hear the address. Senior leader Deng Xiaoping, who has formally retired but reportedly remains influential, did not attend for a second straight year.

Security was at a level routine for such meetings, but police guarded the Great Hall and closed half of Tiananmen Square, the center of last year's protests. A bomb disposal truck was on hand.

Li said the government would ease the austerity program instituted in late 1988 to control inflation and breakneck growth, admitting the program has stalled industrial production and raised unemployment.

He said this year there would be looser credit and more funds injected

into the economy but that central economic planning ''with flexibility'' would be re-emphasized over market forces.

Taking a stiff line on politics, Li repeatedly slammed ''bourgeois liberalization,'' the Chinese leadership's code phrase for Western political and cultural influences, and warned against those trying to subvert communism ''under the banners of freedom, democracy and human rights.''

He said ideology had been neglected and the country should rally around mass campaigns to emulate party heroes, including legendary figures from the 1966-1976 Cultural Revolution, an era that had been officially discredited.

''Marxism-Leninism and Mao Tse-tung thought must prevail in the ideological field,'' Li said, adding that art, literature and other intellectual pursuits ''must be oriented towards serving socialism.''

The line was tough on students, who were at the core of last year's unrest. Li said students must undergo political, military and physical labor training, and demanded that education ''consistently give top priority to a firm and correct political orientation.''

The National People's Congress meets in full session once each year, generally to formally confirm decisions made by party leaders earlier. This year's session is to approve a number of new laws, including one on joint China-foreign business ventures.

(MARCH 20) UPI - Stock prices on the Tokyo Stock Exchange closed sharply lower Tuesday despite a hike in the official discount rate by the Bank of Japan in a move to stem inflation and calm Japan's turbulent financial markets.

The blue-chip Nikkei Average of 225 selected issues fell 1.46 percent or 456.05 points to 30,807.19 following the third worst single-day point plunge of 1,353.20 points Monday.

The broader-based Tokyo Stock Exchange Index of all listed major shares plummeted 53.05 points to 2,273.18.

Trading was slow as an estimated at 580 million shares changed hands, compared with 412 million shares Monday.

Declines pounded advances 812 to 190, while 112 issues remained unchanged.

Elsewhere in Asia, prices closed slightly higher in light trading on the Hong Kong Stock Exchange.

The key Hang Seng Index, which fell 15.07 points Monday, gained 8.64 points to 2,880.03. Financials fell 15.05 points, utilities gained 10.75, industrials rose 9.80 and properties gained 43.06 points.

Turnover amounted to 932.32 million shares, compared with 919.23 million

shares traded Monday.

In Australia, stock prices closed lower in light trading on the Sydney Sharemarket.

The key All Ordinaries Index, which rose 14.2 points Monday, eased 2.9 points to 1,596.0. The closely watched Gold Index, which climbed 23.7 points Monday, fell 19.1 points to 1,768.1.

Declines edged out advances 184 to 142, while 261 issues remanined unchanged.

Turnover amounted to 89.8 million shares, compared with 112 million shares on Monday.

#90079u0857 03/20/1990 ~United Press International

TOKYO (MARCH 20) UPI - Aided by brisk domestic demand, Japan's crude steel output in fiscal 1989, ending March 31, would be the fifth highest on record with 108.7 million tons, the Japan Iron and Steel Federation estimated Tuesday.

The estimate represents a 2.3 percent increase over the preceding year, marking the third consecutive year-on-year increase since 1987, federation officials said.

A record output of 120.02 million tons was set in fiscal 1973, they said.

Exports, however, will remain slow because of substantial decreases in sales to China, the largest export market for Japanese steelmakers, and the Soviet Union, the officials said.

In calendar 1989, Japan's crude steel production set the fifth highest on record of 107.91 million tons, up 2.1 percent over a year ago.

Exports dropped 14.9 percent to 20.12 million tons, marking the fourth straight year-to-year fall, the federation said.

The federation said crude steel production in February declined 0.9 percent from a year ago to 8.27 million tons, the first year-to-year fall in 12 months.

The officials said daily output, however, amounted to 295,000 tons, almost unchanged from 296,000 tons in January.

#90079u0905 03/20/1990 ~United Press International

AGANA, GUAM (MARCH 20) UPI - A representative of the American Civil Liberties Union Tuesday deliberately violated provisions of a new anti-abortion law that has been described as the most restrictive in the United States and its territories.

The law prohibits abortions except when the woman's life is in jeopardy. Victims of rape or incest, regardless of age, could not have an abortion unless their life is at stake.

But the new law goes even beyond the victim. It makes it a misdemeanor for anyone to provide information concerning abortions.

Janet Benshoof, an ACLU expert on constitutional privacy rights who arrived in Guam Sunday morning, offered the names of clinics with addresses and telephone numbers, to about 80 people, most of them women, at a Press Club meeting Tuesday in which she was the guest speaker. The meeting was covered by radio, television, wire services and print media.

In response to a question, Benshoof acknowledged that she intentionally violated the law in hopes of provoking arrest.

She also announced the ACLU will take the matter to court.

Guam Attorney General Elizabeth Barrett, who is in charge of enforcing the law, has publicly advised both the legislature and governor that in her opinion the law is unconstitutional.

But the legislature ignored that opinion, and on February 9 passed the bill which the governor of the U.S. territory signed into law Monday evening, never making reference to his attorney general's opinion.

Barrett has noted that the Supreme Court's so-called Webster decision last July, allowing states to regulate abortion, did not go so far as to overturn the landmark 1973 Roe vs. Wade ruling, which created a constitutional right to abortion.

During the legislative session in which the bill was passed, the gallery was full of anti-abortion advocates, led by Archbishoop Anthony Apuron, head of the archdiocese of Agana and the northern Mariana Islands. A day earlier, Apuron threatened to excommunicate any Catholic senator who voted against the bill.

The consensus among private practicing attorneys is that the attorney general could not now enforce a law she has already publicly announced is unconstitutional.

Chief of Police Adolph Sgambelluri said he could not enforce the new law

without a direct order from the attorney general.

There is a provision in the law that mandates a referendum in the November 6 general elections. The people will be asked to rescind or affirm the law.

In the meantime, womens groups, bolstered by doctors and nurses, have already started meetings to plan a campaign to rescind the law. But Benshoof's legal challenge may take precedent over the November referendum.

About 90 percent of Guam's 150,000 citizens are Catholic. The Roman Catholic Church has been a leading worldwide opponent of abortion.

Sen. Elizabeth Arriola, author of the bill, is a lay leader in the Catholic Church.

Guam is an unincorporated territory administered by the U.S. Interior Department. It became a U.S. territory in July 1950.

Southernmost and largest of the Mariana Islands with 209 square miles, Guam lies 1,500 miles southeast of the Philippines and 3,000 west of Hawaii.

Its people are U.S. citizens, but cannot vote for president. Since 1972, Guam has had one representative in the U.S. House, who can vote in committee but not on the House floor.

-30- 3624

#90079u0920 03/20/1990 ~United Press International

LUSAKA, ZAMBIA (MARCH 20) UPI - Soviet Foreign Minister Eduard Shevardnadze assured the African National Congress Tuesday the Soviet Union would continue to support the black nationalist movement in its fight against apartheid in South Africa.

Shevardnadze held talks with leaders of the ANC, including Joe Modise, commander of its military wing, Umkhonto we Sizwe (Spear of the Nation), in the Zambian capital, where the ANC has maintained its headquarters for the past 25 years.

''We will continue supporting the aims of the ANC in its fight against apartheid,'' said Shevardnadze, who was traveling later in the day to Windhoek to attend Namibia's independence celebrations.

No specific reference was made during the talks to the ANC's armed struggle, senior ANC member Stanley Mabezela said.

''We assume the Soviets' support is still there. As far as the ANC and the Soviets are concerned, there is no change in policies,'' Mabezela said.

In reference to recent reforms by South African President Frederik de Klerk, Shevardnadze said, ''The phase is now very crucial and we share the view that we are now entering a decisive stage.''

De Klerk announced Feb. 2 the ANC and South African Communist Party would be allowed to operate freely in the country for the first time in 30 years. The first official contact between the ANC and the ruling National Party, which came to power in 1948, will take place in talks scheduled for April 11.

Moscow provides the bulk of the ANC's military funding for its limited guerrilla war against South Africa.

At a meeting with the ANC Monday in Lusaka, the 13-member Organization of African Unity Special Committee on Southern Africa agreed to monitor progress on implementing pre-conditions laid down by the ANC for formal negotiations with the South African government.

The conditions, spelled out by the ANC in the Harare Declaration and adopted by the OAU Special Committee last August in the Zimbabwean capital include demands for the lifting of a 45-month-old state of emergency and the release of all political prisoners.

The United Nations also has adopted the Harare Declaration in a modified form.

''We have decided to establish a monitoring team to closely follow up the implementation of the declarations,'' OAU Special Committee Chairman and Egyptian President Hosni Mubarak said.

The team is to travel between South Africa and the so-called ''Frontline States,'' comprising Angola, Botswana, Mozambique, Tanzania, Zambia and Zimbabwe, and to prepare fortnightly reports to be circulated to OAU member states and the U.N. secretary-general.

Mubarak urged fellow African states not to cease their isolation of South Africa and appealed for aid for returning former refugees.

''Measures taken by President de Klerk are far too insufficient to warrant any review of the international consensus against apartheid,'' Mubarak said. ''We urgently appeal to the international community to render financial support for the resettlement and rehabilitation of the many returnees.''

WASHINGTON (MARCH 20) UPI - America's merchandise trade deficit shot up by 20.5 percent in January to $9.25 billion, boosted by a jump in petroleum imports, the government said Tuesday.

The January deficit was an increase of $1.6 billion over December, the Commerce Department said. Private economists had expected a deficit of between $9 billion and $9.6 billion for January.

''The weather was a factor,'' said Irwin Kellner, chief economist with Manufacturers Hanover in New York. ''We imported a lot of petroleum to make up for what we drew down in December when we had the cold weather.''

The department said January exports totaled $32.1 billion, an increase of $1.2 billion or 4 percent, while imports hit $41.3 billion, up $2.8 billion or 7.3 percent.

The January level of exports set a new monthly record and was the highest since $31.5 billion in October 1989, according to the monthly report compiled by the department's Census Bureau.

But the main reason for the huge increase in the U.S. merchandise trade deficit for January was the $5.9 billion in petroleum imports, an increase of $1.8 billion over December's imports, the Commerce Department said.

The United States imported a record number of barrels of petroleum products, 291,278, for a single month in January, the department said. The previous high was 268,891 barrels in August 1989, officials said.

In December, the United States imported 226,268 barrels of petroleum products.

Norman Robertson, chief economist for Mellon Bank in Pittsburgh, said the expanding petroleum imports are ''going to emerge as a major problem'' for the United States in the 1990s.

''It's getting worse,'' Robertson said. ''We're looking at diminishing output in the United States and increasing exports. It's quite possible in the next four to five years we could be importing 45 percent to 50 percent of our oil needs.''

The change in January imports also reflected increases in industrial supplies and materials, consumer goods, foods, feeds and beverages, the Commerce Department said.

With the month's dramatic increase in petroleum imports, the merchandise trade deficit with the Organization of Petroleum Exporting Countries, OPEC totaled about $2.6 billion in January after $1.2 billion in December.

On a nation-by-nation basis, the January trade deficit with Japan, about $2.9 billion, was the lowest since $2 billion December in 1984. It totaled $3.5 billion in December.

But the trade deficit with the nations of Western Europe hit about $300 million in January after a surplus of $600 million.

The deficit with South Korea was $500 million in January vs. $300 million in December, with China $800 million vs. $500 million, Taiwan $1.1 billion vs.$700 million, Hong Kong $500 million vs. $200 million.

January's deficit with neighboring Canada was $600 million vs. $900 million, and $200 million with Mexico, virtually unchanged from December's trade statistic.

TIRGU MURES, ROMANIA (MARCH 20) UPI - Troops patrolled the city Tuesday following ethnic clashes that reportedly killed one person and injured 11, including a noted writer from Transylvania's Hungarian minority community.

Playwright Andras Suto, in his early 60s, was hospitalized with broken bones and an eye injury after being beaten by Romanian nationalists, the official Hungarian news agency MTI reported Tuesday from Bucharest.

Rival mobs roamed the streets of Tirgu Mures Monday, attacking political offices and a radio station and beating up passers-by in Romania's worst

ethnic unrest since the December overthrow and execution of Communist dictator Nicolae Ceausescu.

The violence followed a week of escalating tension in several Transylvanian cities between the Romanian majority and ethnic Hungarians, who are demanding separate schools and a university.

Transylvania, Romania's westernmost province, borders Hungary and is home to the majority of Romania's ethnic Hungarian population.

Hungary Tuesday accused Romanian nationalists of carrying out a ''pogrom'' against Hungarians in Tirgu Mures. Hungarian Foreign Minister Gyula Horn sent an urgent message to U.N. Secretary-General Javier Perez de Cuellar expressing ''profound anxiety'' over the ''serious atrocities committed against ethnic Hungarians,'' MTI said.

Interim Romanian President Ion Iliescu appealed for calm as the army patrolled the streets of Tirgu Mures Tuesday. The Democratic Forum, Hungary's largest opposition group, called for a protest Tuesday night in the capital of Budapest. Hungary's ruling Social Democratic Party has demanded that the unrest be considered by the European Parliament.

Romanian and Western witnesses said a man was beaten to death outside the old Communist Party headquarters during a protest Monday by about 2,000 ethnic Romanians in Tirgu Mures, a city of about 150,000 people, about half of whom are ethnic Hungarian. Police have not confirmed the report.

At least 11 other people were reported hurt in scattered violence before calm was restored Monday evening. Army troops patrolled the streets to prevent further clashes, and MTI reported reinforcements arrived in the city at dawn.

Among the injured was a translator for United Press International, who was punched and kicked by a mob of ethnic Romanians who tried to storm the city radio station. Some in the crowd pushed a UPI reporter and destroyed her notebook, shouting, ''We don't need journalists here!''

The reporter and translator were chased down a street and escaped in a taxi. Seconds later, a truck filled with soldiers arrived at the scene.

Earlier, a Hungarian television crew was attacked by another mob of Romanian protesters.

Iliescu, who heads the provisional Romanian government in Bucharest, appeared on national television to appeal to both sides to end the violence. He urged police, who have so far kept a low profile, to maintain order in Transylvania.

Ethnic tensions have been escalating in Transylvania because of the provisional government's failure to fulfill promises to allow ethnic Hungarians to establish separate schools with classes in the Hungarian language.

Fears that the increasingly vocal Hungarians would try to push for the secession of Transylvania have prompted a backlash by ethnic Romanians, led by an extremist movement known as Vatra Romaneasca.

The unrest, which threatens to overshadow the campaign for Romania's first democratic elections in May, is rooted in the simmering hostility stemming from official suppression of the Hungarian minority under Ceausescu.

The first reported ethnic disturbance occurred Friday in Tirgu Mures when ethnic Romanians tore down a Romanian-language sign outside a pharmacy and beat back several Romanians who tried to enter the store.

The Romanians rampaged through the city, waving Romanian flags, and by evening no Hungarians could be found on the streets.

TOKYO (MARCH 20) UPI - Japan's booming economy entered its 40th straight month in March, bolstered by brisk domestic demand and healthy corporate performance, the government reported Tuesday.

"Fundamental factors of the Japanese economy remained healthy despite wild fluctuations of foreign exchange rates and stock prices," said the Economic Planning Agency in its monthly report on the domestic economy.

The continuous economic expansion was the third longest after World War II, following a record 57-month span in the 1965-70 period and a 42-month duration in 1958-61.

The agency said personal consumption continued to grow steadily, as shown in brisk sales at major retail stores nationwide and double digit growth in sales of vehicles and overseas travels by Japanese tourists. Capital spending also remained healthy both in manufacturing and non-manufacturing sectors, the agency said.

It said Japanese corporations planned a 6.1 percent increase in their plant and equipment investment in fiscal 1990, starting April 1, but the figures may be revised upward later and possibly exceed a 15.6 percent rise estimated for the current fiscal year.

The agency noted that Japan's housing starts grew 6.3 percent in January over a year ago, compared with a 0.6 percent rise in December. The sound

domestic economy also was reflected in growing corporate earnings both in manufacturing and non-manufacturing sectors and in a low level of bankruptcies, the agency said.

Economic indicators prepared by the agency stood at 52, topping the boom-or-bust line of 50, the agency said. It noted that domestic prices remained stable despite the yen's sharp drop against the dollar that increased pressure on import prices.

The agency said the booming economy has caused labor shortages. There were 132 jobs for every 100 job seekers in January, unchanged from December, it said.

Japan's merchandise trade surplus continued to shrink in February with imports rising 7.0 percent over a year ago against a modest 1.9 percent increase in exports, the agency said.

MINNEAPOLIS (MARCH 20) UPI - Honeywell Inc. has announced the sale of another block of the common stock it holds in Yamatake-Honeywell for $35.2 million.

The 2.3 percent interest in Yamatake-Honeywell was acquired by a group of Japanese financial, industrial and trading corporations, Honeywell announced Monday.

On Oct. 24 and Dec. 20, Honeywell sold 16 percent and 7.5 percent stakes, respectively, of Yamatake-Honeywell. Honeywell said proceeds from the three transactions are being used in the company's announced program to repurchase up to ten million of its shares. Honeywell intends to maintain its current 24.2 percent ownership in Yamatake-Honeywell.

It also said the sale of part of its Yamatake-Honeywell equity served to unlock value for Honeywell shareholders, while maintaining a key business partnership.

Honeywell is a Minneapolis-based controls company that provides products, systems and services for homes and buildings, industry, and aviation and space. The company had 1989 sales of $6.1 billion and employs 65,000 people worldwide.

#90079u1025 03/20/1990 ~United Press International
ATHENS, GREECE (MARCH 20) UPI - A majority of the Iranian Parliament said Tuesday it holds the United States responsible for the safety of four Iranians who disappeared in Lebanon in 1982, the official Islamic Republic News Agency reported.

A group of 170 deputies in the 270-member Majlis, or Parliament, ''issued a statement holding the United States and its agents responsible for any harm that befalls the four Iranians being held hostage in Lebanon by the Christian Phalangists,'' IRNA said in a report monitored in Athens.

The four men, diplomat Mohammad Musavi, Ahmed Motavasselian, Kazem Akhavan and a driver identified only as Bahardoust, disappeared in Lebanon in 1982.

Iran accused Lebanese Christian Phalangist forces of kidnapping them and handing them over to Iraq, which was then losing its war against Iran.

President Akbar Hashemi-Rafsanjani has appealed to the archbishop of Canterbury, Robert Runcie - whose emissary, Terry Waite, is also a hostage in Lebanon - to use any influence with the Phalangists to have the four Iranians freed.

Runcie told Rafsanjani in a letter last year that he was unable to locate the Iranians, despite his best efforts. Diplomats said they believed the kidnapped Iranians were dead.

Iran's Majlis is dominated by young radical deputies controlled by hard-line clerics who oppose Rafsanjani on several issues.

IRNA said the statement of the 170 deputies ''was read in the Majlis ... in reaction to Western media reports concerning the possible death of the Iranian diplomats.''

The statement said the fate of 18 missing Westerners in Lebanon, including eight Americans, ''depends on the will of the Lebanese Muslims who want the United States to end its plots in Lebanon,'' IRNA said.

On Monday, Iranian Deputy Foreign Minister Ali Mohammad Besharati said he believed the Western hostages held by pro-Iranian Shiites in Lebanon would be released gradually within 10 months.

Rafsanjani said last August that Iran would help win freedom for the hostages. The offer came amid speculation the United States was preparing a military attack on Shiite bases in Lebanon, after one group admitted killing Marine Lt. Col. William Higgins and another threatened to murder American hostage Joseph Cicippio.

#90079u1054 03/20/1990 ~United Press International

TOKYO (MARCH 20) UPI - Honda Motor Co. said Tuesday it has developed inertial navigation equipment for automobiles that always provides accurate information to the driver.

The major Japanese automobile maker said the new system combines navigation technology such as one used for aircraft and a map database system using a compact disk.

The distance driven is measured by the Vehicle Speed Sensor and the

changes in direction are measured by the high-precision Gas Rate Sensor to calculate the route traveled, the company said.

The route traveled is continually checked against the road information stored on the compact disk, and both sensor deviations and those arising at the time the location is set are suitably corrected, it said. The current location and direction and the route traveled are displayed on a road map on a six-inch color cathode ray tube display, the company said.

The vehicle's position and its direction are displayed in the center of the map and the route traveled is displayed as a dotted line. When the destination is designated, the travel direction is shown by a solid line and the distance as the crow flies is shown in kilometers, the company said.

The company said the map database on a single compact disk contains most information needed for ordinary driving such as the names of prefectures (states) and cities, intersections and public and leisure facilities, which are displayed in a color scheme.

#90079u1069 03/20/1990 ~United Press International

SEABROOK NH (MARCH 20) UPI - Operators at the long-delayed Seabrook nuclear power plant began start-up procedures early Tuesday that will bring the $6.5 billion reactor to full power in about three months, a plant spokesman said. The controversial plant's reactor was started at 3:59 a.m.

Seabrook received its full-power license on Thursday after a federal appeals court rejected a request for a stay by plant opponents. The Nuclear Regulatory Commission voted to approve a full-power license for Seabrook on March 1.

"Operators today began the process of bringing the reactor up to the three percent power level for initial testing of plant systems," said Ron Sher, spokesman for New Hampshire Yankee, which operates the plant.

The startup process consists of withdrawing 57 control rod assemblies from the plant's nuclear fuel, Sher said. Those rods, which are made of neutron absorbing silver cadmium indium, permit the nuclear reaction to start as they are removed.

Sher said after testing is completed at the three percent level, plant operators will gradually increase the reactor power levels in increments to 30, 50, 75 and 100 percent power over the next two or three months.

Testing will be carried out at each power level before increasing reactor

operation to the next one, Sher said. Seabrook will produce limited amounts of electricity when the plant reaches ten percent power.

New Hampshire Yankee President Edward Brown said operations will use "a careful and conservative approach throughout the startup program. We will take as much time as necessary to safely test all plant systems."

Safety was one of the primary objections to the plant by anti-nuclear groups, who battled it in demonstrations and in the courts for nearly 20 years.

Opponents, including the Massachusetts attorney general's office, claim that communities within the plant's ten-mile emergency zone could not be evacuated in the event of a nuclear accident.

Seabrook is located on the heavily populated New Hampshire coast about 40 miles north of Boston. Construction at Seabrook was completed in July 1986. Delays in the licensing of Seabrook led to the bankruptcy of its lead owner, Public Service Co. of New Hampshire, in January 1988.

Sher said the plant will be gradually be placed in commercial service as its utility owners receive permission from state utility regulators to begin charging customers for Seabrook power.

#90079u1076 03/20/1990 ~United Press International

BOSTON (MARCH 20) UPI - Sometime during their lives, about half of all Americans will faint.

For most, the fainting spell will be a one-time episode that is not a sign of an underlying health problem.

But for up to 100,000 people each year, blackouts will be recurrent events that can signal the presence of heart disease, neurological or psychiatric disorders, or problems with blood pressure or medication.

In medical terminology, repeated fainting is known as syncope (pronounced sink-oh-pee). According to Dr. Mark Linzer, it can be a disabling problem for sufferers and a baffling one for doctors.

Doctors are unable to explain the cause of syncope in up to one-third of those affected, despite the availability of high-technology diagnostic tools, said Linzer, director of the Syncope Evaluation Center at the New England Medical Center in Boston.

When the cause cannot be pinpointed, often despite months of tests, blackout sufferers can be left unable to drive, work or lead normal lives,

he said. Some live in fear of another episode.

The good news, however, is that strides are being made in diagnostic techniques, particularly through the use of small, portable devices that monitor heart rates of syncope sufferers and help doctors determine whether cardiac disorders are the root of the problem.

The instruments, known as loop electrocardiographic recorders, keep a record of heart rhythms through a digital memory system that replaces old information with new every four minutes.

Linzer said the recorders are about the size of telephone paging beepers and can be worn on the hip or in a shoulder holster. Patients equipped with the devices are told that if they faint, they should hit a button to stop the recording as soon as they gain consciousness.

In that way, Linzer said, there will be a record of the person's heart rhythms immediately before and during the blackout. By examining the recording, doctors can determine the presence or absence of abnormal beats known as arrhythmias.

Although heart disease accounts for only about 10 percent of all cases of repeated fainting, it is probably what syncope patients fear most, Linzer said.

The link between fainting and cardiac disorders was highlighted recently by the death of Loyola Marymount basketball star Hank Gathers, who passed out during a game last Dec. 9 and died after collapsing again during a contest on Mar. 4.

After his initial blackout, doctors said Gathers suffered periodic irregular heartbeats. The results of an autopsy indicated he had a disease called cardiomyopathy that can damage and enlarge the heart and set off arrhythmias.

''Hank Gathers is the most unfortunate case of what can happen with heart arrhythmias,'' Linzer said. He added, though, that cases such as Gathers', in which the heart grows ''big and baggy'' for reasons sometimes linked to viral infections or genetics are ''really quite rare.''

Among most syncope patients who suffer from irregular heart beats, ''the chances of dying suddenly are very small,'' Linzer said.

If loop monitors or other tests, such as those in which electrodes are inserted into the heart, detect arrthythmias, any number of things can be done, he said.

Solutions range from medication to pacemakers, which can speed up a slow

heart rhythm to defibrillators, which can slow an accelerated heartbeat.

In up to 10 percent of syncope sufferers, the cause is stroke, seizure or neurological disorder, Linzer said. These people often are diagnosed through non-invasive procedures such as CAT scans.

When cardiac and neurologic problems are ruled out as the reason for blackouts, diagnosis and cure can be become difficult, Linzer said.

Changes in blood pressure, especially after a sudden movement such as standing up, can be a frequent cause of syncope among the elderly, but less so among younger people.

When there is no obvious physiological explanation, Linzer said the doctors at his syncope center look for other causes, such as shock or stress or persistent psychiatric disorders. To aid in the diagnosis, patients are asked to fill out a 100-item questionnaire about the circumstances of fainting episodes.

Because syncope can have so many causes, both physical and mental, Linzer said he expects to see the emergence in coming years of more multi-disciplinary diagnostic centers like his, which combine the skills of neurologists, cardiologists, internists, psychiatrists and even sports medicine specialists.

In addition, he advocates patient self-help groups, like one initially suggested by a patient ''who was a tennis player and fainted every time she rushed to the net,'' he said. After her problem was brought under control, ''she wanted to form a group to let other people know there can be light at the end of the tunnel.''

#90079u1104 03/20/1990 ~United Press International
PITTSBURGH (MARCH 20) UPI - Landmark Savings Association, one of Pennsylvania's largest thrifts, announced Tuesday that federal regulators have approved its capital plan for financial security.

Landmark, based in Pittsburgh, was required by the federal Office of Thrift Supervision to boost its tangible capital from one percent of total assets to 1.5 percent.

The unstable status of savings and loan institutions nationwide led federal regulators to require thrifts to have a sufficient amount of tangible capital - meaning cash and other hard assets - to cover liabilities.

Under Landmark's capital plan, the thrift will pursue a no-growth strategy

and will be restricted from paying any capital distributions to its shareholders in the near future, officials said. Landmark executives said customers would see no changes in services as mortgage loans and personal loans will continue to be available.

"This is an important day for Landmark. The OTS decision on our capital plan is a real vote of confidence for Landmark's board and management," said J. Richard Eshleman, president of Landmark, which is among the ten largest thrifts in the state with assets of $1.6 million.

#90079u1131 03/20/1990 ~United Press International

KATMANDU, NEPAL (MARCH 20) UPI - Authorities raided a university campus Tuesday and arrested about 500 doctors, teachers, journalists and other professionals meeting as part of the month-old movement for multi-party democracy, witnesses said.

Police made the arrests in an auditorium at the Tribhuvan University campus, about 2 miles west of Katmandu, and loaded the suspects into trucks and drove them away, the witnesses said.

The arrests came as professional groups have become increasingly supportive of the opposition movement and have called on King Birendra to begin negotiating demands for multi-party democracy.

The meeting at Tribhuvan University was about 2 1/2 hours old when police raided it in mid-afternoon, the witnesses said. Many participants escaped during the raid, they said.

Among those arrested were Sambhu Prasad Gwayali, a former law minister and currently acting president of the Human Rights Organization of Nepal; Mathura Prasad Shrestha, medical professor and president of the Forum for the Protection of Human Rights; Govinda Biyogi, president of the Nepal Journalists Association, and Ishwar Gwayali, an engineer and former president of the Nepal University Teachers Association

All except Biyogi spoke at the meeting in support of the movement, which was launched Feb. 18 by eight outlawed leftist parties seeking to overturn Nepal's 29-year-old ban on political parties.

Chief government spokesman Radhe Shyam Bista said he could not confirm the

number of arrests at Tribhuvan University but said, ''They were arrested for making provocative speeches.''

At least 13 people have been killed and thousands arrested since the coalition of leftist parties began strikes and demonstrations aimed at ending Nepal's partyless panchayat system.

Opposition sources have put the death toll as high as 24 and have said thousands of activists have been arrested and many have been subjected to inhumane treatment in prison.

In a separate incident Tuesday, about 45 students were arrested when they tried to march from the Sawashwoti campus in Katmandu, the Nepalese capital, after burning panchayat effigies and chanting anti-government slogans, witnesses reported.

Meanwhile, a former cabinet minister dismissed earlier this month by Birendra in connection with the movement said a group of parliamentarians was trying to visit jails to verify reports of police atrocities against political prisoners.

Keshav Kumar Budhathoki, formerly the assistant minister for water resources, discussed the planned jail visits during an informal news conference at his residence.

The government spokesman said before the raids Tuesday that 1,000 people were still being detained in various prisons in Nepal in connection with the movement.

Earlier Tuesday, a group of unionized teachers said it would observe a planned nationwide strike Wednesday as part of the ongoing movement.

Birendra hinted last week at making political reforms within the panchayat system, but his overtures were rejected by opposition leaders who have insisted on the full restoration of the multi-party democracy the king's father abolished 29 years ago.

(MARCH 20) UPI - A senior Lithuanian government official tells U-P-I that he and another lawmaker from the Baltic republic met with Soviet President Gorbachev at the Kremlin last night to discuss Lithuania's drive for independence. The lawmaker declined to reveal specifics about the meeting.

An aide to Lithuanian President Vytautas Landsbergis says the country's nationalist-dominated parliament is scheduled today to discuss Gorbachev's decree granting Moscow control of facilities deemed national property. The

tough measures were announced yesterday and are the latest in the two sides' war-of-nerves.

Leaders from around the world are gathering in Namibia today to observe the symbolic end of colonialism in Africa. After 106 years of foreign domination, Namibia will raise its flag tonight at midnight Namibia time, after South African President de Klerk lowers his country's flag.

Illinois election officials predict that only a quarter of the state's more than six-Million registered voters will take part in today's primary election. Aside from the Republican gubernatorial race, the only statewide competitionsare the Democratic races for comptroller and treasurer.

New Yorkers also go to the polls today to decide, among other things, who will assume the seat of convicted Wedtech scandal defendant Representative Robert Garcia. Garcia's South Bronx district is one of the poorest sections in the United States. Democrats also hope to gain the vacated Staten Island seat.

WINDHOEK, NAMIBIA (MARCH 20) UPI - Heads of state and senior government officials from around the world descended on the tiny capital of Windhoek Tuesday for midnight celebrations ushering in sovereignty for Africa's last colony after 75 years under South Africa.

The ceremony will climax an ambitious U.N.-supervised program ending the nation's colonial status and a bitter bush war for independence.

''We've been waiting for this for a long time,'' said Simon Jansen, 37, an electrician at the Rossing uranium mine in Swakomund, who traveled more than three hours to Windhoek to join attend the celebrations.

''I'm still thinking back about the years that we worked so hard but it's over now. We await a nice future for Namibia,'' he said in the black tonwship of Katutura on the outskirts of the hill-shrouded capital.

President Frederik de Klerk of South Africa was among the first to arrive Tuesday to a red-carpet welcome at Windhoek's airport, where jets ferrying dignitaries landed one after another through the day. State-run television said 75 flights would arrive and dazed organizers battled to find rooms for more than 2,000 visitors.

Others on hand included Presidents Hosni Mubarak of Egypt, Joaquim Chissano of Mozambique, Kenneth Kaundaa of Zambia, Soviet Foreign Minister Eduard Shevardnadze and Secretary of State James Baker.

South African black leader Nelson Mandela also was expected to arrive to attend the celebrations and meet Wednesday with Baker.

Baker held bilateral talks throughout the day, including the first meeting of a U.S. secretary of state with Angolan President Jose Eduardo dos Santos.

A senior U.S. official, who is deeply involved in U.S. policy in Africa, said after the Baker-dos Santos meeting that he ''noticed new flexibility'' on the part of dos Santos on seeking a cease-fire.

''The secretary said in the context of a cease-fire and the beginning of good faith negotiations, the United States is prepared to improve its relationship with the government of Angola,'' the official said.

''President dos Santos indicated he agrees that a cease-fire is the necessary first step to a political solution and that his government is prepared to consider entering a negotiation,'' the official said.

The United States does not recognize the Angolan government and this status could be one of the inducements Baker offers dos Santos if he enters into substantive, productive negotiations with the National Union for the Total Independence of Angola - known by the Portuguese acronym UNITA - that lead to an end of the war.

De Klerk was welcomed by President-elect Sam Nujoma, whose South West Africa People's Organization waged a 23-year bush war against South African rule of the sprawling mineral-rich territory first colonized by Germany, which ruled from 1884 until South African troops conquered the territory in 1915 during World War I. Of Namibia's 1.3 million people, about 100,000 are white, mainly German and Afrikaner descendants.

SWAPO captured a majority of the 72-seat Constitutent Assembly elections monitored by the United Nations in November but fell short of the two-thirds needed to approve its own charter, resulting in a consensus constitution heralded as possibly the most democratic in Africa. A national army made up of former SWAPO guerrillas and former South African-trained troops is presently undergoing training.

''The blood that was spilled in the fight for independence will not be forgotten when the clock strikes 12 tonight,'' said The Namibian, a Windhoek daily newspaper that strongly supported SWAPO during the independence war. ''At this moment, the heavy oppressive cloak of colonialism will be lifted from the shoulders of every Namibian.''

Hundreds of Namibians began flocking to Windoek's athletic stadium late Tuesday afternoon for the celebrations. Shortly before midnight, de Klerk is to lower the South African flag at the stadium. Namibia's new blue, white, red and green striped flag with a sun in the left-hand corner will rise in its place.

In the city center, black and white Namibians donned independence T-shirts flags and caps, mingling with U.N. personnel, visitors and shoppers, including women of the Herero culture dressed in their usual Victorian-style clothes. Shop windows displayed flags but few signs of bunting were visible elsewhere on city streets.

Nujoma will be sworn in by U.N. Secretary-General Javier Perez de Cuellar. The U.N.'s Nobel-prize-winning multinational force of Blue Berets supervised the independence process under the 1978 U.N. Security Council Resolution 435.

#90079u1169 03/20/1990 ~United Press International
BRUSSELS, BELGIUM (MARCH 20) UPI - Countries that mismanage their economies would receive no automatic "bailing out" by the European Community, a report on economic and monetary union said Tuesday.

"If a country is pursuing the wrong economic policy they will have to pay the price," said Henning Christophersen, who heads a European Commission panel on the matter.

The report also called for a single European currency and a central European bank, or EuroFed, modeled after the German Bundesbank or the U.S. Federal Reserve System, with an independent board of governors appointed for lengthy terms.

The report by Christophersen, the EC commissioner for economic and financial affairs, is designed to form a framework for an intergovernmental conference on economic and monetary union to be held by the end of the year.

Christophersen said "shock absorber" remedies would be available to EC member states harmed by a natural disaster or sudden increase in energy prices, but there would be no general obligation of the Community to buoy sagging economies.

"There would be no bailing out, no automatic responsibility of the European Community to come to the aid of a member state if it has for a period of years pursued the wrong macroeconomic policies," he told a news conference. "That sends a very clear message."

The report by the Commission, the EC executive agency, rejected an earlier call for a binding deficit ceiling in each member state as part of European economic union.

"We don't think it is quite that simple," Christophersen said, adding the West German economy had thrived despite a budget deficit while the British economy had lagged with a budget surplus.

The deficit ceiling was recommended in The Delors Report, issued last April by a committee headed by EC Commission President Jacques Delors. Britain had particularly opposed such a provision, arguing it infringed national sovereignty.

The sweeping report by the Commission panel was sent to Albert Reynolds, the Irish finance minister, to be discussed at a meeting of EC finance ministers in western Ireland next weekend. The Irish hold the rotating Community presidency until July.

Christophersen's panel recommended that a single currency, the European Currency Unit, replace the existing 11 EC currencies. The ECU is now comprised of a basket of EC currencies, with the strong West German deutschemark forming the basket's core.

The panel rejected a British proposal that called for competing currencies within a European monetary union. "We don't find the British idea very satisfactory," Christophersen said. "We don't feel that kind of permanent competition would lead to stable exchange rates. One currency would emerge as the winner."

A British source in Brussels termed the Christophersen report an "interesting contribution to the debate" over economic and monetary union, but said it leaves many questions unanswered. "It says what it will look like at the end of the journey, but doesn't tell you how to make the journey," the source said.

Britain has not yet joined the exchange-rate mechanism of the European Monetary System, a procedure designed to keep currencies within a narrow band of one another, and Prime Minister Margaret Thatcher has long resisted further integration of EC economies.

#90079u1172 03/20/1990 ~United Press International

MIAMI (MARCH 20) UPI - Nineteen dieters have filed lawsuits claiming the Nutri-System weight loss program led to gall bladder disease and accusing the company of fraud and negligence.

The plaintiffs are women from the Miami and Fort Lauderdale areas ranging in age from 17 to 60, one of their attorneys, Robert Fiore, said Tuesday. They filed separate lawsuits seeking unspecified damages Monday in Dade County Circuit Court.

All but two plaintiffs had undergone surgery to remove their gall bladders and those two suffered gall stones that may require hospitalization, Fiori said.

The lawsuits claim that Nutri-System, headquartered in Willow Grove, Pa., failed to supervise customers' weight-loss routines, which included packaged foods they bought from the company.

''The conduct on the part of the defendants is tantamount to unauthorized practice of medicine without a license,'' the lawsuits charge.

The lawsuits said the company should have known that rapid weight loss is linked with a variety of ailments.

''In particular, rapid weight loss increases the saturation of bile with cholesterol, directly contributing to the formation of symptomatic gallstones and gall bladder disease,'' the suits charge.

Nutri/System spokesman James Millard said company attorneys had reviewed one of the suits and found it to be without merit.

''The allegations seem to be coincidental to the state of obesity,'' Millard said. ''We feel our program is an excellent program and we stand by its quality, its safety and its effectiveness.''

He disputed an allegation that the program does not meet the guidelines of various medical and health organizations.

''We do meet all of the stated principles or guidelines anybody chooses,'' Millard said.

The lawsuits appear to be the first of their kind filed against the company. Millard said he knew of no others.

In one of the suits, Rita Kronstat of Coral Springs said she weighed about 193 pounds when she enrolled. She said she lost 25 1/2 pounds over several weeks, then developed severe abdominal pain.

''She was diagnosed as suffering from symptomatic gallstones and advised to have her gall bladder removed as soon as possible,'' her lawsuit said.

She underwent surgery Dec. 7. Before signing up with the program, Kronstat had never had gallstones or gall bladder problems, the suit said.

Thirteen husbands joined their wives in the litigation, claiming loss of intimacy.

HONG KONG (MARCH 20) UPI - A group of 83 Vietnamese boat people chose to return to their homeland Tuesday rather than remain in the British colony's cramped detention centers.

The Vietnamese boarded a chartered Hanoi-bound jet, becoming the 14th group to take part in the U.N.-sponsored program since its inception in March 1989.

A government spokesperson said nearly 1,500 Vietnamese have chosen to return to Hanoi.

Hong Kong officials are pushing to return to a policy of forced

repatriation, saying the voluntary program does little to ease the political and economic strain on the colony's refugee camps.

Hong Kong sent 51 boat people back to Vietnam against their will in December. Hanoi, uspest with worldwide condemnation of the forced repatriation, has refused to accept any more boat people returned against their will.

Favorable winds have returned to the South China Sea, and the tiny colony is bracing for what has become an annual influx of tens of thousands of Vietnamese seeking to escape their nation's grinding poverty.

Nearly 56,000 refugees currently live behind barbed wire in the colony's detention centers, most of whom have no chance of being resettled in the West.

Since June 1988, Hong Kong has defined its boat people as either political refugees or economic migrants. Only those who can prove they have a legitimate fear of persecution in Vietnam are eligible for resettlement.

The rest, an estimated 90 percent of the colony's refugees, face life in Hong Kong's squalid camps or a forced return to Hanoi.

BRUSSELS, BELGIUM (MARCH 20) UPI - Countries that mismanage their economies would receive no automatic ''bailing out'' by the European Community under terms of a report on economic and monetary union released Tuesday.

''If a country is pursuing the wrong economic policy they will have to pay the price,'' said Henning Christophersen, who heads a European Commission panel on the matter.

The report also called for a single European currency and a central European bank, or ''EuroFed,'' modeled after the German Bundesbank or the U.S. Federal Reserve System, with an independent board of governors appointed for lengthy terms.

The report by Christophersen, the EC commissioner for economic and financial affairs, is designed to form a framework for an intergovernmental conference on economic and monetary union to be held by the end of the year.

In Paris Tuesday, French Foreign Minister Roland Dumas said a December conference to reach agreement on European monetary unity should be advanced because of the rapid pace of German reunification,

Christophersen said ''shock absorber'' remedies would be available to EC member states harmed by a natural disaster or sudden increase in energy prices, but there would be no general obligation for the Community to buoy sagging economies.

''There would be no bailing out, no automatic responsibility of the European Community to come to the aid of a member state if it has for a period of years pursued the wrong macroeconomic policies,'' he told a news conference. ''That sends a very clear message.''

The report by the commission, the EC executive agency, rejected an earlier call for a binding ceiling on deficit spending in each member state as part of European economic union.

''We don't think it is quite that simple,'' Christophersen said, noting that the West German economy thrived despite a budget deficit while the British economy had lagged with a budget surplus.

The deficit ceiling was recommended in The Delors Report, issued last April by a committee headed by EC Commission President Jacques Delors.

Britain had particularly opposed such a provision, arguing it infringed national sovereignty.

The sweeping report by the Commission panel was sent to Albert Reynolds, the Irish finance minister, to be discussed at a meeting of EC finance ministers in western Ireland next weekend. The Irish hold the rotating Community presidency until July.

Christophersen's panel recommended that a single currency, the European Currency Unit, replace the existing 11 EC currencies. The ECU is comprised of a ''basket'' of EC currencies, with the strong West German deutschemark forming the basket's core.

The panel rejected a British proposal for competing currencies within a European monetary union.

''We don't find the British idea very satisfactory,'' Christophersen said. ''We don't feel that kind of permanent competition would lead to stable exchange rates. One currency would emerge as the winner.''

A British source in Brussels termed the Christophersen report an ''interesting contribution to the debate'' over economic and monetary union, but said it leaves many questions unanswered.

#90079u1195 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - The Supreme Court ruled unanimously Tuesday that a black machine operator was entitled to a jury trial in an employment discrimination case.

The court's decision in the highly technical civil rights case reversed a ruling that had limited the man's claim to a non-jury trial before a federal judge.

At issue was whether John Lytle, who had been a machine operator for Schwitzer Turbochargers at a plant in Arden, N.C., could bring suit under both Title VII of the Civil Rights Act of 1964 and a Civil War-era civil rights law known as Section 1981.

Section 1981 requires a jury trial and can lead to monetary damages against an employer while Title VII can only lead to reinstatement and

lost wages. Typically, civil rights claims are filed under both laws.

In an opinion by Justice Thurgood Marshall, the court threw out the trial judge's ruling against Lytle and sent the case back for trial.

''To hold otherwise would seriously undermine a plaintiff's right to a jury trial under the Seventh Amendment,'' he said.

The case stems from the 1983 firing of Lytle over the taking of sick days. He maintained that white workers with worse attendance records were not fired, and he eventually brought suit. He also charged that Schwitzer retaliated against his suit by giving him bad job references.

The trial judge dismissed the 1981 claims on a holding that Title VII provided the exclusive remedy for the claim and then ruled in favor of the company. The appeals court affirmed.

In other action, the court reversed a ruling in an inheritance tax case involving a claim for a refund.

The court, siding with the government, said such claims must be filed within specified time limits. Justice John Paul Stevens chided the court for handling such a minor dispute, saying the case will not be ''much celebrated or often cited.''

#90079u1212 03/20/1990 ~United Press International
WINDHOEK, NAMIBIA (MARCH 20) UPI - Secretary of State James Baker found ''new flexibility'' on the part of the president of Angola Tuesday on achieving a political settlement in the Angolan civil war, a senior U.S. official said.

Baker promised President Jose Eduardo dos Santos that the United States is prepared to improve its relations with Angola if it cooperates in breaking the diplomatic stalemate with the armed opposition headed by Jonas Savimbi the official said.

Talks between dos Santos and the National Union for the Total Independence of Angola have been stalled since last year, and there has been heavy fighting between the Soviet-backed Angolan government and Savimbi's forces which are backed with U.S. military aid.

Baker later met with Soviet Foreign Minister Eduard Shevardnadze, who talked to dos Santos on Monday.

Baker and Shevardnadze are in Windhoek to participate in independence celebrations for Namibia.

The United States does not recognize the Angolan government and this status could be one of the inducements Baker offers dos Santos if he enters into substantive, productive negotiations with UNITA that lead to an end of the war.

The U.S. official, who is deeply involved in U.S. policy in Africa, discussed Baker's meeting with dos Santos on the basis he not be identified. ''I have noticed new flexibility on the part'' of dos Santos on seeking a cease-fire, the official said.

''The secretary said in the context of a cease-fire and the beginning of good faith negotiations, the United States is prepared to improve its relationship with the government of Angola,'' the official said.

''President dos Santos indicated he agrees that a cease-fire is the necessary first step to a political solution and that his government is prepared to consider entering a negotiation,'' the official said.

Baker assigned one of his top aides, Herman Cohen, assistant secretary for Africa, to try to move the cease-fire process forward in talks with Gen. Franca Edalu, chief of staff of Angola's armed forces.

The official could give no explanation for dos Santos's apparent new willingness to talk about a cease-fire with UNITA, but said Baker had told the Angolan president the United States is committed to shipping military aid to Savimbi's forces ''until reconciliation is achieved.''

''I was under the impression that he felt a cease-fire is a prerequisite to any political negotiations,'' the official said of Baker. ''This I think is a major difference.''

Baker met dos Santos in a white-washed one-level house with a swimming pool high on a hill overlooking the green mountains and Windhoek, where the two men were to join other visiting officials at Namibia's independence ceremony early Wednesday morning.

Baker planned to meet Wednesday with Nelson Mandela, the leader of the African National Congress, to promote negotiations between the black nationalist group and white-ruled South Africa. Baker goes to Cape Town, South Africa, Thursday for talks with President F.W. de Klerk, who ordered Mandela freed from prison last month after 27 years incarceration for his struggle for black equality in South Africa.

#90079u1234 03/20/1990 ~United Press International

NEW YORK (MARCH 20) UPI - Former Philippine first lady Imelda Marcos and

Saudi Arabian arms dealer Adnan Khashoggi went on trial Monday on charges of siphoning more than $100 million from the Asian nation's treasury into New York real estate and art.

''I'm a Philippine citizen, I should be tried in my home country, the republic of the Philippines, before the Philippine people,'' a sad-eyed Marcos told swarming reporters as jury selection began in a federal court.

''If I am to be tried here I would like to be tried like an ordinary citizen,'' said Marcos, who was accused with her late husband, Ferdinand, of looting the Philippine treasury.

The portly Khashoggi, nattily dressed in a blue suit, traveled to court from his apartment by subway.

Asked how he felt, the stoic multi-millionaire replied, ''I would rather be in Mecca, praying.''

Asked if he thought he had been betrayed by the United States, Khashoggi said, ''Not yet.'' Will he prevail? ''I think so. I have confidence in American justice.''

U.S. District Judge John Keenan said he hoped a pool of 150 potential jurors could be whittled down to a panel of 12 with six alternates.

The jurors were being questioned in a room behind the courtroom, and attorneys on both sides said they hoped to have a working jury by the end of the week.

The complex conspiracy case was expected to continue well into the summer, and as the morning dragged on, the black-clad Marcos sat patiently at the witness table, fingering her rosary. The wide cowboy hat favored by her attorney, Gerry Spence, lay on the table next to her.

Monday, Spence said he would call former President Ronald Reagan or his wife, Nancy, as witnesses.

''Much of the defense information will come from the lips of the President Reagan,'' he said. ''He is a substantive witness. Ronald Reagan knows many matters first hand in this case. He was a close friend to President Marcos. He was close to Mrs. Marcos.''

Marcos is charged with fraud and obstruction of justice in the racketeering scheme and faces up to 50 years if convicted of the charges against her.

Khashoggi, 54, who unabashedly cultivates his reputation as one of the richest men in the world, faces up to 20 years in prison and a $250,000

fine if convicted of obstruction of justice and fraud.

The one-time billionaire emerged as a key middleman in the Iran-Contra arms-for-hostages deal that was uncovered in November 1986 and became the most serious political scandal of the Reagan administration.

Spence said Reagan's testimony could prove vital to the case.

He said the Reagans knew the Marcoses ''very well,'' calling them ''confidants of the Marcoses.''

Prosecutors contend that Marcos conspired to steal money from her country's treasury before fleeing the ''People Power'' revolution in 1986 that gave Corazon Aquino the presidency.

The former Philippine first lady had been living a low-profile life in Hawaii since her husband's death. One of her attorney's, John Bartko, said that despite her notoriety, she is no longer a wealthy woman.

Her $5 million bail was posted by New Jersey tobacco heiress Doris Duke, but when she arrived in New York for her arraignment last November, she stayed in an $1,800-a-day suite at the Waldorf Towers.

#90079u1261 03/20/1990 ~United Press International

PORTLAND, OR (MARCH 20) UPI - Civil rights workers suing a white supremacist group over the beating death of a black man are seeking donations for their legal fight with a mass mailing that includes a gruesome autopsy photo of the victim's cracked skull.

''I've sent you enclosed the crime photo because I want to shock you and other caring Americans about the reality of racial violence in our society '' says the letter from Morris Dees, executive director of the Southern Poverty Law Center Klanwatch Project in Montgomery, Ala.

''I know the picture is disturbing but all too often words alone are not enough to cause us to take a stand,'' Dees said in the mailing.

Dees said his group is suing Tom Metzger of San Diego, leader of the White Aryan Resistance and ''the most dangerous adult white supremacist in America.''

The Southern Poverty Law Center claims Metzger encouraged young neo-Nazi skinheads to attack minorities - allegedly leading to the Nov. 13, 1988, death of Mulegeta Seraw, an Ethiopian student at Portland State University.

The three ''skinheads'' involved in the baseball-bat beating death of

Seraw were convicted and are in prison, but Dees said Metzger is just as responsible.

''The real culprits responsible for his violent death continue to operate freely, winning young new recruits to a twisted philosophy of racial hatred every day,'' Dees said.

He said a 1986 issue of Metzger's ''W.A.R.'' newspaper announced: ''The old days are over. It's open season on niggers, cops and capitalists - kill 'em and let the devil sort 'em out.''

The fund-raising letter includes a note from actor Gregory Peck saying, ''The effort being waged by Klanwatch against racial violence deserves our vigorous support, and I urge you to join in this cause.''

#90079u1266 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - ''Excessive concern for secrecy'' by Defense Secretary Dick Cheney kept a pool of American reporters from covering the first critical hours of the U.S. invasion of Panama, a report released Tuesday said.

The report, commissioned by the Pentagon, also criticized the ''less than effective leadership and performance in the office'' of Cheney's spokesman, Pete Williams, the assistant secretary of defense for public affairs.

And it disclosed that a preliminary guidance plan for media coverage of the Panama invasion had been drawn up a month earlier but was locked in a safe ''and effectively buried there'' for fear there might be leak of the operation.

The commissioned report was written by Fred Hoffman, a former Pentagon correspondent for the Associated Press and until late last year a deputy spokesman at the Defense Department.

Williams commissioned Hoffman to investigate what went wrong with the ''media pool'' in Panama following extensive complaints by news organizations that their reporters saw little or no action.

The creation of a ''media pool'' of reporters - several representatives of wire services, newspapers, radio and television - to take into combat came about following the denial of news reporting access to the U.S. invasion of Grenada in 1983.

The Dec. 20 invasion of Panama was the first time the media pool has been used in an actual combat situation, but Hoffman's report noted the reporters were not taken to Panama until four hours after the start of the

operation.

''Excessive concern for secrecy prevented the Defense Department's media pool from reporting the critical opening battles of the U.S. invasion of Panama,'' the report said.

''Because of a secrecy-driven decision by Defense Secretary Dick Cheney, the pool was called out too late to cover the decisive U.S. assault in the brief war. Military leaders played no part in shaping that decision,'' it said.

"Cheney," according to the report, ''said his first priority was safeguarding the security of the operation and that 'I was aware of the conflict' between the imperative and the goal of getting the pool to Panama in time.''

Hoffman said in his report, however, that the five-year history of Pentagon-sponsored pools had shown reporters could be trusted to respect ground rules, including operational security.

''Unless the Defense Department's leaders are prepared to extend that trust in hot war situations,'' the report said, ''the pool probably will be of little value.''

The report said the media pool could have been formed of American reporters already in Panama, where there was already a large U.S. press presence, but that the decision to make it a Washington-based pool was made by Cheney.

The report said President Bush and Vice President Dan Quayle had questioned Cheney as to why the media pool could not be formed in Panama, but that Cheney said, ''The pool was created for this kind of situation.''

While the decision to invade Panama was made Dec. 17, Cheney withheld notification to the news organizations of the formation of a pool until 7:30 p.m. Dec. 19 - five and a half hours before the invasion.

''We basically decided to notify the pool after the evening news Tuesday to minimize the possibility of leaks,'' Cheney said, according to the report, adding, ''I did it with full knowledge'' of what his decision would mean for the pool.

''As it turned out, the Pentagon pool landed in Panama about four hours after U.S. troops launched their attacks on key targets,'' the report said.

Williams never contacted Gen. Colin Powell, chairman of the Joint Chiefs of Staff, to rectify the situation, the report said, and Powell was unaware of the troubles. ''I thought everything went smoothly,'' Powell

said.

Hoffman made 17 recommendations in his report to improve future pool operations, five of which the Pentagon said it would implement immediately.

The Pentagon said it agreed in principle but would ''require some refinement'' in six other recommendations - including a key one that the secretary of defense should issue a policy directive stating explicitly his official sponsorship of the media pool and making it clear that the pool must be given every assistance to report combat by U.S. troops from the start.

#90079u1269 03/20/1990 ~United Press International

HOLLYWOOD (MARCH 20) UPI - Three newly released films failed to show much clout at North America's movie houses last week, while a pair holdovers proved the staying star power of Sean Connery and Tom Hanks.

''Lord of the Flies,'' Blue Steel'' and ''Lambada'' all opened to anemic grosses on more than 3,000 screens, disappointing studios and theater owners alike.

Heading the top 10 in the weekly rankings of Entertainment Data Inc. was ''The Hunt for Red October,'' starring Connery as a canny Soviet submarine commander, with a gross of $11 million.

The Cold War drama sank 21 percent from the previous week to log a three-week total of $53.9 million in 1,817 theaters.

Second in line was Hanks' new romantic fantasy ''Joe Versus the Volcano,'' co-starring Meg Ryan, with a snappy $7 million in the till for the week.

It dropped 24 percent in its second week as the picture registered a total of $18.8 million in 1,799 houses.

The best performance by a newcomer was recorded by the third-place finish of the remake of the 27-year-old ''Lord of the Flies,'' starring two dozen American boys - ages 8 to 13 - who become young savages when their airplane crashes on a deserted tropical island.

''Lord of the Flies,'' roundly panned by critics who compared it unfavorably with the cult film original, opened in 888 situations and came away with a first-week take of $4.4 million.

Running fourth was ''House Party,'' a spirited black comedy-musical aimed at the young movie crowd. It drew $3.5 million in 550 situations for a two-week gross of $9.2 million.

In fifth spot was ''Blue Steel,'' starring Jamie Lee Curtis as a rookie cop who falls in love with a guy she thinks is a psychotic killer. Opening in 1,307 theaters, this far-fetched action-thriller fetched $3 million.

''Lambada,'' the new sex-oriented dance craze, suffered a limping libido. In its opening week it was No. 8 on 1,117 screen, grossing a measly $2 million.

Worth noting: ''Forbidden Dance'' - also based on lambada - grossed a paltry $720,864 on 637 screens to finish No. 14 in its debut week.

Two hot Academy Award films remained in the top 10. ''Driving Miss Daisy'' was No. 6 with a gross of $2.9 million for a 14-week total of $69.5 million. ''Born on the Fourth of July'' was 10th with $1.2 million and a 13-week tally of $63.5 million.

Despite the weak showing of new films, the cumulative box-office gross in North America's 23,000 theaters was a hefty $88.2 million, surpassing the $70.5 million mark for the same week in record-setting 1989.

So far this year movies have grossed $816.4 million versus $825.8 million a year ago.

The top 10, last week's gross, total gross, weeks in release:

1. ''The Hunt for Red October,'' $11 million, $53.9 million, 3 weeks.
2. ''Joe Versus the Volcano,'' $7 million, $18.8 million, 2 weeks.
3. ''Lord of the Flies,'' $4.4 million, 1 week.
4. ''House Party,'' $3.5 million, $9.2 million, 2 weeks.
5. ''Blue Steel,'' $3 million, 1 week.
6. ''Driving Miss Daisy,'' $2.9 million, $69.5 million, 14 weeks.
7. ''Bad Influence,'' $2.6 million, $7.6 million, 2 weeks.
8. ''Lambada,'' $2 million, 1 week.
9. ''Hard to Kill,'' $1.8 million, $39.9 million, 6 weeks.
10. ''Born on the Fourth of July,'' $1.2 million, $63.5 million, 13 weeks.

ST. LOUIS (MARCH 20) UPI - AT&T said Tuesday it has been awarded a five-year, $18 million contract from General Dynamics Corp. for communications services.

Under the contract, which includes two one-year renewal options, AT&T would provide a nationwide integrated voice, data, and video network serving General Dynamics headquarters in suburban St. Louis and about 300

other loctions.

Besides voice communications capabilities, the custom network would provide data transmission for a variety of business and scientific computing applications, AT&T said.

General Dynamics, the nation's second-largest defense contractor, is involved in designing, developing, and manufacturing defense systems and producing and delivering general aviation aircraft, construction materials and natural resources. Its revenues for 1989 were $10 billion.

(MARCH 20) UPI - A Lithuanian official says the Soviet republic's new nationalist-controlled Parliament will meet this afternoon to discuss Moscow's economic pressure to slow down Lithuania's rush to independence. A member of a two-man Lithuanian delegation which met last night with Soviet President Gorbachev told U-P-I that ''both good and bad'' things were said in the wide-ranging talks.

Namibia rolled out the red carpet for South African President de Klerk today as he arrived to end 106 years of Pretoria's rule and celebrate independence for the African nation. Secretary of State Baker will represent the United States. Baker will use the occasion to hold top-level talks with his Soviet counterpart and South African black leader Nelson Mandela.

Chinese Premier Li Peng says the Communist Party will maintain its iron grip on power. At today's opening of China's annual session of Parliament... Li called for renewed national campaigns to stress social stability, economic austerity and Marxist orthodoxy. Li also referred to last year's crackdown on the student-led pro-reform movement as a ''great victory.''

The first day of spring is NOT a pleasant one for parts of the East as a cold front is sending temperatures plunging to near freezing. Forecasters say wet snow and cold rain is falling along the Atlantic Coast... just a week after record-high temperatures warmed the region. Snow and rain fell over most of Pennsylvania, laying several inches of snow in the state's western mountains.

#90079u1310 03/20/1990 ~United Press International

LONDON (MARCH 20) UPI - Stonehenge, Britain's best-known ancient monument, was shrouded in sackcloth and twine on the vernal equinox Tuesday to cover 4-foot graffiti spelling out ''LIVE.''

The letters were daubed on four upright stones of the 4,000-year-old monument early Sunday, probably by some of about 20 people that police and security guards discovered and evicted from the site, 80 miles southwest of London, during the night, Wiltshire Police said.

''I was very angry indeed,'' said Brian Davison, inspector of ancient monuments for English Heritage, caretaker of Britain's antiquities. ''I don't know why it has been done. At the moment it is just spoiling everyone's enjoyment of ... a national treasure.''

A couple visiting from the United States was in tears at the sight of ''the ruined temple,'' he said.

Chief Inspector John Woodman said police were investigating the crime but had no immediate leads.

''It is all rather mysterious ... L-I-V-E ... as to who did it,'' said English Heritage's Marion Shelley. ''It may just have been people doing it for a laugh, rather than for a social movement.''

The vernal equinox, the point at which the sun appears to cross the celestial equator from south to north, occurs at 9:20 p.m. Tuesday, marking the beginning of spring in the Northern Hemisphere.

People gathered to celebrate the event at Stonehenge. Some people ascribe magical properties to the circle of stones on the Salisbury Plain, where the first rays of the sun shoot straight under the monument's main arches - if skies are clear.

Davison is among the experts trying to determine how to remove the 4-foot letters brushed on in 4-inch-wide strokes. A creamy white, glossy household paint was used, he said.

''They are not coming off easily,'' Davison said. ''We will wait until we have the samples from the laboratory come back. If worst came to worst, we would have to blast it off with an eggshell mixture.''

The stones are wrapped in sackcloth and twine for cosmetic purposes, as well as to protect them from additional damage, he said.

While the restoration must be conducted carefully to avoid further damage to the stones, Davison said, ''It is not the same as if paint were thrown on a Van Gogh. These are stones that have been exposed to the weather for 4,000 years.''

Their surfaces have been eroded by rain, wind and frost since prehistoric man hauled the heavy stones, probably more than 50 miles, from quarries in

Wales, beginning in 3100 B.C.

Davison said even after the paint is removed a shadow of the letters will remain because the stones are covered by lichens, which, if removed, will expose bare stone.

Problems will persist even after lichens begin to grow again.

In the late 1960s, a vandal painted ''Radio Caroline on 269'' on the stones to advertise a pirate radio station. The paint is gone but ''yesterday it was bloody obvious'' because the lichens growing on the rocks absorb moisture differently according to their age.

Graffiti artists damage Stonehenge about once a decade, Davison said.

Other scrawls have included the Portsmouth soccer club, and ''Free the ponies,'' he said. ''I don't know what particular animals were locked up.''

The stones also have been chiseled with graffiti, including several Bronze Age carvings. Christopher Wren, the English architect who designed St. Paul's Cathedral in London, carved his name on one stone.

Davison dismissed speculation that the latest letters were painted by supporters of the Liverpool soccer club who were in a hurry.

''Although there are nine stones upright in a row ... you would have had to start on the left-hand stone (which the graffiti does not),'' he said.

#90079u1311 03/20/1990 ~United Press International

(MARCH 20) UPI - Prosecutors in Elizabeth, New Jersey, say the case against a 64-year-old man accused of killing his wife, mother and three teenage children remains strong in spite of the lapse of more than 18 years. Jury selection begins today for John Emil List on five counts of murder. List, who disappeared after the slayings in December 1971... was arrested last year in Richmond, Virginia.

Police in Switzerland say French actress Capucine jumped to her death from her eighth-floor apartment in Lausanne . Capucine is best known as the slinky seductress in the first ''Pink Panther'' movie. Police say the 67-year-old actress took her life Saturday after reportedly suffering from illness and depression.

Hosptial officials in West Palm Beach, Florida, say a 32-year-old man is in critical condition after an angry four-ton elephant lifted him into the air... slammed him to the ground... and gored him with its tusk. Lion Country Safari animal handler Bill Pentler underwent surgery last night.

Officials do NOT know why the elephant attacked Pentler, a six-year Safari veteran.

A report says the film studio Twentieth Century-Fox has banned film critics Roger Ebert and Gene Siskel indefinitely from screening previews of its movies. Ebert and Siskel were guests last week on the ''Live - Regis and Kathie Lee'' show and panned the Fox movie, ''Nuns on the Run,'' saying it didn't contain a single laugh.

NICOSIA, CYPRUS (MARCH 20) UPI - Kuwait has agreed with its Japanese customers for a 25 cents reduction in its crude price formula for the second quarter of this year, an oil industry newsletter reported.

The Nicosia, Cyprus-based Middle East Economic Survey, reported Monday in its current issue that agreement was reached last week in talks between the state-owned Kuwait Petroleum Corporation and Cosmo Oil. The reduction followed Saudi Arabia's 20 cent cut in Far East prices for April, the newsletter said.

#90079u1325 03/20/1990 ~United Press International

LAUSANNE, SWITZERLAND (MARCH 20) UPI - French movie actress Capucine, a recluse for the past five years, jumped to her death from her eighth-floor apartment last weekend, police reported Tuesday.

Capucine, 67, took her life on Saturday, a police statement said.

Friends of the actress said she had been ill and depressed for some time and for the past five years had been almost a total recluse, wanting only her cats and plants for company.

Born in Toulon, France, as Germaine Lefebvre, Capucine first studied painting and then became a top international model, based mainly in New York.

Beautiful, tall, variously blonde and dark-haired but always elegantly sophisticated, Capucine broke into Hollywood in 1959, starring with Dirk Bogarde in ''Farewell.''

A series of movies followed through the 1960s with stars like John Wayne, Stewart Granger and Jane Fonda.

Capucine was the slinky femme fatale in the first of the ''Pink Panther'' comedy films with Peter Sellers playing the loony French police inspector.

Returning to Europe, she starred in a dozen or so films alongside people like Alain Delon and Jean-Paul Belmondo, in Fellini's ''Satyricon'' in 1971, and appeared frequently in other Italian movie and television productions.

Her last film appearance was in ''The Curse of the Pink Panther'' in 1984, another in the series produced by Blake Edwards.

A shy person, she chose the stage name Capucine for an exotic ornamental South American flower with large petals that are typically orange. The word comes from the French for a monk who wears a cowl and is used by monks and nuns of a branch of the St. Francis order.

Capucine, who also starred in ''What's New Pussycat'' with Sellers, said in many interviews during her career that there were too few good screenplays for actresses.

''There is nothing good if a film actress is over 30 and not prepared to take off her clothes,'' she once said.

But she opposed strident women's liberation campaigns, saying, ''a woman has to be feminine.''

Capucine was close friends with actress Audrey Hepburn, a long-time resident of Switzerland anmd who lives in the countryside near Lausanne.

Police said the actress's death was ''definitely'' a suicide because she had a private elevator to her apartment and the front door was locked from the inside.

She bought the flat on the recommendation of late actor Yul Brynner, who also lived in the exclusive apartment building.

#90079u1335 03/20/1990 ~United Press International

LONDON (MARCH 20) UPI - Chancellor of the Exchequer John Major, in the nation's first televised budget address, Tuesday committed to beating the inflation that has troubled the economy and pledged to take advantage of the changing European market.

Major unveiled the government's spending plan, which attempted to curb surging inflation which has hit 7.7 percent, much higher than Major expected, and substantially bring down interest rates before Prime Minister Margaret Thatcher must call nationwide elections.

''The government's economic policy has two main objectives. The first is

to bring inflation down again. Until that happens we cannot reduce interest rates and keep them down,'' Major told the House of Commons and a television audience estimated at 1 million.

''The second is to enable this country to take the opportunities of the 1990s,'' he said. ''In Western Europe, the single market is nearly on us. And the whole of Eastern Europe, where there is great feeling of good will for Britain, has opened up in the most dramatic way.

''We need to make sure that British business can take advantage of these changes.''

The budget address was the first televised live. Television cameras were allowed in the House of Commons last fall, and Major tailored his speech to the requirements of television - tipping off listeners early on to plans for two tax breaks, instead of waiting until the end as tradition requires.

He sipped occasionally from a glass of Stretton Hills mineral water, from Shropshire, near his wife Norma's birthplace. His predecessors have favored sterner stuff - Nigel Lawson had a wine spritzer on hand and Geoffrey Howe had a gin and tonic.

Major said the corporation tax would remain unchanged at 35 percent for major companies, but smaller companies would get a tax break.

The chancellor expressed dismay at the low rate of savings in Britain, just 3 percent, and said he would provide incentives to save.

He said a tighter monetary policy would slow growth in the economy in 1990 which in due course would yield a fall in inflation.

''I now expect the economy to grow by 1 percent this year, compared with the trend growth of 4.5 percent in 1987 and 1988. But growth should return in 1991 towards a sustainable rate of around 2 3/4 percent.

''Inflation has been far more stubborn than anyone expected. A significant fall is still some months away and a number of factors will mean that the position will worsen noticeably before it improves,'' he said.

Major said he expected inflation to be just over 7 percent by the end of the year, compared to the 5 3/4 percent he previously forecast. ''Beyond that I expect inflation to fall below 5 percent during 1991.''

Expectation of a tough budget boosted sterling on the world's financial market in early trading. The pound opened more than a cent higher at $1.6220 and regained more than two pfennings from Monday's fall against the German mark.

Thatcher was counting on Major's new budget to prove the government policy of using high interest rates will succeed in bringing down inflation and soaring mortgage interest rates before she has to call elections.

The new budget will be followed Thursday by a midterm election in mid-Staffordshire, where a solid Conservative Party area was expected to fall to the opposition Labor Party.

A nationwide election does not have to be called until June 1992 unless so many Conservatives turn against Thatcher that she loses her 100-seat majority in Parliament.

Thatcher has pledged to ''fight every inch of the way'' to win the next general election, a tough battle given opinion polls showing Labor has extended its lead over the Conservatives to 20 percent.

Conservative support has slid with the government's introduction of a new community charge, or poll tax, that is unpopular and has sent pictures around the world of demonstrators clashing with riot police.

Analysts said it is essential for Major to assure jittery international markets that the pound is in secure hands and inflation will be tamed, while convincing voters that short-term discomfort is worth long-term success.

Major drew groans from the members of Parliament by annoucing increases in taxes on alcohol and cigarettes.

#90079u1344 03/20/1990 ~United Press International

NEW YORK (MARCH 20) UPI - Poet Allen Ginsberg and author Quincy Troupe protested Tuesday implementation of a new law which would ban ''indecency'' on public radio 24 hours a day.

The writers, along with executives of the National Emergency Civil Liberties Foundation and PEN, an international writers' organization, said they have protested to the Federal Communications Commission in response to a law passed by Congress in 1988.

The law, sponsored by Sen. Jesse Helms, R-N.C., would extend the existing 6 a.m. to 10 p.m. restriction on indecent materials to protect children of 12 years and younger to a 24-hour ban to protect all young people under 18.

The U.S. Court of Appeals in Washington, D.C., halted implementation of the law pending an appeal by broadcasters and First Amendment advocates. The case has since been forwarded to the FCC for public comment.

''Pseudo-religious legal interference with my speech amounts to setting up a state religion much in the mode of an intolerant Ayatollah Khomeini or a Stalinoid bureaucratic party line,'' said Ginsberg, poet laureate of the beat generation.

''Those who want to extend the Helms amendment to ban this mystific 'indecency' on the air 24 hours a day cannot deny they are trying to censor art and socially relevant speech,'' Ginsburg said. ''Broadcasting censorhip of my poetry and the work of my peers is a direct violation of our freedom of expression.''

Troupe, whose latest book is an autobiographical collaboration with jazz trumpeter Miles Davis, said the legislation ''conjures up images of book burnings and repression.

'''The Catcher in the Rye,' ' Adventures of Huckleberry Finn,' 'One Flew Over the Cuckoo's Nest,' 'A Raisin in the Sun,' 'Slaughterhouse Five,' 'Catch-22, the works of Jane Cortez, Toni Morrison, Amiri Baraka and even my own latest work, 'Miles: the Autogiobraphy,' are just some of the books and authors which could not be heard on radio under the FCC's latest attempt to further erode First Amendment rights,'' Troupe said.

NECLF Executive Director Edith Tiger added that in addition to denying great works of literature access to airways, discussion of important social issues such as AIDS, rape and human sexuality also would be banned under the new legislation.

''This type of intolerance and narrow-mindedness is truly offensive,'' she said.

#90079u1350 03/20/1990 ~United Press International

NEW YORK (MARCH 20) UPI - ''America's Funniest Home Videos'' and Marshal Matt Dillon were in the prime time top 10 last week, with ''The Simpsons''

almost making the elite group, it was reported Tuesday.

NBC won for the week, as usual. CBS came in second in its seesaw battle with ABC, which was third.

ABC's ''Videos,'' one of two authentic hits of the season, topped the list the previous week and last week was the second most-watched show, beaten only by NBC's ''Cheers.''

The season's other hit, ''The Simpsons,'' was in 11th place, the highest rating ever for a Fox show. The goofy real life families on ''Videos'' are working as a lead-in for the goofy cartoon ''The Simpsons,'' as a sizable chunk of the ABC ''Videos'' audiences switches channels to Fox.

They certainly aren't sticking around for ABC's ''Elvis,'' which was tied for 58th.

The top movie of the week was ''Gunsmoke: The Last Apache'' on CBS, which tied for seventh, way ahead of ''Phantom of the Opera,'' part 1, on NBC, in a tie for 41st, and ABC's ''Love and Lies,'' ranked 47th.

Jane Pauley's first NBC News special since she left the ''Today'' show, ''Changes,'' tied for 33rd and was the highest rated news special on any network since NBC's ''Bad Girls'' in August 1989. ''Bad Girls'' was anchored by Deborah Norville, the new ''Today'' co-host.

On a night-by-night basis, NBC took Monday, Wednesday, Thursday and Saturday, ABC won Tues and Friday and CBS won Sunday.

NBC did not come in third on any night - not even on Friday, long the network's problem period. Part of the credit goes to ''Nasty Boys,'' which beat CBS's ''Dallas'' - the first time a regurar series has gotten the best of J.R. Ewing since December 1987 and ''Miami Vice.''

NBC won the ratings race for the week for the 22nd consecutive time, and 90th out of the last 91 weeks. The network took the week ending March 18 with a 13.8 rating and a 23 share, according to the A.C. Nielsen Co. CBS climbed back into second place with an 11.7 rating and a 20 share, while ABC was third with an 11.5 rating and a 19 share.

The 26-week-old season-to-date ratings show NBC with a 14.8 rating and a 24 share, ABC with a 12.9 rating and a 21 share, and CBS with a 12.3 rating and a 20 share.

In the evening news ratings, ABC's ''World News Tonight'' with Peter Jennings continued to dominate with a 10.6 rating and a 21 share. The Jennings news has been in sole possession of first place or tied for first for 23 of the last 24 weeks. ''NBC Nightly News'' with Tom Brokaw came in

second with a 9.2 rating and a 19 share, and ''CBS Evening News'' with Dan Rather was close behind with a 9.1 rating and an 18 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 programs for the week ending Sunday, Mar. 18, according to the A.C. Nielsen Co., were:

1. Cheers (NBC)
2. America's Funniest Home Videos (ABC)
3. Roseanne (ABC)
4. The Cosby Show (NBC)
5. 60 Minutes (CBS)
6. A Different World (NBC)
7. (tie) Gunsmoke: the Last Apache, CBS Sunday movie
8. Wonder Years (ABC)
9. Who's the Boss? (ABC)
10. In The Heat of the Night (NBC)

#90079u1360 03/20/1990 ~United Press International

WINDHOEK, NAMIBIA (MARCH 20) UPI - Egyptian President Hosni Mubarak said Tuesday he questions Israeli Prime Minister Yitzhak Shamir's commitment to the Palestinian peace process.

''Until now, I don't think that he is serious toward the peace process,'' Mubarak told reporters after a meeting with Secretary of State James Baker. ''But I hope he may change his mind in the future.''

Baker and Mubarak are in Windhoek for Tuesday night's Namibian independence ceremonies.

Mubarak was a key figure in bringing together representatives of the Israeli government and Palestinians living in the occupied territories for preliminary talks on the future of the Palestinians and the West Bank and Gaza Strip.

But the collapse of the Shamir government in a no-confidence vote last week in the Israeli Knesset, or parliament, over moving forward the peace effort put the prospective Israeli-Palestinian talks in suspension.

''We need a new government,'' Mubarak told reporters in an informal news conference on the steps of the hillside home of the Egyptian representative to Namibia.

''We have to wait - what are we going to do?'' Mubarak said, speaking

expansively with his hands and arms.

''The sooner, the better in the peace process, for both sides, for the Palestinians and for the Israelis,'' he said.

''If peace prevails, I tell you from my heart, Israel will be the biggest winner in the whole process.

''Until now, Shamir is saying no. I hope that he may change sometime.''

Baker said the position of the U.S. government remains the same. ''We're waiting for an answer from the Israeli government,'' he said, referring to preliminary talks with Palestinian representatives regarding elections in the territories to choose a formal negotiating team.

-30- 1993

#90079u1378 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - The Army asked Tuesday for permission to order mid-level officers out of the service, if necessary, as it seeks to pare back the size of the military in the 1990s.

The request, offered as a last-ditch way to cut the force if voluntary incentives fail to entice officers to quit, was included within a larger package of proposed personnel changes offered to Congress.

The overall package, with the exception of the power to involuntarily force out officers, covers all branches of the armed forces, although officials of the Air Force, Navy and Marine Corps said they doubted they would need to make use of the other features of the package.

''It would be a last resort if all other things that are voluntary don't work,'' Army personnel chief Lt. Gen. Allen Ono told the manpower subcommittee of the Senate Armed Services Committee.

The Army faces the toughest chore of the services in trying to cut back its forces and - exclusive of any additional reductions ordered by Congress for fiscal 1991 - is currently planning on a reduction of 135,000 by fiscal 1994. The Army is currently planning on cutting about 17,000 slots this year and 42,000 next year to reach a 1991 strength of 728,000.

The package, said Ono, will provide the Army with the flexibility it needs to avoid such drastic things as slowing promotion rates, or drastically reducing its intake of new lieutenants and privates, an action Ono said could ''bring havoc to the Army for over a generation.''

He said it should be adopted quickly because otherwise, ''We would be forced to take actions in a hurried, compressed period and the affected

officers and their families will suffer. Not only will they be pained by the unexpected notice that they must leave the Army, but we would be brutal to them as they are given as little as three months notice to separate.''

Ono said that the proposal for involuntary reductions in force would help address an overage of officers in the middle grades if voluntary efforts are insufficient. He said the action, if taken, would affect those with between six to eight years of service to those with 17 years of service. Those at 18 years would be allowed to stay until 20 years of service to qualify for retirement pay. Officers who were forced out would be entitled to involuntary separation pay, now set at up to $30,000.

Other items in the package, all expansions of existing programs, include:

-Allowing officers with over 20 years experience to retire at their current rank if they have served at least two rather than three years at that rank.

-Letting those with both enlisted and officer grade service, and 20 years overall time in the military, retire after eight years as an officer rather than 10 years.

-Authorize involuntary separation pay for officers who voluntarily get out before being elegible for retirement.

-Allow selective early retirement boards to order out lieutenant colonels or commanders who are eligible for retirement who have been passed over for promotion once rather than twice, colonels and captains with at least two rather than four years of service at that level, and force out captains and colonels who are within two years of the maximum service time of 30 years. It would also waive a rule that says someone passed over for forced retirement cannot be considered again within five years.

-30- 3628

#90079u1385 03/20/1990 ~United Press International

NEW YORK (MARCH 20) UPI - Rain threatened voter turnout Tuesday in special elections to find a successor to Rep. Robert Garcia, who was convicted in the Wedtech scandal, and in Staten Island where Susan Molinari hopes to succeed her father in Congress.

''It's very, very quiet, probably as a result of the weather,'' said John Del Giorno, a spokesman for the Board of Elections. ''It's quieter than a primary. At this point it looks like the weather is really going to hold back on a large turnout.''

Voters in the South Bronx were electing a successor to Garcia, who began

serving his sentence at a federal prison in Florida for his conviction in the Wedtech case.

The South Bronx race has been a heated contest between Democratic state Assemblyman Jose Serrano and Democrat-turned-Republican Simeon Golar, a former judge and city official in the administration of Mayor John Lindsay.

In Staten Island, the race was for a replacement for Republican Guy Molinari, who gave up his seat in Congress when he won election in November to borough president.

The Staten Island campaign has become a bitter struggle between Molinari's 31-year-old daughter, the lone Republican on the City Council, and county Democratic Party lawyer Robert Gigante, 41.

It also has been a test of wills between the national Republicans, who are eagar to hold onto the seat, and the Democrats, who hope to win it back for the first time since the elder Molinari was first elected in 1981.

Molinari, who received a fund-raising boost from President Bush during her campaign, is considered the favorite.

Though the majority are registered Democrats, the district is very conservative and has supported Republicans in the past, such as failed mayoral candidate Rudolph Giuliani and Bush.

In the Bronx, Serrano, 46, is considered the front-runner.

The assemblyman, who would be the sole Puerto Rican voting member of Congress, has picked up the backing of the county Democratic organization and organized labor and the endorsements of all the city's major newspapers as well as the support of Latino officials.

But just as important in the demographically shifting district, Serrano also won the enthusiastic backing of two top black leaders - Mayor David Dinkins and Jesse Jackson.

Both Dinkins and Jackson actively campaigned for Serrano, with the mayor appearing in the district as recently as Sunday in a last-ditch bid to urge black residents to choose the Hispanic Democrat over Golar, who is black and Republican.

BY GERALD NADLER - UPI

MOSCOW (MARCH 20) UPI - Mikhail Gorbachev has flexed his new presidential

muscle to impose tight economic control on Lithuania as a lesson to other republics that want to break away before Moscow is ready to let them go.

An Estonian delegation that negotiated with Gorbachev Monday quickly got the message and Premier Indrek Toome served notice publicly that his Estonia was ''not choosing the Lithuanian variant.''

Rather, he said, it was content to talk things through to independence.

Monday's government decree that tightened Moscow's ministerial control over federal property showed Lithuania's March 11 declaration of independence to be just that - a symbolic declaration of very little substance.

Not one nation has recognized the Lithuanian Parliaments' declaration. That includes the United States, for all of its steadfast 50-year policy of not recognizing the Soviet annexation of the republic in 1940.

When Lithuania's Sajudis nationalist movement seized on an Australian statement of March 12 as recognition, the Soviet Foreign Ministry promptly called the Australian Embassy and scolded its officials.

The Australians dutifully explained later that the initial statement was misinterpreted.

Foreign Ministry spokesman Gennadi Gerasimov warned other governments that any formal recognition of Lithuanian independence would be construed as interference in Soviet internal affairs.

Then, in an indication of the political gamesmanship that Gorbachev and his team enjoy so much, Gerasimov apologetically told reporters: ''I had to pull out the heavy artillery.''

Although Gorbachev showed how easily he could rain on Lithuania's parade, the Soviet president does not dispute the restive Baltic republic's constitutional right or desire to leave the Soviet Union.

But he objects to a precipitous divorce and probably personally might resent Lithuania's obvious rush to declare independence at the first session of its new legislature.

Gorbachev traveled to Lithuania in January and implored the Lithuanians to wait until a new law on secession is passed before they acted.

''Put your slogans (of independence) down, take a break, your mission is completed,'' he told Lithuanians who crowded around him in Vilnius with placards. He told them there is a difference between sloganeering and sober politics.

Sober politics, he said like a schoolteacher, recognizes that 20 percent of Lithuania's population is non-Lithuanian - mainly Russians and Poles. And what of the shipyards, nuclear power stations and other federal factories the Soviets built in the republic?

Gorbachev probably realized he had not dissuaded the Lithuanians. But if the the declaration of independence aimed at shaming him, the Sajudis miscarried by provoking who is arguably the world's most cunning politician.

More sticks than carrots have come the Lithuanian's way since proclaiming independence: helicopters dropping leaflets over Vilnius, low-level jet aircraft buzzing the capital and a leaked report that the Soviets want $33 billion for equipment they would leave behind and non-delivered Lithuanian goods.

And amid the sticks, Gorbachev laid out a major condition for independence: it must be by referendum or plebiscite or, in other words, Lithuania cannot yet proclaim what it does not have - freedom from Moscow.

BY UNITED PRESS INTERNATIONAL

(MARCH 20) UPI - Sam Nujoma, a burly and bearded former railway worker who became the first president of independent Namibia, earned an almost mythical reputation during 30 years in exile at the head of one of the world's favorite African liberation movements.

Nujoma returned home in September 1989 to lead his South West Africa People's Organization in U.N.-supervised independence polls in Africa's last colony, ending a 23-year guerrilla war and three decades of successful globe-trotting for international support.

The elections disproved the world body's accolade to SWAPO as the ''sole and authentic'' representative of Namibia's 1.3 million people but nevertheless gave SWAPO a sufficient share of the 72 seats in a consitutent assembly to fulfill Nujoma's dreams of leading Namibia.

At the same time, Nujoma, 60, has preached reconciliation in the sparsely populated but mineral rich territory of 11 ethnic groups, including 100,000 whites, and the territory's new charter was hammered out by consensus and approved unanimously.

The new army to be trained by the British will be comprised of both former SWAPO fighters and former South African-backed troops and Nujoma has appointed three whites as ministers in his 16-member Cabinet.

''Whites have been misled by successive governments of the South African regime about their future in a SWAPO-led government,'' Nujoma said in one interview.

''They were told there would be chaos, hunger and disease and a lowering of the standard of living. The national liberation will instead offer peace and stability.''

Nujoma's political career began in earnest in the 1950s while working for the South African Railways as a steward - a job that frequently took him to Cape Town where he rendezvoused with other Namibian activists to plot their stategies against Pretoria.

Dismissed from the railways because of trade union activities in 1957, he became a leading opponent of Pretoria's export of apartheid to Namibia and relocation of blacks far outside Windhoek in the what is now the black township of Katutura.

The resistance culminated in a protest Dec. 10, 1959, in which 13 people died in police gunfire. Nujoma was arrested for a week but released on his own recognizance pending trial, prompting him to flee into exile in February 1960.

Born on May 12, 1929, in northern Ovamboland - the heart of SWAPO's

tribal-based support - Nujoma has never earned the distinction as an articulate, well-educated man.

But having survived as head of SWAPO through years of division between its internal and external wings stands as testimony to his cleverness.

Breaches in his control over the organization were never more clearly displayed than at the April 1, 1989, start of the U.N.-managed independence program, when hundreds of SWAPO fighters began pouring into the country from Angola in disregard of the settlement terms.

The result was the worst massacre of SWAPO guerrillas in the war's history: more than 300 dead against the aggressive South African-backed territorial forces.

Scores of prisoners held by SWAPO as alleged South African spies were freed under the U.N. independence plan, returning home from detention in Angolan camps with stories of torture and threats.

Nujoma's 30 years in exile first took him to the United States in June 1960 where he appeared before a U.N. committee on South West Africa and met other leaders of the Ovamboland People's Organization.

After renaming the movement SWAPO, Nujoma returned to Tanzania and set up provisional headquarters in 1961 and made Dar es Salaam the base for his world traveling that nurtured the backing of the Organization of African Unity for formal assistance in 1964.

Nujoma officially took up the armed struggle in 1966 after a World Court judgment against South African rule over the former German colony, which it captured in 1915 during World War I. Testing the court decision he flew by charter aircraft to Windhoek but was turned back at the airport and officially deported.

He was awarded the Lenin Peace Prize in 1978, the same year the U.N. Security Council adopted Resolution 435 that led to independence and fulfilled Nujoma's dreams.

#90079u1404 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - Negotiators are unlikely to complete work on a new U.S.-Soviet grain pact ''in the immediate future,'' Agriculture Secretary Clayton Yeutter said Tuesday on the eve of a new round of talks.

The two superpowers have relied on long-term grain agreements since the mid-1970s, when huge Soviet purchases caught the United States off-guard and emptied its grain bins.

U.S. and Soviet officials started work on the new agreement last December, a few days after the shipboard summit meeting at Malta. They are scheduled to meet Wednesday and Thursday in Vienna for the second round of talks.

''It's unlikely that all elements of that package will be finalized in the immediate future,'' Yeutter said during an impromptu meeting with reporters. ''That's probably all that needs to be said at this point.''

The comments reinforced speculation that the two sides want to proceed at a pace that would allow President Bush and Soviet President Mikhail Gorbachev to sign a grain pact as part of their June summit meeting.

Julius Katz, the chief U.S. negotiator, has expressed optimism about swiftly concluding terms for a new agreement.

U.S. and Soviet negotiators also are working on a wide-ranging trade agreement that would open the way to granting the Kremlin ''most favored nation'' trade status.

The current grain agreement, which expires at the end of this year, obligates the Soviets to buy 9 million metric tons of U.S. grain a year, including 4 million tons of corn and wheat.

In recent weeks, Soviet officials have announced a desire to reduce the volume of grain that is imported and they have pointed to financial constraints. The last major Soviet purchase of U.S. grain was Jan. 12.

''Both governments must take the long view, not the short view so that what the Soviets will or will not be able to purchase in next few months is not terribly relevant to the longer-term negotiating picture,'' Yeutter said.

''We believe it's beneficial to both nations to have that kind of arrangement in effect.''

The Soviet Union became a large-scale grain importer in the 1970s as part of an effort to increase livestock production and improve the diet of its citizens.

The Kremlin bought a record 21.7 million tons of U.S. corn and wheat in fiscal 1989, making it the No. 1 market for U.S. grain. So far this year, it has imported 13.8 million tons.

U.S. negotiators reportedly have sought a five-year agreement that would guarantee a larger volume of Soviet purchases each year and would include more commodities. Soviet officials have spoken against raising the current 9 million-ton obligation and reportedly want more flexibility over the

components of that minimum purchase level.

Yeutter said U.S. negotiators are aware of concerns among wheat organizations that their products could be overlooked if the Kremlin is given too much freedom. Wheat sales have been lagging this year.

''We'll hear their (the Soviets') views at the negotiating table. We'll express our views, which will certainly include a desire to maintain wheat as an integral part of that agreement,'' Yeutter said.

BONN, WEST GERMANY (MARCH 20) UPI - The government, confident its planned economic and currency union with East Germany will be formed by the summer said Tuesday it will halt financial aid to East Germans to discourage further immigration.

The Cabinet decided to cancel by July 1 almost all the financial benefits the East German immigrants now receive and treat them as they treat a German who moves within West Germany.

Interior Minister Wolfgang Schaeuble told a news conference the flood of East Germans to the West seeking a more prosperous life should ebb by July 1 because by then East Germany will be enjoying the advantages of a currency and economic union.

Schaeuble noted that Lothar de Maiziere, the future East German prime minister, said Monday the West German mark will replace the weak East German currency mark before the East German Parliament's summer recess. Chancellor Helmut Kohl's government agrees, Schaeuble said.

He said the prospect of a currency and economic union will keep East Germans at home. The withdrawal of the West German welcome mat also was expected to take away some of the incentive to migrate to the West from East Germany.

East Germans who now come to the West get an initial gift of $119, an emergency shelter, grants to buy furniture for their new homes, interest-free loans, occupational training and schooling if wanted.

After July 1, East Germans who move to West Germany will be basically be on their own.

The Cabinet decision reflected the view that once the hard-line East German Communist government was toppled there was no reason any more to treat as refugees East Germans who come to the West.

The announcement came taken two days after East German elections Sunday paved the way for a center-right government with a strong showing by de Maiziere's Christian Democratic Party.

Both East and West German leaders have appealed to East Germans to stay home and help rebuild the economy. The mass movement to the West has curtailed medical and public services, transport and industrial production.

It also has jammed refugee camps in West Germany and placed a great financial burden on local communities where the immigrants are settled by the Bonn government.

Last week, 10,734 East Germans moved to West, raising the total so far this year to 145,000. Last year the total was 340,000. Since 1950, 3.5 million have left East Germany for the West.

The West German states, both those ruled by Kohl's Christian Democrats and those by the opposition Social Democrats, last week asked speedy action to stop the immigration.

But the state of Saarland decided Tuesday not to wait until July 1.

The Cabinet of Saarland Prime Minister Oskar Lafontaine, who will be the Social Democratic candidate for chancellor in the December West German election, announced that effective immediately it will accept no more East Germans as immigrants.

LAHORE, PAKISTAN (MARCH 20) UPI - Hundreds of thousands of cheering supporters greeted Prime Minister Benazir Bhutto Tuesday during a procession marking the 50th anniversary of a resolution that led to the founding of Pakistan.

Bhutto arrived by helicopter at the procession's starting point in the historic northeastern city of Lahore, from where she rode in an open truck with about 30 other leaders of her Pakistan People's Party to address an evening rally.

Hundreds of thousands of people chanting ''Long Live Benazir'' and carrying PPP and Pakistan flags and huge portraits of the prime minister lined the 1-mile route to the rally site by the Pakistan Tower in a downtown park.

The tower was built to commemorate the day, March 23, 1940, when the Muslim League of Mohammad Ali Jinnah, the nation's founder, adopted a resolution in Lahore calling for a separate homeland for Moslems in the

Indian subcontinent. Pakistan was founded seven years later after the British withdrawal from India.

Bhutto's supporters arrived in Lahore, capital of Punjab Province, from across the country in buses, trucks, private cars and on foot to attend the celebrations marking the anniversary.

Tuesday's welcome for Bhutto, 36, brought comparisons to her arrival in Lahore in April 1986 after years of exile in England. More than half a million people turned out to greet her at that time.

Two years later, the death in a mysterious plane crash of President Mohamad Zia ul-Haq paved the way for a return to democracy, and Bhutto was elected prime minister in November 1988.

Bhutto's father, Prime Minister Zulfikar Ali Bhutto, was overthrown by Zia then army chief of staff, in a 1977 coup and hanged two years later for involvement in a plot to murder a political opponent.

#90079u1486 03/20/1990 ~United Press International

MANILA, PHILIPPINES (MARCH 20) UPI - The Philippine military filed rebellion charges Tuesday against seven opposition politicians and businessmen in connection with the December coup attempt against President Corazon Aquino.

Vicente Puyat, a banker and a defeated senatorial candidate of the opposition in the May 1987 elections, was accused before a suburban criminal court of harboring Maj. Wilhelm Doromal, one of the coup leaders, in his poultry farm. Doromal was arrested Thursday.

A separate recommendation to the Justice Department also was made to prosecute Puyat for ''illegal possession of firearms in furtherance of rebellion.''

Also recommended for prosecution of the Justice Department were another defeated senatorial candidate Homobono Adaza, former presidential assistant Joaquin Venus, the namesake son of captured rebel officer Brig. Gen. Edgardo Abenina, and businessmen Cesar Lopez, Mel Verano and Medardo Pestano.

More than 50 civilians have been charged in the Dec. 1-9 uprising, in which 119 people were killed and more than 500 were wounded. The coup attempt was the sixth since Aquino became president in 1986.

The Justice Department will conduct an investigation of the charges against the seven accused Tuesday and will decide whether they will be

indicted before a civilian criminal court.

On March 6, the Supreme Court ordered the release of lone opposition Sen. Juan Ponce Enrile from a weeks detention while it considered the validity of the ''rebellion with murder'' charge against him.

State lawyers revived the complex charge in a bid to clamp in jail participants in the December uprising amid threats of a new insurrection by coup leaders still at large.

Enrile contends murder is absorbed in the crime of rebellion, which is penalized by a maximum 12 years in jail and bail may be posted. Murder carries a penalty of life imprisonment and no bail is allowed.

CAIRO, EGYPT (MARCH 20) UPI - A court sentenced a Palestinian and an Egyptian now working in Israel to 15 years hard labor on charges of spying for Israel, the semi-official daily Al Ahram reported Tuesday.

Prosecutors told the Supreme State Security Court that Palestinian Awad Moussa, 35, and Egyptian Ibrahim Mesbah El Sawarkey, 35, had gathered information on Egypt and tried to recruit Egyptians to spy for the Jewish state.

Moussa, who pleaded not guilty to the charges but admitted cooperating with the Israeli intelligence agency, Mossad, could have faced the death penalty on spying charges. El Sawarkey fled to Israel and was tried in absentia, the prosecutors said.

Witnesses for the prosecution said Moussa, a taxi driver, had brought an Egyptian woman named Sahar Said Omar, 25, with relatives living in the Israeli-occupied West Bank and Gaza Strip, into contact with an Israeli intelligence officer named Abu Haroun.

The Israeli allegedly asked Omar to gather military and other information in return for cash and a car. The officer also promised to take care of Omar's relatives in the occupied territories.

Egyptian Interior Ministry sources said the sentences, passed late Monday, were comparatively light compared to the execution in Iraq on spying charges last week of a London-based journalist for The Observer newspaper, Farzad Bazoft.

A closed Iraqi Military Court took five hours to decide Barzoft, 31, was guilty of spying for Britain and Israel, and hanged him three days later, despite an international outcry and pleas for the sentence to be commuted.

''The sentences show that Egypt will not tolerate espionage, and will deal harshly with spies,'' the source said. Egypt is the only Arab country to have signed a peace treaty with Israel.

#90079u1502 03/20/1990 ~United Press International

CHICAGO (MARCH 20) UPI - Voters turned out Tuesday in fewer numbers than hoped for by Republican Jim Edgar, who carried a White House endorsement with him in his quest to succeed retiring Gov. James Thompson.

Despite clear skies across the state during the primaries, the Illinois Board of Elections expected light turnout from the state's 6 million registered voters.

''The board's prediction of 25 to 27 percent will still stand,'' said Kel Hudson, spokesman for the board. ''The staff we have assigned throughout Illinois says the voter turnout is light to medium. In some areas, the turnout is expected to be as low as 20 percent.''

In Chicago, however, voters appeared to be turning out in large numbers.

Edgar wanted a large turnout to help him pull ahead of chief rival Steven Baer, a staunch conservative and former director of the United Republican Fund who has displayed surprising strength but still trailed Edgar.

The winner of the Republican primary will oppose Attorney General Neil Hartigan in the general election for governor. Hartigan was unchallenged in the primary.

Tuesday's voting was just a formality for Sen. Paul Simon, D-Ill., and Rep. Lynn Martin, R-Ill., Simon's likely opponent in the fall. Neither Simon nor Martin was opposed in the primaries.

On Monday, White House press secretary Marlin Fitzwater reaffirmed President Bush's endorsement of Edgar for governor of the Land of Lincoln, an unusual step for an incumbent president to take in a contested primary. Although Bush endorsed Edgar before Baer announced his candidacy, Fitzwater said the endorsement would stand.

Tuesday's winners will fight to succeed Thompson, who decided not to seek re-election to a fifth term.

Baer campaigned hard and had hoped for bad winter weather to keep voters home. Tuesday dawned with temperatures in the 20s, but the high was expected to climb near 50 across most of the state.

Monday Baer aimed his message at conservative, anti-abortion, anti-gun control voters. Marshall based his campaign on men's and gun owners' rights.

In a contested congressional race Tuesday, Rep. Gus Savage, D-Ill., faced his first real opposition in years. Savage was opposed by Mel Reynolds, a former Rhodes Scholar and an assistant to the vice president of academic affairs at the University of Illinois at Chicago.

Low voter turnouts in past contests have played havoc with results in Illinois. In 1986, two followers of political extremist Lyndon LaRouche wound up as Democratic nominees and observers blamed the 24.9 percent turnout for the result.

LONDON (MARCH 20) UPI - Stock prices closed higher in light trading Tuesday on the London International stock exchange as investors stepped to the sidelines to await the government's annual budget statement.

The blue-chip Financial Times 100-stock index, which tumbled 25.9 points Monday, closed up 21.7 points at 2,259.7. The narrower top 30 industrial average gained 10.5 points to 1,770.4.

Volume was around 376 million shares, compared with the 320 million shares traded Monday.

Analysts said trading remained light and cautious and most large institutional investors stepped to the sidelines to await Chancellor of the Exchequer John Major deliver his first budget address.

Prices edged higher late in the session as the Chancellor vowed to beat the inflation that has troubled the British economy and pledged to take advantage of the changing European market.

Major repeated the government's commitment to maintaining high interest rates until Britain's inflation is in retreat.

Keeping interest rates high or raising them would probably cause a bearish sentiment to overtake the market, one dealer said, adding there is no hope that interest rates will be lowered.

On the trading floor, breweries were among the day's best performers, encouraged by favorable reports from analysts.

Allied Lyons gained 11 cents to $7.02, Bass gained 21 cents to $14.55 and Guinness added 8 cents to $10.70.

Standard Chartered gained 8 cents to $8.78 despite reporting its latest earnings fell 78 percent due to problem debt and reorganization.

Among the day's other highlights, Trafalgar House gained 14 cents $3.72, Glaxo PLC jumped 35 cents to $12.89 and B.A.T Industries gained 11 cents to $13.07.

Elsewhere in Europe, prices closed slightly higher in brisk trading on the Frankfurt Stock Exchange.

The key German Stock Index gained 2.06 points to 1,908.83.

Analysts said the market was still trying to determine the long-term impact of the unification of the two German states.

#90079u1523 03/20/1990 ~United Press International

RIO DE JANEIRO, Brazil (MARCH 20) UPI - Brazilian authorities announced Tuesday foreigndebt payments have been suspended for up to one week to

give the new governmentof President Fernando Collor de Mello time to gear up his economic reforms.

In addition, Brazil's yearly foreign debt payments will be limited to 1.8 percent of gross domestic product, according to officials.

Claudio Sochaczewski, director of foreign exchange and international affairs at the Central Bank, told journalists the suspension on remittances abroad would last a ''maximum of one week.''

Before lifting this restriction, he said, the Central Bank wanted to wait a few days to ''have an idea of how the foreign-exchange market was behaving.''

Also, the Central Bank passed a resolution Tuesday freezing deposits of foreign currency in Brazilian banks and forcing their conversion into cruzeiros, the local money.

Sochaczewski said this measure would not affect current rules that allow foreign companies to repatriate capital and send royalties overseas.

President Collor launched Friday a drastic stabilization plan under which afreeze lasting 18 months was placed on withdrawals from checking accounts of amounts over $350 and from savings accounts of over $700 and all prices were reduced to March 12 levels. The plan also calls for higher taxes, state spending cutbacks and privatization of state companies.

The dollar was floated against the cruzeiro, the nation's new monetary unit, but, because the stabilization plan has virtually paralyzed banking and commerce, the market value of the dollar is now difficult to determine.

Tourists could buy dollars Monday for 30 cruzeiros, compared to the rate of 74 cruzeiros that was in effect before the stabilization plan kicked in.

Suspension of foreign debt payments and other overseas remittances and the measure freezing foreign-exchange deposits were ordered Sunday, but they were not announced officially until Tuesday.

Brazil's new economic minister, Zelia Cardoso de Mello, said Tuesday that the government planned to eventually limit foreign debt payments to 1.8 percent of the gross domestic product per year - an amount equivalent to about $5 billion.

''This is about half of what the Brazilian government has been habitually remitting abroad to honor its commitments to private creditors,'' she told Radiobras, the government news agency.

Brazil's foreign debt, estimated at $112 billion, is the largest in the

Third World.

Since last July, the nation of 144 million inhabitants has been lagging in making scheduled debt payments and is now estimated to be behind by $6.5 billion.

Collor has pledged that he would not suspend debt payments but would limit them to a fixed percentage of the gross domestic product.

His stabilization plan, called ''New Brazil,'' was designed to halt hyperinflation. In the 12-month period ended Feb. 28, Brazil's inflation rate had risen by 2,751 percent.

#90079u1541 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - President Bush pushed Tuesday for quick congressional action on $800 million in economic aid to Panama and Nicaragua, predicting democracy in those countries would ''increase the pressure'' for change in Cuba.

Stepping up administration efforts to isolate Fidel Castro as a hemispheric holdout against change, Bush sought to inject urgency into the debate over his plan to help the new democratic governments of Central America.

Sen. Patrick Leahy, D-Vt., brought the package before his appropriations subcommittee, but said after meeting with Bush at the White House that lingering questions about the proposed aid cloud prospects for swift action.

Warning that ''enormous amounts of aid'' might only ''open the floodgates to a lot of waste and fraud and corruption'' in countries torn by war and economic devastation, Leahy said Congress would not approve the aid ''without knowing where it's going and what it's going to be used for.''

''Once we have those answers,'' he said, ''we can move very quickly.''

Leahy also said the aid package, which Bush wants passed before the congressional Easter recess begins April 6, could be delayed by Senate debate over a controversial overhaul of the Clean Air Act.

Bush invited Democratic and Republican congressional leaders to the White House after complaining of foot-dragging on the $500 million he proposed Jan. 25 for Panama as part of an overall $1 billion-plus aid package.

White House press secretary Marlin Fitzwater said the leaders were ''generally supportive, some more than others.''

Last week, Bush repackaged the request for Panama into an $800 million Fund for Democracy that includes $300 million for Nicaragua, where U.S.-backed Violeta Chamorro is to be inaugurated April 25, ending a decade of rule by the Marxist-led Sandinistas.

Bush said the $800 million for the two countries would come from military programs - seen by many as evidence of the ''peace dividend'' yielded by reduced superpower tensions - and he promised to seek another $200 million for Nicaragua next year.

Panamanian Vice President Guillermo Ford headed to Washington Tuesday to lobby for assistance, pleading for an economic ''kicker so we can really get the show on the road.''

Ford said Panama, which suffered under U.S. economic sanctions for almost two years before U.S. troops deposed Manuel Noriega in December, has received about $12 million of the $42 million already approved by Congress.

The Cuban dimension to Bush's sales pitch followed Castro's declaration last week that he will continue bucking the trend toward democracy and free-market economics.

With the Chamorro victory in Nicaragua, the administration has tagged Cuba as a last bastion of communism. While other dictators fall, Bush said, ''Castro seems to be firming up his totalitarian position.''

''I'd like to see them shift from that highly militarized island and let democracy have a chance,'' Bush said. ''But I think that if we are helpful to Nicaragua and Panama, it will simply increase the pressure in that marvelous island of Cuba for change.''

Some U.S. officials believe Castro, with Cuba's economy in a state of collapse, will be under increased pressure to adapt if the Soviet Union reduces its longtime subsidies as part of an economically motivated foreign policy retrenchment.

Leahy, citing more pressing strategic reasons to direct U.S. aid to Eastern Europe, said Castro ''is being squeezed by world events'' and predicted, ''there will be changes in Cuba no matter what we do.''

#90079u1542 03/20/1990 ~United Press International

(MARCH 20) UPI - The nation's merchandise trade deficit shot up in January to nine-and-one-quarter-BILLION dollars... up 20 and one-half percent... pushed higher by a jump in petroleum imports. Exports rose four percent to 32-point-one-BILLION dollars, while imports jumped

seven-point-three percent to hit 41-point-three-BILLION dollars. Financial analysts had expected trade red ink of between nine-BILLION and nine-point-six-BILLION dollars for January.

Also on the economic front... the government says consumer prices rose one-half of one percent last month primarily because of higher clothing prices. Inflation at the consumer level jumped one-point-one percent in February. Energy prices fell seven-tenths of one percent in February, but food costs rose one-half of one percent. Excluding often volatile food and clothing prices, the core rate of February inflation at the consumer level rose one-half of one percent.

New Hampshire's controversial Seabrook nuclear power plant is finally working, after long delays caused by opponents who feared about safety at the plant, located about 40 miles north of Boston. Seabrook received its full power license last Thursday and start-up procedures began early this morning. The six-and-one-half-BILLION-dollar reactor is expected to be at full power in about three months.

In New York, the racketeering and fraud trial of Imelda Marcos opens this morning and former President Reagan could play a big role. A defense lawyer for the former Philippine first lady says he'll definitely call Reagan or his wife, Nancy, as a defense witness. Marcos is charged with trying to funnel more than 100-Million dollars from the Philippine treasury into New York real estate and art.

#90079u1560 03/20/1990 ~United Press International

MIAMI (MARCH 20) UPI - General Development Corp. lawyers told directors the company was committing no crimes three months before it was charged by a federal grand jury with defrauding thousands of home buyers, the company's interim chairman said.

"At board meetings, we would get litigation reports, and we were informed by our counsel that nothing being done was illegal," Charles J. Simons, named chairman, president, and chief executive officer less than two weeks ago, told The Miami Herald Monday. He had a seat on the General Development board before taking over in the executive posts. General Development agreed Friday to plead guilty to charges of conspiracy to commit fraud.

Simons, who became General Development's chief when the board removed its top two executives, defended the directors' role: "I'm a director of a large number of corporations, and I always wonder when I'm sitting at those meetings - if something's being done improperly, how do you find out?"

Although the grand jury began requesting General Development records in

April 1988, lawyers at the New York firm Cravath, Swaine & Moore did not inform directors of the probability of criminal indictments until this January, Simons said.

Directors then hired their own counsel, Lloyd Cutler & Pickering, and began investigating allegations that General Development had systematically defrauded home buyers through rigged appraisals and deceptive sales practices. The grand jury concluded that General Development overpriced its homes and went to great lengths to conceal this overpricing from customers.

A week before authorities unsealed the indictment, the General Devolopment board fired David F. Brown as chairman and chief executive officer and Robert F. Ehrling as president. Simons took over at the board's request. He had been on the board since 1985.

"Was I concerned a year ago?" Simons said. "The answer is no. Nor were the other directors. Was it more pervasive than what I was told at board meetings? The answer is yes." The lawyers "still will tell you they don't believe it was wrong," Simons said.

But information received since January convinced him of the company's wrongdoing, Simons said. "There clearly were cases where salespeople went too far," he said. "I don't know if management condoned it, but there was enough smoke that management should have looked for fire." General Development has an uphill climb in its efforts to reshape the company's reputation, he said.

"We're going to have to earn our way up," Simons said. "We're going to run the company with complete integrity. We're not going to do anything that's not proper. I'm talking morally, not just legally." The board's plans include finding new investment capital and selling land and company-owned utilities for as much as $170 million, he said.

Simons said the company also wants to settle two class action suits filed by disgruntled homeowners and its dispute with shareholder Attilo Petrocelli, who controls almost 13 percent of General Development stock.

#90079u1563 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - Senate Democratic leader George Mitchell accused the Bush administration Tuesday of essentially rejecting a deficit-cutting plan proposed by Rep. Dan Rostenkowski, D-Ill., while trying to suggest otherwise.

Mitchell alleged that administration officials have merely tried to ''create the impression'' they were giving serious consideration to the

formula Rostenkowski recently proposed for balancing the federal budget.

Rostenkowski, chairman of the House Ways and Means Committee, touched off sharp debate with his $500 billion plan to raise a variety of taxes, freeze Social Security benefits and reduce other spending to eliminate budget deficits.

White House press secretary Marlin Fitzwater, who last week welcomed the plan as a vehicle for negotiation even while expressing opposition to many of its provisions, said again Tuesday that it contained ''areas to discuss.''

Mitchell, however, asserted that recent congressional testimony in which budget director Richard Darman opposed every element of the Rostenkowski plan displayed a ''total lack of seriousness about the budget on the part of the administration.''

''They have opposed every single specific provision in the Rostenkowski plan while creating the impression ... it's not a bad idea,'' he said.

Mitchell likened the administration response to that of a man who has been served a breakfast of coffee, eggs and ham, only to tell his benefactor he did not like any of those items, ''but apart from that, thanks for the breakfast.''

''The president is the cause of the budget deadlock so only the president can break the budget deadlock,'' he said.

(MARCH 20) UPI TODAY'S PEOPLE:

FERGIMANIA: The media onslaught has already started in anticipation of a new royal baby. The area around Portland Hospital in London is swarming with equipment-laden photographers staking out their territory for when the duchess of York, the former Sarah Ferguson, checks in to give birth to her second child with Prince Andrew. Even though Fergie isn't expected to be admitted until next week, some photograhers have been camping on the sidewalk for the past two weeks. More than 60 8-foot ladders already are in place around the hospital for the big event and camera crews are reportedly paying hefty fees for vantage points from balconies across the street, including a prime spot at the Royal National Institute for the Blind.

SHE'S BAAAAACK: David Letterman's least favorite guest has been arrested again at his Connecticut home. Margaret Ray, 38, of Paonia, Colo., was caught by police early Monday after Letterman called police to report her

trespassing at his New Canaan home. Ray had been released from a state prison only three days earlier after serving a sentence for breaking into Letterman's home and the latest arrest marks the sixth time she has been caught at the talk show's home since 1988. She was held on $1,000 bond and was to be returned to the prison.

NEWMAN AND GRIGGS: Paul Newman had a bandage on his right hand when he showed up in court in Bridgeport, Conn., Tuesday for the opening arguments in a deli owner's suit against him. Newman, dressed in a navy blue pin-stripped suit, white shirt and red and gold tie, smiled at the crowd and explained that he suffered the injury when his 70-pound Louisiana swamp dog, Griggs, lunged on the leash while they were out for a walk. The dog was given to Newman by the Louisana Legislature while he was filming the movie ''Blaze.'' Newman is being sued by Julius Gold, who says he deserves a cut of the money from Newman's food company because he helped start the business.

CRAFT BACKS OUT OF JOB: Christine Craft, the anchorwoman who lost her job in Kansas City, Mo., because of her looks, had to quit her job with a San Francisco television station because of a back problem. Craft, 45, was hired as a fill-in anchor for the 10 p.m. newscast at KOFY and had been on the job only 11 days before a herniated disc drove her out. Craft, who also is a first-year law student in Sacramento, struck a blow for women's rights by winning a lawsuit against Metromedia TV in Kansas City when she was demoted because of her age and appearance and for not being deferential to men.

GLIMPSES: Yves St. Laurent is hospitalized and missing the Paris fall-winter fashion show. A spokesman said the designer is suffering from extreme fatigue caused by the strain of preparing his collection. ''It's not cancer and it's not AIDS,'' the spokesman said. ''It's serious, but let's not panic'' ... Linda Bloodworth-Thomason, the executive producer and creator of the ''Designing Women'' sitcom, has reached an out-of-court settlement in the AIDS death of her mother. Bloodworth-Thomason and her brother, Ralph Bloodworth, had sued Methodist Hospital in Memphis, Tenn., its blood bank and three doctors, claiming their mother, Claudia, 86, died of an AIDS-tainted blood transfusion. Details of the settlement were not announced.

#90079u1588 03/20/1990 ~United Press International

EAST BERLIN (MARCH 20) UPI - Conservative leader Lothar de Maiziere's three-party alliance, rebuffed for the second time by the Social Democrats courted the Liberals Tuesday in its bid to form a coalition government.

De Maiziere, expected to become East Germany's next prime minister, had invited the Social Democatic Party to join his conservative Alliance for Germany, which won 193 seats but fell short of securing a majority in the 400-member Parliament in Sunday's elections.

The Social Democrats, which won 87 seats, said Monday they were not prepared to join a coalition with the conservatives, who favor a much faster reunification process with West Germany.

Ibrahiim Boehme, the chairman of the Social Democrats, rejected the invitation to form a broad coalition with the conservatives again on Tuesday.

Boehme said his party ruled out any coalition with the German Social Union one of the three parties in the Alliance on the grounds it had fought a dirty campaign. He objected especially to charges made by the German Social Union that former Communists had infiltrated his Social Democratic Party.

Helmut Lueck, spokesman of the East German Christian Democrats, said Tuesday de Maiziere would try to arrange a meeting with Boehme to discuss the problem, but that the Christian Democratic leader was at the same time courting the Liberals.

Three liberal parties, which together won 21 seats, agreed Tuesday to merge and form a party called the Free Democratic Party, or the Liberals, and said they were awaiting a concrete offer from the alliance.

There appeared to be no serious obstacles to a coalition of the two groups similar to West German Chancellor Helmut Kohl's coalition with Foreign Minister Hans Dietrich Genscher's Free Democrats.

The Liberals' 21 seats would be enough to give de Maiziere's conservative alliance a total of 214, more than enough for a majority in the legislature known as the People's Chamber.

But such a coalition would fall far short of the two-thirds majority in the legislature needed to introduce constitutional amendments such as those that will be needed for unification with West Germany.

In Bonn, the West German government, confident its planned economic and currency union with East Germany will be formed by the summer, said Tuesday it will halt financial aid to East Germans to discourage further immigration.

The Cabinet decided to cancel by July 1 almost all the financial benefits the East German immigrants now receive and treat them as they treat a German who moves within West Germany.

East Germans who now come to the West get an initial gift of $119, an emergency shelter, grants to buy furniture for their new homes, interest-free loans, occupational training and schooling if wanted. After July 1, East Germans who move to West Germany will be basically be on their own.

The Cabinet decision reflected the view that once the hard-line East German Communist government was toppled there was no reason any more to treat as refugees East Germans who come to the West.

Both East and West German leaders have appealed to East Germans to stay home and help rebuild the economy.

Kohl, meanwhile, told his Cabinet he wants ''swift and intensive'' efforts made to form the ''structures for cooperation'' between East and West Germany to formulate common monetary, economic and social policies.

#90079u1600 03/20/1990 ~United Press International

ORLANDO, FL (MARCH 20) UPI - Orange County commissioners, angry that Walt Disney World Co. beat the county to millions of dollars in tax-free bonds, approved a plan Monday allowing the county's housing authority to spend funds to investigate a legal challenge aimed at blocking the company from issuing the bonds.

In January, Disney's governmental arm, the Reedy Creek Improvement District, won $57 million in tax-exempt bonds - the entire amount available this year in six central Florida counties.

Reedy Creek plans to spend the money to upgrade Disney's sewage system. Orange County had wanted $19 million to finance housing for 1,200 moderate- and low-income families.

Disney "made a business decision to take and keep the housing-bond allocation," said commissioner Linda Chapin. "Now we've made a business decision to try to get it back." County officials concede Reedy Creek won the bonds fair and square.

Under state law, tax-exempt bonds are awarded on a first-come, first-served basis. Orange County's request arrived at the state Bond Finance Authority on Jan. 4, two days after Disney's.

County officials said the bond money should be allocated based on population, with a local government receiving $5 per resident. Using that formula, Reedy Creek, with 70 full-time residents, would be eligible for $350.

Reedy Creek and Disney officials have said they have a legitimate claim to the bond money. Earlier, they offered to give the county land for the construction of multi-family housing, but the county rejected the offer, saying it wanted to help first-time home buyers, not apartment renters.

#90079u1613 03/20/1990 ~United Press International

PARIS (MARCH 20) UPI - Designer Emanuel Ungaro Tuesday joined other creators in saluting Eastern Europe in the fall-winter ready-to-wear fashion shows for international store buyers and press.

Ungaro outdoes his competitors when it comes to joining different complicated patterns in different colors. His mix-match talent shone in his colorful flowing evening skirts in printed velvet, satin printed blouses and multi-colored jackets and vests, all in Eastern European prints like rich medieval costumes.

Add tiny brocaded handbags on chains or cords, rope-like tassel belts, tiny brocaded pillbox hats and satin tasseled shawls, flat gold shoes or embroidered knee-brushing boots. Sometimes he threw in a modern touch such as gold kid jackets.

Ungaro's one-time draped dance hall dresses with huge shoulders are just a memory. His runway may have been less exciting but the clothes were more wearable. Instead of one color per outfit, he usually used three, mixing different prints or sunny colors such as lavender, burgundy, orange, gold and turquoise for jackets, skirts and coats. He made a orange silk jacket, for example, and married it with a fuchsia satin tunic and blue velvet skirt.

He used short hemlines for daytime and both short and long for evening. Trousers were added, such as narrow gray pants with lipstick red or sunshine yellow jackets.

Capes were plentiful, as in other shows, and some outfits sported two capes in bright colors edged with a second color. Long loose coats with cape effects and quilted parkas also hit the runway.

Ungaro, too, followed the hood craze, showing filmy hooded organdy evening jackets over tiny draped black dresses. Giant taffeta bubble skirts blossomed out for evening.

The palette included turquoise, salmon, red, orange, lavender plus gold for daytime outfits as well as for shimmering lame or sequinned evening jackets, some in folklore prints.

Although viewers argue over the merits of some shows, there was no confusion about the Guy Laroche parade - young, sophisticated and wearable ready-to-wear at the lowest prices of any of the high fashion houses.

Guy Douvier, who creates the ready-to-wear for Laroche while Angelo Tarlazzi does the handmade couture, opened with long argyle or pale blue cable knit sweaters with long knitted scarves over narrow trousers.

Enormous white coats over white trousers, casual suede shirts, duffle coats over black tights, quilted paisley-printed parkas - the wise Douvier rolled out the winners.

Probable best sellers: a green wool blazer with a satin collar over a lavender wool skirt, body-clinging jersey dresses in three-color bands like Modigliani abstract paintings, capes in summer colors, a white coat dress with a deep V-neckline and gold belt, a black velvet suit edged in brightly colored satin strips, black long or short fringed evening dresses for dancing the Charleston.

Add your own accessories to the simple Laroche line and you have fine fashion.

Fur designer Frederic Castet has left the Dior salon to open his own leather and fur house. His fashion show, attended by former customers and Dior alumni, featured recorded applause. A more real touch was the best false furs in town - a white blouson jacket, a huge white trenchcoat, a blue and black striped blouson, a black and bordeaux printed coat, a moss green trench coat - all in factory-made, ecologically sound fake fur.

The real furs meant mink or fox lined raincoats, giant mink coats, etc.

The Valentino salon's winter show as usual paraded luxurious, wearable clothes by Valentino Garavani, but not newsworthy except for a gold lame evening jacket and top that were cut like a twin-set sweater.

The most memorable moment was the wobbly, precarious march down the runway of a model, who, having drunk too much champagne backstage, had to be retired from the show.

#90079u1625 03/20/1990 ~United Press International

BOGOTA, COLOMBIA (MARCH 20) UPI - The head of a former Colombian rebel group whose 1985 capture of the nation's Supreme Court left more than 100 dead will run for president in elections May 27, a group spokesman said Tuesday.

The April 19 Movement, which signed a peace pact with the government and officially became a political party two weeks ago, chose Carlos Pizarro Leongomez as its candidate on Monday, party spokesman Ramiro Lucio told said.

''Unanimously, the organization supported the candidacy of Commander Pizarro. We think he's the man who best understands the aspirations of change, and perhaps a feeling of protest, in the country,'' Lucio said on Bogota's Caracol radio.

Pizarro will face the Liberal Party's Cesar Gaviria, Social-Conservative Rodrigo Lloreda and the leftist Patriotic Union candidate, Bernardo Jaramillo, in elections on May 27. President Virgilio Barco is prohibited by law from seeking a consecutive term.

Two weeks ago the movement, known as M-19, turned over its weapons and broke ranks in return for a government pardon and a chance at political life after 18 months of negotiations with the Barco administration.

Pizarro ran for mayor of Bogota on March 11, receiving more than 40,000 votes and finishing third behind the Liberal and Social-Conservative candidates.

Lucio also denied press reports that one of the swords of South American liberator Simon Bolivar, stolen by the M-19 from a Bogota museum in 1974, was in the hands of Cuban leader Fidel Castro.

''I don't know where it is,'' Lucio said, ''but I know Fidel Castro doesn't have it.'' The former rebels would return the sword, symbolic of Latin American independence and freedom, ''when there is a truly democratic situation'' in Colombia, Lucio said.

Although the government still has not diclosed the official results of last week's elections, M-19 appears to have won two municipal council seats, one seat in congress and a mayoral race, while the other leftist political force in Colombia, the Patriotic Union, lost ground.

Lucio, while praising the M-19 electoral showing as ''a triumph,'' protested ''vote robbery'' in Bogota and in Cauca state, where the group claims a former rebel commander won a mayor's race.

While the M-19 has signed a peace pact with the government and given up 16 years of guerrilla warfare, other Colombian rebel groups, most notably the National Liberation Army and the Revolutionary Armed Forces of Colombia, have stepped up attacks and ambushes in recent months.

#90079u1636 03/20/1990 ~United Press International

HOUSTON (MARCH 20) UPI - The owner of KODA-FM has called off an $86.5 million deal to sell the Houston radio station and two other Texas radio properties, in part because of problems in arranging financing.

Command Communications, a New York-based broadcast company, said the state's economic comeback also persuaded it to cancel the sale of the stations to Evergreen Media of Irving, Texas, the Houston Chronicle reported Tuesday.

The sale would have covered KODA, Dallas station KRLD-AM and the Texas State Radio Networks, which provides agribusiness reports, Spanish-language programming and Dallas Cowboys football for stations across Texas.

Under an agreement in principle reached in December, Evergreen Media offered to pay $58.5 million to Command for KRLD and the Texas State Networks and an additional $28 million for KODA, which is owned by the Sillerman Cos. Sillerman Cos. is run by Robert F.X. Sillerman, a founder and major shareholder in Command Communications.

"The sale of the Houston station had a window during which we could opt to retain the (three) stations," said Carl C. Brazell Jr., president and chief executive officer of Command Communications.

He said the decision was not based "on one single reason" and reflected the "continued strong performance of the properties and the brightening prospects for the Texas economy."

The decision to end negotiations on the sale also was partly prompted by Evergreen Media's demand to provide financing, said Sillerman. Sillerman said financing was difficult to obtain for Evergreen Media because the collapse of the junk-bond market has dramatically shrunk the amount of

capital available. Scott K. Ginsburg, president and chief executive of Evergreen Media, said he was disappointed Command had ended negotiations.

#90079u1641 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - President Bush pushed Tuesday for quick congressional action on $800 million in economic aid to Panama and Nicaragua, predicting democracy in those countries would ''increase the pressure'' for change in Cuba.

Stepping up administration efforts to isolate Fidel Castro as a hemispheric holdout against change, Bush sought to inject urgency into the debate over his plan to help the new democratic governments of Central America.

Sen. Patrick Leahy, D-Vt., brought the package before his appropriations subcommittee, but said after meeting with Bush at the White House that lingering questions about the proposed aid cloud prospects for swift action.

Warning that ''enormous amounts of aid'' might only ''open the floodgates to a lot of waste and fraud and corruption'' in countries torn by war and economic devastation, Leahy said Congress would not approve the aid ''without knowing where it's going and what it's going to be used for.''

''Once we have those answers,'' he said, ''we can move very quickly.''

Leahy also said the aid package, which Bush wants passed before the congressional Easter recess begins April 6, could be delayed by Senate debate over a controversial overhaul of the Clean Air Act.

Bush invited Democratic and Republican congressional leaders to the White House after complaining of foot-dragging on the $500 million he proposed Jan. 25 for Panama as part of an overall $1 billion-plus aid package.

White House press secretary Marlin Fitzwater said the leaders were ''generally supportive, some more than others.''

At a hearing on Capitol Hill later, Leahy escalated his criticism, calling the $800 million - on top of $500 million already approved for Panama - ''too much money.''

''I think the administration has got its priorities all wrong,'' Leahy said in a statement, also rapping as ''silly and wasteful'' a debt repayment plan for Panama backed by the administration.

Last week, Bush repackaged the request for Panama into an $800 million

Fund for Democracy that includes $300 million for Nicaragua, where U.S.-backed Violeta Chamorro is to be inaugurated April 25, ending a decade of rule by the Marxist-led Sandinistas.

Bush said the $800 million for the two countries would come from military programs - seen by many as evidence of the ''peace dividend'' yielded by reduced superpower tensions - and he promised to seek another $200 million for Nicaragua next year.

Panamanian Vice President Guillermo Ford headed to Washington Tuesday to lobby for assistance, pleading for an economic ''kicker so we can really get the show on the road.''

Ford said Panama, which suffered under U.S. economic sanctions for almost two years before U.S. troops deposed Manuel Noriega in December, has received about $12 million of the $42 million already approved by Congress.

The Cuban dimension to Bush's sales pitch followed Castro's declaration last week that he will continue bucking the trend toward democracy and free-market economics.

With the Chamorro victory in Nicaragua, the administration has tagged Cuba as a last bastion of communism. While other dictators fall, Bush said, ''Castro seems to be firming up his totalitarian position.''

''I'd like to see them shift from that highly militarized island and let democracy have a chance,'' Bush said. ''But I think that if we are helpful to Nicaragua and Panama, it will simply increase the pressure in that marvelous island of Cuba for change.''

Some U.S. officials believe Castro, with Cuba's economy in a state of collapse, will be under increased pressure to adapt if the Soviet Union reduces its longtime subsidies as part of an economically motivated foreign policy retrenchment.

Leahy, citing more pressing strategic reasons to direct U.S. aid to Eastern Europe, said Castro ''is being squeezed by world events'' and predicted, ''there will be changes in Cuba no matter what we do.''

WAYNESBORO, GA (MARCH 20) UPI - The Nuclear Regulatory Commission sent a team to Georgia Power Co.'s Plant Vogtle nuclear station Tuesday to investigate the loss of power to a reactor cooling system when a truck hit a nearby utility pole.

No injuries or health hazards were reported at the atomic power plant or

in surrounding Burke County, and no radiation was released, officials said.

Georgia Power spokesman Tal Wright said a ''site area emergency'' was declared when a truck backed into a pole supporting electrical equipment, knocking out power to the plant.

Wright originally said non-essential personnel were evacuated from the plant, but spokeswoman Cindy Theiler later corrected that statement, saying no one was evacuated.

Wright said the emergency was downgraded to an alert when electrical service was restored after about half an hour. He said the problem involved ''a switching area of the nuclear power plant'' and not the atomic reactors.

However, NRC spokeswoman Sue Gagner said the loss of power stopped the circulation of coolant to the reactor, although she added it was not a serious problem because of multiple backup systems to provide power.

Wright said power was cut to the Unit 2 reactor, but automatic switches took the reactor off line immediately. The Unit 1 reactor was being refueled at the time and was not operating.

Gagner said a team of NRC investigators headed to Waynesboro from Atlanta Tuesday afternoon to find out how the incident happened and how Georgia Power responded to it.

''It's pretty much over, but they'll be reviewing it,'' Gagner said.

The backup electrical generating system used a diesel engine, Gagner said.

The alert was cancelled at 1:42 p.m., and the NRC also went off emergency standby at that time, Gagner said.

''The plant is in a normal shutdown refueling condition,'' she said.

NRC spokesman Frank Ingram in Washington said, ''The alert was called because a truck backed into a transformer, knocking out outside electric power to one of the two reactors.''

Plants ''are required to declare an alert when this kind of thing happens '' Ingram said.

A ''site area emergency'' was declared at 10 a.m., Wright said.

An emergency is automatically declared ''whenever power is lost on an off-site for more than 15 minutes,'' he said. The emergency was downgraded to an alert after 36 minutes.

He said the plant was ''operating normally and power had been restored to essential equipment.''

Earl Porterfield, director of the Burke County Emergency Management Agency said county officials decided not to evacuate the area around the plant.

''There is no release of any type whatsoever,'' Porterfield said. ''We think what's happening is people are overreacting.''

BY HENRY J. RESKE - UPI

WASHINGTON (MARCH 20) UPI - Recent activity on the abortion front has shown the prophetic value of Justice Antonin Scalia's warning words in the Supreme Court's Webster decision last year that the battle was far from over.

In that ruling, which allowed the states greater authority to restrict abortion, Scalia attacked his brethren for failing to face the issue foursquare and overrule the landmark Roe vs. Wade, to turn the debate back to state legislatures where it played out before 1973.

The issue, the justice said, is a political one, not one for the federal courts.

The Supreme Court's reluctance to take that step, Scalia warned, would mean more ''carts full of mail from the public, and streets full of demonstrators, urging us - their unelected and life-tenured judges who have been awarded those extraordinary, undemocratic characteristics precisely in order that we might follow the law despite the popular will - to follow the popular will.

''Indeed, I expect we can look forward to even more of that than before, given our indecisive decision today.''

Events since the July ruling have proven him right.

Advocates on both sides have taken to the streets and to the voting booth and state legislators have rushed to enact new and tougher anti-abortion laws. While some of those lawmakers ran into a wall of protest and others lost their jobs in elections, new restrictions have been passed.

Those laws, as many supporters freely admit, are designed mostly to create more court challenges they hope will finally topple Roe, the ruling declared it is a woman's right to seek an abortion without limits by the

government during the first three months of pregnancy.

''Certainly since the Webster case at least a score of states have passed laws or tried to revive old laws to challenge the doctrine of Roe vs. Wade '' said Bruce Fein, a conservative court watcher.

He said one of the great anomalies of Webster is that five justices did not overrule Roe, but acted as though it had been. He said such a posture invites challenge and noted that an anti-abortion law in Pennsylvania already has gone to court and the most stringent anti-abortion law - just enacted in the territory of Guam - is also headed to court.

In the past, Fein said, legislators who wrote such laws would have been attacked and the laws either stopped in the legislature or immediately struck down in court with little chance of appellate review.

However, those legislators now see victory at the Supreme Court right around the corner and hope to be first in line.

The court has two cases pending dealing with the abortion rights of teenagers but the court has ruled in the past that teenagers do not have the same rights as adults in areas of constutional law. And, recent decisions in New York and Boston dealing with government limits on federal funds for abortion counseling should arrive before the high court before the disputes over new state laws.

Those cases, however, are on the legal periphery of the issue and the court make be unwilling to use them to overturn Roe.

What the court will do when it does face the challege to Roe coming from the states is unclear, but Scalia had his view of that too.

''It thus appears that the mansion of constitutionalized abortion-law, constructed overnight in Roe vs. Wade, must be disassembled door-jamb by door-jamb, and never entirely be brought down, no matter how wrong it may be,'' he said in Webster.

#90079u1683 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - Two pieces of a secret military space payload - believed to be a disabled $1 billion U.S. spy satellite stationed over the Soviet Union - have re-entered and burned up in the Earth's atmosphere, the Pentagon said Tuesday.

''The remaining pieces are expected to decay within two to seven weeks,'' Defense Department spokesman Pete Williams said.

''None of these are expected to reach the ground and none of them did in the case of the two items that have already entered the atmosphere,'' he said.

Williams repeatedly refused to identify the object in space that is slowly disintegrating, but acknowledged it was taken up by the space shuttle Atlantis last month.

U.S. sources said at the time of the launch that Atlantis was placing into orbit a sophisticated $1 billion spy satellite that would be able to monitor northern Soviet naval bases and missile silos.

The Soviet news agency Novosti first reported from Moscow last Friday that the U.S. satellite was breaking up and that Soviet officials were monitoring the trajectory of the pieces.

The Pentagon then issued a three-sentence statement that ''hardware elements'' of some kind from the Atlantis mission were expected to re-enter the atmosphere without risk to life or property.

Williams, who refuses to confirm the existence of spy satellites, declined to comment on a Washington Post report Saturday citing U.S. intelligence sources as saying the satellite suffered a disabling malfunction the week of March 5.

In his regular Pentagon briefing Tuesday, Williams said the U.S. Space Command-Space Surveillance Network was monitoring ''the status of pieces associated with the STS-36 (Atlantis) space shuttle mission.''

''Two of the items have already re-entered the Earth's atmosphere. The remaining pieces are expected to decay within two to seven weeks.

''I don't believe that the pieces that re-enter the atmosphere present any danger and that's as far as I can go,'' Williams said.

The spokesman declined to discuss the capability of the disintegrating object, the size of the pieces or the number of them remaining in space. He also would not talk about how the Defense Department feels about the program.

''It's a classified DOD (Department of Defense) program ... We don't characterize it one way or another.''

#90079u1687 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - The Bush administration Tuesday warned the Soviet Union that an atmosphere of ''intimidation and tension'' in

Lithuania would jeopardize the peaceful dialogue over the fate of the secession-minded republic.

The White House issued the statement a few hours after President Bush acknowledged that he had communicated with Soviet President Mikhail Gorbachev about Lithuania's declaration of independence.

White House press secretary Fitzwater said that ''indications of troop movements on the ground'' from several sources had raised U.S. wariness.

''The activities and statements of the Soviet government over the past few days are cause for concern,'' Fitzwater said, but he told reporters there had been no indication of ''forcible control'' by Soviet forces.

At the same time, Fitzwater said Gorbachev and other Soviet leaders had stated repeatedly that ''they do not intend to use force'' against Lithuania.

The United States has never recognized the incorporation of Lithuania into the Soviet Union through a World War II pact with Nazi Germany. The Baltic republic, first independent in 1919, again this year declared its independence and its intention to secede from the Soviet Union.

Secretary of State James Baker, in Africa for the celebration of Namibia's independence, met with Soviet Foreign Minister Eduard Shevardnadze on Tuesday and was expected to take up the matter of Lithuania, the State Department said.

''The Lithuanian people freely expressed their intention to restore Lithuanian independence. The United States has consistently supported the Baltic people's right to peaceful self-determination,'' Fitzwater said, reading the statement.

''The United States notes that the Lithuanian government has expressed a readiness to address all legitimate Soviet interests, including economic interests, through negotiations. We also note repeated Soviet statements that negotiations, not force, are the proper course in this situation.

''We have called upon the Soviet government to address its concerns and interests through immediate negotiations with the government of Lithuania. We continue to urge a constructive dialogue. This would be complicated by an atmosphere of intimidation and increasing tension,'' Fitzwater said.

''In this regard, the activities and the statements of the Soviet government over the past few days are cause for concern. We are watching the situation closely,'' he said.

Reporters asked Fitzwater whether his reference to the ''government of

Lithuania'' did not connote diplomatic recognition of it as a separate nation, but he insisted there was no change in policy.

''I'm not going to play word games with you,'' he told reporters.

Earlier, Bush acknowledged that he had communicated with Gorbachev about Lithuania. During reporters' questioning at a White House meeting with congressional leaders, Bush answered, ''previously, yeah,'' when asked whether he had expressed his views to Gorbachev.

Bush said he was ''glad that they are still talking peaceful change. That's essential. They've been very good about it, the Soviets have all through Eastern Europe.''

Fitzwater reiterated Monday that Bush believes that Lithuania should negotiate with the Soviet Union over its future and that U.S. diplomatic recognition will not come until the republic controls its own territory.

Fitzwater also said that Bush did not want ''to say anything that would tend to exacerbate problems or attitudes on either side.''

The Lithuanian government has appealed for formal recognition from the United States and other nations. So far, no country has complied.

#90079u1717 03/20/1990 ~United Press International

NAIROBI, KENYA (MARCH 20) UPI - Eleven trucks carrying this year's first famine relief food drove into unknown danger through rebel military lines in Ethiopia Tuesday, a relief official in Addis Ababa said.

The 10-ton heavy-duty trucks, loaded with 110 tons of food, set off at 12:45 p.m. from the town of Dessie, 150 miles north of Addis Ababa, said John Wiater, an official of U.S.-based Catholic Relief Services, in a telephone interview.

Marked with the insignia of the church-based Joint Relief Program and driven by volunteer Ethiopians, their primary mission was to blaze the trail for a major famine relief operation planned by the government, the United Nations andlocal church groups, he said.

About 4.5 million people face death by starvation in Ethiopia in the next nine months, according to U.N. estimates. Their plight, at first the result of crop failure in 1989, has been made worse by the two civil wars now raging across the north of the country.

Plans to supply food through the Red Sea port of Massawa, 470 miles north of Addis Ababa, went awry in February when the rebel Eritrean People's Liberation Front captured the town.

The convoy operation is one alternative plan.

But the 11 trucks of the JRP face formidable obstacles on their test run to the town of Kobo, 80 miles north of Dessie, Wiater said.

They will travel up a road that last year was the scene of bloody fighting between government troops and rebels of the Tigre People's Liberation Front.

No one knows if the road is mined, Wiater said.

''There is a genuine possibility that it is,'' he said. ''Every driver was very worried and I would say most of them were very scared. They deserve a lot of praise.''

The convoy must also deal with unknown conditions at river crossings. Bridges at two major river crossings are either down or very weak, Wiater said.

''That's why we're only using 10-ton trucks,'' he explained.

If the convoy returns successfully, however, plans are being laid for a trucking operation that aims to move 14,000 tons a month into Tigre and Eritrea provinces as soon as possible.

Large trucks, if usable across the rivers, can carry 22 tons apiece, Wiater said.

Food distribution centers are already being set up along the road, and the JRP hopes to take relief as far north as Adigrat, 390 miles from Addis Ababa.

The U.N. Food and Agriculture Organization has estimated that 700,000 tons of relief food will be needed this year to stop famine in Ethiopia. The JRP's 14,000 tons a month would provide a total of only 126,000 tons through December.

#90079u1723 03/20/1990 ~United Press International

DETROIT (MARCH 20) UPI - Domino's business in Asia is headed up, in more ways than one, as the pizza chain strives to maintain its trademark 30-minute delivery guarantee in some of the world's most crowded cities.

Domino's Pizza Inc., with corporate headquarters in Ann Arbor, Mich., has enjoyed dramatic growth in Japan since its first store there was opened five years ago. Fifty-four Domino's outlets now are operating in Japan and the company envisions a ten-fold increase in coming years. Domino's executives were not, however, willing to provide specific sales figures for Japan or other Asian countries.

Corporate spokeswoman Maria Pavelich says the Japanese took very rapidly to fast food delivery, which was not common in that country before the arrival of Domino's.

But getting the job done required some adjustments on Domino's part. For example, delivery cars which the company commonly uses in the United States would quickly become bogged down in the teeming streets of cities like Tokyo. In Japan, Pavelich says, most Domino's pizzas are delivered by motor scooter - and elevator.

Domino's says its delivery personnel actually spend more time traveling up

and down in the elevators of high rise buildings than they do horizontally on the streets.

"The cities are so congested that a lot of times, the delivery areas, instead of being horizontal, are vertical," Pavelich said. In Hong Kong, where Domino's has two stores, pizzas generally are delivered on bicycles.

Delivery areas, which may be geographically smaller than some in the United States, are determined based on "the density of the population - how many people we believe we can service in that amount of time (30 minutes)," Pavelich said.

Another wrinkle which would baffle American delivery drivers - Japanese buildings are not numbered consecutively, but based on the year in which they were built. Peak demand times or "pie hours" are about the same in Japan as in the United States.

While accidents involving Domino's pizza delivery personnel have stirred controversy and led to some lawsuits in the United States, Pavelich says she is aware of no such problems in Japan.

Baseball - another American institution which has been warmly embraced in Japan - was responsible for bringing Domino's to Asia. Domino's owner Thomas Monaghan also owns the Detroit Tigers.

Ernie Higa, who now owns the rights to the name Domino's Pizza in Japan as the company's master licensee, met Monaghan through Tigers President Jim Campbell, who knew Higa's father.

While pizza parlors in this country often adopt Italian-sounding names, reflecting the dish's nominal heritage, the younger Higa "strives in every way to keep Domino's as American as possible," Pavelich said. Being authentically American, she said, is a major selling point with Japanese fast food consumers.

"In the fast food industry, American businesses are the leaders or they are considered leaders in Japan. They are viewed as very clean, with great product quality and great service." Even Japanese-based companies sometimes use American-sounding names like "California Pizza," she noted.

Even when it comes to pizza, however, Japanese consumers still like to have it their way, which means tuna fish is more popular as a topping than pepperoni. And Japanese consumers pay quite a bit more for their pizzas - $16.23 for a large pie - reflecting that nation's higher cost of living, Pavelich said.

Pavelich says differences in the Japanese work force and that country's labor laws can complicate running a pizza stand on the American model.

"People are so highly educated in Japan that it's hard to really get a lot of employees to work in these types of businesses," Pavelich said. She said store managers must be more selective in their hiring because of Japanese laws which prohibit sacking workers.

Domino's has 34 outlets in Australia and one each in Korea, Taiwan and Guam, in addition to its stores in Hong Kong and Japan. The Guam store, which opened in 1988, catering to a mixed clientele of U.S. military personnel and Japanese tourists, had the best first-week sales of any overseas outlet. Singapore and Bangkok are among the sites under active consideration as Domino's contemplates further Pacific Basin expansion.

WASHINGTON (MARCH 20) UPI - Four Republican members of the Senate Judiciary Committee urged the administration Tuesday to stop seeking the recommendation of the American Bar Association on the nomination of federal judges, charging the ABA has compromised its neutrality.

In a letter to Attorney General Richard Thornburgh, the senators cited a list of ''extreme policy declarations'' approved by the ABA's House of Delegates at its midyear meeting, including one which they said was tantamount to approving ''abortion on demand.''

''Frankly, experience make us quite sceptical that the ABA will be able to successfully 'build a wall' between its announced policies and its judicial screening function,'' the senators said.

The four senators signing the letter were Assistant Senate Republican leader Alan Simpson of Wyoming and Sens. Charles Grassley, R-Iowa, Orrin

Hatch, R-Utah, and Gordon Humphrey, R-N.H.

Although not responding directly to the letter, Ralph Lancaster, chairman of the ABA's Standing Committee on the Federal Judiciary, said, ''Our evaluation focuses, as it always has, only on three factors: professional competence, judicial temperament and integrity.''

''We have no 'litmus test' and do not consider the views of the potential nominees on paricular policy issues,'' he said. ''The ABA has adopted over 750 policy positions on legislative issues; none of these is now or will be a factor in the standing committee's evaluations.''

Before submitting a nomination for a federal judgeship, presidents ask the ABA for a confidential evaluation. The ABA recommendation is accorded great weight in the selection of a federal judge and in the Senate confirmation process.

The ABA previously ran into trouble with conservatives over the nomination of Robert Bork to the Supreme Court. While the panel endorsed him, some members thought him not qualified and leaked the split vote to the media. Bork was eventually defeated by the Senate.

The ABA's position on abortion has also stirred up the usually clubby ABA. A number of members have resigned over the position and others have threatened to and a move is afoot to bring the issue up again at the ABA's summer meeting.

In addition to the pro-choice poisition on abortion, the senators said the ABA proposed ''a wholesale reversal of the numerous Supreme Court employment decisions,'' recently endorsed ''extreme anti-gun legislation'' and backed legislation which they said would ''effectively render state and federal death penalties unenforceable.''

''As demonstrated by several recent nomination controversies, a nominee's position on issues such as abortion can be critical to his or her confirmation,'' the letter said. ''Since the ABA is now an avowed advocate of an unlimited pro-abortion position, it can no longer make any credible or legitimate claim to neutrality in evaluating judicial nominees.''

The senators' letter noted that Thornburgh has publicly said that the ABA's positions taken at the midyear meeting called into question the organization's role in the selection of federal judges.

BOSTON (MARCH 20) UPI - Department of Health and Human Services regulations barring the use of public funds for abortion counseling or

referral services are unconstitutional, a federal appeals court ruled in an opinion made public Tuesday.

In a 3-1 decision, the 1st U.S. Circuit Court of Appeals declared the regulations, while for the most part technically permissible under the public health service law they were drafted under, are in fact unconstitutional.

''The effect of the regulations is to infringe upon women's freedom of reproductive choice by denying them access to important information and by interfering with the physician-patient relationship,'' Judge Hugh Bownes wrote for the majority.

That in turn violates abortion rights guaranteed under the landmark Roe v. Wade decision and left standing by the Supreme Court's split decision in the 1989 Webster decision, the court ruled.

''The secretary's policy does not merely fail to remove obstacles to abortions, it create obstacles,'' Bownes wrote, adding the law also impinges on First Amendment freedom of speech by denying a woman's right to receive all pertinent information about abortion.

In a dissenting opinion, Judge Juan Torruella declared the regulations did not interfere with rights granted under Roe.

''The secretary (of health and human services) has merely refused to fund an activity which the government is not constitutionally required to support, without imposing legal obstacles to a citizen's choice of action in a protected area,'' Torruella wrote.

The regulations, which involve family planning funds in the so-called Title 10 program, were announced in 1988 by the Reagan administration but were promptly enjoined by a U.S. District Court in Boston.

The regulations govern the use of $140 million by 4,000 organizations around the country.

The restrictions forbid any counseling about abortion by recipients of family planning money and require such recipients to direct pregnant women only to facilities that care for the ''health of the unborn child.''

Opponents of the regulations contend they skew the information provided to thousands of women, most of them low-income and many of them teenagers who depend on federally financed family planning centers for counseling and advice concerning issues of contraception, family planning and abortion.

Justice Department lawyers had argued the regulations do not interfere with a woman's right to an abortion, a right upheld in last year's Webster

decision. But government attorneys argued unsuccessfully the government is entitled to discourage abortion referrals.

David Cole, staff lawyer for the Center for Constitutional Rights, hailed the ruling as declaring ''government cannot brainwash low-income women by giving them ideologically skewed information regarding decisions about their bodies and lives.''

He said the proposed regulations, in the guise of assisting young and low-income women, would deny them the same right to make an informed decision about childbirth or abortion that those who can afford to pay a doctor enjoy.''

Cole said the government had sought to have the original May 1989 ruling ''reconsidered in light of Webster,'' the 1989 Supreme Court decision allowing states to impose restrictive regulations regarding abortion.

Webster was one in a string of rulings that held governments do not have an obligation to fund abortions and the federal government, in arguing the regulations should be upheld, sought to extend that reasoning to say governments are not obliged to fund speech about abortion.

Arlene Champoux, Massachusetts Citizens for Life legislative director, said the decision ''would in effect enable the federal government to pay for abortion again in violation of another part of the Constitution.

''We are developing a rights paranoia,'' she said. ''There was a time in this country when we spoke of rights, we spoke of responsibilities in relation to the rights. I'd very much like to see (that) reintstated. There is a right of a child to life.''

Last November in New York, the Court of Appeals for the 2nd Circuit ruled the counseling restrictions are constitutional.

The issue is virtually certain to be reviewed by the Supreme Court next term.

WASHINGTON (MARCH 20) UPI - Clayton Williams, the Texas rancher-oilman turned flamboyant GOP gubernatorial nominee, met with President Bush Wednesday and said he wants to ride the president's popularity ''like a bucking bronco.''

Williams, 58, described by Republican National Committee Chairman Lee Atwater as the ''political phenomenon of 1990,'' told reporters that Bush said he and the first lady will campaign for him in Texas, the president's home state.

Bush also offered simple advice. ''He told me, 'Just keep doing what you've been doing,''' said Williams, who won the Republican primary last week with his own brand of politics.

Williams' campaign took off when he did a series of ''get tough'' television commercials in which he said he would introduce young drug offenders ''to the joy of busting rocks.''

Williams, dressed in a blue pinstripe suit, a white cowboy hat and black boots, said of the popular president: ''He has some wonderful coatails and I'd like to grab a hold of them and ride them like a bucking bronco.''

Williams will face the April 10 winner of the Democratic run-off election between Texas State Treasure Ann Richards and Texas Attorney General Jim Mattox.

#90079u1772 03/20/1990 ~United Press International

CHICAGO (MARCH 20) UPI - Soybean futures rallied to their highest levels in several weeks Tuesday on the Chicago Board of Trade.

Follow-through buying supported soybeans, although there was some profit-taking in the wake of strong gains Monday. The prospect of a smaller supply of South American soybeans available for export contributed to the strength of the Chicago market.

Soybean meal rallied on active commercial buying and closed higher across the board, but soybean oil prices were virtually unchanged in lackluster trading.

Corn was higher and wheat was mostly higher at the close. Corn had underlying support from hopes of an export sale to Egypt, although gains were limited by local selling.

Nearby wheat rallied on short-covering and light deliveries against the March contract while favorable weather conditions kept the deferred wheat on the defensive.

Basis levels were mixed.

At the close, corn was up 1/2 to 2 1/2, soybeans up 1 1/2 to 2 3/4, wheat unchanged to up 3 3/4 and oats off 1/2 to 2 cents.

#90079u1778 03/20/1990 ~United Press International

NEW YORK (MARCH 20) UPI - Venezuela and its bank creditors said Tuesday they reached a pact to trim the South American nation's $34 billion foreign debt and annual interest payments while providing fresh loans to stimulate economic growth.

The debt reduction package, the third to be negotiated under a plan advanced last year by U.S. Treasury Secretary Nicholas Brady, could reduce Venezuela's $20 billion commercial bank debt by one-third, officials said.

Depending on the options selected by the 400-odd banks which were represented in negotiations by a bank advisory committee led by the Chase Manhattan Bank, Venezuela could receive up to $11 billion in new loans.

"We are very pleased," said Miguel Rodriguez, Venezuela's planning minister, who was assisted in the talks by central bank president Pedro Tinoco and chief negotiator Edgard Leal. "This accord is a complete program for restructuring the Venezuelan debt." "The main objective is to reduce the external debt and provide the necessary funds so Venezuela can undertake growth and development," he said.

Bank advisory committee president and Chase executive Robert Murphy said the agreement was "comprehensive enough to be attractive to the international community and, at the same time, meet Venezuela's needs."

Murphy said the agreement will promote Venezuelan growth during the economic program launched a year ago by the government of President Carlos Andres Perez. He said his committee "will work diligently" in coming weeks to garner support for the pact from the banks it represents.

In Washington, the U.S. Treasury issued a statement saying officials welcomed the agreement, saying that "the package preserves a maximum amount of freedom of choice for creditor banks in a market context."

The plan calls for Venezuela to repurchase between $5 billion and $7 billion of its own debt on the secondary market. The remaining principal and interest payments are to be reduced by about 30 percent. Banks will provide up to $11 billion in fresh capital to sustain economic growth.

#90079u1781 03/20/1990 ~United Press International

(MARCH 20) UPI - Officials in Waynesboro, Georgia, say a power failure prompted an emergency evacuation at the Georgia Power Company's Plant Vogtle nuclear station today. NO injuries or health hazards are reported. A spokesman says a truck hit a power pole, knocking out electrical power to the plant. He emphasizes that the plant's nuclear reactors are NOT affected. Electrical service has been restored.

Some economists are disappointed by a federal report showing the nation's merchandise trade gap widened to nine and one-quarter-BILLION dollars in January. Mellon Bank economist Norman Robertson says expanding oil imports are ''going to emerge as a major problem'' in this decade. It was a boost

in petroleum imports that fueled the January hike in the trade deficit.

Interim Romanian President Ion Iliescu is appealing for calm today after ethnic clashes rocked a Transylvanian city. Reports say one person was killed and 11 others injured in yesterday's violence in which Romanian nationalists attacked ethnic Hungarians. Army troops patrolled the streets today to prevent further clashes.

Soviet Foreign Minister Shevardnadze met with African National Congress leaders today in Zambia and assured them Moscow would support their fight against apartheid . He says South Africa has now entered into the decisive stage of its racial reforms. Moscow provides the bulk of the A-N-C's military funding.

Senate Democratic leader George Mitchell says the Bush administration has already rejected the deficit cutting plan proposed by fellow Democrat Dan Rostenkowski of Illinois. Mitchell says White House budget director Richard Darman has opposed every element of the plan... even though the White House says it's giving the proposal due consideration.

#90079u1838 03/20/1990 ~United Press International
WASHINGTON (MARCH 20) UPI - Environmental groups Tuesday urged Congress to enforce an 18-year-old U.S.-Canadian agreement to rid the Great Lakes of toxic pollutants, and they recommended using the Clean Air Act to do so.

The organizations, led by the Sierra Club, said the federal government has failed to implement the Great Lakes Water Quality Agreement, leaving the five lakes more endangered than ever.

''This is indeed a momentous and crticial time for the Great Lakes,'' said Brett Hulsey, Midwest associate representative for the Sierra Club.

''We feel that Congress and the federal government should make this agreement law,'' Hulsey said. ''We've been told several times by state

administrators that they don't believe they need to comply with international agreements. We think that's wrong.''

The United States and Canada signed the accord in 1972, and a renewal in 1978 included the goal of virtually eliminating ''the discharge of any and all persistent toxic substances.''

Hulsey said the current Clean Water Act and an amended Clean Air Act that the Senate is expected to vote on later this week should be used to enforce the agreement.

John Jackson, a Canadian environmentalist and president of Great Lakes United, said his country must share part of the blame for not enforcing the pact.

''All too frequently, the U.S. and Canadian federal governments and the Great Lakes states and provinces ignore the requirements of the agreement '' Jackson said.

Jackson said actions that should be taken include setting deadlines for completion of plans to clean up 42 designated toxic ''hot spots'' in the Great Lakes region, and setting uniform water quality guidelines to reduce disparities in standards between the Great Lake states and provinces.

The Great Lakes constitute the world's largest inland bodies of fresh water. They contain about 95 percent of the fresh surface water in the United States and provide drinking water to 23 million people.

Reports of such environmental threats as contaminated sport fish in Lake Michigan and the onslaught of the zebra mussel shellfish in Lake Erie have heightened concern among enviornmentalists nationwide, as well as residents and lawmakers from the Great Lakes region.

#90079u1890 03/20/1990 ~United Press International

NORFOLK, VA (MARCH 20) UPI - Families of the 47 sailors killed in the USS Iowa blast hope to gather 1 million signatures calling on the Defense Department to reopen the Navy's inquiry into the tragedy, a family spokeswoman said Tuesday.

The families, located throughout the country, were sent copies of a petition last week, said Kathy Kubicina, sister of Clayton Hartwig, a gunner's mate who the Navy cited as the probable cause of the Apr. 19 gun turret explosion.

Hundreds of signatures have been gathered and Kubicina said she's hopeful the goal will be attained next month.

''The response has been wonderful,'' said Kubicina, who lives in Cleveland Ohio. ''We have a lot of support out there and we just hope people will sign up and support our cause.''

The petition, written to Defense Secretary Dick Cheney, refers to a recently released congressional review of the Navy's investigation into the explosion in the battleship's No. 2 gun turret. A Mar. 5 report released by a joint panel of the House Armed Services Committee sharply criticized the Navy's investigation for omitting information and creating a circumstantial case against Hartwig.

The petition refers to the panel's findings and requests Cheney to take

responsibility for ''direct involvement in requiring the U.S. Navy to identify the real cause of the Apr. 19, 1989 explosion aboard the USS Iowa.''

A Navy spokesman said Tuesday that the service had no plans to reopen its investigation into the explosion, which occurred during gunnery exercises off Puerto Rico.

The Navy stands by its conclusion that the blast was a ''wrongful and intentional act, most probably committed by'' Hartwig, said Lt. Mark Walker, a Navy spokesman in Washington.

Kubicina has been leading a fight to clear her brother's name, ever since the Navy issued its official report into the explosion last fall. While the Navy has stuck to its findings, Kubicina said she is optimistic the petition will help keep up interest in finding the exact cause of the turret explosion.

She noted a Senate subcommittee and the General Accounting Office are still reviewing the Navy's report. Kubicina said she will discuss the investigation with GAO officials later this month.

''I really believe that these guys are taking an interest,'' Kubicina said. ''I think these petitions will be the thing that does the trick ... to get the Navy to take a second look.''

Kubicina said the families hope to collect the million signatures by the April 19 anniversary of the explosion. A memorial ceremony is to be held aboard the battleship in Hampton Roads on that date.

DETROIT (MARCH 20) UPI - A top Chrysler Corp. executive said Tuesday that the company will add a driver's side air bag to its popular minivan models in about 18 months' time but that these safety devices will be "less effective" than the ones now offered in Chrysler cars.

Chrysler Motors Chairman Bennett E. Bidwell told a meeting of the Automotive Press Association in Detroit the No. 3 automaker is "working as fast as we can get there" to offer the balloon-like devices on its front-drive minivans.

"But it will be less effective than the other supplemental restraint devices," Bidwell said, primarily because the minivan's design places front-seat occupants further and higher up from the dashboard and steering wheel.

No other minivans are currently offered with air bags or automatic front-seat belts because, unlike cars, they are not yet required by federal law to be equipped with passive restraints.

"A higher priority is to install rear-seat shoulder harnesses," Bidwell said, adding that Chrysler's minivans have proven to be a crashworthy design.

Adding air bags to Chrysler's minivans, first introduced for 1984, will most probably be made as a running change to the 1991 Dodge Caravan, Plymouth Voyager, and Chrysler Town & Country models that go on sale this fall, a company spokesman said.

Chrysler, which has an aggressive advertising campaign aimed at touting its advantages over other domestic autos and especially over imports, will soon begin airing commercials using Chrysler drivers who have escaped serious injury or death because of air bags, Bidwell said. Chrysler currently offers driver's side air bags on all its North American-built cars, something other U.S. carmakers do not do.

Bidwell, a harsh critic of Japan's trade practices, also said Chrysler's ad campaign has so far "reopened the dialogue" on the merits of American cars. "I think the verdict was in - Japanese products are great and American products are not great," he said, adding it remains to be seen if Chrysler's sales will improve as a result of the commercials.

Bidwell also said he does not rule out Chrysler or the industry lowering car prices as a way to stimulate what he called "kind of mediocre" industry sales since the start of the 1990-model year last October.

"Ninety-five percent of people would say car prices are too high. ... But if you ask me what to do about it, I don't know," he said, noting that auto companies get more publicity when they frequently revise rebate offers or other buyer-incentive programs. "(Lowering prices) makes good copy for two days, and then it's time to wrap the fish in the newspaper that printed it," he said.

On the labor front, Bidwell said he hopes a strike by the United Auto Workers union against one of the nation's top carmakers can be averted in late summer or early fall as the UAW seeks to replace current national labor pacts with new agreements that enhance job security. "The mood's tough on both sides," he said. Current three-year labor pacts between the UAW and each of the nation's Big Three automakers expire Sept. 14, with negotiations to start this summer.

#90079u1911 03/20/1990 ~United Press International

CAIRO, EGYPT (MARCH 20) UPI - Libyan opposition sources in Athens, Greece, said Tuesday Col. Moammar Gadhafi ordered his own security forces to burn down a chemical plant in Rabta, south of Tripoli, to prevent a possible U.S. military strike.

However, a spokesman for the opposition National Front for the Salvation of Libya in Cairo declined comment on the allegation, and Western diplomatic sources said they could not immediately corroborate the claim.

The Libyan news agency, Jana, quoted Gadhafi as calling on Islamic states to boycott the West.

''We should boycott these forces and should not allow anyone to boycott us '' Jana, monitored by the British Broadcasting Corp., quoted Gadhafi as saying in a speech Monday at the opening session of the second general congress of the World People's Islamic Leadership in Tripoli.

''We are the ones who should boycott them, given that they need us to consume their products,'' he said.

In remarks reminiscent of late Egyptian nationalist leader Gamal Abdel Nasser, Gadhafi said, ''Libya, which is the heart of the Islamic world, declares that it does not need America, Britain, Germany or any of these crusader countries. We will not lose anything.

''We welcome this embargo, so that we can close our markets to their trivial products, which have corrupted us.''

Gadhafi also called on Islamic states to cut ties with the West.

''No Islamic country should have relations with the U.S. government and its allies. Furthermore, the break must be forever and rigorous,'' he said.

The charge that Gadhafi ordered the burning of the plant came from a Libyan opposition source in Athens in a telephone interview with United Press International.

''We have heard from our people in Libya that Gadhafi himself ordered the fire at Rabta, to ensure the Americans had no excuse to launch an attack (on the plant),'' the source, who asked that his name not be used, said. ''Gadhafi said, 'I will burn this plant down myself rather than give the American dogs an excuse to bomb it.'''

The source said Gadhafi lived in fear of an air strike similar to the one in April 1986, when U.S. jets bombed Tripoli after Washington accused the mercurial Libyan leader of sponsoring anti-U.S. terrorism.

''Gadhafi lives in fear of another American strike.... He knows neither

the Russians nor any other Arab state will stand up for him except with words,'' the source said.

A spokesman for the NFSL in Cairo said the group's delicate position in Egypt following the improvement in ties between Gadhafi and Egyptian President Hosni Mubarak precluded the organization from making any official comment.

''We don't have an official status in Egypt now.... We only have a social status,'' the spokesman said.

One Western diplomat said he doubted the Libyans would burn their own plant down, but did not rule out such a possibility.

''We don't know yet the extent of the damage at Rabta,'' the Cairo-based West European envoy said. ''It seems unlikely at first glance that even Gadhafi would burn his own plant down.

''But Gadhafi is capable of anything.... And if he thought this action would prevent an embarrassing U.S. military strike, while at the same time making Libya appear to be the victim of foreign saboteurs, then it could make sense."

The United States hinted before the Rabta fire last Thursday that it had not ruled out the use of force unless Gadhafi halted what U.S. and West German officials said was the production of mustard and nerve gasses.

Gadhafi, in his first statement on the fire last week, did not directly accuse the United States and Israel of starting the blaze, but said they had the most to gain from the act.

Jana news agency quoted him as blaming saboteurs for starting the fire, and Libyan Ambassador Abdurahman Shalgam said in Rome Monday that a number of people had been arrested and could face execution.

Shalgam said Libya was ready for an international inspection of the plant, provided all countries in the region, including Israel and as well as the United States, also agreed to have their chemical plants inspected.

''Rabta is a large industrial complex whose existence has never been a secret and which produces ferrous, plastic, petrochemical and medicinal goods,'' Shalgam said.

#90079u1919 03/20/1990 ~United Press International

NEW YORK (MARCH 21) UPI - Street News, which bills itself as the nation's only homeless newspaper, Tuesday announced it would start operating in San

Francisco and Washington and would try to employ more homeless in selling the paper.

Founder and editor-in-chief Hutchinson Persons, speaking at the paper's first news conference, also tried to defuse criticism of financial mismanagement at the paper.

The homeless vendors of Street News buy papers at two Manhattan sales offices and keep 45 cents of the monthly tabloid's 75-cent cover price. Another nickel is put into an ''apartment fund,'' to be used as a one-time grant for housing deposits.

Persons said an apartment referral service and psychological counseling would be made available to the 1,200 vendors who now sell the newspaper throughout the city, and that branches would soon be operating in Washington, D.C., and San Francisco.

Citing as his influences philospher Ayn Rand and America's founding fathers, Persons said his intention from the beginning had been to help those who could help themselves.

''We're not claiming Street News is going to help every single homeless person,'' he said.

Persons admitted that New York City Street Aid, the organization which publishes Street News, suffered from financial confusion in its first six months of operation.

The former rock musician, who now earns a salary of $1,000 a week, said he hoped the addition of a full-time accountant to the staff and a new management team headed by family friends would make the paper more accountable to its critics.

Business manager Jack Scott admitted that the group may have erred by concentrating solely on publishing the newspaper.

''The stuff that was not pertinent to putting the newspaper out was put on the back burner,'' he said.

He said a probe into its finances launched last fall by the office of the state attorney general office was the result of miscommunication, not deception.

#90079u1922 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - President Bush met close to an hour Tuesday with Costa Rican President-elect Rafael Angel Calderon and said the

U.S.-backed Nicaraguan Contra rebels should be demobilized and disarmed by peaceful means.

During the meeting, Calderon also requested U.S. assistance and later told reporters that Bush expressed ''a clear political will'' to help the Central American country. Calderon, who takes office on May 8, said that no specific amounts of aid were discussed.

Calderon, who was on a private visit, said that he told Bush that private investment was being encouraged and Costa Rican officials also were discussing development aid with the International Monetary Fund and the World Bank.

He said that the subject of Cuba, which is being further isolated as the only Marxist government in the hemisphere, was not discussed in the Oval Office.

He told Bush of the ''affection of the Costa Rican people'' for him and the United States.

And Calderon added a nostalgic note that 50 years ago his father visited the White House in the same capacity.

#90079u1925 03/20/1990 ~United Press International

(MARCH 20) UPI - The Census Bureau, in one of the most controversial projects of its 200 year history, sent out 15,000 census takers Tuesday in an unprecedented effort to count homeless Americans huddled on grates or taking refuge in shelters.

''We believe that a homeless person has the same right as every American in the country to be counted,'' Bureau Director Barbara Bryant told a Washington news conference. ''The cities and communities in which these individuals live have the right to have them included in their count.''

During the $2.7 million operation, dubbed ''Street and Shelter Night,'' an estimated 15,000 census workers will visit shelters, ride subways, go under bridges, monitor abandoned buildings and walk along beaches and other places the homeless congregate.

The counters, travelling in teams, were to wear bright identifying vests and carry walkie-talkies. They were under orders not to roam the streets, going instead to already selected sites.

Despite the nationwide effort - never before attempted - to find the forgotten Americans, the project has drawn considerable fire from some advocates of the homeless who contend it cannot provide an accurate count

and its numbers will be used to slash funding from needed programs.

Underscoring that discontent, members of the Community for Creative Non-Violence dumped a load of sand in front of the Commerce Department's Herbert Hoover Building near the White House. A banner accompanying the sand read: ''Like grains of sand, the homeless cannot be counted.''

But Bryant insisted that while the count won't be exhaustive, ''these numbers will be believable. Is it hundreds of thousands? Is it millions? We're going to know that kind of scope.''

Estimates of the number of homeless have fluctuated widely, with some government estimates putting the figure at 250,000-350,000 people and some homeless advocates arguing it is as high as 3 million people - a quarter of a million or more of them children.

The number determined in the count will become part of the 1990 census and will be used when state legislatures begin the reapportionment process and to allocate federal aid. An specific number for the homeless will not be reported until early 1991.

Census officials said local communities have provided the bureau with a list of 11,000 shelters and a list of another 11,000 places, such as abandoned buildings and parks, where the homeless are known to congregate.

Bureau officials acknowledge their method will miss some - loners, those who scrounge around dumpsters or sleep in doorways or other secluded places.

Anita Beaty of Atlanta's Task Force for the Homeless, a coalition that drew up a list of 77 homeless shelters in the area, said most shelter directors have agreed to cooperate with the count but have serious reservations.

''We've been really alarmed at the methodology'' the Census is using, she said. ''There's no way they're going to get an accurate count.''

An official for the Ohio Coalition for the Homeless agreed and said cold weather would make a hard job even more difficult.

''It is going to be inaccurate, and then it is going to be used against the interests of homeless people when it is time to appropriate money,'' said Alana Shindler, associate director of the coalition.

The ''Street and Shelter Night'' was divided into three phases. In the first, from 6 p.m. local time to midnight, the special census takers planned to interview and count people in shelters and low-cost hotels and motels.

From 2 a.m. to 4 a.m., the counters were to go to streets and other outdoor sites where people are known to sleep and count them even if they have to estimate such facts as age, race and sex.

A third phase, from 4 a.m. to 8 a.m., census workers planned to wait outside abandoned buildings and similar spots, counting people coming out and trying to get information about others inside.

Many of the workers were from the ranks of the homeless, hired for one night. Pay scales varied around the country.

LaVerne Collins, director of the census region that includes Delaware, Maryland, New Jersey and Pennsylvania, estimated homeless people accounted for 200 of the 1,800 workers in Philadelphia.

Declaring the bureau will find ''the vast majority of those in shelters and on the streets,'' Census chief Bryant said, ''Homelessness is a social problem in the 1990s at a level unlike 1980,'' when the last decennial census was taken.

''Our society cannot address this problem without knowing the order of its magnitude,'' she said.

#90079u1938 03/20/1990 ~United Press International

HOUSTON (MARCH 20) UPI - The Food and Drug Administration has approved expanded testing of an implantable device that may control or prevent epileptic seizures in patients who do not respond well to drug therapy, the device's maker said Tuesday.

''This authorization enables us to expand the clinical investigation to include up to 100 patients and 15 leading medical centers in the U.S.,'' said Reese S. Terry Jr., chairman of Cyberonics Inc., the firm that developed the NeuroCybernetic Prosthesis, or NCP.

''It means that, by the end of this year, we will be able to have completed the equivalent of more than 50 patient-years of testing to evaluate the NCP's effectiveness in stopping and preventing epileptic seizures. On the basis of that data, we may be able to ask the FDA for permission to make the device generally available.''

Pilot study results indicated the device may be safe and effective in controlling and preventing certain types of epileptic seizures in patients who have not responded to drug therapy, the company said.

Four of 10 patients included in the pilot study had reductions of more

than 75 percent of their seizure rates, Cyberonics said. The remaining patients, with the exception of one, reported either smaller reductions in seizure rates, decreased seizure lengths and intensities or significant improvement in cognitive ability.

The NCP works by transmitting mild electrical signals through the vagal nerve - the largest nerve in the body - to the brain. The signals decrease the brain's sensitivity to conditions or stimuli that can trigger epileptic seizures.

The pocket watch-size device, similar to a heart pacemaker, is implanted beneath the skin below the left collarbone. An insulated wire links it in the patient's neck with the vagal nerve, which runs from the brain to the internal organs.

The frequency and intensity of the device's stimulation pattern can be reprogrammed from outside the body. It also may be activated by a patient who senses the onset of a seizure.

More than 2 million Americans have some form of epilepsy, a disturbance of electrical rhythms in the brain that cause occasional convulsions or clouding of consciousness.

In at least 170,000 of these cases, the disease cannot be controlled with either drugs or surgery. These patients, who are likely to average one or more seizure each month, are primary candidates for the Cyberonics device.

#90079u1941 03/20/1990 ~United Press International

MOSCOW (MARCH 20) UPI - A legislative committee moved toward satisfying a U.S. condition for improved trade relations Tuesday and approved a bill lifting most travel and emigration restrictions for Soviet citizens.

The bill passed by the Parliament's Foreign Affairs Committee would remove the requirement for exit visas, ending a tragic chapter of Soviet history in which tens of thousands of ''refuseniks'' were denied permission to leave the country and sent to prison for even seeking it.

Committee chairman Alexander Dzasokhov told the official Tass news agency that the panel members will push on the floor of Parliament for the bill's passage during the current session of the Supreme Soviet, which ends in late April.

The measure's supporters also urged the Parliament to resolve other issues related to foreign travel, especially money exchange laws that severely limit the amount of hard currency Soviets can take out of the country.

Fyodor Burlatsky, a chief sponsor of the bill, said it is ''a major indicator of democratization in the Soviet Union,'' Tass said.

Burlatsky said that ''unlike many economic laws that are undoubtedly more fundamental, this one will have an immediate effect and will boost the Soviet Union's prestige abroad.''

The right to free movement for Soviet citizens is at the center of the human rights improvements that Washington has long demanded of Moscow as a requisite for lifting barriers to better trade between the two superpowers.

With the travel bill and a separate measure on freedom of conscience and religious belief heading toward expected enactment, U.S. and Soviet officials have begun negotiations toward giving Moscow the ''most favored nation'' trading status that would cut tariffs on Soviet goods.

''Under the provisions of the (travel) bill, no permission is required for Soviet citizens' departure from the country, and exit visas will no longer be needed,'' Tass said.

''A passport for traveling abroad will be issued for a period of five years to whomever applies for it to a home affairs agency,'' it said. ''The time abroad is determined by the citizen himself.''

The measure sets ''state-security considerations'' or ''criminal proceedings'' as grounds for denying the new passport, but ''a citizen may lodge an appeal with any authority, right up to the U.S.S.R. Supreme Soviet,'' Tass said.

The state-security provision could provide a loophole that might enable zealous bureaucrats to continue to deny travel permission to the tens of thousands of Soviets who work in the giant military-industrial complex.

But the bill cuts in half, from 10 to five years, the time a Soviet holding a defense-related job must wait before he or she can travel abroad.

The number of Soviets emigrating or traveling in foreign lands has already skyrocketed under President Mikhail Gorbachev's liberalized policies.

Burlatsky said 235,000 people left the country for good last year and 2 million went abroad on temporary trips, including 300,000 to Western countries. He said the numbers in both categories are expected to double this year.

But Soviets still face bureaucratic battles and long waits for their travel documents.

The bill bound for Parliament gives the government no more than one month

to issue the new passport to citizens planning a trip and sets a three-month limit for issuing a passport for permanent emigration.

HARTFORD, CT (MARCH 20) UPI - Gov. William A. O'Neill, who led Connecticut through the economic ups and downs of the 1980s, announced Tuesday he will not seek re-election to a third full term in November.

Despite the lowest poll ratings of his career, the Democratic governor said he believed he could have won in November but was not prepared to pay the price of a tough - and likely negative - campaign.

''I firmly believe I could win re-election. But the modern process of campaigning is a rigorous one,'' O'Neill, 59, told reporters at his official residence.

''It exacts a toll on the body and the spirit which, at this point in my career, I do not choose to pay,'' said O'Neill, who as lieutenant governor succeeded Ella T. Grasso, who resigned Dec. 31, 1980, because of cancer.

O'Neill, a former tavern owner, led Connecticut through the economic tough times of the early and late 1980s and oversaw adoption of major new spending programs in the boom years in the middle of the decade.

He was easily elected to two full terms.

O'Neill has slipped in the polls, however, as the state continues to

struggle with budget deficits, despite record tax hikes of nearly $1 billion last year and a hike in the nation's highest state sales tax to 8 percent.

If he completes his current term, O'Neill will be the state's longest-serving governor since Jonathan Trumbull II died in office in 1809 after serving 11 years and eight months.

Rep. Bruce A. Morrison, D-Conn., is the only one who has formally announced candidacy for the Democratic gubernatorial nomination. Morrison has been campaigning for several months and several times called on O'Neill to withdraw from the race.

However, with the growing uncertainty over whether O'Neill would run, other Democrats in recent days have indicated an interest in running.

Among those considering a run if O'Neill withdrew from the race were state Rep. William J. Cibes Jr. of New London, co-chairman of the Legislature's Finance, Revenue and Bonding Committee, and state Senate President Pro Tempore John B. Larson of East Hartford.

The Republican candidates are Rep. John G. Rowland of Waterbury, state Senate Minority Leader Reginald J. Smith of New Hartford, New Haven developer Joel Schiavone and banker Joseph McGee of Fairfield.

Former Republican Sen. Lowell P. Weicker Jr. also is running as an independent.

#90079u1974 03/20/1990 ~United Press International

WINDHOEK, NAMIBIA (MARCH 20) UPI - U.N. peacekeeping forces reveled in the success of their most ambitious operation in 30 years as independence dawned on Namibia at midnight Tuesday, ending a yearlong mission to close out Africa's colonial history.

''There was a job to be done and you did it with total commitment,'' U.N. Secretary-General Javier Perez de Cuellar told the peacekeepers, know as Blue Berets, assembled on a parade ground of a former South African base now occupied by the Nobel Prize-winning peacekeeping troops.

Not a shot was fired in combat since the troops landed on Namibian soil, elections certified by the U.N. boss as free and fair produced a constitution heralded as one of the most democratic in Africa and peace has largely returned to a land torn asunder by war for a quarter century.

At the same time, a new army to maintain peace is emerging. In the spirit of the call for national reconciliation by Namibia's new president, Sam Nujoma, the new defense force consists of equal numbers of former guerrillas and former South African-backed troops.

''It's one of the pleasant surprises in this process that has people walking around pinching themselves, saying 'can it really be true,''' said U.N. spokesman Fred Eckard.

''I don't think you can compare it with much else. It was short and sweet and successful ... and under budget.''

Deployed under U.N. Security Council Resolution 435 approved on Sept. 29, 1978, the mission was to formally end at midnight Tuesday as the South African flag dropped over the territory ruled by Pretoria since 1915.

''The implementation of Security Council Resolution 435 was one of the most complex operations ever undertaken by the United Nations, politically logistically and administratively,'' Perez de Cuellar said.

Three U.N. helicopters dropping hundreds of tiny U.N. and Namibian flags flew over the U.N. ceremony as Kenyan, Malaysian and Finnish troops marched past U.N. officials, including Perez de Ceullar and U.N.

Transition Assitance Group Commander Gen. Prem Chand.

As a military band brought up the rear, four turboprop planes flew overhead, ''United Nations'' emblazoned on the underside of their wings.

The mission sent an average 6,700 U.N. personnel representing 109 nations into Namibia, including a 4,300-member military force. UNTAG manned 200 posts across the sparsely populated former German colony.

South Africa, its sanctions-strapped economy further drained by military involvement in Namibia and Angola, accepted the plan on Dec. 22, 1988, in a U.S.-brokered deal that also included a withdrawal of 50,000 Cuban troops from Angola by July 30, 199l.

The $416.2 million undertaking was the 15th for the U.N. troops whose previous missions in such areas as Cyprus, Lebanon and the disputed Kasmir between India and Pakistan earned the Nobel Peace Prize in 1988.

None has been regarded as so ambitious since the deployment of 22,000 troops in the former Belgian Congo in 1960.

The U.N. mandate included monitoring the withdrawal of South African forces from Namibia and the return of 43,332 Namibian exiles, among them guerrillas of the South West Africa People's Organization. Elections for a 72-seat constituent assembly that drafted the post-independence charter produced a 97 percent voter turnout, U.N. officials said.

With the exception of the debacle in the first few weeks of the U.N. mandate, when more than 300 SWAPO guerrillas were killed by South African troops when they crossed into Namibia from Angola, the operation has been widely regarded as a major success.

''The trick will be to replicate it elsewhere in the world to build a track record,'' said Eckard, echoing the sentiments of other U.N. officials casting their eyes on Cambodia as possibly the next assignment for the peacekeepers.

''A lot of our people are so excited by the field experience ... hoping to do it all over again.''

Although no shot were fired in combat by the peacekeepers, 17 were killed - 16 in traffic accidents and one in an apparent robbery.

Already some 1,000 military troops and 350 police have been sent home, leaving about 5,275 still in the territory, including 1,500 police, many of whom were to stand side-by-side with Namibian police as a ''stabilizing factor'' during the independence celebrations.

The first large wave of troops will leave Namibia Sunday and the bulk of the other military units will depart by month's end.

#90079u1986 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - President Bush, refusing to wilt under pressure from produce interests, ''simply hates broccoli'' and will not reverse his personal ban on the vegetable, the chief White House spokesman said Tuesday.

Press secretary Marlin Fitzwater said broccoli growers have protested to the White House ''about this important matter and we are very sensitive to the broccoli growers.''

''Unfortunately, the president simply hates broccoli and won't eat it,'' said Fitzwater.

''He simply banned it from being served to him,'' the spokesman said, confirming a gustatory item in the latest issue of U.S. News and World Report.

The broccoli ban includes the presidential plate in the White House as well as aboard Air Force One, where the standard fare is substantially above the quality of most airplane food.

In an effort to take some of the steam out of the issue, Fitzwater said, ''We tell the broccoli growers the White House staff loves broccoli and we think it's good for you.''

''But,'' he added, ''what can you expect from a man who likes pork rinds?''

WASHINGTON (MARCH 20) UPI - Sen. Bob Graham, D-Fla., accused the United Nations Tuesday of failing to pressure Cuba to halt human rights violations, and new allegations emerged that rights activists are under siege by the Castro government.

''It is imperative that the United Nations accept its responsibility to protect the human rights of people within Cuba,'' Graham said at a news conference.

Graham was flanked by Maria Cazabon, a Cuban exile living in southern Florida whose family has been harassed by security agents for their high-profile efforts to publicize human rights violations.

Cazabon recited repeated incidents over the past several weeks during which the government has spurred pro-Castro protests surrounding Cazabon's family house in Havana.

On March 5, she said, a screaming mob assembled for more than 12 hours at her family's house, where they ''broke down the front door, hurled heavy rocks, broke most of the windows and thoroughly destroyed the front and side yards.''

Days later, she said, two men claiming to be retired army officers came into her family's house and threatened them with violence.

''The stage is now set for what could easily become an escalation of violence with god knows what hideous results,'' she said.

Ironically, the March 5 protest was preceded by one day by a vote of the U.N. Human Rights Commission criticizing Cuba's human rights record and pledging to re-examine abuses next year.

Graham said Castro was obviously unnerved by the vote, which would explain the ensuing crackdowon among dissidents, 11 of whom were rounded up and jailed.

Graham challenged the U.N. to ''take the responsiblity'' for its actions and assure the safety of political dissidents.

''It is now the responsibility of the United Nations to see that those people are protected,'' he said.

(MARCH 20) UPI - Nations from around the world sent heads of state and senior government officials to the African nation of Namibia today for celebrations marking its indepedence after 75 years of South African rule. The ceremony in the capital of Windhoek will climax an ambitious U-N-supervised program that ends the nation's status as Africa's last colony. A Namibian newspaper today said the blood spilled in the nation's fight for independence will NOT be forgotten.

A major step was taken today toward the launch of the one-and-a-half-BILLION-dollar Hubble Space Telescope. The crew of the shuttle Discovery successfully completed a practice countdown at Cape Canaveral that concluded with the simulated ignition and shutdown of the ship's three main engines. Discovery and its five-member crew are set to blastoff April 12th.

President Bush says he is urging peaceful change in Lithuania and says he has contacted Soviet President Gorbachev about Lithuania's declaration of independence. Bush told reporters at the White House today he's- quoting now- ''glad that they are still talking peaceful change.'' Reports from Moscow indicate Gorbachev met with two members of a Lithuanian delegation in the first such talks between Moscow and the Baltic state.

Some of the nation's economists were disappointed with a government report today showing inflation at the consumer level rose one-half of one percent last month. The government says much of the increase is related to higher costs for apparel and up-keep. Economist Hugh Johnson of First Albany Bank in Albany, New York, says the report shows that the inflationary relief seen at the wholesale level in the Producer Price Index has NOT been passed through to consumers.

WASHINGTON (MARCH 20) UPI - The federal government proposed rules Tuesday to protect nursing-home residents from being charged for items covered by Medicaid and Medicare, but critics said the action was more than a decade late.

Congress in 1977 required what is now the Health and Human Services Department to issue rules saying what costs could be charged to residents after reports that nursing home operators were misusing residents' money.

At that time, the Health Care Financing Administration said existing rules and procedures met the intent of the law. However, the HCFA said nursing-home reform legislation in 1987 made it apparent more specific rules were needed.

Sen. David Pryor, D-Ark., chairman of the Senate Aging Committee, hailed the proposals as a sign that the HCFA ''will strengthen its commitment to nursing home residents,'' but added that the regulations were overdue.

''To give you an idea how belated this action is, it was originally mandated the year Jimmy Carter was sworn in as president,'' he said.

Elma Holder, executive director of the National Citizens Coalition for Nursing Home Reform, a consumer group, said the rules should have been proposed by sometime in 1978.

''This is one of the most long-awaited sets of regulations we've had. ... It boggles the mind,'' Holder said. ''Year after year we were told this was on the secretary's desk for signature.''

Under the rules proposed by Health and Human Services Secretary Louis Sullivan, any nursing home participating in Medicare and Medicaid would be barred from passing on certain charges to residents.

Medicare pays for services in skilled nursing facilities for patients who have just left a hospital. Medicaid provides nursing-home care for the poor.

Items and services that could not be charged to residents include soap, hair conditioner, shampoo, razors, combs, brushes, deodorant, dental floss denture adhesive and cleaner, toothbrushes, toothpaste, moisturizing lotion, tissues, cotton swabs, sanitary napkins, towels, hospital gowns, over-the-counter drugs such as aspirin, nail care, hair cuts and personal

laundry.

Residents could be charged for telephones, televisions, radios, other clothing, reading materials, smoking materials, candy, flowers, entertainment, special services such as private duty nurses, private rooms except when therapeutically necessary and more expensive special foods.

The rule would require nursing homes to tell a resident who requests an item or service whether there will be a charge and the amount of that charge.

It forbids nursing homes from charging for any item or service not requested or from requiring a resident or applicant to request an item or service as a condition of admission or of a continued stay.

The proposed rule published in the Federal Register requests public comments within 60 days. The amount of comment will affect when a final regulation is published, HCFA officials said.

LOD, ISRAEL (MARCH 20) UPI - Former President Jimmy Carter, wrapping up his Middle East tour, expressed hope Tuesday that Israel's next government would be led by a party dedicated to ''an aggressive pursuit'' of peace.

Carter, who mediated the first peace treaty between Israel and an Arab nation, Egypt, said he found a lower level of tension and animosity in the region than during a trip three years ago, but whether the change would lead to major advancements in the peace process must wait on the new Israeli government.

Carter's comments to reporters prior to departing for Cyprus en route to the United States came before President Chaim Herzog picked Labor Party chairman Shimon Peres to form the new government.

The former president also hinted that the Palestine Liberation Organization's involvement in the peace process was inevitable.

''I personally believe that our government leaders ought to continue the direct talks with Yasser Arafat and other leaders,'' Carter told reporters before his departure.

''Although we certainly have strong disgreements between our country and the PLO, there's no doubt that the PLO can play either a major constructive or destructive role in the peace process.''

Asked whether he would counsel President Bush to meet with Arafat, Carter said, ''President Bush is perfectly able to make his own decisions. I'm not giving him advice.''

Carter had planned to meet Arafat in Tunis this week, but he told Palestinian editors Monday the meeting had been postponed because the PLO chief was scheduled to attend independence celebrations in Namibia.

Carter's private jet arrived in Larnaka, Cyprus, from Tel Aviv about 5:45 p.m. Tuesday and departed at 7 p.m. (11 a.m. EST) for the United States.

Carter's nine-day Middle East tour took him to Egypt, Syria and Jordan before his arrival Sunday in Israel. During his stay in Israel, Carter met with prominent Palestinians and Israeli officials, including Prime Minister Yitzhak Shamir and Labor Party leader Peres who were vying for Herzog's mandate to try to form Israel's next government.

The Likud-Labor coalition collapsed last week after Likud leaders refused to accept a U.S. proposal designed to help start Israeli-Palestinian talks.

In the next few days or weeks, Carter said, he hoped to see the formation of a ''strong and able and dynamic and courageous government'' in Israel.

''I have no preference about which party is successful,'' Carter said. ''Obviously in Israel that's a decision for the Israelis to decide and I hope that it will be a party dedicated to an aggressive pursuit of the peace process.''

Carter said his Middle East trip was in preparation for a conference at the end of 1990 by the Carter Center in Atlanta, Ga., on the interrelationship between economic matters and the peace process. Before then, he hoped to see major moves toward ''definitive talks'' between Palestinian and Israeli delegations, which he considered ''another major step toward a comprehensive peace agreement.''

Carter discussed Syrian President Hafez Assad's comments to him that Damascus was willing to hold peace negotiations with Israel as part of an international peace conference.

Carter said the Assad proposal remained the same as during his trip to the

region three years ago, but the situation in Syria had changed and Syria was now less dependent on the Soviet Union, had a growing relationship with the United States and had re-established ties with Egypt, Carter said.

''Around the region, I found in general a lower level of tension and animosity than I found three years ago but I can't say this is significant enough to lead to a major effort toward peace. I think that really has got to wait on what happens in Israel in its formation of its new government.''

At his news conference, Carter also repeated his opposition to settlement of Soviet Jews and other immigrants in the occupied West Bank and Gaza Strip.

During his visit to Israel, Carter criticized the government for human rights violations against Palestinians in the occupied territories that created an atmosphere not conducive to understanding and peace.

Carter met Tuesday with Israeli officials in charge of the territories who told him more than 250 women and children of West Bank residents would be returned following their deportations last year.

But Carter said his ''criticism would be moderated to the extent that the human rights abuses were corrected.''

(MARCH 20) UPI - NO injuries or health hazards are reported after a power failure prompted an emergency alert at Georgia Power Company's Plant

Vogtle nuclear station in Waynesboro. Officials say NO radiation was released. A company spokesman says ''a site area emergency'' was declared and some workers were evacuated... when a truck hit a pole supporting electrial equipment, knocking out power to the plant. He says the problem involved ''a switching area of the nuclear power plant'' and NOT atomic reactors.

19 women from Florida's Miami and Fort Lauderdale areas are suing the Nutri-System weight loss company for fraud and negligence. The lawsuits filed yesterday claim the Willow Grove, Pennsylvania, company's program led to gall bladder disease, forcing all but two of the women to have surgery to remove gall bladders. A Nutri-System spokesman says company lawyers reviewed one of the suits and found it to be without merit.

Witnesses in Nepal today say police arrested about 500 people holding a meeting as part of a month-old push for a multi-party democracy. Reports say police raided a university campus near Katmandu, arresting 500 teachers, doctors, journalists and other professionals. Witesses say several activistsescaped the raid. The arrests come as professional groups are becoming more supportive of the opposition movement. They called on King Birendra to hold talks to end Nepal's 29-year-old ban on political parties.

The Soviet space agency today announced the date of a joint flight with Japan to put a Japanese television reporter in orbit. The agency says the flight will take place December 2nd and two Japanese candidates have already completed the first six months of training for the mission. A Japanese radio and television company is paying nine-Million dollars to participate in the flight.

WASHINGTON (MARCH 20) UPI - A wind-up toy ''Riding Rabbit'' was recalled Tuesday because it may break into small parts that could choke young children.

No injuries have been reported in connection with the toys, but the danger was discovered when it was tested for safety, according to a Consumer Product Safety Commission statement.

The 6-inch ''Riding Rabbit'' is made of yellow or pink plastic with a white face, orange nose, white stomach and a decal of three stars and a blue cloud. When wound up, the rabbit's head rocks as it ''rides'' around on what appears to be a unicycle.

About 5,400 of the toys were sold nationwide, particularly on the East Coast, by Dan Brechner & Co. Inc. of Floral Park, N.Y., from January 1988

to February 1989 for about $5 each, the statement said.

Consumers who have the rabbits should return them to the store where they were purchased for a refund, it said.

#90079u2095 03/20/1990 ~United Press International

NEW YORK (MARCH 20) UPI - International Business Machines Corp. introduced new products Tuesday and cut prices on old ones in a move designed to increase its share of the sagging desktop computer market for business.

In 1989, the computer giant's personal computer sales jumped 13 percent and increased the company's share of the overall PC market 2 percent, said Dan Lautenbach, IBM's director of personal system marketing.

A lot of industry people, however, believe the 1990 market will be soft and ''our first quarter is a little softer than last year,'' Lautenbach said. He declined to say what share of the PC market IBM currently has.

''But as we look at the full year, we still think we will accomplish .. the same percentage growth that we did last year,'' the executive said in a telephone interview.

Don Young, an analyst with Sanford Bernstein & Co. in New York, termed the product announcement ''not a major event.''

Industry talk has been that IBM has been doing well in the PC market, Young said, ''and it's nice to hear it confirmed.'' Overall, the PC market ''is pretty soft,'' he agreed.

Since the introduction of the Personal System/2 machines three years ago, ''we've been enhancing the system in the desktop,'' Lautenbach said.

''These machines we are announcing today are floor-standing machines - the high-end of the line,'' he said.

The new model 80 workstation servers can be used as a common database and file server for local area networks of five to 100 desktop computers being used by medium to large-sized companies in ''almost every type of application,'' Lautenbach said.

''Almost all industries have the LAN-type environment,'' he said.

The combination of the new model 80s and new version of the OS-2 operating system available this month ''gives us, per workstation, probably the lowest price in the industry,'' Lautenbach said.

IBM also announced price reductions on all existing PS/2 model 80s, model 60s, model 30-001s and model 30-021 personel computers.

IBM's stock closed down $1 to $108 a share on the New York Stock Exchange.

The company also introduced a new low-cost laser printer designed to bring the quality of laser printing to the low end of the desktop market.

''It provides half the speed at half the price ... we've got this thing down into the $1,400 range,'' Lautenbach said.

-30- 2589

#90079u2096 03/20/1990 ~United Press International

JERUSALEM (MARCH 20) UPI - Labor Party chairman Shimon Peres, who led the challenge that brought down Prime Minister Yitzhak Shamir's government last week, was chosen Tuesday to form the next Israeli ruling coalition.

President Chaim Herzog summoned Peres to his residence to present a letter giving him a mandate to attempt to put together a government coalition.

After handing Peres the letter during a brief ceremony broadcast live on Israel Television, the two met privately.

''It became clear to me during the consultations and clarifications that I held that Knesset member Shimon Peres had the best chance to receive the majority of support in the Knesset,'' Herzog told a news conference later.

Herzog said there was little support among the Knesset members for elections or another Likud-Labor coalition government.

''Simple logic forces the giving of a chance for a different way,'' he said. ''The party that led the confrontation toward the toppling of the government has the right to receive a chance to present the Knesset its way and to ask for the Knesset's faith.''

Peres promised to begin work immediately on setting up a new government. ''I will do my best in order to set up the broadest possible government as quickly as possible, focusing on issues of peace, security and immigration '' he said in a brief statement.

Peres, 66, failed in 1984 to put together a Labor-led coalition and entered into a ''national unity government'' with Likud during which the posts of prime minister and foreign minister were rotated with Shamir.

After the 1988 elections, Shamir was picked to form the government. Another national unity coalition with Labor was forged with Peres as finance minister.

Peres, who began his political career as a protege of Israeli founding father David Ben-Gurion, also has served as defense and finance minister.

By Tuesday evening, Herzog had finished consultations with all 15 parliamentary parties. Following the meetings, support for Labor and Likud was split evenly among the 15 parties in the 120-member Knesset, the Israeli parliament.

Under Israeli law, the president must choose the leader he believes has the best chance of forming a government coalition, but he is not bound by the mathematics of party support.

Herzog met Tuesday with members of five small parties whose support could tip the balance either way for the two major parties. But there were no surprises as the five parties lined up as expected.

The right-wing Moledet and Tehiya parties, and the ultra-Orthodox Degel Hatorah supported Shamir to form the next government.

The centrist Shinui Party and the Arab Democratic Party, which has one Knesset seat, said they backed Peres.

The Knesset voted the Likud-led government out of power last week in a no-confidence vote introduced by Labor after Likud leaders refused to approve a U.S. plan for holding talks with Palestinians.

The no-confidence motion followed the firing of Peres from the Cabinet and the resignation of 10 Labor ministers.

Peres has three weeks before reporting back to the president. The president can then grant up to 21 more days for the task.

If the effort fails, the president can choose another Knesset member to attempt forming a coalition. The process has no time limit and only a majority of the Knesset can decide to call elections.

#90079u2112 03/20/1990 ~United Press International

CAPE CANAVERAL, FL (MARCH 20) UPI - The crew of the shuttle Discovery completed a smooth-sailing practice countdown Tuesday, clearing another hurdle on the road to the long-awaited launch of the Hubble Space Telescope next month.

Launch processing has been proceeding so smoothly in recent days that NASA managers are informally discussing the possibility of moving the flight up a day or so, although no such decision has been made to date.

In any case, the practice countdown began Monday and ended on time at 11:01 a.m. EST Tuesday with the simulated ignition and shutdown of Discovery's three main engines.

''We talked it over and we think it was a very clean test from our point of view,'' commander Loren Shriver radioed the launch control center from Discovery's cockpit.

Shriver and his four crewmates then reviewed emergency escape procedures at the launch pad before heading back to the Johnson Space Center in Houston for final preparations.

Discovery is scheduled to take off at 9:21 a.m. EDT Apr. 12, to kick off the 35th shuttle mission, the third of nine planned for 1990 and one of the most important in the history of the shuttle program.

The goal of the mission is the deployment of the $1.5 billion Hubble Space Telecope, one of the most nearly perfect optical instruments ever built to operate above Earth's hazy atmosphere.

''It looks like, from the briefings we've received so far down here, all the processing for Discovery and the telescope is going just great, and we anticipate ... that we're still on schedule for launch the 12th of April '' Shriver said Monday.

Wearing bulky spacesuits, Shriver and his four crewmates strapped in aboard Discovery early Tuesday for the final hours of a dress-rehearsal countdown.

The ''terminal countdown demonstration test'' is a traditional milestone for any shuttle mission and one that gives the astronauts and launch engineers a final chance to review launch day procedures.

''We have had overall, quite a smooth countdown this morning with nothing that would preclude continued preparations to launch the Hubble Space

Telescope on the 12th of April,'' said NASA spokesman George Diller. ''All the space shuttle systems performed as expected.''

The only issue Tuesday involved an apparent leak somewhere in the shuttle's engine system. The leak was detected during a routine test and it was so large, engineers said it probably involves an obvious problem that will be relatively easy to fix.

Shriver, 45, Sullivan, 38, co-pilot Charles Bolden, 43, Steven Hawley, 38, and Bruce McCandless, 52, plan to launch the boxcar-size telescope on the second day of their five-day mission.

Once in orbit above Earth's hazy atmosphere, the Hubble Space Telescope is expected to help answer fundamental questions about the birth and eventual death of the universe, allowing scientists to see deeper into the cosmos and with greater clarity than ever before.

Launch originally was planned for 1983, but the mission was repeatedly delayed by technical problems and, ultimately, the 1986 Challenger disaster.

WASHINGTON (MARCH 20) UPI - About 12,000 hand-held hair dryers are being recalled because they pose an electrocution hazard, the Consumer Product Safety Commission said Tuesday, while also warning of another household hazard.

The voluntarily recall involves the Pierre Cardin ''Elegance'' dryer,

model EL203, imported by Arrow Trading Co. of New York and sold nationwide. The commssions urged consumers to return the hair dryers to places of purchase for refunds.

The action is being taken because the dryer has no safeguard against electrocution should it fall into a water-filled sink or bathtub while the power switch is ''off,'' officials said.

The commission estimates about 17 people are electrocuted each year in similar accidents involving hand-held hair dryers.

In another alert, the agency reminded Americans not to use portable electric heaters in bathrooms or near other sources of water.

The warning follows three recent electrocution deaths related to accidents involving electric heaters in the bathroom, officials said.

Two Missouri children, ages 2 and 4, died when they pulled an electric heater into a bathtub where they were sitting, while a 65-year-old Illinois woman died when a portable heater she had placed on a tub edge toppled into the water.

Most electric heaters have no protection against electrocution should the appliance come in contact with water, officials said, adding that the growing availability of small, lightweight heaters may be increase the risk such devices will be used dangerously close to water.

#90079u2131 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - President Bush sent an updated national security strategy to Congress Tuesday with the renewed warning that ''uncertainties and new dangers'' surround the startling moves toward democracy worldwide.

The report, completed as the president is fending off increased calls for a ''peace dividend'' savings from defense spending as the Soviet threat diminishes, pointed to one such source of danger in the democratic restructuring now underway in Eastern Europe.

''Such fundamental political change will likely be turbulent,'' the study said. ''There may be setbacks and new sources of instability. Happy endings are never guaranteed.''

At the same time, a senior administration official briefing reporters at the White House refused to discuss the assessment in terms of Soviet leader Mikhail Gorbachev's current confrontation with the rebellious move towards independence in Lithuania.

But in a statement accompanying the 34-page report required annually by Congress, Bush said the ''potential that exists for instability'' as budding democracies enter uncharted territory underscored the need for a sustained, albeit reduced, U.S. defense posture.''

''We have arrived at a moment of historic opportunity, but continuing uncertainties and new dangers still threaten American interests and values '' he said. ''We will not abandon the basis of our success.''

The official, speaking on condition he not be identified, said the United States continued to bear primary responsibility for deterring nuclear war and that American ''military forces will be reduced, will be restructured, but will not be dismantled.''

The study, which basically reiterated administration policy developed in the past year and demonstrated how the government is struggling to adapt strategy to reflect the virtual collapse of communism, also pointed up the need to avoid trade disputes with allies and to prevent the spread of high-tech weaponry to Third World countries.

The official said the report also reflected a changing threat from the Soviet Union in Europe to a more likely source of tension in the future from Third World countries such as Libya and Lebanon.

''The U.S.-Soviet competition is not necessarily the main backdrop'' anymore, the official said. ''We may now be able to reorient a lot of our military planning to deal with some of these contingencies, which are are real-world contingencies, now that the central front in Europe is no longer the main obsession.''

The official also singled out trade tensions with Japan as an example of what the report cited as disputes that ''could strain political and security ties.''

''These are 1990s reasons for us to stay engaged,'' said another official. ''Our mission in the world may be shifting away from containing an enemy to reassurance of stability.''

The updated strategy repeated U.S. commitments to integrating the Soviet Union into the international system; maintaining the western alliance as a force for stability in Europe, and streamlining American forces while keeping ''substantial nuclear and conventional forces'' in Europe as long as necessary.

Bush also repeated U.S. support for German reunification, with the new state remaining a full member of the NATO alliance, including militarily.

''I look to this report to be the foundation for a productive, non-partisan, national dialogue as we continue to develop and articulate a strategic approach,'' the president said.

BELFAST, NORTHERN IRELAND (MARCH 20) UPI - Two bombs claimed to be the work of the Irish Republican Army exploded inside the high-security missile laboratory of a defense plant Tuesday, wounding one person and leaving five others in shock, officials said.

The IRA claimed responsibility for bombing the Short Brothers arms manufacturing firm on the outskirts of Belfast. It has staged two other attacks on the plant in its fight against British rule in Northern Ireland.

A caller claiming to represent the outlawed IRA told the British Broadcasting Corp. it planned other attacks and in the future it would not issue a warning as it did Tuesday.

The IRA has said it considers people working on defense contracts legitimate targets in its anti-British drive.

A second caller, who said he was a member of the Ulster Volunteer Force, said the Protestant paramilitary group would retaliate if the IRA attacked the plant again.

Police said the IRA warned that five bombs had been planted inside the arms plant, prompting authorities to evacuate about 5,000 workers just 20 minutes before two bombs went off at 3 p.m.

The evacuation order did not reach everyone, however, and one employee who remained inside was slightly wounded and five people were in shock.

Security personnel conducted a search for the five bombs claimed by the IRA but only found evidence of the two that detonated.

They said the devices exploded inside a high-security section where the company is working on a multimillion dollar contract for the Starstreak missile, a portable anti-aircraft projectile modelled on the U.S.-made Stinger missile.

Police said the bombs were planted near a boiler room, and did minimal damage to work stations. Flights were briefly disrupted at Belfast city airport while security personnel searched a nearby Shorts facility where planes are built.

A bomb containing 30 pounds of plastic explosive was detonated in the aircraft plant last month, and five months earler a triple bombing destroyed a $48.6 million aircraft.

#90079u2138 03/20/1990 ~United Press International

TIRGU MURES, ROMANIA (MARCH 20) UPI - About 10,000 ethnic Hungarians took to the streets Tuesday to protest a wave of anti-Hungarian violence as political leaders appealed for an end to Romania's worst ethnic unrest since the December revolution.

The provisional government convened an emergency session in Bucharest amid reports that columns of ethnic Romanians and Hungarians were marching toward the city center in Tirgu Mures, the scene of ethnic rioting on Monday.

Authorities put the toll from Monday's violence to at least 24 injured, including a prominent Hungarian playwright. Medicial officials denied a report that one man had been beaten to death.

Rival mobs roved the streets Monday afternoon and evening, attacking political offices and a radio station and beating up passers-by, authorities said.

''We were trapped like rats,'' said a badly bruised 20-year-old student, describing how he and several others were beaten up by a mob that attacked the headquarters of the Democratic Union of Hungarians in the Transylvanian city of 150,000.

The violence followed a week of escalating tension over Hungarian demands for schools in their native language. Transylvania, where most of Romania's Hungarian minority is concentrated, has seen a resurgence of Hungarian nationalism since the Dec. 25 overthrow of communist dictator Nicolae Ceausescu, who aggressively carried out a policy of forced assimilation.

About 10,000 ethnic Hungarians demonstrated in the downtown area to protest Monday's violence, especially the attack on the office of the Democratic Union of Hungarians.

Among the injured in the attack was playwright Andras Suto, an ethnic Hungarian in his early 60s who was hospitalized with broken bones and an eye injury. Hungarian television said Suto was blinded in one eye.

News of the attacks sparked demonstrations in Hungary, which borders Transylvania. In Budapest, more than 70,000 people gathered in Heroes' Square to protest the violence.

One banner carried by the demonstrators read, ''This is where Triamon has led us all,'' referring to the 1921 treaty that severed Transylvania from modern-day Hungary.

Hungarian Foreign Minister Gyula Horn sent an urgent message to U.N. Secretary-General Javier Perez de Cuellar expressing ''profound anxiety''

over the ''serious atrocities committed against ethnic Hungarians, the official news agency MTI said.

Horn summoned the Romanian ambassador to his office to issue an official protest, MTI said.

In Bucharest, interim President Ion Iliescu appealed to both ethnic groups for calm. Expressing regret over the violence, he visited the injured writer Suto at a Bucharest hospital where he was flown for treatment of his eye injury.

The provincial government in Mures County also appealed for order and said it was launching an investigation of ''persons ... who sow hatred and encourage violence.''

''The (government) condemns any nationalist-chauvinistic propaganda and calls on the Romanian, Hungarian and German population, urging them not to let themselves be manipulated by extremist elements,'' it said in a statement carried by the official news agency Rompres.

Radu Ceontea, leader of the Romanian nationalist group Romaneasca Vatra, blamed the Hungarians for the unrest and said the ''patience of the Romanians in the Mures Valley and Tara Gurgiului was stretched to its limit.''

Rompres blamed ethnic Hungarians for instigating Monday's violence. It said the initial spark was an attack on an ethnic Romanian who was ''hit in the head with a knife,'' seriously injuring him.

Shortly afterward, about 60 to 70 ethnic Hungarian demonstrators locked themselves in the DUH party headquarters and began ''hurling stones and bricks at Romanian demonstrators down in the street,'' Rompres said.

Hours later, ethnic Romanians from nearby towns began arriving in buses and went on a rampage through the city, some brandishing Romanian flags. A translator for United Press International was punched and kicked by a mob of ethnic Romanians who tried to storm the city radio station.

#90079u2139 03/20/1990 ~United Press International

WINDHOEK, NAMIBIA (MARCH 20) UPI - Soviet Foreign Minister Eduard Shevardnadze gave assurances Tuesday that Moscow will not use force to stop Lithuania's drive for independence, and Secretary of State James Baker said there ''is no reason not to take him at his word.''

Baker and Shevardnadze met for nearly four hours on the eve of independence celebrations for Namibia, and Baker said the efforts of the

two superpowers to end South African rule in the territory shows what can be accomplished when Moscow and Washington cooperate instead of compete.

Baker said the two ministers did not set a date for the Washington springtime summit for President Bush and Soviet President Mikhail Gorbachev.

The fast-changing events in the crumbling Soviet empire, especially the independence movement in the Baltic, were major subjects for the meeting in a modern whitewashed hillside residence of the U.S. liaison to Namibia.

Baker appeared to have no doubt about Soviet intentions, although the Soviet official did not make a categorical rejection of ever using force to rein in breakaway Soviet states.

''The minister made it very clear to me they are hopeful that questions involving Lithuania will be handled through dialogue,'' Baker said, standing with the Soviet official under an awning at the to the residence as a cool, steady rain beat down. ''That is what the (Moscow) government would like to have happen and that is what they expect to have happen.

''He said force would not be the solution to the problem as far as the Soviet Union is concerned,'' Baker said. ''There is no reason not to take him at his word.''

Gorbachev is struggling to maintain central authority over the Soviet republics from Moscow as nationalist movements seek to pull away. The use of Soviet military power to crush the Lithuanian movement would be a staggering political blow to Gorbachev's efforts to present a new Soviet face to the world after years of hard-line rule from the Kremlin.

Gorbachev has said independent Eastern European nations are free to follow their independent democratic courses, but Moscow is now faced with the difficult task of applying that to the Baltic states that have strained against their forcible inclusion in the Soviet Union.

Shevardnadze said the two superpowers are now engaging in ''a very substative, very constructive'' dialogue. The subjects included the reunification of Germany, the civil strife that still consumes Afghanistan after the withdrawal of Soviet troops and efforts to forge a cease-fire between the Soviet-backed Marxist government of Angola and the U.S.-supported opposition of Jonas Savimbi.

The Soviets have objected to the presence of a united Germany in NATO, but the issue is being slowly resolved through talks with Moscow and among the victorious allied powers of World War II. Shevardnadze spoke about this unification process, but in a broad perspective that also included Lithuania.

''We have to look for a solution that would be in keeping with the interests of all Europeans and all people of the world,'' Shevardnadze said.

Baker and Shevardnadze, who dined on fried King Clit fish with bananas, chicken breasts, and vanilla ice cream with cherries as reporters camped in the first-floor garage, later attended the midnight independence celebration for Namibia.

Baker plans to meet Wednesday with Nelson Mandela, the leader of the African National Congress who was released from prison last month after 27 years imprisonment for his efforts to bring full political equality to blacks in South Africa.

He goes to Cape Town, South Africa, Thursday for talks with President F.W. de Klerk, who ordered Mandela freed from prison last month after 27 years incarceration for his struggle for black equality in South Africa.

Baker met earlier with President Jose Eduardo dos Santos in an effort to budge him toward preliminary talks with Savimbi on a cease-fire in the Angolan civil war. A senior U.S. official reported ''new flexibility'' by dos Santos on the possible talks.

Baker promised dos Santos that the United States is prepared to improve its relations with Angola if it cooperates in breaking the diplomatic stalemate with the armed opposition, the official said.

Talks between dos Santos and the National Union for the Total Independence of Angola have been stalled since last year, and there has been heavy fighting between the Soviet-backed Angolan government and Savimbi's forces which are backed with U.S. military aid.

WASHINGTON (MARCH 20) UPI - Industry came out swinging Tuesday against compromise clean air legislation pending in the Senate, saying the bill is far more expensive than the Bush administration or Senate leaders have

admitted.

The Clean Air Working Group, a coalition representing about 2,000 large and small businesses, released a study charging the compromise bill would cost $47 billion per year - more than twice as expensive as the $22 billion clean air plan proposed by President Bush last summer.

Coalition officials said the study contradicted assertions by Senate leaders and the president that the compromise bill was affordable and carefully crafted to protect jobs and the economy.

They noted that, before working out the compromise measure with Senate leaders, President Bush vowed to veto any clean air bill passed by Congress that exceeded the cost of his initial proposal by more than 10 percent. Although the administration has not come up with a dollar figure for the compromise, it says the plan meets that requirement.

However, the coalition said its study demonstrated the compromise went way beyond Bush's 10 percent cap.

''We are extremely concerned that the Bush administration is simply pretending that certain provisions in the (compromise) bill just won't happen,'' said Bill Fay, spokesman for the coalition.

Fay voiced special concern about the bill's provisions on auto emissions and toxic air pollution from industry - the same sections environmental groups contend are too weak to clean up the nation's air.

The compromise measure is before the Senate, which began debate on a major ''pro-environment'' plan by Sens. Timothy Wirth, D-Colo., and Pete Wilson, R-Calif., to tighten controls on auto tailpipe emissions and expand requirements for carmakers to sell vehicles that can use cleaner-burning fuels such as natural gas and grain-based ethanol.

Environmental groups have strenuously lobbied for the Wirth-Wilson amendment, saying it is essential to fight urban smog, which now exceeds federal health standards in 101 cities.

Auto industry officials maintain that tougher tailpipe emission limits and an expanded clean fuels program will impose major costs on American industry and consumers while providing little environmental benefit.

Senate leaders and Bush administration officials have echoed those arguments and also warned the Wirth-Wilson proposal is a potential ''deal-breaker'' that could destroy their delicate clean air compromise.

Behind the scenes in the Senate, administration officials and Senate leaders struggled to defuse or defeat a $700 million coal miner aid

proposal by Sen. Robert Byrd, D-W.Va., that also threatened to unravel the compromise.

Administration officials said Byrd's proposal was much too expensive and that Bush would veto any clean air bill containing it.

Despite that warning, Byrd, the powerful chairman of the Senate Appropriations Committee, appeared to have enough votes to gain passage.

Administration officials met with Byrd Monday in hopes of reaching a compromise, possibly involving increased job training funds for the impoverished Appalachian coal-field communities expected to be badly hurt by the clean air bill's acid rain control provisions.

A spokeswoman for Byrd declined any comment but Bill Samuel, legislative director for the United Mine Workers, said administration officials had not offered any deal palatable to Byrd.

Byrd wants to provide an estimated $700 million in special unemployment benefits to the estimated 3,000 to 5,000 Appalachian coal miners expected to lose their jobs because of acid rain reduction provisions in the clean air bill.

Those provisions require 107 coal-burning power plants in the Midwest and South to reduce sulfur dioxide emissions linked to acid rain. Many utilities are expected to meet those requirements by switching from high-sulfur Appalachian coal to low-sulfur coal mined in western states.

#90079u2165 03/20/1990 ~United Press International

COLOMBO, SRI LANKA (MARCH 20) UPI - The Sri Lanka government said Tuesday it will suspend diplomatic relations with Israel and order the closing of the Israeli interests section of the U.S. Embassy by April 20.

President Ranasinghe Premadasa, apparently trying to placate Moslem groups within Sri Lanka, said ties would be severed until Israel takes steps that include the withdrawal from ''all occupied Palestinian territory.''

Sri Lanka will resume diplomatic relations with Israel once it ''recognizes the Palestine Liberation Organization as the legitimate representative of the Palestinian people, withdraws from all occupied Palestinian territory and agrees to participate in an international conference on the Middle East convened by the United Nations,'' a government statement said.

An Israeli interests section functioning under the U.S. Embassy in Colombo became the Israeli diplomatic mission in Colombo after former Sri Lanka

President Junius Jayewardene established diplomatic relations on May 27, 1984.

Premadasa's goverment, which was elected in late 1988, said in the statement, ''The termination of the Israeli interests section is one of his election pledges which he promised to fulfill at the earliest possible opportunity.''

In Jerusalem, the Israeli Foreign Ministry issued a statement saying Sri Lanka's action does not help Middle East peace efforts, but saying that Israel will consider reestablishing ties when Colombo is ready.

#90079u2184 03/20/1990 ~United Press International

ATLANTA (MARCH 21) UPI - The Georgia Supreme Court refused Tuesday to block Friday's scheduled execution of condemned killer Larry Grant Lonchar, convicted of murdering three members of a bookmaking operation.

Lonchar's lawyers asked the court to stay the 12:15 p.m. electrocution until he receives a mental competency hearing.

Lonchar's attorneys are questioning his mental competency since he recently called on corrections officials to set his execution date and put him to death before his appeals are exhausted.

In a letter last month to DeKalb Superior Court Judge Robert J. Castellani Lonchar asked the trial judge to set the electrocution date.

''I didn't want to ask you but would you sign the death warrant?'' Lonchar asked the judge. ''I am really sorry I have to ask you 'cause I know this is going to be a struggle with you.''

Lonchar, 38, was convicted in 1987 of the Oct. 13, 1986, gambling-related murders of Charles Wayne Smith, 54, his son Steven, 24, and girlfriend Margaret Louise Sweat, 45. He also was convicted in the shooting of Charles Rick Smith, 30, who survived the incident to testify against Lonchar.

Testimony showed that Lonchar owed the elder Smith at least $10,000 in football gambling debts when he and an accomplice posed as law enforcement agents on a raid at a condominium in DeKalb County.

Once inside the apartment, Lonchar and accomplice, Michael Wells, handcuffed Charles and Steven Smith and shot them several times in the head and chest.

Rick Smith testified he also was shot but survived by playing dead. Sweat,

who attempted to telephone police for help, was stabbed 17 times in the throat.

Lonchar would be the 15th person to die in Georgia's electric chair since the U.S. Supreme Court reinstituted the death penalty in 1976.

#90079u2193 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - Polish Prime Minister Tadeusz Mazowiecki, seeking a stronger voice in German unification, arrived Tuesday for a

historic state visit dramatizing the changes eroding postwar divisions in Europe.

Fortified with $10 billion in international aid, Mazowiecki was guaranteed a pledge of continued U.S. support for a transition to democracy and free markets that set the stage for the fall of communism in Eastern Europe.

A senior administration official said the visit would mark a final ''break from the Polish past'' and progress toward ''a more friendly relationship'' with the United States since the repudiation of communist rule last June.

''We want to put behind the vestiges of the Cold War,'' the official said.

Mazowiecki, leader of the first non-communist government in Eastern Europe will meet Wednesday with President Bush and hold talks with other U.S. officials before traveling Friday to an expected hero's welcome by the huge Polish-American community in Chicago.

And while he planned to update U.S. officials on economic reform, his chief internal challenge, that issue was expected to be superseded by concern driven by the swirl of political change outside Poland.

A troubled and tragic history with Germany, most painfully evidenced by the loss of 6 million Poles in World War II, has spurred Polish demands for a formal role in negotiations on German unification.

Though West and East Germany, joined by the four wartime allies, agreed last week to give Poland a limited seat at their ''two-plus-four'' unification talks, sources close to Mazowiecki said he would ask Bush for a larger role.

The two-plus-four powers agreed to include Poland in discussions of its border with Germany. Mazowiecki wants to foreclose the possibility of any future claims on German territories that Poland acquired after World War II.

Beyond that, he wants Poland at the bargaining table not only to address the nettlesome border question but other matters bearing on its security concerns.

The administration, however, seems less than enthusiastic to back a bigger formal role for Poland in the unification talks.

Contending the Poles ''met their objective'' in being invited to discuss border issues, the official said Bush ''would listen'' to a request for a broader role, ''but our position is that what has been done meets the concern.''

After a series of statements that Polish officials criticized as ambiguous West German Chancellor Helmut Kohl in the last few weeks has renounced claims on Polish territory ''either now or in the future.''

Kohl has accepted the principle of a treaty to enforce that commitment, though its specific terms and timing remain subject to discussion. Mazowiecki has called for stronger assurances than those received to date.

The border question has been so unsettling that Poland has indicated it may keep Soviet troops on its soil - as a hedge against German intentions - at a time the Soviets are being run out by Warsaw Pact allies Hungary and Czechoslovakia.

White House press secretary Marlin Fitzwater said Tuesday the United States was satisfied with the most recent West German statements, which came after Bush reportedly urged Kohl to strengthen his commitment to the Poles.

On the economic front, U.S. officials said a massive infusion of Western aid and technical assistance has begun to satisfy the acute need for help that existed just months ago.

The United States has committed more than $1 billion in loans, food and other economic assistance to Poland this year and has participated in multilateral debt-relief talks and formation of a $1 billion economic stabilization fund.

The drive to strip away inefficiencies, subsidies and other vestiges of a state-controlled economy has caused prices and unemployment to rise and industrial output to fall, but has brought down to double and single digits the almost 1,000 percent inflation of last year.

Before leaving Warsaw, Mazowiecki told the Polish-language New York newspaper Nowy Dziennik that Poland had ''received considerable assistance already'' from the United States but said, ''We hope for more.''

But with the aid programs in place, administration officials said they expected no specific requests or promises of additional assistance beyond a recent grant of an extra 200,000 tons of wheat.

''The problem is no longer the amount,'' said one official, ''but channeling it in the right directions and seeing that it's absorbed effectively.''

WASHINGTON (MARCH 20) UPI - Prosecutors rested their case against John Poindexter Tuesday, 12 days into his Iran-Contra trial, after directly linking the former national security adviser to charges of lying to Congress.

The government, represented by independent Iran-Contra prosecutors, called 10 witnesses against Poindexter before ending its presentation shortly after noon.

The prosecution's final two witnesses were an FBI agent and a former aide to the Senate Intelligence Committee. The agent previously testified about her interview with Poindexter after he resigned in November 1986. The committee aide met with Poindexter in late November 1986 as the Iran-Contra scandal was emerging in public view.

Poindexter's lawyer, Richard Beckler, presented his first witness Tuesday afternoon - a former White House lawyer - and also told reporters he would play eight hours of Ronald Reagan's videotaped testimony on Wednesday.

Beckler's strategy has been clear all along - to show that Poindexter was only doing Reagan's bidding.

Printed transcripts of Reagan's testimony have been released. But U.S. District Judge Harold Greene has not allowed distribution of the videotape itself, although he permitted reporters to watch it.

Once the videotape is played in the courtroom Wednesday, Greene has ruled it can be broadcast on television and radio. Reagan gave the testimony in Los Angeles in February.

Poindexter is being tried on five felony charges of conspiracy, obstruction and lying to Congress.

After hearing lengthy legal arguments, Greene declined to dismiss the charges against Poindexter, saying the government had presented ample proof and the jury should make a decision.

Greene also said he would rule Wednesday on whether Reagan must turn over excerpts of his personal diaries for Poindexter's use during the trial. Reagan eventually agreed to testify on videotape but has continued a legal battle to hold on to the diaries.

The Iran-Contra scandal was the worst of Reagan's eight-year presidency. It involves secret U.S. arms sales to Iran in the hope of freeing American hostages in the Middle East, and the diversion of some of the profits from those sales to the Nicaraguan Contra rebels when Congress had prohibited such aid.

Highlights of the government's case included testimony:

-From Oliver North, who said he watched Poindexter tear up a secret, politically embarrassing ''finding,'' signed by Reagan, authorizing the arms sales linked directly to the hostages. North, who reported to Poindexter, was convicted last year on three Iran-Contra felonies. North also said Poindexter was ''aware of what I was doing at all times,'' including supplying covert aid to the Contras.

-From Rep. Lee Hamilton, D-Ind., former chairman of the House intelligence committee, who said Poindexter in November 1986 did not tell the panel about White House and CIA involvement in the first shipment of U.S. missiles to Iran in November 1985. Hamilton directly linked Poindexter to the heart of the prosecution's case.

-From Ellen Glasser, the first FBI agent to interview Poindexter after he resigned as national security adviser, who said he claimed not to know about the destruction of White House documents and blamed his aide for the scandal, saying North ''was up to something.'' She also said Poindexter said he regularly discussed the covert operation with North and could have stopped it.

-That more than 5,000 computer notes were deleted from Poindexter's White House computer files in November 1986. The notes were recovered after being re-created from a White House backup system.

Glasser returned to the witness stand Tuesday and answered questions from Beckler about small discrepancies between notes she wrote after interviewing Poindexter Nov. 28, 1986, and an official version typed the next day.

The government's final witness was Eric Newsom, a staff aide to the Senate Intelligence Committee in November 1986 who met with Poindexter and others at the White House Nov. 21, 1986 - four days before the national security adviser resigned.

Poindexter said nothing about the diversion of arms sale profits to the Contras, Newsom said, nor did he reveal the existence of the politically embarrassing Reagan ''finding'' explicitly linking arms and hostages.

Newsom said he only learned of the diversion along with the American public - Nov. 25, 1986, when Attorney General Ed Meese revealed it at a news conference announcing that North had been fired and Poindexter resigned.

Poindexter did discuss the November 1985 missile shipment to Iran, Newsom said, and read from his notes of the session when Poindexter remarked it would be ''unfair to say this was an operation run out of the basement of the White House.''

Poindexter's opening witness was Dean McGrath, a former White House lawyer who reviewed responses to several congressmen asking for information on whether North was assisting the Contras when Congress had banned official aid. The White House responses - signed by Poindexter - were false and form part of the government's case.

But on cross-examination, McGrath said he did not know North was involved in assisting the Contras, that a top aide to Poindexter suggested the actual language and he would not have approved the letters if he had known they contained lies.

#90079u2221 03/20/1990 ~United Press International

BOSTON (MARCH 20) UPI - A Boston museum offered a $1 million reward Tuesday for information leading to the safe return of 12 masterpieces stolen in what may be the most lucrative art heist of all time.

Authorities around the world have been put on alert for signs of movement

of the art, including works by such masters as Rembrandt, Vermeer and Degas, stolen early Sunday from the Isabella Stewart Gardner Museum by thieves posing as police.

When Isabella Stewart Gardner, a wealthy widow known for her eccentric lifestyle, left her collections to the public, she specified that the museum could not buy or substitute any art works. Thus the museum's insurance policy covered only damages to the art, not theft or ransom money.

Museum officials announced a $1 million reward Tuesday, saying, ''The museum is able to post the reward because Sotheby's and Christie's, international art auction houses, have agreed to underwrite a $1 millon contribution to the musuem by committing their own financial support as well as approaching other members of the art community.''

Police have said the stolen art was worth more than $200 million, while Karen Haas, the museum's curator, said it was easily ''worth hundreds of millions of dollars.'' Whatever their worth, experts agree that it was perhaps the costliest art theft in history.

Two thieves, apparently unarmed, overpowered museum guards early Sunday and stole 11 paintings, drawings and etchings which they cut from their frames. Also stolen was an ancient Oriental beaker.

The FBI, completely at a loss about the whereabouts of the works, asked law enforcement officials from Boston police to Interpol, the international police organization, to look for links to the theft.

Among the art stolen were five works from the museum's Dutch Room, including a Rembrandt oil painting, ''The Storm on the Sea of Galilee,'' as well as a small self-portrait etching and a double portrait, ''A Lady and Gentleman in Black,'' by the 17th-century Dutch master.

Also stolen were two other oils, ''The Concert'' by Dutch master Jan Vermeer and ''Landscape with an Obelisk'' by Rembrandt's student, Govaert Flinck; five paintings and drawings by the Frenchman Edgar Degas; 19th-century French master Edouard Manet's oil ''Chez Tortoni;'' and the oldest work in the museum, a Chinese bronze beaker dating to the Shang Dynasty around 1200 B.C.

Art experts have suggested the thieves may have been recruited by a private collector knowledgeable enough to select a coherent group of pieces, although an FBI spokesman said authorities were not aware of such a collector.

Housed in a four-story building designed in the style of a 15th-century Venetian palace, the 87-year-old Gardner Museum is considered to have one

of the finest small art collections in the country.

Gardner, who lived in the building, stipulated in her will that none of the museum's works - 290 paintings and about 2,000 other objects, including tapestries and a collection of presidential letters - could be moved or sold.

The world's biggest reported art theft was a 1989 robbery of three Van Gogh paintings worth an estimated $72 million from the Kroeller-Mueller Museum in the Netherlands. In 1988, three other Van Goghs and two other works with an estimated $52 million value were stolen from the Stedelijk Museum in Amsterdam.

BY VERNON SCOTT

HOLLYWOOD (MARCH 20) UPI - Among the dumbest things the movie business can do is release two films on the same subject at the same time, like it did with ''Lambada - Set the Night on Fire'' and ''The Forbidden Dance.''

It's happened before, but apparently no one has learned the lesson.

''Harlow'' was the title of two 1965 pictures based on the life of actress Jean Harlow. Kim Novak starred in one, Carol Lynley in the other. Both died at the box office.

More recently, it was the release of ''Dangerous Liaisons'' in 1988, followed by ''Valmont: Les Liaisons Dangereuses'' in 1989. They were both based on Christopher Hampton's play. One fared OK. One didn't. Neither soared.

Now, this month, it is the release of ''Lambada - Set the Night on Fire'' and ''The Forbidden Dance.'' The pictures, based on the same sexy Brazilian dance craze, are the product of a pair of former partners, Menachem Golan and Yoram Globus, a couple of filmmakers from Israel who once ran Cannon Films as a team.

''The Forbidden Dance'' is Golan's, released by Columbia Pictures and starring Laura Herring, Jeff James, Sid Haig and Richard Lynch.

Globus' movie, under the Cannon banner, is ''Lambada - Set the Night on Fire,'' released by Warner Bros. and starring Eddie Peck, Melora Hardin, Shabba-Doo and Ricky Paul Goldin.

In the race to get their pictures to theaters first, there was disaster.

In view of the fact that both movies were released on the same day, March 16, it would be safe to assume that Globus and Golan no longer are members of the same Jolly Fellows Lodge.

They decided - one surmises independently - to capitalize on the growing lambada craze like ''Dirty Dancing,'' ''Salsa,'' ''Saturday Night Fever'' and ''Flashdance.''

But ''The Forbidden Dance'' and ''Lambada - Set the Night on Fire'' are about as much like those other films as Bette Midler is to Grace Kelly, or Bill Murray to Cary Grant.

Fred Astaire and Ginger Rogers never did the lambada, although its aficionados claim it goes back to the terrible 20s in sinful Brazil or Argentina where it was banned because of its overt sexuality.

Lambada is called a ''cultural phenomenon'' by the filmmakers, advertised with a wink and a nudge. It is as raunchy as public dancing is allowed to get.

The simultaneous releases hurt both pictures.

''Lambada - Set the Night on Fire'' grossed only $2 million in its opening week in 1,117 theaters. ''The Forbidden Dance'' tapped a miserable $720,864 from 637 screens.

The producers did manage to hire some attractive young people to star in their films.

Laura Herring, a beautiful young Mexican-born actress-dancer, explained the lambada as performed in ''The Forbidden Dance'' as follows:

''It's a very sensual dance. People in Brazil were put in jail for doing it 50 years ago. I guess they thought they'd have too many babies.

''Most of the dance is in the hips, and there's a lot of body contact between the dancers. I recommend that you only do the dance with someone you love very much, you know.

''I would dance rock 'n' roll with a stranger, but not the lambada. I am afraid I would get to know him too well too soon. It's too intimate. I won't say it's safe sex. It's a dance. It's just more sexy than the others.

''Sometimes the legs of both parties become very tangled and it has a hot Latin beat to it.''

Herring went on to say that women generally wear flaring mini-skirts with

bikini panties or G-strings when they dance the lambada.

''When they swirl as they dance the skirt flies up, leaving very little to the imagination,'' she said. ''Like anything else, it depends on what you're thinking about.''

The male point of view on lambada is taken by Goldin, who dances in the other picture.

''There's no holding back. Know what I mean?'' he said. ''It's a form of safe sex. You're not doing it right unless you're dancing pelvis to pelvis.

''I'm from New York and thought I knew how to move my hips when I danced, but when I learned to do the lambada, I was sore for days.

''It's a fad. It started out in just a few clubs in this country and now it's springing up all over the place. It's not easy to learn. You have to take lessons to do it authentically.

''You learn all the steps and then you've got to let it go and have no inhibitions. It gets really loose and exciting. They're putting out a line of clothes for girls who dance the lambada. Believe me, there's not much to 'em.''

Goldin, warming to the subject, said lambada is not a spectator dance.

''If you're there and people are doing it,'' he said, ''you gotta join in. If you ask me, the lambada is an aphrodisiac.''

#90079u2246 03/20/1990 ~United Press International

CAPE CANAVERAL, FL (MARCH 20) UPI - A $150 million satellite was not ejected from its Titan 3 launch rocket last week because the second-stage separation system was mistakenly wired for a two-satellite payload, officials said Tuesday.

As a result, a separation command to release the Intelsat 6 communications station from payload position No. 2 went instead to position No. 1 where there was no satellite.

''It was an engineering error, which resulted in the incorrect wiring that prevented the separation signal from getting to the satellite,'' said Robert Gordon, a spokesman for Titan-builder Martin Marietta Astronautics Group.

The owner of the satellite - the 118-nation International Telecommunications Satellite Organization - sent a letter Monday to NASA Administrator Richard Truly, officials said, asking the space agency to consider what might be done to rescue the costly satellite.

The Intelsat 6 satellite was launched last Wednesday by a commercially built Titan 3 rocket making only its second flight.

The ascent to space was flawless, but once in orbit, engineers were unable to separate Intelsat 6 from the booster's second stage so an on-board rocket could fire to continue the craft's ascent to its operational altitude of some 22,300 miles.

With the satellite stuck to the Titan 3 second stage, Intelsat engineers ultimately decided to separate the spacecraft from its solid-fuel booster instead.

They later fired on-board liquid-fueled rocket thrusters to raise the satellite into a higher long-term storage orbit where the otherwise healthy spacecraft will be safe for months to come. Engineers currently are debating a number of options, including the possibility of a shuttle

rescue flight.

In the meantime, the uninsured $150 million satellite is useless as a communications station, a major failure for America's fledgling commercial rocket program.

The first launch of a commercial Titan 3 came on Dec. 31 when two foreign-owned communications satellites were successfully boosted into orbit.

Such dual payloads are mounted atop each other in the Titan 3 nose cone and ejected one at a time with the top satellite separating first followed by the one below.

Engineering drawings for the second Titan flight last week led technicians to mistakenly wire the separation system for two satellites when only Intelsat 6 was on board, Gordon said.

''The wiring for this launch was similar to the point that it was incorrect to fire the first position,'' he said. ''The satellite was in the second position.''

The Denver Post reported Tuesday the initial mistake came about because of a breakdown in communications at the company's plant outside Denver.

''No one was goofing off or being secretive,'' a company spokesman told the paper. ''It was a case where the computer people said they would launch the first payload and the wiring people thought that meant the bottom payload compartment. There was just nothing at the separation device to receive the signal.''

The newspaper said a similar problem was discovered with a Titan 3 scheduled for launch June 1 to carry another Intelsat 6 into space.

Martin Marietta likely will adopt a new system of pre-launch checks, the newspaper said, that includes carrying out a mock satellite separation on the ground, using the firing commands employed in space.

#90079u2255 03/20/1990 ~United Press International

(MARCH 20) UPI - Secretary of State Baker met with Soviet foreign minister Shevardnardze in Namibia today, where both are attending an independence celebration for the last African colony. Earlier, Baker met with Angola's president... and said Washington will improve links with Angola if it co-operates in breaking a diplomatic stalemate with the armed opposition. There has been heavy fighting between the Soviet-backed Angolan government and opposition forces receiving U-S military aid.

A federal appeals court today found UNconstitutional federal rules barring the use of public funds for abortion counseling and referral. In a 3-1 ruling, the appeals court in Boston said the Department of Health and Human Services rules are UNconstitutional. The rules govern the use of 140-Million dollars by four-thousand organizations around the country. Justice Department lawyers had argued the rules do NOT interfere with a woman's right to an abortion.

A Pentagon-commissioned report released today criticizes the government's handling of media access during the December invasion of Panama. The report charges an ''excessive concern for secrecy'' by Defense Secretary Cheney kept a pool of American reporters from covering the first critical hours of the invasion. It also criticized what it called- ''the less than effective leadership and performance'' of Cheney's spokesman, Pete Williams.

Egyptian President Hosni Mubarak is voicing doubts about Israeli Prime Minister Yitzhak Shamir's commitment to the Mideast peace process. Mubarak told reporters in Namibia that he doesN'T think Shamir is serious about negotiating peace... but he hopes the Israeli leader changes his mind. Mubarak added that the peace process has to wait on a new, more receptive Israeli government. The Egyptian president is in Namibia for independence celebrations later today.

(MARCH 20) UPI - The Supreme Court says laid-off workers seeking damages from their unions for lack of fair representationn have a constitutional right to a jury trial. The 6-3 ruling came in a case involving 27 truck drivers who sued a Winston-Salem, North Carolina, local. They accused the union of failing to refer their claims of illegal layoffs to the union's grievance committee. A federal court ruled earlier that the workers have a right to a jury trial to determine whether the union must give back pay and benefits to the workers. The union appealed

The Georgia Power Company now says NO one was evacuated during a power failure at its Plant Vogtle nuclear station. Officials say NO one was hurt and NO radiation was released. But the Nuclear Regulatory Commision sent a team to the plant in Waynesboro, Georgia, to investigate the loss of power to a reactor cooling system... after a truck hit a utility pole. Georgia Power officials initially said some workers were evacuated from the plant, but later another official said NO evacuation occurred.

NEITHER former Philippine first lady Imelda Marcos NOR Saudi Arabian arms dealer Adnan Khashoggi wanted to be at their fraud and racketeering trial that began this morning in New York. Marcos said she should be tried by

her own people in the Philippines... and Khashoggi said he would rather be in Mecca, praying. Jury selection is taking place today.

British officials are angered by the weekend defacing of the ancient monument Stonehenge. Some of the giant stones making up the mysterious landmark were painted with four-foot high letters spelling out ''live.'' Police are investigating the crime, but have NO immediate leads. However, they suspect the graffiti may have been done by some of about 20 people who were evicted this weekend from the site, 80 miles southwest of London.

#90079u2283 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - The Commerce Department said Tuesday it has determined that Canadian stretch limousines are being sold in the United States at less than fair value.

But the department also noted that it found no evidence the limousines are being subsidized by the Canadian government.

Imports of stretch limousines from Canada to the United States were valued at $195 million in 1988, the department said.

The International Trade Commission has 45 days to determine whether the imported limousines have materially injured or threaten to injure the U.S. limousine industry.

If the ITC determines the domestic industry has been injured the Commerce Department will instruct customs officers to collect antidumping duties.

Antidumping duties are placed on imports found to be competing unfairly with domestic products.

The limousine investigation began last August after complaints from Southampton Coachworks Ltd., of Farmingdale, N.Y.

#90079u2300 03/20/1990 ~United Press International

NEW YORK (MARCH 20) UPI - The stock market closed lower Tuesday in active trading as profit taking and computerized program selling erased midday gains sparked by a rally in the dollar.

The Dow Jones industrial average, which rose 14.41 Monday, lost 16.89 to close at 2738.74.

Among broader market gauges, the New York Stock Exchange composite index fell 0.95 to 187.71 and Standard & Poor's 500-stock index dropped 1.96 to

341.57. The price of an average share lost 18 cents.

Declines led advances 881-600 among the 1,979 issues crossing the NYSE tape. Big Board volume was 177,320,000 shares, compared with the 142,300,000 shares traded Monday.

Analysts characterized Tuesday's action as profit taking after recent gains, with computerized program selling, used to profit on price differences between stocks and stock-index futures, exacerbating the losses. The Dow industrials had picked up ground in five of the previous six sessions.

Before establishing the downtrend, however, the market switched direction. Prices fell in early trading, pressured by news that inflation at the consumer level rose 0.5 percent in February after gaining 1.1 percent the month before.

Excluding the often volatile food and energy sectors, the core rate of inflation at the consumer level also rose 0.5 percent in February, the government said. Economists had expected a much smaller rise in consumer inflation and were troubled by Tuesday's report.

Also of concern to investors was the news that the U.S. merchandise trade deficit shot up 20.5 percent in January to $9.25 billion, boosted by a jump in petroleum imports.

The January deficit was an increase of $1.6 billion over December, the Commerce Department said. Private economists had expected a deficit of between $9 billion and $9.6 billion for January.

But stock prices then turned higher, boosted by a continued rise in the dollar despite the Bank of Japan's one-point hike in its discount rate, which was intended to bolster the sagging yen. In late trading, the dollar was quoted at 154.05 yen, up from 153.05 late Monday. In the early afternoon, however, profit taking and program selling dragged prices back down.

"The market has had a meaningful move up, particularly one tied to the dollar," said Alan Ackerman, senior vice president at Gruntal & Co. "We shouldn't be surprised at some profit taking, and what we're seeing is orderly."

On the trading floor, Bank of Boston was the most active issue in dividend-related trading, off 1/8 to 15 1/4.

Bank of New England followed, rallying 7/8 to 5 1/8. Reports said the bank would not comment on the sharp rise, but there was said to be vague speculation in the market about a possible cash infusion for the company.

Philip Morris was third, unchanged at 39.

Among the other blue chips, AT&T lost 5/8 to 41 3/4, IBM tumbled one to 108 after cutting prices on its current line of Personal System-2 computers, Exxon fell 3/4 to 46 3/4, Chevron dropped 1 1/4 to 68 and Texaco eased 1/4 to 59 1/8 - extending their declines on OPEC's failure over the weekend to take action to restrain oil production.

Elsewhere, Curtiss-Wright surged 7 1/2 to 59 1/2 on speculative buying after news that its chairman died Monday.

Digital Equipment was up 1 1/8 to 82 1/4 after an analyst Monday made positive comments about the stock. L.A. Gear surged two to 35 3/8, also reportedly benefiting from analysts' recommendations.

Service Resources plunged 1 3/8 to 5 1/2. Reports said the trustee for a debt issue by one of its units has demanded immediate repayment of the debt. The company has missed the last three interest payments on the issue reports said, adding that Service Resources is in talks on restructuring its financial obligations.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 212,699,560 shares, compared with 170,246,660 shares traded in the previous session.

Prices closed lower in active trading on the American Stock Exchange. The Amex Market Value index fell 0.70 to 363.42. Declines led advances 304-258 among the 816 issues traded. The price of an average share dropped three cents. Composite volume totaled 18,322,200 shares, compared with 14,300,000 shares traded Monday.

An issue of Salomon's "put" warrants on Tokyo's Nikkei stock index, which function as bets against that market, led the Amex issues, up 1/2 to eight.

The National Association of Securities Dealers composite index fell 2.82 to 440.09.

#90079u2316 03/20/1990 ~United Press International

NEW YORK (MARCH 21) UPI - The nation's gasoline inventories fell 2.5 million barrels last week with demand easing as refineries curtailed production during their maintenance turnarounds from heating oil to gasoline production, the American Petroleum Institute reported Tuesday.

For the week ended March 16, the oil industry's weekly survey found gasoline supplies slipped to 241.2 million barrels from 243.7 million barrels in the prior week and remained slightly ahead of year-ago levels

of 241.0 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also skidded, to 182.8 million barrels from 185.5 million barrels a week earlier, but stayed significantly higher than year-ago levels of 164.9 million barrels.

Gasoline production declined to 6.4 million barrels daily from 6.7 million barrels a day in the previous week and was the same level as year-ago output of 6.4 million barrels daily.

Gasoline imports slipped slightly to 346,000 barrels daily from 361,000 barrels daily in the previous week and were well below year-ago imports of 440,000 barrels daily.

U.S. refineries operated at 83.7 percent of capacity last week, the same level as a week earlier and much higher than the 79.9 percent of a year ago.

Inventories of distillate - used for home-heating oil and diesel fuel - fell seasonally to 105.9 million barrels from 110.1 million barrels a week earlier but remained above year-ago levels of 99.2 million barrels.

Distillate production slipped to 2.5 million barrels daily from 2.7 million barrels daily in the preceding week and stayed level with year-ago output.

Distillate imports fell to 183,000 barrels a day from 349,000 barrels a day in the previous week but were much lower than year-ago imports of 405,000 barrels a day.

Crude oil imports declined to 5.7 million barrels a day from 6.0 million barrels a day in the previous week but remained slightly higher than year-ago imports of 5.6 million barrels a day.

Imports of refined products rose to 2.4 million barrels daily from 1.6 million barrels daily in the preceding week and were somewhat higher than year-ago imports of 2.3 million barrels daily.

Crude oil inventories rose barely to 351.0 million barrels from 350.8 million barrels in the prior week and were above year-ago levels of 339.5 million barrels.

#90079u2338 03/20/1990 ~United Press International

(MARCH 20) UPI - Reflecting slack near-term demand, crude oil prices plunged Tuesday while gasoline rates rose in anticipation of an industry

report showing a further decline in inventories.

The benchmark West Texas Intermediate on the last day of trading the April delivery contract dropped 32 cents to end the day on the New York Mercantile Exchange at $19.28 a barrel after trading as low as $19.07 a barrel.

May delivery, which becomes the WTI spot-month contract Wednesday, fell 19 cents to $19.77 a barrel.

Estimated trading volume was a heavy 116,599 contracts.

On the U.S. Gulf Coast spot market, WTI for prompt delivery declined 35 cents to $19.25 a barrel.

''The major feature was the expiration of the April contract,'' said Bill Hinton of Stotler & Co. in New York.

With storage facilities full at the Cushing, Okla., midwest distribution terminal, demand for April delivery WTI has been weak, the analyst said.

Traders were looking for WTI to settle below $19 a barrel, but it found support at $19.07, Hinton said.

Gasoline trading was dominated by the expectation that the weekly survey of the American Petroleum Institute would show stocks declined last week for the second week in a row after rising nine consecutive weeks, Hinton said.

Traders had expected a decline of 1.5 million to 2.5 million barrels.

The API report, released after the Merc closed, showed a drop of 2.5 million barrels to 241.2 million barrels.

Unleaded gasoline for April delivery gained 0.95 cent to 57.31 cents a gallon on the Merc.

On the New York Harbor cash market, unleaded gasoline jumped 1.25 cents to 55.60 cents a gallon.

On the European spot market, Britain's widely traded North Sea Brent fell 18 cents to $17.71 a barrel.

The UAE's Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - dropped 17 cents to $15.25 a barrel.

On the Merc, home heating oil for April delivery slipped 0.19 cent to 54.35 cents a gallon, while gaining 0.30 cent on the New York Harbor spot

market.

Three companies - Sun Co. of Radnor, Pa., Citgo Petroleum Corp. of Tulsa, Okla., and Marathon Petroleum Co., the Findlay, Ohio, subsidary of USX Corp. - reduced by 25 cents a barrel the posted price they will pay for crude at the wellhead to $18.75 a barrel for WTI.

#90079u2390 03/20/1990 ~United Press International

NEW YORK (MARCH 20) UPI - The dollar shook off an increase of 1 full point in the Bank of Japan's key interest rate Tuesday to test a 3 1/2-year high despite Federal Reserve intervention.

The Bank of Japan raised its official discount rate, charged on loans to the country's largest commercial banks, to 5.25 percent from 4.25 percent in a bid to quell rising inflation and prop up the sagging yen.

But the rate increase had been anticipated for months while the Bank of Japan settled a dispute over interest rate policy with the Finance Ministry, and when the central bank finally acted the hike had little effect.

The dollar had battered the yen in markets around the globe after the midday announcement in Tokyo. New York players followed suit.

''The general feeling is that it was too little, too late,'' said David Jaques, a corporate trader for Barclays Bank. ''The market had factored it in and when the event actually took place there was very little effect.''

Some traders said investors believed the Japanese were not that shook up by the deflation of their assets and were preparing for more.

The Fed sold dollars several times during trading Tuesday, but this had no dampening effect on the U.S. currency, traders said.

''With a close this high, the market could expect to see some follow through of intervention in the next few days,'' said Valerie Walker, a foreign exchange adviser at Harris Trust & Savings Bank.

In late New York trading, the U.S. currency was quoted at 154.15 yen - a level not seen since the middle of 1987 - up from 153.05 yen late Monday. The dollar was changing hands at 1.70455 German marks, versus 1.6860 marks Monday. There is no official close in the New York market.

The dollar strengthened appreciably against the mark after losing ground the day before on short-lived financial market euphoria at the victory of a conservative coalition in East German elections.

''There is uncertainty, generally, about investments in Europe and with the Russians and their republics,'' said Francoise Soares-Kemp, a Credit Suisse vice president. ''It's one of those things where the dollar looks really good.''

Other dollar rates: 1.5220 Swiss francs, up from 1.5085.; 5.760 French francs, up from 5.690.; and 1,257 Italian lire, up from 1,246.50.

The British pound eased to $1.60 from $1.6135.

In Europe the dollar firmed, ending in Frankfurt at 1.6940 German marks against 1.6790 Monday and in Zurich at 1.5140 Swiss francs against 1.5065.

The dollar also rose in Paris, Brussels and Milan to 5.6985 French francs against 5.690, 35.19 Belgian francs against 35 and 1,246.70 lire against 1,245.00.

In London, the pound slipped to $1.6110 against $1.6115.

In earlier trading in Asia, the dollar shrugged off Japan's discount rate hike by closing slightly higher at at 153.65 yen, up from 153.55 Monday.

Republic National Bank in New York closed cash gold off $9.25 an ounce at $392.50 against $401.75 Monday. The New York Commodity Exchange settled gold at $392.20, off $8.50 from Monday's $400.70.

In Zurich, gold slipped to $399.50 against $402.50. London gold also was lower at $398.50 compared to $402.75.

Republic closed cash silver at $5.055 an ounce, off from $5.125. Comex spot silver dipped to $5.04 an ounce from $5.10. Zurich silver was unchanged at $5.10 an ounce. London silver held steady at $5.13.

#90079u2441 03/20/1990 ~United Press International

WASHINGTON (MARCH 20) UPI - Administration officials said Tuesday the United States is willing to hand over to the new Polish government the remains of one of modern Poland's greatest heros, one-time premier and pianist Ignace Paderewski.

The remains of Paderewski, who died in New York in 1941, have been kept in a crypt at Arlington National Cemetery awaiting the establishment of a freely elected Polish government.

An administration official said the issue is expected to be raised by Polish Prime Minister Tadeusz Mazowiecki, who arrived in Washington late Tuesday for talks expected to focus on economic aid and German unification.

As for Paderewski, the official, said, ''If the Poles want him, we'll hand him over.''

Paderewski was the Polish Republic's first prime minister after the World War I, but he resigned in 1919 to go back to his other love, music.

He is a major figure in Polish history and culture, a politician who represented freedom and a pianist with a towering international reputation.

After Germany's 1939 invasion of Poland, the pianist rejoined the Polish government-in-exile in London and was appointed president in 1940. He came to the United States and died June 29, 1941.

President Franklin D. Roosevelt ordered Paderewski's body interred in Arlington, awaiting the rebirth of a free Poland. It could not be buried, under national cemetery regulations, since he had not served in the U.S. armed forces.

It lies in a polished wooden coffin edged with brass in an underground chamber next to the mast of the U.S.S. Maine, which was sunk in Havana harbor in 1898, sparking the Spanish-American War.

Polish governments have requested the return of the remains since 1947, but Washington has always refused, citing the absence of free elections that symbolized Paderewski's life.

That has now changed, with the United States supporting the newly elected

Polish government and with members of Congress pushing for even more support for the newly emerging democracies of Eastern Europe.

A State Department official said, ''There's no reason to keep him now.''

#90079u2452 03/20/1990 ~United Press International

SCRANTON PA (MARCH 20) UPI - Pop singer Gloria Estefan suffered a broken back and five members of her entourage were injured Tuesday in a bus-truck accident on a snowy highway in the Pocono Mountains, officials said.

Estefan, lead singer of the Miami Sound Machine, was listed in stable condition at Community Medical Center in Scranton. Dr. William Pfeifer, who treated the singer, said she suffered a broken vertebra in the center of her back but no paralysis.

''At this point, we are looking for her getting everything back,'' Pfeifer a trauma surgeon, said during a brief news conference at the hospital. ''She is not paralyzed in any way, shape or form.''

Estefan, husband Emilio and four other people, including their son, were injured when a tractor-trailer struck their bus from behind, pushing it into a second tractor-trailer, officials said.

State police said the accident occurred in the westbound lanes of Interstate 380 near Tobyhanna, about 20 miles southeast of Scranton.

''We were stopped, waiting for them to clear the road. I didn't see him coming,'' bus driver Ron Jones said.

Jones said Estefan was en route from CBS Records in New York City to Syracuse for a performance. The other members of Miami Sound Machine were already in Syracuse, he said.

Hospital spokeswoman Nancy Parlo said Emilio Estefan, son Nayib and Barbara Arenchibia, all passengers on the bus, were still receiving treatment at 5 p.m.

Jones and Lori Rooney, another passenger, were treated and released from the hospital.

Gloria Estefan told doctors she was asleep on a bunk at the time of the accident. She was the most seriously injured of the bus passengers, Pfeifer said.

Estefan and the Miami Sound Machine had been scheduled to perform Tuesday night at the Onondaga County War Memorial in Syracuse. The accident forced

cancellation of the concert.

Estefan and the Miami Sound Machine won the American Music Awards' 1989 favorite pop-rock duo or group award, and Estefan was a host on the 1990 awards show.

In 1988, Estefan won the BMI award as songwriter of the year. She wrote seven of the songs on the group's 1989 album ''Cuts Both Ways.''

Miami Sound Machine's music is a mixture of Latin, pop, rock, and urban influences. The group is based in Miami.

#90079u2551 03/20/1990 ~United Press International

LOS ANGELES (MARCH 21) UPI - Maxicare Health Plans Inc., the ailing health maintenance organization, said Tuesday that it has filed a plan of reorganization with the federal bankruptcy court that it is aiming to emerge from Chapter 11 protection by this summer.

Maxicare, which has been in bankruptcy for more than a year, also filed disclosure statements in U.S. Bankruptcy Court in Santa Ana, Calif., showing that it had audited losses in 1988 of $611.8 million on revenues of $1.6 billion. Most of the losses were write-offs of goodwill from discontinued operations, spokesman Jim Lucas said.

Maxicare, of Los Angeles, filed for Chapter 11 protection after failing to make debt payments on $445 million of bonds and left health-care providers with more than $300 million in unpaid bills.

Since the filing, the company has cut its operations from about 900,000 subscribers to about 320,000. The company has operations in California, Illinois, Indiana, Louisiana, North Carolina, South Carolina and Wisconsin.

Maxicare also said Tuesday that unaudited results for the nine months ended Sept. 30 showed losses of $22.3 million on revenues of $412.3 million. The losses were mainly due to the Chapter 11 filing and the downsizing of the company.

Lucas said the company has been operating with a positive cash flow - taking in more money than it is spending - and is moving close to profitability in the current quarter. Maxicare currently has more than $60 million of cash on hand, compared with $6 million at the time of the Chapter 11 filing last year.

Maxicare has not altered the economic terms of the plan, announced several months ago, under which shareholders will receive about $102 million in cash, 10-year 13.5 percent notes with a principal amount of $67 million and common stock and warrants.

The plan also calls for Maxicare to issue 10 million shares of new common stock to be listed on the NASDAQ National Market System and for the cancellation of the current 34.6 million current shares.

A public hearing on the plan has been set for April 23, which could mean that the company could emerge from bankruptcy as early as this summer, Lucas said.

#90079u2631 03/20/1990 ~United Press International

CHAMPAIGN, Ill. (MARCH 20) UPI - All-Big Ten quarterback Jeff George announced Tuesday he will skip his last year at Illinois and enter the NFL draft.

''I have decided that it is in my best interest to forego my last year of eligibility at the University of Illinois and petition the NFL to enter the 1990 draft,'' George said during an emotional news conference.

''It has always been my dream to play in the NFL,'' he said, adding he expects to be one of the first 10 players drafted.

George, 6-foot-4 and 210 pounds, becomes the latest in a growing list of college quarterbacks to enter the draft. Already available include Andre Ware of Houston, Major Harris of West Virginia and Scott Mitchell of Utah.

George, only the 10th quarterback in Big Ten history to pass for more than 6,000 yards, led the league with 19 touchdown passes in 1989. He also topped the conference in total offense with a 205-yard average per game, while the Fighting Illini were the Big Ten's top passing squad.

George said his reasons for making the move included three years at Illinois without a scholarship and a looming rookie NFL salary cap. He said the factors clouding his decision included the team's chances for a national championship, a Rose Bowl trip and an opportunity for the Heisman Trophy.

''One of my regrets will be that I will not be a member of a great 1990 U of I team,'' George said. ''Under the leadership of Coach (John) Mackovic and his staff, I know the team will do well and I wish them the best.

''I would like to thank Coach Mackovic and the entire staff for their guidance over the last three years,'' George continued. ''I have learned a lot about football and life under them.''

George also thanked former Illini coach Mike White, who welcomed him to Champaign when George transfered from Purdue after his freshman season in 1986. He is just 10 hours short of graduating.

George's voice broke and he appeared on the verge of tears when he concluded his prepared remarks.

''I want to thank my closest advisors during this time - my family and God '' George said.

Mackovic, vacationing in California, issued a statement saying he was ''disappointed'' in George's decision, but wished him well.

''We greatly appreciate what he's meant to the University of Illinois

football program over the last three years,'' Mackovic said. ''Based on what he's accomplished at Illinois, we anticipate that Jeff will be very successful as a professional football player.''

George's parents and uncle attended the news conference, along with several players.

''I was a little bit surprised, but not too surprised,'' said wide receiver Shawn Wax. ''I'm sure he has the talent and the ability to play up there, and I wish him the best of luck.

''I think every collegiate football player in America is envious of his position,'' Wax added.

Mackovic said he was confident of his remaining quarterbacks, with the early nod going to 5-foot-9 sophomore Jason Verduzco.

George, a native of Indianapolis, was named player of the game in Illinois' victory in the 1990 Florida Citrus Bowl and was awarded the Sammy Baugh Trophy for the nation's best quarterback from the Columbus (Ohio) Touchdown Club.

His total of 22 touchdown passes last season broke Tony Eason's single-season record at Illinois. He finishes his collegiate career trailing only Jack Trudeau and Eason on the school's all-time passing list.

#90079u2724 03/20/1990 ~United Press International

NEW YORK (MARCH 21) UPI - Doctors performed a third skin graft operation Tuesday on a 12-year-old Brooklyn boy allegedly set afire by a neighborhood bully, but said he remained in critical condition.

David Aupont responded well to a 3 1/2-hour operation, in which doctors grafted skin to his chest, neck, and abdomen, said Myrna Manners, a spokeswoman for New York Hospital-Cornell Medical Center in Manhattan.

''We expect he'll be in the hospital for another three months, at least,'' she said.

More operations will be necessary but have not yet been scheduled, Manners said.

The frail Aupont sat upright and ate solid food Monday for the first time since being beaten, robbed, and set on fire as he walked to school March 7.

Police said Aupont was attacked by a neighborhood bully who asked him if he smoked crack and then set him afire in an abandoned Brooklyn building.

The unidentified 13-year-old assailant was charged as a juvenile.

Manners said doctors have barred all but Aupont's immigrant Hatian family from the boy's bedside while he recovers from the latest operation.

Even so, she said, he received phone calls Tuesday from the New York Knicks and the World Wrestling Federation, Manners said.

Aupont has received an outpouring of support from well-wishers from around the world.

Former President Ronald Reagan and his wife, Nancy, stopped by briefly on Sunday to say they were praying for the recovery of the boy.

Other visitors have included actor Bill Cosby and his television son Malcom Jamal Warner, the Rev. Jesse Jackson, and Mayor David Dinkins.

BOSTON (MARCH 21) UPI - A 6-year-old New Hampshire boy was listed in critical but stable condition at Children's Hospital Tuesday after becoming Boston's first lung transplant recipient.

''He's got a long road to go, but we're really confident he can do it,'' William Beard said of his son, Danny, who received a single lung during a marathon operation that began at midnight and ended 10 hours later.

Doctors said that until Danny's new lung can start working on its own, the boy will be kept on a heart-lung bypass machine that kept him alive for three weeks until a donor lung could be found.

Following the operation, Danny's father and his mother, Kathryn Beard, thanked the family of the unidentified donor. ''The parents of this person they just created a miracle,'' William Beard said. ''It's so much more than a gift. They saved our son's life.''

Danny is the second lung transplant recipient in New England and the youngest. Last year, the operation was performed on about 80 people worldwide.

Prior to the operation, doctors judged Danny's condition so serious that they felt he had only a few days to live without the transplant. The family was told ''he wouldn't have made the week,'' William Beard said.

Danny was diagnosed with a rare condition known as pulmonary fibrosis, which can rapidly destroy the functioning capacity of the lungs. The cause

is unknown, although researchers believe a viral infection might be at fault.

#90079u2834 03/20/1990 ~United Press International

NEW YORK (MARCH 21) UPI - Citicorp Chairman John Reed said Tuesday that nonperforming real estate loans have been steadily mounting on his bank holding company's books and are likely to reduce earnings this year.

''We do expect that we're going to have to hit the profitability of the business (and) bear the burden of carrying nonperforming assets and taking significant write-offs,'' Reed told securities analysts and journalists in a presentation on Citicorp's strategy for the 1990s.

He declined to offer specific figures on how such losses at Citicorp's ailing Arizona subsidiary and elsewhere might cut profits. But, Reed said, ''At the Citicorp level, we are going to have higher write-offs.''

''It is a problem area and probably will be for some time,'' Reed said, adding that he thought the real estate woes would bottom out this year.

Citicorp was committed to riding out the current ''rough patch'' in real estate lending, Reed said, adding, ''It is a business we are comfortable with.'' Other markets, like California, have remained relatively healthy and have helped to offset downturns seen in other parts of the country.

Given the soft commercial real estate and corporate lending markets in North America, Reed said Citicorp will continue to develop its profit centers in international consumer banking and credit card services.

''Global is vital, consumer is vital,'' he said. ''The nature of the business is (bank) branches, cards and mortgages to the broad middle sector of the marketplace.'' This strategy applies to foreign-developed markets, such as Europe and Asia, and to the developing world, he said.

''We are every place and we want to be everyplace,'' he said.

Continued involvement in Latin America holds out the chance that Citicorp may one day recover on loans other banks have already written off. ''Our assumption is that most of the debtors will make it,'' he said.

By the mid-1990s, Reed said, Citicorp can look forward to annual profits of about $5 billion. Twenty percent of these will come from traditional corporate lending and financing in the developed world, while 65 percent will derive from international consumer operations.

#90079u2898 03/20/1990 ~United Press International
(MARCH 20) UPI - Africa's last colony celebrates independence... prosecutors rest their Iran-Contra case against John Poindexter... and Washington voices concern about Lithuania. Those stories and more, next, from U-P-I.

Today marks the official end of 75 years of South African rule in the neighboring territory of Namibia.

Heads of state and senior government officials from around the world are gathering in the capital of Windhoek for the celebrations, which are to take place at an athletic stadium shortly.

The ceremony will end with South African President F-W de Klerk lowering his nation's flag so it can be replaced by Namibia's new one.

The activities mark the successful completion of a U-N-supervised program to free Africa's last colony.

Secretary of State Baker is among the dignitaries in Windhoek for the celebrations.

Baker today held talks with several leaders, including those from the Soviet Union and Angola. He's also to meet with South African black nationalist Nelson Mandela.

U-S officials say Baker noted Angola's president has eased his position on seeking a peaceful solution to his nation's civil war with U-S-backed rebels.

Baker said that could lead to improved relations with the Angola.

#90079u2935 03/20/1990 ~United Press International
(MARCH 20) UPI - The prosecution has rested its case in John Poindexter's Iran-Contra trial... which is now in its 12th day in a Washington, D-C, courtroom.

Prosecutors called a total of 10 witnesses against the former national security adviser, who's accused of conspiracy, obstruction and lying to Congress in the worst scandal of the Reagan administration.

The prosecution's final two witnesses took the stand today. F-B-I agent Ellen Glasser completed her testimony about an interview with Poindexter after he resigned in November 1986. Glasser was questioned about discrepancies in her notes and the official version of the interview typed

the next day.

Former Senate Intelligence Committee aide Eric Newsom later testified that Poindexter said NOTHING about the diversion of arms sales profits to the Contras during congressional hearings.

Defense lawyer Richard Beckler says his first witness will be a White House attorney. Beckler also plans to show videotaped testimony from former President Reagan in his efforts to prove his client was just following orders from the president.

-30- 1266

#90079u2993 03/20/1990 ~United Press International

(MARCH 20) UPI - President Bush is pushing for quick congressional action on 800-Million dollars in economic aid to Panama and Nicaragua in an effort to isolate Cuba's Fidel Castro.

Bush predicts that establishing democracy in Panama and Nicaragua will increase the pressure for change in Cuba. He invited congressional leaders to the White House today to voice his concerns.

Vermont Democrat Patrick Leahy brought the aid package before his Senate appropriations subcommittee. But Leahy said after the meeting with Bush that there are still serious questions about the package and they're delaying swift action.

The lawmaker said Congress would NOT approve the money without knowing where it was going and what it would be used for.

He warned that enormous amounts of aid might lead to waste, fraud and corruption in the countries already torn by war and economic devastation.

Bush wants the aid package passed before Congress begins its Easter recess April 6th.

#90079u2999 03/20/1990 ~United Press International

PORT-AU-PRINCE, HAITI (MARCH 20) UPI - Seven military officers loyal to ousted dictator Prosper Avril were fired Tuesday and hundreds of members of the Presidential Guard moved out of the Presidential Palace now controlled by a civilian government.

Newly installed President Ertha Pascal Trouillot announced in a televised speech in native French creole that democratic elections would be held as soon as possible, but she did not name a date, and said she would reduce her presidential salary, believed to be about $10,000 a year.

Lt. Gen. Herald Abraham, head of Haiti's volatile armed forces, met with Trouillot during the day. Military sources said the decision to move the Presidential Guard from the palace would allow the civilian government to ''work without pressure.''

The 1,200-strong guard, which had been loyal to Avril, was moved to a barracks in the Carfour suburbs of the capital.

Avril, who seized power in a military coup in September 1988, was ousted in a popular revolt on March 10 and is now believed to be in exile in Florida.

An official military statement said among the seven fired soldiers were several who tortured a union activist during the waning days of Avril's regime and Major Isadore Peongon, the former chief of traffic services who is now under arrest on charges of insubordination.

In her speech, Trouillot, a former federal judge, called for ''an urgent and massive assistance'' from the United States, Canada and Europe to help her restore Haiti's devestated economy.

Among the poorest nation in the Western Hemisphere, Haiti's per captia income hovers at $300 a year, making the presidential salary of $10,000 a princely sum. Government officials estimated Trouillot would take a salary cut to $6,000 a year.

In office only a little over a week, the new civilian government has been beset by violence believed to be carried out by the dreaded Tontons Macoutes, the deadly secret police force created by former President-for-Life Francois ''Papa Doc'' Duvalier.

Local radio reported that people panicked in downtown Port-au-Prince Tuesday afternoon when men in a jeep hurled tear gas into an elementary school. No one was reported injured in the incident, and the children were evacuated.

On Monday an army seargant was killed when he was shot by men in a jeep as he waited at a bus stop in the capital.

Political leaders, who want elections held within six months, called on civilians to organize against terrorism.

''The people have to be ready to counteract the actions of the terrorists who do not want the country to change in the world of democracy and progress,'' said Jean Claude Roy, a businessman and political activist.

#90079u3010 03/20/1990 ~United Press International

SAN BERNARDINO, CA (MARCH 21) UPI - An international drug trafficking ring operating out of the Arizona border town of Yuma has been smashed with the seizure of 1,000 pounds of cocaine and arrest of 13 suspects, authorities said Tuesday.

The ring, which was believed to have generated more than $100 million in drug profits in the past year, was dismantled as a result of a coordinated investigative effort by U.S. narcotics officers and Mexican authorities.

''This was a coordinated effort involving the Mexican government. It was a good, solid strike against a significant organization,'' Drug Enforcement Administration spokesman Ralph Lochridge said.

Along with the cocaine, valued at about $3 million, about $2.2 million in cash and 10 weapons were seized in raids conducted Saturday in Yuma, San Bernardino County and Hermosillo, Mexico, Lochridge said.

The operation was the result of a ''covert investigation'' that began in September. The investigation was led by the San Bernardino County Sheriff's Department and involved DEA agents, the Arizona Department of Public Safety, the U.S. Border Patrol, Customs and the Riverside County Sheriff's Department.

The suspects were identified as alleged members of a ring known as ''Banda de Muerte'' - Spanish for ''Band of Death'' - that was importing heroin, cocaine and marijuana across the U.S.-Mexican border.

''Yuma was the hub on the U.S. side,'' Lochridge said. ''That was the distribution center for the cocaine from Mexico. But this was a poly-drug organization involving heroin and marijuana too.''

Ledgers seized in 10 raids in Yuma, four in San Bernardino County - including an upholstery and landscaping businesses in Bloomington that apparently were ''fronts'' for the drug operation - and one in Mexico indicated that the ring had moved in excess of $100 million in drugs in the past year.

In Hermosillo, Mexico, authorities also seized 1,500 pounds of marijuana and a large amount of cocaine.

Also seized in the operation were four residences and 16 vehicles.

Those arrested, both Mexican and U.S. citizens, were held on suspicion of a variety of charges, including money laundering and conspiracy to import drugs. Lochridge identified the ringleader as Isidro Ibarra-Chaidez, 47, of Yuma.

#90079u3033 03/20/1990 ~United Press International
(MARCH 20) UPI - A report commissioned by the Pentagon says Defense Secretary Cheney was too concerned about secrecy in keeping the media from covering the first key hours of the U-S invasion of Panama in December.

The independent study also says Cheney spokesman Pete Williams showed ''less than effective leadership and performance.''

Williams accepted blame and said he and Cheney would make sure the media pool arrives at the start of any future military operations ''whenever possible.''

The report was written by Fred Hoffman, a former Pentagon correspondent and until late last year a deputy spokesman at the Defense Department.

A pool of reporters from various media was created following the black-out of reporting access to the U-S invasion of Grenada in 1983. But reporters were NOT taken to the December invasion of Panama until four hours after it started.

The report says the five-year history of Pentagon pools shows reporters could be trusted to respect operational security.

Prosecutors closed their case against former Exxon Valdez captain Joseph Hazelwood today by saying the skipper gambled and lost by drinking before his ship ran aground.

Prosecutor Brent Cole told a jury in Anchorage, Alaska, that Hazelwood was NOT falling-down drunk, but made a series of alcohol-impaired decisions that led to the nation's worst oil spill last March 24th.

Cole said Hazelwood ''took too many risks and it resulted in a captain's worst nightmare.''

Hazelwood is charged with reckless endangerment, operating a tanker while intoxicated, negligent discharge of oil and criminal mischief.

The only blood-test done on Hazelwood came 11 hours after the accident. It showed him with a blood-alcohol level under the state limit. But alcohol specialists testified that at the time of the accident, Hazelwood would have been drunk.

Specialists for the defense disputed the claim.

#90079u3034 03/20/1990 ~United Press International

SAN FRANCISCO (MARCH 20) UPI - A California state appeal court Tuesday upheld the state's 1986 involuntary AIDS blood test initiative for criminal suspects who attack police and health workers.

The 1st District Court of Appeal ruled that the voter-approved initiative, Proposition 96, does not violate California's constitutional privacy protections or federal protections agains illegal search and seizure.

The initiative is one of the few laws of its kind in the nation, Deputy City Attorney Burk Delventhal said.

The appeal court approved a human imunodeficiency virus test, HIV, on Johnetta Johnson, accused of biting a deputy sheriff during a scuffle at a 1989 custody hearing for her teenage son.

This was the first constitutional test of the law since it was overwhelmingly passed by voters in November 1986.

The appeal court approved the blood test for Johnson, even though there is not a single known case of AIDS being transmitted through bites.

The ruling could be appealed to the California Supreme Court, but no decision has been made, according to Ruth Borenstein, a lawyer for the American Civil Liberties Union, which supported Johnson's challenge of the law.

The justices noted their concern over the questionable medical value of the mandatory test.

The initiative requires criminal suspects to submit to a test of AIDS if they transmit bodily fluids through sexual assault or by attacks on police or health workers.

The justices said while they upheld the statute's constitutionality, ''We cannot rule on its wisdom.''

Proposition 96 mandates costly hearings and testing procedures that consume the time of the courts and public entities, Justice Zerne Haning wrote.

Under the ruling, each case will require an evidenciary hearing to determine whether the request for an AIDS test is merited by the specific circumstances of each case, Delventhal said.

Delventhal said it is unlikely an AIDS test would be required for someone who only spit at an officer if the saliva did not come in contact with an

open cut.

Borenstein said she hoped public safety workers would follow the court's advice and recognize that the only real security for them will come if they submit themselves for AIDS testing.

Three medical experts testified in the case that AIDS is spread three ways through unsafe sexual contacts; through blood or blood products and directly from mother to child during pregnancy.

The experts all said it is only theoretically possible to get AIDS through saliva. They consistently noted that no such instance had been documented.

Haning noted that AIDS is the modern equivalent to leprosy and many have warned that laws such as Proposition 96, approved in times of fear, could prove the same threat to liberty as the communist scares of the Joseph McCarthy era in the 1950s or the Japanese relocation camps of World War II.

''This is not such a case,'' Haning wrote. ''The electorate has enacted a statute which is narrowly drawn to respond to a serious state interest. Testing must be accomplished in a medically approved manner, and its results are subject to strict rules of nondisclosure,'' he wrote.

Haning went on to note that a San Francisco Police Officers' Association report suggested that education about AIDS would be better than legislation that is difficult to enforce ''but is also of questionable medical value and seems to only add to the hysteria of the AIDS situation.''

Haning said, ''While we agree in principle with much of this sentiment, it is not for courts to judge the wisdom of legislation.''

#90079u3162 03/20/1990 ~United Press International

SACRAMENTO (MARCH 21) UPI - Officers of First Executive Corp. declined to appear voluntarily before an Assembly committee investigating the life insurance company's extensive junk-bond investments, officials said Tuesday.

The Los Angeles-based firm also has hired two well-connected lobbyists to represent its interests in Sacramento as Assemblyman Patrick Johnston, D-Stockton, attempts to compel them to testify before the Assembly Finance and Insurance Committee.

These are two of the moves in an elaborate legal chess game between First Executive and Johnston, a Stockton Democrat.

While Congress regularly uses its subpoena power to compel testimony from recalcitrant witnesses, the power has been only occasionally used in the state Legislature. Johnston admits legislative leaders are feeling their way.

''There's been considerable resistance on the part of First Executive,'' Johnston told United Press International.

Johnston, the committee chairman, is pushing for legislation to establish a guarantee fund to protect policyholders against the insolvency of their life insurance company. He said California is one of the few states without one.

As part of that effort, Johnston said he wants to hear from Fred Carr, First Executive's chief executive officer, and Doug Marcian, its chief investment officer, regarding their use of a strategy of junk-bond investments engineered by indicted junk-bond king Michael Milken.

First Executive, which has about $60 billion in insurance in force and carries policies for 100,000 Californians, stunned the financial world in January when it announced a $515 million write-off against fourth-quarter earnings to reflect the lower value of its junk bond portfolio.

Last month, Johnston subpoenaed Carr, Marcian and Milken with the approval of Assemblyman Tom Bane, D-Tarzana, chairman of the Assembly Rules Committee.

In a letter dated Monday, First Executive President Alan Snyder told Johnston that Carr and Marcian would not testify because of the time needed for preparation and ''the adverse publicity that would be generated by a hearing in which the central focus is the company's standing in the insurance community.''

Milken lawyer Arthur Liman, who gained fame in the Iran-Contra hearings in 1987, told Johnston last week that Milken would assert his Fifth Amendment rights against self-incrimination and would not testify.

Milken, the former official of the Drexel, Burnham, Lambert Group, faces 98 counts of fraud and racketeering in New York.

#90079u3272 03/20/1990 ~United Press International

(MARCH 20) UPI - Israeli President Chaim Herzog has picked Labor Party chairman Shimon Peres to form the nation's next ruling coalition. Herzog presented Peres with a letter during a brief television ceremony today giving him the mandate to put together the new government.

The U-S Army today took custody of a Greyhound replacement driver wanted for desertion. He was arrested Saturday near Crescent City, California. Greyhound said it hired the driver March 2nd, the day most of its workers went on strike... but the company had NOT finished its background review.

Imelda Marcos says she's a Philippine citizen and so should be tried in her home country before her people. The former first lady of the Philippines is on trial in New York on charges of skimming more than 100-Million dollars from the Asian nation's treasury.

A museum in Boston is offering a one-Million-dollar reward for information leading to the safe return of 12 works of art stolen Sunday. They include paintings by masters such as Rembrandt and Degas , and the museum's curators say they're worth ''hundreds of Millions of dollars.''

There's word from Athens, that Libyan leader Colonel Moammar Gadhafi was behind the fire that destroyed a chemical plant in Rabta, south of Tripoli. Libyan opposition sources say Gadhafi ordered the plant burned down to prevent a possible U-S military strike.

East German conservative party leader Lothar de Maiziere is courting the nation's liberals today in his bid to put together a coalition government. De Maiziere turned to the liberals after Social Democrats rejected his offer for a second time.

A federal investigator in Jacksonville, Florida, says a package bomb that killed an elderly man last night at his apartment does NOT appear to be related to a series of racially motivated mail bombings in the South last December.

Thailand's government today abolished a military decree that allowed the government to shut down any newspaper. The decision marks another step in Thailand's gradual return to democracy since a military takeover in 1976.

Police say French movie actress Capucine jumped to her death from her eighth-floor apartment in Lausanne, Switzerland. She appeared in 1960's films with stars such as John Wayne and Jane Fonda. She ended her life Saturday at age 57.

Tammy Faye Bakker and her followers are again without a church. Bakker's New Covenant Church moved into a building in Orlando, Florida, two weeks ago. But county officials have ordered them out because of zoning laws.

-30- 2732

#90079u3518 03/20/1990 ~United Press International

(MARCH 20) UPI - The Census Bureau is making an UNprecedented nationwide effort to include America's homeless in this year's population count.

15-thousand census takers went out today to visit shelters, ride subways and check abandoned buildings and other places where the homeless congregate. The plan is drawing fire from some advocates for the homeless who say the effort will give an inaccurate count that could be used to slash funding from needed programs.

A federal appeals court in Boston ruled that the Department of Health and Human Services canNOT prevent public funds from being used for abortion counseling or referral services. The 3-1 decision made public today says such regulations are UNconstitutional. The judge writing for the majority says regulations of that kind infringe upon women's freedom of reproductive choice by denying them access to important information.

Democratic leaders in Congress today introduced a bill to raise some one-BILLION dollars in taxes over five years from foreign companies. Representatives Dan Rostenkowski of Illinois and Richard Gephardt of Missouri say the legislation will help make sure foreign companies are paying their fair share of taxes on their U-S operations. The lawmakers say the bill is NOT meant to hinder foreign investment.

Jury selection began today in Elizabeth, New Jersey, in the trial of an accountant who hid for 18 years after allegedly killing his wife, mother and three children. More than 200 people were called as potential jurors in the trial stemming from the 1971 killing. John Emil List was arrested in Virginia last year, living with a new wife under a new name.

A Soviet legislative committee today approved a bill to lift travel and emigration restrictions against Soviet citizens. The United States has made easier travel by Soviet citizens a condition for improved trade relations. The committee chairman says he plans to push for Parliament to pass the bill by next month.

-30- 2155

#90079u3854 03/20/1990 ~United Press International

(MARCH 20) UPI - 28-year-old bus Greyhound driver Martin Shaw was arrested early Saturday morning when police stopped his bus for a routine log check on U-S 101 near Crescent City, California. Shaw was turned over to the U-S Army today on a warrant charging him with desertion. Shaw was a hired as a replacement driver by Greyhound on March 2nd, the day a nationwide strike against the bus line began. Greyhound officials say they had NOT finished a background review on Shaw.

Israeli President Chaim Herzog today summoned Labor Party chairman Shimon Peres, giving him a mandate to attempt to put together a government coalition. Peres last week led the challenge that brought down Prime Minister Shamir's conservative government. Under Israeli law, the president must choose the leader he believes has the best chance of

forming a government coalition, but is NOT bound by the mathematics of party support.

The Irish Republican Army claims responsibility for two bombs that exploded today inside a defense plant in Belfast, Northern Ireland. Officials say one person was wounded and five others were in shock. This would be the third I-R-A attack on the weapons plant. Police said the I-R-A warned that five bombs had been set inside the plant, prompting evacuation of five-thousand workers just 20 minutes before the bombs went off.

The world's richest woman and its fourth-wealthiest person received a pay raise. The British government today gave Queen Elizabeth the Second and 10 other members of the Royal family a pay increase of nine percent. For the Queen herself, that trasnslates into eight-pointMillion dollars a year. The entire family, Queen included, will receive a total of some 11-Million dollars.

#90079u4038 03/20/1990 ~United Press International

(MARCH 20) UPI - New violence reported in the Transylvanian provincial city in Romania where ethnic unrest erupted yesterday. News reports say ethnic Romanians from surrounding towns arrived tonight in buses and trucks and attacked ethnic Hungarians with axes and iron bars. Earlier, about 10-thousand ethnic Hungarians took to the streets in the province of Transylvania, where most of Romania's Hungarian minority is concentrated. The violence is being condemned by the provisional government, which is meeting in emergency session.

Namibia is celebrating its independence after 75 years under South African rule. South African President de Klerk lowered the South African flag during a midnight ceremony in the capital city of Windhoek... where it's Wednesday morning. Earlier, De Klerk was greeted by Namibia's president-elect, Sam Nujoma , whose rebel group had waged a 23-year war against South African rule.

Western diplomatic sources could NOT immediately verify claims that Libyan leader Moammar Gadhafi ordered his own security forces to burn down a chemical plant south of Tripoli. The charge came from a Libyan opposition source in Athens during a telephone interview with United Press International. The source says Gadhafi lives in fear of another U-S air strike. American jets bombed Tripoli in 1986 after Washington accused Gadhafi of sponsoring anti-U-S terrorism.

The Martin Marietta Astronautics Group says the second stage of a Titan-3 rocket that put a satellite into a useless orbit last week was mistakenly wired for two satellites. The engineering error prevented technicians from

sending a signal to separate the satellite from its booster. 118 nations jointly own the satellite. They have asked NASA what might be done to rescue the 150-Million-dollar satellite. A space shuttle mission is one possibility.

-30- 2010

#90079u4078 03/20/1990 ~United Press International

(MARCH 20) UPI - Doctors say pop singer Gloria Estefan suffered a broken back today in an accident in the Pocono Mountains, but suffers NO paralysis. Estefan was in her tour bus on snowy Interstate 380, near Scranton, Pennsylvania, when a tractor-trailer struck the bus from behind... pushing it into another tractor-trailer. The accident forced cancellation of tonight's concert by Estefan and the Miami Sound Machine in Syracuse, New York.

The jury is expected to begin deliberations in Anchorage, Alaska, tomorrow in the trial of former Exxon Vandez skipper Joseph Hazelwood. The prosecution argues Hazelwood was drinking last March and therefore was impaired when tanker ran aground in Prince William Sound, triggering the worst oil spill in U-S history. During closing arguments today, the defense called the charge ''absolute nonsense''... citing the unanimous support of witnesses who said Hazelwood was in control of himself before the tanker sailed.

In Washington, prosecutors in the 12-day Iran-Contra trial of John Poindexter rested their case today by directly linking the former national security adviser to charges of lying to Congress. Poindexter's lawyer, Richard Beckler, then presented his first witness and told reporters he would play eight hours of former President Reagan's videotaped testimony tomorrow. Beckler's strategy is to show Poindexter was only doing Reagan's bidding by helping divert profits from secret arms sales to Iran to Nicaraguan Contra rebels.

Industry today voiced outrage over the compromise clean air bill pending in the Senate. In Washington, a coalition representing two-thousand businesses calling itself the Clean Air Working Group issued a report that says the bill will cost 47-BILLION dollars a year. That's more than twice as much as President Bush or the Senate says it will cost.

-30- 2016

#90079u4280 03/20/1990 ~United Press International

(MARCH 20) UPI - The latest news from across the nation and around the world... from the wires of United Press International.

Namibia has raised its flag for the first time as an independent nation.

For more than a century, Namibia had been under foreign rule. First under Germany, and for the last 75 years, South Africa. After a U-N peace plan which ended a 23-year war, Namibia has become independent.

Heads of state from around the world attended the ceremony in the capital of Windhoek, where it's already Wednesday.

Secretary of State Baker and South African black rights leader Nelson Mandela attended. South African President de Klerk lowered his country's flag, and wished Namibia peace as part of what he called ''a new southern Africa.''

Sam Nujoma... who led the fight for independence by the South West Africa People's Organization... was then sworn in as president. He again called for peace among his country's 11 ethnically and racially divided groups.

New clashes leaving dozens more injured reportedly erupted today in Romania at the scene of bitter ethnic fighting yesterday.

The Hungarian news agency said the violence appeared in the Transylvanian town of Tirgu Mures. It said ethnic Romanians from surrounding towns drove into the city in buses and trucks and attacked ethnic Hungarians with axes and iron bars.

Only hours earlier, 10-thousand ethnic Hungarians had taken to the streets of the city to protest a wave of anti-Hungarian violence.

Yesterday, Romanians attacked the office of the Democratic Union of Hungarians. 24 people were injured, including a prominent Hungarian playwright, who suffered broken bones and an eye injury.

Romania's provisional government condemned the violence.

The clashes follow Hungarian demands for schools in their native language.

News of the attacks sparked protests by 70-thousand people in neighboring Budapest, Hungary. One banner blamed the violence on the 1921 treaty that severed Transylvania from modern-day Hungary.

-30- 2196

#90079u4321 03/20/1990 ~United Press International

(MARCH 20) UPI - While Washington warned Moscow today against using ''intimidation and tension'' against Lithuania, the Soviet foreign minister assured Secretary of State Baker the Soviets will NOT use force against the Baltic republic.

Baker said there is NO reason to doubt Soviet Foreign Minister

Shevardnadze. The two met in Windhoek, Namibia , where they attended a ceremony marking that country's independence from South Africa.

Baker said the chief Soviet diplomat told him Moscow hopes to use dialogue to handle last week's declaration of independence by Lithuania.

But at the White House, news secretary Marlin Fitzwater said indications of Soviet troop movements have raised U-S worries. Fitzwater said Soviet actions and statements over the past few days are cause for concern. But he added there are NO indications the Soviets have taken ''forcible control.''

An opposition source in Greece told United Press International Libyan leader Colonel Gadhafi had ordered the burning of a chemical plant in Rabta, south of Tripoli.

A Western diplomat says he doubts the Libyans would burn their own plant down. But he did NOT rule out such a possibility, saying- quote- ''Gadhafi is capable of anything.''

The United States hinted last week it had NOT ruled out the use of force unless Gadhafi halted what U-S officials say is the production of mustard and nerve gasses at the Rabta plant.

A Cairo-based West European envoy says burning the plant would make sense if Gadhafi believes such action would prevent an embarrassing U-S military strike... and at the same time make Libya appear to be the victim of foreign saboteurs.

#90079u4330 03/20/1990 ~United Press International

(MARCH 20) UPI - Many economists are troubled by new figures on inflation that show a higher rise in inflation than expected.

The Labor Department reported today that consumer prices went up five-tenths of one percent in February. That comes on top of a one-point-one percent hike in January.

A top analyst for First Albany Bank in New York called the February number ''a big disappointment.'' He said it will make it difficult for the Federal Reserve to lower interest rates.

The greatest factor fueling inflation's rise was higher costs for apparel and upkeep, which rose three-point-three percent last month. The Labor Department said new higher-priced spring and summer clothing is responsible for the rise.

To make matters worse, America's merchandise trade deficit shot up by 20-point-five percent in January to more than nine-BILLION dollars.

Petroleum made up almost two-thirds of the deficit.

Former Philippine first lady Imelda Marcos and a Saudi Arabian arms dealer went on trial in New York today. The 60-year-old Marcos and Adnan Khashoggi are charged with siphoning more than 100-Million dollars from the Philippine treasury into New York real estate and art.

Marcos, who stands accused with her late husband Ferdinand, believes she should be tried as an ordinary citizen before the Philippine people in her home country.

Marcos is charged with fraud and obstruction of justice in the racketeering scheme and could face up to 50 years in prison if convicted. The 54-year-old Khashoggi could face up to 20 years in prison.

After jury selection is completed, the complex conspiracy case is expected to continue well into the summer.

#90079u4416 03/20/1990 ~United Press International

(MARCH 20) UPI - Romania's provisional government is appealing for calm as ethnic violence erupted for a second day in the Transylvanian city of Tirgu Mures. Dozens of people reportedly were injured as rival groups of demonstrators fought with iron bars and axes tonight.

The world's newest nation has a new president. Sam Nujoma , the 60-year-old former railway steward who led the 23-year-old bush war against South Africa, was sworn in early Wednesday as president of newly independent Namibia.

A hotly debated plan to toughen the bipartisan compromise clean air bill was rejected by the Senate today. Lawmakers voted 52-46 to nix a proposal to tighten controls on auto tailpipe emissions and require mass production of ''alternative fuel'' cars. It is a major clean air defeat for environmentalists.

The fate of former Exxon Valdez skipper Joseph Hazelwood is now in the hands of a jury in Anchorage, Alaska. Following closing arguments, jurors began deliberations this evening in the case stemming from the worst oil spill in U-S history.

The Census Bureau sent out 15-thousand census takers today in the first effort to count homeless Americans. The project has drawn considerable fire from some advocates of the homeless, who contend it cannot provide an

accurate count and that its numbers will be used to slash funding from needed programs.

Polish Prime Minister Mazowiecki arrived in Washington, D-C, today for a historic state visit. The leader of the first non-communist government in Eastern Europe since World War Two will meet with President Bush tomorrow.

#90079u4428 03/20/1990 ~United Press International

(MARCH 20) UPI - The first official day of spring brought snow to much of the East Coast today. Parts of New England received as much as 14 inches. But the rain that wreaked havoc through the Deep South for several days is ending and cooler weather prevailing.

Pop singer Gloria Estefan is hospitalized in stable condition tonight in Scranton, Pennsylvania, following a bus-truck collision that left her with a broken back. Doctors say the lead singer of the Miami Sound Machine apparently suffered NO paralysis. Five other members of Estefan's entourage were injured in the crash, which occurred during a snowstorm in the Pocono Mountains.

Today was primary election day in Illinois. Voters are deciding who will be the Republican candidate to oppose Democrat Neil Hartigan in November general election for governor. Voter turnout was reported light, except in Chicago.

Rain threatened voter turnout for two special congressional elections in New York City today. Voters in the South Bronx are choosing a successor to Robert Garcia, who was convicted in the Wedtech scandal. In Staten Island, Susan Molinari hopes to succeed her father in Congress.

Israeli President Herzog asked Labor Party chairman Shimon Peres to form a new government today. Peres has three weeks before reporting back to the president, who can then grant up to 21 more days for the task.

A royal frenzy as the British news media await the birth of the newest royal. Dozens of photographers have staked out a spot outside the London hospital where the dutchess of York, popularly known as ''Fergie,'' is expected to deliver her second child sometime this week.

#90079u4550 03/20/1990 ~United Press International

(MARCH 20) UPI - Romanians and ethnic Hungarians clashed for a second day in a row in Tirgu Mures, Romania. The city is in a Transylvanian province that used to be part of Hungary. Romania's official news agency says what started tonight as a ''dialogue'' between 15-thousand ethnic Hungarians

and several thousand Romanians turned violent. Combatants fought with iron bars and axes, leaving dozens injured. Romania's provisional government condemned the violence and called on authorities in Tirgu Mures to end the unrest.

Namibia is celebrating its independence and a new president. The Namibian flag was raised in a ceremony just after midnight early Wednesday in the capital city of Windhoek. Then Sam Nujoma... who for 23 years led a guerrilla war for independence from South Africa... was sworn in as president. In a speech, Nujoma called for unity in his ethnically divided country.

The Senate has turned down a proposal to tighten controls on auto tailpipe emissions and require mass production of ''alternative fuel'' cars. Today's rejection by a vote of 52-46 is viewed as a major clean air defeat for environmentalists. Car emissions are the primary cause of ozone smog which now exceeds federal health standards in 101 cities.

A Boston museum today offered a one-Million-dollar reward for information leading to the safe return of a dozen stolen masterpieces. The Isabella Stewart Gardner Museum says the money would even be given to the thieves if they returned the paintings and sculptures, which were swiped early Sunday. The museum director says the F-B-I is certain the money will aid the investigation, even though the paintings are valued at hundreds of Millions of dollars.

#90079u4583 03/20/1990 ~United Press International

(MARCH 20) UPI - Cardinal Joseph Bernardin of Chicago today urged against punitive measures for Catholic public officials who disagree with the church on abortion. Bernardin... one of the nation's most influential Roman Catholic prelates... instead called for ''moral persuasion.'' He spoke in Washington at the Woodstock Theological Center. Recently, Cincinnati Archbishop Daniel Pilarczyk said Catholics associated with abortion services should NOT take Holy Communion.

Actor Paul Newman was in court today in Bridgeport, Connecticut, for the second trial in the civil suit filed by a Westport delicatessen owner. Julius Gold claims he helped the actor launch his Newman's Own salad dressing but that Newman reneged on a verbal promise to give him a share of the business. Newman denies the claim, and says he concocted the dressing at home and decided to sell it to raise funds for charities. The first trial ended in a mistrial in 1988.

A consumer survey of more than two dozen supermarkets confirms what many people already suspected- that high-sugar breakfast cereals aimed at children are placed on lower shelves within easy reach of the youngsters.

A spokesman for the Center for Science in the Public Interest says the average sugar content of a ''kids'' cereal is 44 percent and amounts to ''breakfast candies.'' But a spokesman for Grocery Manufacturers says NO matter what shelf the boxes occupy, it's the parents that have the ''the final say'' in buying the cereal.

Ah, the sweet smell of success. A 14-year-old Rhode Island boy today walked off with a 500-dollar U-S Savings Bond and a year's supply of footwear. Matt Greenhalgh made the haul by winning the international division of the 15th annual Rotten Sneaker Contest in Montpelier, Vermont. Greenhalgh claims NO secret formula. He says his dilapidated pair of green of sneakers- quote- ''just smell up when I walk.''

BOULDER, CO (MARCH 21) BUSINESS WIRE - Sterling-Rice Group, a Boulder-based consulting firm, announces two new assignments from Chicago-area firms, Keebler and the National Livestock and Meat Board.

Keebler, a new client, has asked SRG to develop new products for the snack manufacturer. The Meat Board has requested that SRG assess certain elements within their meat marketing program. ''We're pleased that Sterling-Rice Group continues to attract major out-of-state clients.

''It's great SRG, obviously, but it also benefits Colorado's overall reputation as a source for creativity and strategic thinking,'' said Rick Sterling, president of SRG.

Sterling-Rice Group specializes in business development and assists a host of local and national consumer products companies. Some of their other clients are: American Lamb Council, Carnation, Ralston Purina, Quaker Oats, Frito-Lay and Earth's Best Baby Food.

SANTA CLARA, CA (MARCH 21) BUSINESS WIRE - Calera Recognition Systems Inc. announced today at CeBIT French and German versions of their TrueScan and TopScan Professional series of OCR systems for PC AT and PS/2 with Micro Channel.

These are the first in a suite of European languages to be made available by Calera. As part of the launch for the new products, Calera is exhibiting at CeBIT for the first time.

Calera manufactures TrueScan and TopScan Professional OCR systems for many leading platforms including IBM PC and PC-compatibles, PS/2 with MCA, Apple Macintosh and Sun workstations and the products are compatible with all leading scanners and software applications. Calera's OCR products convert scanned documents into usable computer text files.

Because products which are specialized for each language will always be more accurate than generic products, Calera uses native language dictionaries and other language-specific information in the OCR process. This provides the most accurate reproduction of both characters and document structures.

For example, the structure for placement of commas and decimal points when writing numbers in French is the reverse of English; sometimes there is no decimal point, just a space. Both French and German provide the same high-quality performance found in the American English version and accurately identify document structures.

The French and German versions will be available early 2nd quarter.

As with the American English version users can automatically put paper-based business documents into word processors, databases, spreadsheets and desktop publishing applications. The products are designed to accurately recognize all typefaces from 6 to 28 point and capture both text and graphics in a single pass.

In addition, they perform text recognition on all types of documents including typewritten, draft and letter-quality dot-matrix, typeset and laser print and can convert facsimile files into any of the applications mentioned above.

Calera will also be showing the recently introduced American English version of TopScan Professional and TopScan for the Macintosh on their Compound Document Processsor (CDP), the fastest scanning and text recognition system on the market, rated at over 3000 words per minute.

Calera's international sales philosophy is built around creating partnerships with resellers who have the capability to market and support Calera's full line of products from the entry level product, TrueScan, through its high-end TopScan Professional. Calera currently is distributing through a select group of European resellers and intends to further expand its role throughout Europe.

Founded in 1982 as The Palantir Corp., Calera Recognition Systems is the leading manufacturer of document recognition systems and scanners for use in the office environment. From the beginning the company has focused its attention on developing the highest performance document recognition technology for uses ranging from desktop to large systems applications. Calera is exhibiting at Hall 6, Stand F23/C46, Booth G6.

EL MONTE, CA (MARCH 21) BUSINESS WIRE - Marshall Industries (NYSE:MI) Wednesday reported operating results for the three-month period ended Feb. 28, the third quarter of its fiscal year 1990.

Net sales for the quarter decreased to $132,536,000 from $133,705,000 for the like period last year. Net income declined to $4,544,000, or 53 cents per share, from $5,344,000, or 58 cents per share, a year ago.

For the nine months ended Feb. 28, net sales decreased to $390,687,000 from $398,703,000 in the prior year. Net income for the nine-month period was $13,876,000, or $1.53 per share, compared with last year's $16,794,000, or $1.81 per share.

Management said that on a year-to-year basis, sales and margins continue to reflect the substantial decline in volume of dynamic random access memory (DRAM) products as prices have been significantly below prior-year levels. The sales decline has been largely offset, however, by growth in the company's other product areas.

Marshall Industries is a leading national distributor of industrial electronic components, computer products, electronic test instruments and production supplies.

PALO ALTO, CA (MARCH 21) BUSINESS WIRE - Citing its pioneering commitment to open systems and a host of products available now, Hewlett-Packard Co. Wednesday announced NewWave Computing, a standards-based computer strategy and underlying computer architecture that strengthen HP's lead in the worldwide movement to open, cooperative-computing systems.

''There's a major transformation under way in the computer industry, driven by innovative technologies and customer demands for open systems and standards,'' said Dean O. Morton, HP executive vice president and chief operating officer.

''This shift away from proprietary, single-vendor environments to cooperative, multivendor environments perfectly matches the open-systems approach HP adopted in the mid-1980s.

''What other vendors are just beginning to talk about is, in fact, the basis of NewWave Computing now. Today's announcement formalizes our approach to cooperative computing and provides the blueprint for its implementation in the 1990s.''

NewWave Computing enables customers to select the best available computer products from HP or other vendors and to link them in networks that make information easier to acquire, share, use and manage. It consists of products and technologies available today and a carefully thought-out vision of the cooperative-computing environments customers want.

By implementing NewWave Computing, organizations can improve decision-making, increase productivity, get information faster and obtain greater return on information-systems investments -- critical needs in the global marketplace of the 1990s.

''Customers want to protect their investments in hardware and applications while gaining the freedom and flexibility that open systems provide,'' Morton said. ''They want to choose the equipment and software that best serve their needs with the assurance that everything will function as part of a single, integrated whole -- sharing information and working together as if designed for that purpose.

''Proprietary environments prohibit this mix-and-match approach. Only a strategy based on open systems and standards will allow true cooperative computing. And no other major vendor can match HP's proven commitment to open systems, or the standards-based products and technologies HP has available today. HP bases its innovation on standards and offers its innovation to the standards movement,'' said Morton.

HP is the third-largest U.S. computer manufacturer, with computer products and services accounting for about 70 percent of the

company's total 1989 revenue of $11.9 billion.

The company's products range from terminals, personal computers and workstations to high-performance minicomputers and servers. Also included are computer networks, office services, software applications, user interfaces, peripherals and support services.

HOUSTON (MARCH 21) BUSINESS WIRE - Smith International Inc. (NYSE:SII) and Industrial Equity (Pacific) Ltd. (IEP) announced Wednesday that they had entered into an agreement pursuant to which IEP's holdings in Smith, representing approximately 32 percent of Smith's outstanding common shares on a fully-diluted basis, would be registered for public sale.

The agreement contemplates that the securities will be sold pursuant to a registered public offering in a firm commitment underwriting. Smith intends to file a registration statement in early April and the offering would occur after the registration statement has been declared effective by the SEC. Smith will not receive any proceeds of the offering.

On March 1 IEP stated publicly that it intended to explore the possibility of selling all its holdings in Smith.

Smith International, the largest downhole drilling tool and service company in the world, designs, manufactures, sells and services a broad group of products used for drilling wells in the oil and gas industry.

BEAVERTON, OR (MARCH 21) BUSINESS WIRE - The Koll Co. has received the 1990 Landscape Contribution Award from the Associated Landscape Contractors of America (ALCA), announced Brian A. Lessler, Koll vice president and regional asset manager.

Koll was recognized by the national landscape contractors professional association for its commitment to using contracted services for quality landscaping, and creating and perpetuating environments of excellence.

The Portland division was selected for this honor from a field of other nominated development companies from around the country. Koll was nominated by Northwest Landscape Industries, a local member of the national organization.

''Our company's philosophy is to create campus-like environments for our tenants, which in turn, give our projects a more premium image,'' said Lessler. ''That thinking remains a cornerstone of our development strategy, not only here, but in Koll divisions regionwide.''

The Koll Co. is the largest commercial development company headquartered on the West Coast. The privately owned firm provides development, acquisition and property management services for real estate projects throughout the West.

MOUNTAIN VIEW, CA (MARCH 21) BUSINESS WIRE - ASK Computer Systems Wednesday announced that Irwin ''Jake'' Jacobs will join the company in the new position of vice president, sales and marketing.

ASK's worldwide sales and customer service organizations, channel marketing and business development will report to him.

''Jake brings a depth of experience in sales and marketing to ASK that will contribute to positioning us for the 1990s,'' commented Sandra Kurtzig, ASK's chief executive officer. ''Jake shares our view that ASK is a $200 million start-up ready to grow to a billion dollars.''

Jacobs, 52, joins ASK from Perception Technology Corp. of Canton, Mass., where he was president and chairman of the board. Previously, he held top management positions at computer software and technology firms.

Jacobs spent 17 years with Digital Equipment Corp. He was vice president, commercial OEMs when he left the firm in 1982. While at DEC, Jacobs was a key executive in launching Digital into the commercial market, first as head of the Business Products Group, then as head of commercial OEMs where he was responsible for worldwide reseller activities. He grew this group from minimal revenue to become one of DEC's largest business units.

ASK Computer Systems is the leader in enterprise-wide information systems for manufacturing companies. There are 950 ASK employees worldwide supporting 300,000 ASK system users.

Over 25,000 ASK software products operate at customer manufacturing sites worldwide. ASK completed its 1989 fiscal year in June with revenue of $186 million and net income of $13.5 million.

SAN DIEGO (MARCH 21) BUSINESS WIRE - Cipher Products Group has received the final signature on a contract with Digital Equipment Corp. successfully extending and expanding its 12-year relationship as a supplier of removable information storage devices.

The contract is estimated to be worth approximately $16 million over the next two and a half years. Under the terms of an existing basic order agreement, Cipher Products Group (CPG) will furnish its half-inch reel-to-reel nine-track tape drives, including the Microstreamer and Group Coded Recording (GCR) drives for Digital's new MicroVAX III series, MicroVAX II and PDP-11 computer systems.

This broad range of drives offering Cipher/Pertec and SCSI interfaces allows Digital considerable flexibility in serving Computer Special Systems customers requiring nine-track tape drives for disk backup, archival storage, data interchange and software distribution.

''Digital and Cipher have mutally benefited from this business partership for many years,'' said CPG vice president and general manager Craig Turner. ''This contract was the next step for CPG to furnish its full line of half-inch tape solutions, including the new F880ES and M995 drives that will accommodate DEC's large and diverse customer base. We are pleased to have been selected as DEC's continuing supplier.''

Cipher Products Group is the half-inch cartridge and reel-to-reel division of San Diego-based Cipher Data Products Inc.

Digital Equipment Corp., with headquarters in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

LOS ANGELES (MARCH 21) BUSINESS WIRE - Odyssey Entertainment Ltd. (NASDAQ:ODYY) and its foreign sales subsidiary, Odyssey Distributors Ltd., are participating in the co-production and/or co-financing of two major motion pictures and have provided significant foreign presales commitments for three additional major motion pictures through its joint venture with Cinecom Entertainment Group.

The total production costs of the five films is in excess of $57 million. The films are financed in whole or in part through Odyssey Distributors' distribution arrangements and bank commitments.

The first of these films, ''Q & A,'' starring Nick Nolte, Timothy Hutton and Armand Assante, was written and directed by Sidney Lumet, whose previous films include ''Dog Day Afternoon,'' ''Serpico'' and ''Network.'' Based on a novel by Judge Edwin Torros, Lumet's screenplay is about a young district attorney facing off against a legendary detective and the criminal justice system.

''Q & A'' will be released by Tri-Star Pictures on April 27 in 1,000 theaters nationwide. ''Q & A'' was financed entirely by presales by Odyssey in association with Regency International Pictures, B.V. Odyssey/Regency is also funding the initial domestic theatrical releasing costs of ''Q & A'' through a highly favorable distribution arrangement with Tri-Star.

The second picture, ''Switch,'' is an original screenplay by Blake Edwards who will direct, about a womanizer who is killed by several of his lovers and comes back to life as a woman -- played by Ellen Barkin, one of the hottest actresses in Hollywood today. The film is being produced in association with HBO, which holds all domestic rights, and will be distributed theatrically in the United States and Canada by Warner Bros.

Odyssey/Regency, which concluded the HBO deal, financed approximately 60 percent of the costs of production through its credit line with Credit

Lyonnais Bank Nederland and owns all foreign rights. ''Switch'' is currently in preproduction and principal photography is scheduled to commence April 18.

Two of the remaining three films, ''The Handmaid's Tale'' and ''Aunt Julia and the Scriptwriter,'' were produced by Cinecom Entertainment Group, and will be released in the foreign territories under the Odyssey/Cinecom banner.

''The Handmaid's Tale'' was released domestically on March 7 and is already enjoying huge success in its initial foreign opening in Germany. Robert Duvall, Faye Dunaway and Natasha Richardson star in Harold Pinter's screen adaptation of Margaret Atwood's best-selling novel about an America of the future where a puritanical regime forces child-bearing women into slavery.

Volker Schlondorff, whose ''Tin Drum'' won an Academy Award for best foreign film, directed the film.

Based on Mario Vargas Llosa's cult novel, ''Aunt Julia and the Scriptwriter'' is a zany romantic comedy set in jazz-filled New Orleans in the 1950s. ''Aunt Julia,'' starring Barbara Hershey, Keanu Reeves and Peter Falk, will be released in the United States later this year.

The fifth film, ''Rosencrantz and Guildenstern are Dead,'' is produced by Michael Brandman in association with Cinecom and Odyssey Distributors. Richard Dreyfuss and Gary Oldman head the cast of ''Rosencrantz,'' Tom Stoppard's screenplay adaptation of his award-winning hit stage play. Vangelis (''Chariots of Fire'') will score this manic comedy-drama, which is now in post production.

These films all follow a program set by Odyssey whereby the company is involved in major feature film activities as early as the packaging stage, without the financial risks traditionally associated with filmmaking. In each case the level of foreign sales commitments has exceeded Odyssey's required contribution to the film costs.

SAN FRANCISCO (MARCH 21) BUSINESS WIRE - The Federal Home Loan Bank of San Francisco is sponsoring two half-day workshops on March 27 and 28 in Los Angeles and San Francisco on the new Affordable Housing Program initiated by the Financial Institutions Reform, Recovery, and Enforcement Act of 1989.

The workshops will be free. Attendees must register in advance. The workshops are designed to assist institutional housing lenders and affordable and low-income housing developers and sponsors in California, Arizona, and Nevada to understand the new Affordable Housing Program and its application process. Funds for the Program are provided by the 12 Federal Home Loan Banks through their housing finance lender members.

Applications for participation in the Affordable Housing Program will be accepted by the Federal Home Loan Bank of San Francisco until May 1, 1990. A second application period for 1990 will extend from July 17 through August 31, 1990.

Interested housing lenders, developers, and sponsors may contact Ann-Marie Murphy at the Federal Home Loan Bank at 415/393-1376 to obtain more information on the workshops, and to register to attend. Registration will be limited to 200 attendees in each location.

SAN FRANCISCO (MARCH 21) BUSINESS WIRE - Bank of America has named Senior Vice President Bruce W. Mitchell, its New York-based Northeast/Southeast Institutional Group manager, to head the Europe, Middle East and Africa Division's transactional services.

Mitchell, 51, will be responsible for EMEA Division operations as well as product management, quality, and sales and marketing of transactional services, reporting directly to the Division Executive Vice President, William V. Young.

Young said Mitchell ''brings a wide knowledge of both international and multinational banking to bear on our commitment to this important product segment.''

Senior Vice President Barbara L. Rambo, manager of the Consumer Industrial Finance Group at the bank's New York Corporate Office, was named acting head of the Northeast/Southeast Institutional Group.

Mitchell joined Bank of America in 1963 as a community relations officer advancing to vice president and head of the bank's Southern California public relations unit in 1970. Following assignments in corporate finance in Los Angeles and in multinational banking in London, he served as vice president and manager of the bank's London Branch from 1974 until 1979.

He was named a senior vice president in charge of planning and analysis for the bank's World Banking Division in 1979, the position he held prior to assuming his New York responsibilities in 1982.

Mitchell graduated from Stanford University in 1962 and also holds an MBA from that institution.

PHOENIX (MARCH 21) BUSINESS WIRE - John P. Singleton was named Wednesday to the board of directors of Security Pacific Bank Arizona (SPBA).

Singleton is vice chairman and chief operating officer of Security Pacific Corp., the parent company of SPBA based in Los Angeles. He also is a member of the corporation's office of the chief executive. His responsibilities as chief operating officer include oversight of the Security Pacific Banks in Arizona, Nevada, Washington, Oregon, Alaska and Canada, as well as the Security Pacific Automation Co. and all SPC staff support groups.

Singleton holds a bachelor's degree in management from Arizona State University. He has pursued graduate studies in management and computer science at several universities, including the University of Southern California.

Active in national, state and local civic affairs, Singleton currently serves on the national boards of Junior Achievement and the National Alliance of Business. In 1988, he received the Information Systems Award for Executive Leadership from the John E. Anderson Graduate School of Management at UCLA. He also received the 1988 National Award for Achievement in Managing Technology from Carnegie-Mellon University.

Last fall, Singleton was honored by the Arizona State University Business Alumni Association as their 1989 Hall of Fame recipient.

Security Pacific Bank Arizona is affiliated with Security Pacific Corp., the nation's fifth largest bank holding company, which has $84 billion in assets and employs 41,000 people in 1,500 offices throughout the United States and in 27 foreign countries.

LA JOLLA, CA (MARCH 21) BUSINESS WIRE - Precision Aerotech Inc. (ASE:PAR) Wednesday announced a 15 percent increase in sales to $18,072,000 for the third quarter ended Jan. 31, over $15,649,000 for the like period in 1989 after reflecting Micronics as a discontinued operation.

The company reported a loss from continuing operations of $1,483,000, or 46 cents per share, after preferred stock dividend requirements, compared with a loss of $802,000, or 26 cents per share, for the quarter ended Jan. 31, 1989.

The company reported a net loss of $877,000, or 27 cents per share, for the quarter. During the like quarter in 1989, the company reported a net loss of $1,423,000, or 46 cents per share.

For the nine months ended Jan. 31, sales from continuing operations were $53,015,000, compared with $37,380,000 for the like period in 1989. The company realized a loss from continuing operations of $1,899,000, or 62 cents per share, after preferred stock dividend requirements, compared with a loss of $2,357,000, or 76 cents per share, for the like period in 1989.

The company reported a net loss of $7,465,000, or $2.28 per share, after losses from, and sale of Micronics of $5,566,000, or $1.66 per share, for the nine months. For the like period in 1989 the reported net loss was $3,197,000, or $1.02 per share.

Third quarter and year-to-date results reflect a positive adjustment of $606,000, or 19 cents per share, associated with the sale of Micronics in March.

The losses from continuing operations for the quarter are primarily attributed to specific contracts at the Coast and Aero Technologies subsidiaries. While Coast contributed to the loss in the quarter, the loss was significantly reduced from the third quarter of the prior year. The earnings of the remaining subsidiaries continue to meet forecasts.

During the months of February and March, a number of senior management changes were announced. The changes included the appointment of Harry W. Todd as chairman of the board of directors, Richard W. Detweiler to the position of chief executive officer, and William G. Nevers assumed the responsibilities of senior vice president and chief financial officer.

Richard Detweiler said: ''The new senior management team is pleased to

be associated with Precision Aerotech Inc. With the sale of Micronics' assets completed, we will be devoting our full and focused attention toward improving the performance of the company.''

Precision Aerotech is a leading producer of custom manufactured precision devices, metal assemblies and components used in the aerospace industry.

LOS ANGELES (MARCH 21) BUSINESS WIRE - Ticor Title, one of the nation's largest and oldest title insurance companies, has activated their Disaster Assistance program, in consideration of the Upland Feb. 28 earthquake in parts of San Bernardino and Los Angeles counties.

Ticor Title is offering reduced title insurance rates for financing or refinancing a residential or commercial property in Los Angeles and San Bernardino counties affected by the recent quake until March of 1992.

''Ticor Title wants to do its part in assuring a rapid and successful recovery from this unfortunate act of nature,'' said Richard C. White, executive vice president and Western Region manager of Ticor Title.

Ticor Title services San Bernardino County with three offices serving the cities of San Bernardino, Upland and Victorville and the western part of Los Angeles County with offices in Diamond Bar and Rosemead.

Ticor Title is one of the oldest and largest title insurance groups in the United States. Ticor Title insurance is provided by Ticor Title Insurance Co., Ticor Title Insurance Company of California, Ticor Title Guarantee, various subsidiaries, agents and underwritten title companies.

Headquarters for the nationwide company is in Los Angeles. San Bernardino County Offices: County Main Office, 714/885-9975 Upland, 714/981-5727 Victorville, 714/241-6939 Los Angeles County Offices: Rosemead, 714/307-7051 Diamond Bar, 714/396-0380

SANTA CLARA, CA (MARCH 21) BUSINESS WIRE - Intel corp. was presented with Texas Instruments' 1989 Supplier Excellence Award Wednesday.

The award, given annually, honors firms whose dedication to quality and service have met Texas Instruments' high standards. Recipients are an elite group of suppliers representing less than one percent of Texas Instruments' suppliers.

The presentation to Carl Everett, vice president and director, North American sales and marketing, and Frank Gill, senior vice president and director, sales and marketing, was made by a management team from Texas Instruments.

Intel manufactures microcomputer components, modules and systems.

DALLAS (MARCH 21) BUSINESS WIRE - Central and South West Corp. said Wednesday that its Central Power and Light Co. subsidiary has received approval from the Public Utility Commission of Texas to collect a stipulated rate increase of $105 million.

The increase, which will increase CPL's revenues by 13 percent, was requested by 10 intervenors that have signed a stipulated settlement agreement in CPL's pending rate case. The Texas PUC still must approve the settlement, which was reached in February.

A second step of the settlement calls for CPL to file for an additional base-rate increase of $120 million to become effective Jan. 1, 1991. CPL's base rates then would be frozen through 1994, subject to certain force majeure contingencies. However, fuel charges to customers would continue to be adjusted after review and approval by the Texas PUC.

A decision on the settlement by the Texas PUC is expected later this year. However, if the settlement is not approved, revenues collected under the stipulated increase would be refunded.

Because three intervenors have not signed the settlement agreement, hearings in CPL's rate case are continuing. In February 1989, CPL filed the case to reflect in rates its investment in the South Texas Project nuclear plant. Both units of the 2,500- megawatt plant are in full operation.

Central and South West Corp. is a Dallas-based public utility holding company. It owns Central Power and Light Co., Public Service Company of Oklahoma, Southwestern Electric Power Co., West Texas Utilities Co., Transok Inc., and five other subsidiaries.

BELLEVUE, WA (MARCH 21) BUSINESS WIRE - First Mutual Savings Bank (NASDAQ:FMSB), which recently reported record annual earnings of $1.5 million for 1989, announced Wednesday it has been advised that Arthur W. Skotdal of Everett, Wash., has formed a new group that may seek to replace three members of bank's board of directors, including President and Chief Executive Officer Bruce Baker, at the annual meeting of shareholders on April 26, 1990.

First Mutual's Vice Chairman Scott Wallace, and Linda Nordstrom are the other nominees of First Mutual's board standing for election this year to the bank's 10-person board of directors.

''The board of directors of First Mutual will vigorously oppose any attempt by Mr. Skotdal to replace as directors the bank's president, vice chairman and a valued director with his personal representatives. The following letter is being mailed immediately to First Mutual shareholders '' said the bank's Chairman F. Kemper Freeman Jr.

March 21, 1990
Dear First Mutual Shareholder:

Arthur W. Skotdal of Everett, Washington has notified the Bank that he has formed a group comprised of himself, his brother-in-law and two lawyers whose stated goal is to place Mr.Skotdal's three representatives on First Mutual's Board of Directors.

It has been disclosed that Mr. Skotdal and his brother-in-law are the sole source of funds being used to finance their dissident slate of nominees.

To the best of our knowledge, Mr. Skotdal's nominees have no experience as officers or directors of a bank.

DO NOT SIGN THIS OUTSIDE GROUP'S BLUE PROXY CARD!

Shortly, First Mutual will be mailing you additional information regarding Mr. Skotdal and his representatives. In the meantime, we ask you to read carefully First Mutual's 1989 Annual Report to Shareholders and Proxy

Statement. We believe the accomplishments of the Bank and its Board of Directors in the four years First Mutual has been a public company have been rewarding ones for all our shareholders.

IF YOU HAVE NOT ALREADY VOTED FOR FIRST MUTUAL BANK'S NOMINEES--PRESIDENT & CEO BRUCE BAKER, LINDA NORDSTROM AND VICE CHAIRMAN SCOTT WALLACE-- BY SIGNING AND MAILING THE WHITE PROXY CARD, PLEASE DO SO PROMPTLY. THE BOARD OF DIRECTOR'S WHITE PROXY CARD AND A RETURN ENVELOPE ARE ENCLOSED FOR YOUR CONVENIENCE.

This solicitation is being made on behalf of the Board of Directors.

Sincerely yours,
F. Kemper Freeman, Jr.
Chairman of the Board

Skotdal stated in Form F-ll filings with the Federal Deposit Insurance Corporation (FDIC), dated March 16, that his new group of four Washington state investors owned 200,661 shares, which is about 14.44 percent of the bank's 1,389,631 outstanding shares of common stock. The other persons identified as members of Skotdal's new group are his brother-in-law, Edwin C. McRory, an insurance broker in Seattle; Gosta E. Dagg, an Everett lawyer; and Charles W. Mertel, a partner in the law firm of Short Cressman & Burgess of Seattle, which is representing the outside group in the proxy contest. According to their filings, Skotdal and his brother-in-law have agreed to pay all expenses for the proxy contest.

First Mutual was advised in July 1989 that an earlier investor group, also headed by Arthur W. Skotdal, had been dissolved. No reason was given by Skotdal for dissolving the group. That group, which was originally formed in April 1988, stated in its filings with the FDIC that it ''may seek to acquire a controlling interest'' in the bank. No offer was ever made to the board of directors or shareholders of First Mutual.

The following individuals were members of the earlier Skotdal group: Arthur W. Skotdal of Everett, Edwin C. McRory and Irene Skotdal McRory of Seattle, Walt Philipp of Yakima, and Roy Robinson and Gordon Bjorg of Robinson Chevrolet in Marysville.

First Mutual recently reported 1989 net income increased 17 percent to an all time high of $1.5 million or $1.07 per share for the year ended Dec. 31, 1989. In 1988 the savings bank earned $1.3 million or $.92 per share. All earnings per share figures are adjusted for a 15 percent stock dividend paid Jan. 15, 1990. First Mutual's capital equals 8 percent of assets at Dec. 31, 1989, well above the FDIC minimum requirement of 6 percent.

First Mutual Savings Bank, headquartered in Bellevue, operates five

full-service branches in the Seattle metropolitan area known as the ''Greater Eastside.'' The FDIC-insured savings bank derives a significant portion of its income from mortgage banking operations and also originates small commercial property loans.

SAN FRANCISCO (MARCH 21) BUSINESS WIRE - The Pacific Gas and Electric Co. board of directors Wednesday authorized management to redeem or repurchase up to $542 million of mortgage bonds and up to $200 million of preferred stock in order to reduce financing costs.

Refunding of the Series 85A, 85B, 85C, 86A and 84D bonds during 1990 is expected to save approximately $2.9 million a year and could result in total savings of up to $34.9 million. The preferred stock repurchase or redemption during 1990 and 1991 would result in an estimated annual savings of $8 million.

Bond coupon rates and due dates are: 85A - 12.25 percent, May 1, 2018; 85B - 11.25 percent, Nov. 1, 2018; 85C - 10.00 percent, Jan. 1, 2019; 86A - 10.50 percent, Feb. 1, 2019; 84D, 12.75 percent, Nov. 1, 2017.

The PG&E board also authorizes registration with the Securities and Exchange Commission of an additional $500 million of Medium-Term Notes (MTNs) in order to satisfy a portion of PG&E's debt financing needs.

LONGMONT, CO (MARCH 22) BUSINESS WIRE - Staodynamics Inc. (NASDAQ:SDYN) Wednesday announced that it has entered into a letter of intent to acquire the rights to a new rehabilitation product.

Staodynamics' President W. Bayne Gibson said: ''As a part of our marketing strategy of developing new proprietary products for the home health care market, we are pleased to announce that a letter of intent has been signed for acquisition of the rights to an exciting new electro-mechanical product for rehabilitation.

''This letter of intent is with a company which has developed a unique product incorporating patented features and is developing other

rehabilitation products.

''While at this time we are not in a position to disclose the specifics, we believe it will not only diversify the company's product line, but will be a significant contributor of future revenues. The company's plan is to introduce the product to the market by the end of its current fiscal year.''

Gibson also announced the appointment of John L. Fenstermaker as the company's vice president of manufacturing, effective April 9, 1990.

Gibson said: ''John Fenstermaker has elected to take advantage of an opportunity for early retirement from a long and distinguished career in management with IBM Corp.

Fenstermaker has been employed by IBM Corp. for 32 years, most recently as the site operations manager for the Boulder, Colo., IBM plant.

Staodynamics is a leading manufacturer of medical electronic products, primarily TENS (transcutaneous electrical nerve stimulation) devices used for the relief of chronic and acute pain, and NMES (neuromuscular electrical stimulation) devices used in physical and sports medicine for muscle re-education and rehabilitation.

The company has been engaged in an extensive clinical investigation using electro-therapy for wound care, which when approved for sale within the United States, is likely to become a major portion of the company's business.

PHOENIX (MARCH 22) BUSINESS WIRE - Verit Industries announced Thursday that it has acquired the California and Texas operating divisions of Emerald Homes.

These operating divisions design, build and market single family homes primarily in the San Francisco Bay area of Northern California, the San Diego area of Southern California, and Houston, Texas.

As of Dec. 31, 1989, these divisions had total revenues of approximately $69 million, net income of approximately $9 million, total assets of approximately $70 million, and liabilities of approximately $49.5 million.

During a transition period, Emerald Homes has contracted to continue the construction and sale of homes in these divisions on behalf of Verit.

Verit issued 52,250 shares of series B convertible preferred stock, 300 shares of Series C convertible preferred stock and issued a $5 million line of credit to Emerald Homes. The Series B shares are convertible into 5,225,000 shares of common stock following listing approval with the American Stock Exchange (which will require a shareholder vote), and are intended to be distributed to the unit holders of Emerald Homes on a one share per unit basis following compliance with applicable securities laws. The Series C shares are convertible into 1,410,000 shares of common stock on March 31, 2000.

Verit also announced that it has relocated its corporate offices to 5333 N. 7th St., Suite 112, Phoenix, Ariz. 85014, and that its phone number is 602/274-0076.

Verit's common shares are traded on the American Stock Exchange under the symbol VER.

SAN DIEGO (MARCH 22) BUSINESS WIRE - Mission West Properties (ASE/PSE:MSW) Wednesday released the following report of consolidated operations.

For the first fiscal quarter ended Feb. 28, the company reported net income of $9,000, or 1 cent per share, on revenues of $4,195,000. During the like period of the preceding fiscal year, the company reported net income of $869,000, or 58 cents per share, on revenues of $7,643,000.

In reporting the results, G. Joseph LaBreche, president, noted that most of the current year's first-quarter revenues resulted from the sale of a 25,000-square-foot office building in Carlsbad. The 1989 period included the sale of a six-building industrial project also located in Carlsbad.

LaBreche noted that the company is in escrow to sell an office building in San Diego, which is anticipated to close in April 1990. The profit from the sale of this property, if completed, will be recognized in the second quarter of the 1990 fiscal year.

Mission West Properties, a publicly held San Diego real estate development corporation with approximately $50 million in assets, develops, owns and operates income properties located primarily in Southern California and Arizona.

#90080b0227 03/21/1990 ~Business Wire

SAN ANTONIO (MARCH 22) BUSINESS WIRE - The board of directors of La Quinta Motor Inns Inc. (NYSE:LQM) announced the formation of a partnership with AEW Partners L.P. to own 18 existing La Quinta Inns and to acquire and convert existing inns owned by other parties to La Quinta Inns.

The partnership may also fund the construction of new La Quinta Inns. Aldrich, Eastman & Waltch Inc. is the manager of AEW Partners L.P., a real estate operating company, the limited partners of which are major domestic institutional investors.

''This is a significant transaction for our shareholders,'' said Sam Barshop, president and chairman of the board of directors of La Quinta, ''because it provides the La Quinta chain with the ability to take advantage of acquisition and conversion opportunities throughout the country in the current economic environment where capital from traditional sources is not readily available.''

According to Barshop, ''Acquisition and conversion of existing properties to La Quinta Inns has become an important strategy for the company because the cost of converting inns is considerably less than the cost of new construction. The company has already identified more than 100 lodging facilities which are acquisition candidates for La Quinta and we have begun the screening and evaluation process.

''We anticipate that the new partnership will provide the company with the ability to increase the size of the La Quinta chain by 40 to 50 additional inns to be acquired from third parties over the next several years, thereby providing for long-term increases in La Quinta's earnings and cash flow as well as marketing and operational efficiencies.''

The partnership will be capitalized with contributions of cash and a note totaling $72 million from AEW Partners L.P. and $48 million from La Quinta in cash and equity in 18 existing La Quinta properties being contributed by La Quinta to the partnership.

Including anticipated borrowings and cash projected to be generated from operations, the new partnership expects to have resources of over $150 million to support the company's growth targets. All inns owned by the partnership will be operated as La Quinta Inns and will be managed by La Quinta under a long-term management agreement.

The partnership (La Quinta Development Partners L.P.) will be owned 40 percent by La Quinta and 60 percent by AEW Partners L.P., and La Quinta will act as general partner. Michael Steinberg, one of the principals of Aldrich, Eastmand & Waltch has been named to the board of directors of La Quinta.

Under the terms of the Partnership, AEW Partners L.P. has the ability, after a vesting period, to convert a portion of its ownership interest in the partnership into common shares of La Quinta Motor Inns Inc. at a premium to the present market price of La Quinta's common stock; if AEW Partners L.P. exercises all of its conversion rights, it would own approximately 15 percent of the then-outstanding common shares of La Quinta.

As of March 15, La Quinta owned or managed 207 inns in 29 states.

#90080b0247 03/21/1990 ~Business Wire

EMERYVILLE, CA (MARCH 22) BUSINESS WIRE - Farallon Computing Inc. Wednesday announced the MacRecorder Voice Digitizer.

It allows users to record voice in sound-capable application software. Farallon also announced the new Farallon Sound Toolkit, a set of programming routines that build on Macintosh System software to give developers a standard and easy way to add sound input and playback capabilities to their applications.

Microsoft Mail version 2.0 for AppleTalk networks is the first of many business applications to incorporate this sound-recording, -compression and -playback technology.

The new MacRecorder Voice Digitizer is a more compact and simplified version of the original Farallon sound digitizer that comes with the MacRecorder Sound System. The MacRecorder Voice Digitizer contains a microphone and an eight-bit analog-to-digital converter. It plugs into the modem or printer (RS-422 serial) port of a Macintosh computer.

Both digitizers will work with Microsoft Mail and other applications that use sound.

The Farallon Sound Driver and HyperSound (a HyperCard stack) are included in the MacRecorder Voice digitizer package. The driver software, which goes in the Macintosh System Folder, lets you record and play both compressed and non-compressed sounds from the digitizer. HyperSound software records sound into HyperCard stacks.

The complete MacRecorder Voice Digitizer package will be sold in both single and ten-packs for the convenience of large electronic mail users who want to make it a standard, company-wide input device.

The Farallon Sound Toolkit allows developers to build recording, compression, decompression and playback capabilities into their applications. By adding voice input, application developers such as Microsoft will increase their products' commercial appeal.

Farallon has been working with leading software developers for the last year to encourage the use of sound in business applications on the Macintosh.

Farallon is the world's leading provider of twisted-pair networks, with more than 1 million PhoneNET System nodes installed in Fortune 500 companies, universities and government agencies. The company produces personal communications products and technologies, primarily for use on Macintosh computers. Farallon products embrace a variety of communications media, including ISDN, analog and digital voice, data, fax and video.

VANCOUVER, BC (MARCH 21) BUSINESS WIRE - The International Beverage Corp. (NASDAQ Symbol: TIBC.F; VSE Symbol: IBE.V), the registered holder of the trademark ''Clearly Canadian,'' Wednesday announced that there has been no material changes in the Company's affairs which would warrant the recent activity in the trading of the Company's shares.

Management stated that the recent activity in the stock is directly attributable to the following factors:

- Revenues for the six months ended December 31, 1989 increased 265 percent over the comparable period in fiscal 1989.

- The roll-out of the product into new regions, notably Florida and New England, with additional Mid-West states slated for March/April.

- The recent unfortunate incident with Perrier has highlighted the magnitude of the water segment of the beverage industry, the industry's growth to date, and outstanding growth projections for the future.

- Most ''water'' beverages are controlled by conglomerates. The International Beverage Corp. is one of the few investment vehicles that offers investors any leverage within the industry.

- There has been some speculation of a take-over of the Company. Management states categorically that there have been no firm offers made. However, because of The International Beverage Corporation's unique

position within the industry and the overwhelming success of its product ''Clearly Canadian,'' the Company will always be subject to this speculation, particularly as most growth by majors have been through acquisitions.

The International Beverage Corporation produces and markets ''Clearly Canadian,'' a line of natural and flavored sparkling mineral waters. Through distribution agreements, ''Clearly Canadian'' is sold in 24 states all of Canada and Japan.

#90080b0616 03/21/1990 ~Business Wire

FREMONT, CA (MARCH 21) BUSINESS WIRE - Vitalink Communications Corp. (NASDAQ:VITA) announced Wednesday a number of enhancements planned for its TransPATH family of bridge/router internetworking systems including router support for seven additional network protocols and IBM source routing, an X.25 network interface and the Exterior Gateway Protocol.

The new protocols include DECnet, OSI, GOSIP and various forms of XNS. TransPATH systems can already route the TCP/IP protocol.

Vitalink also announced that it signed a multiyear agreement with Touch Communications for the OSI-based technology that will be used in TransPATH.

Together with its existing capabilities, the new enhancements position TransPATH as a very versatile LAN internetworking system for building large multivendor data networks, especially in organizations where a combination of Digital, IBM, UNIX-based or client-server computer systems share the services of a single enterprise LAN/WAN network.

TransPATH systems include all the features of Vitalink's market leading bridge products plus an advanced function router. With the support for additional protocols, TransPATH users will gain more options to route traffic on their enterprise network. Organizations typically route one to three heavily used network protocols and bridge the balance of their network traffic.

Organizations route specific network traffic, either to create individual network domains, to build very large networks by linking bridged subnetworks together with routers, or to translate between subnetworks which use dissimilar LAN technologies like token ring and Ethernet. In

contrast, traffic is bridged to achieve high network performance, to simplify network management and to handle unroutable protocols like Digital's LAT or IBM's LU 6.2.

Beyond the addition of new protocols and source routing, Vitalink continues to enhance the TransPATH router capabilities with the addition of Exterior Gateway Protocol (EGP), IP security, socket level traffic control, and an updated release of the SNMP (Simple Network Management Protocol) MIB II (Management Information Base). These enhancements are designed to tailor the networking environment to the customers' needs.

Vitalink Communications Corp., founded in 1980, manufactures and markets a family of LAN internetworking systems including Ethernet and token ring remote bridges, bridge/routers plus comprehensive network management systems.

WEST PATERSON, NJ (MARCH 21) BUSINESS WIRE - Prospect Park Financial Corp. (NASDAQ:PPSA), holding company for Prospect Park Savings Bank, SLA, Wednesday announced that the bank has begun a gradual phase-out of the operations of its wholly owned real estate development subsidiaries.

The subsidiaries, Prospect Development Corp. and Prospect Ventures Inc., are primarily involved in the development of residential real estate projects in northern and central New Jersey. ''Over the past decade, Prospect Park Savings Bank's development subsidiaries have successfully provided a supplement to the overall profitability of our core banking operations.

''However, the current weak real estate markets, combined with 1989 thrift industry legislation requiring the separate capitalization of real estate development subsidiaries, make this type of investment far less attractive to the Bank,'' said Russell L. Frignoca, chairman and chief executive officer.

The phase-out will entail a reduction of staff over the next 10 months, which is expected to result in an ultimate savings of approximately $1 million annually in operating expense. About 20 positions, or approximately 8 percent of the bank's total work-force, will be affected.

In an action related to the phase-out, the company said that it recently conducted an auction of the remaining unsold units of Wedgewood Knolls, a

182-unit condominium development sponsored by Prospect Development Corp. in West Paterson, N.J. Frignoca noted that all 40 of the remaining units were sold at auction, and that over 90 percent of the sales contracts have now been closed.

''There were qualified bidders for more than twice the number of units available, and we look forward to further auction activity as part of our phase-out plan,'' stated Frignoca. During the nine months ended Jan. 31, 1990, Prospect Park wrote down the value of many of the real estate development ventures of the Bank's subsidiaries to present net realizable value.

Prospect Park Financial Corp. is the holding company for Prospect Park Savings Bank SLA. The $586 million-asset Bank, founded in 1926, operates seven full-service branches in northen New Jersey.

SAN JOSE, CA (MARCH 21) BUSINESS WIRE - Leo Korman, 43, a financial executive with more than 19 years experience, has been named senior vice president and chief financial officer of Businessland Inc.

He will report to David A. Norman, chairman, president and chief executive officer.

Korman comes to Businessland from Castle & Cooke Inc., a substantial Los Angeles based food and real estate company, where he was vice president-controller. His major areas of responsibility were financial planning, budgeting, long range planning, acquisition evaluation and analysis, and external and internal reporting.

''Leo brings to Businessland a solid and diverse financial background,'' stated David A. Norman. ''I have known him for 10 years since his days at the A.C. Nielsen Co. and have watched him develop. Over the years he has gained substantial experience in international and distribution issues that will be invaluable to Businessland as we go forward.''

Prior to Castle & Cooke, Korman was with the A.C. Nielsen Co. for 10 years. He joined Nielsen in 1977 as director, internal audit, became assistant controller in 1980 and was promoted to chief financial officer and a member of the board of directors in 1984.

Korman obtained his B.S. in math and finance from St. Louis University and his M.B.A. from the University of Chicago.

Founded in 1982, Businessland Inc. is an international leader in the distribution integration and support of microcomputer and workstation systems for businesses. The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, two in West Germany and five in Canada. It reported sales of $1.2 billion in fiscal 1989.

FREMONT, CA (MARCH 21) BUSINESS WIRE - Vitalink Communications Corp. (NASDAQ:VITA) announced Wednesday a multiyear technology agreement with Touch Communications of Campbell, Calif., to provide access to their Open Systems Interconnection (OSI) communications software.

The agreement represents the first time that Touch has agreed to provide a LAN internetworking company its implementation of the OSI protocol stack. Vitalink will offer customers Touch's OSI routing protocol set on its family of TransPATH bridge/router systems.

While many companies plan to adopt OSI as their primary multivendor protocol in the 1990s, today, most operate multiprotocol networks. The migration to OSI can occcur smoothly with a bridge/multiprotocol router like TransPATH where OSI routing can concurrently operate with the bridging and routing of non-OSI protocols.

In addition to increased commercial demand for OSI, federal agencies are mandating implementation of OSI in all future product purchases. Having a protocol stack that complies with the Government OSI Profile (GOSIP) will enable Vitalink to satisfy customer needs in critical government markets where agencies will be required to purchase only GOSIP-compliant products, starting in August 1990. TransPath, Vitalink's bridge/multiprotocol router, will be able to play an important role in the government's transition to OSI.

OSI will be available on Vitalink's TransPATH bridge/routers in 1991.

Touch Communications Inc., a privately-held company, was founded in March 1985 to develop enterprise-wide connectivity solutions based on OSI (Open Systems Interconnection) standards such as MAP/TOP and GOSIP. Touch's product line enables systems integrators and large end-users to build complete OSI networks that allow their existing workgroup solutions to become part of the large corporate network. Touch has previously announced an X.400 gateway engine including gateways to many electronics mail applications including SMTP and UUCP,

Vitalink Communications Corp., founded in 1980, manufactures and markets a family of LAN internetworking systems including Ethernet and token ring remote bridges, bridge/routers plus comprehensive network management systems. All products are sold directly by Vitalink and indirectly via a network of distributors.

HANNOVER, West Germany (MARCH 21) BUSINESS WIRE - Digital Equipment Corp. Wednesday announced the formation of an operations center in West Berlin to prepare for the opportunities created by a unified German marketplace.

The announcement, made at CeBIT'90, underlines Digital's commitment to supporting its global customers and to introducing information technology into the emerging markets of Eastern Europe in accordance with COCOM controls. Five weeks ago Digital announced its first direct investment in Eastern Europe, a joint venture company in Hungary.

The newly created operations center, located in West Berlin, will be under the management of Digital Equipment GmbH, Digital's West German subsidiary. Heribert Stiegler will manage the center, which will prepare Digital's approach to a unified German market. The center will begin by offering consulting services and support to current Digital customers, both resellers and end users, in support of their plans for a unified German market.

''This activity is part of Digital's evolving response to the reforms taking place throughout Eastern Europe,'' said Clifton W. Clarke, Digital's Manager of International Trade & Policy. ''As our West German and other global customers position themselves for the opportunities posed by a unified German market, Digital is committed to supporting their needs and is well positioned to participate in the economic activities of the unification process.''

Digital's first European sales office was opened in Munich 27 years ago this month, and today Digital employs approximately 4,700 people at more than 30 locations in Germany. The scope of Digital's German operations includes sales, service, manufacturing, and engineering. In fiscal 1989, Digital Equipment GmbH reported sales of over $880 million.

Stiegler, previously a senior manager for Digital Equipment GmbH in Stuttgart, has held a series of sales and software services positions during his 14 years with Digital.

Digital Equipment GmbH, based in Munich, is a wholly owned subsidiary of Digital Equipment Corporation, the world's leading supplier of networked computer systems and a leader in systems integration. Digital, headquartered in Maynard, Massachusetts, employs over 125,000 people, does business in 73 countries, and has annual revenues of $12.7 billion.

SAN JOSE, CA (MARCH 21) BUSINESS WIRE - Conner Peripherals Inc. (NASDAQ:CNNR) Wednesday announced that its Kato Series 2.5-inch disk drive has been designed into the new notebook PCs introduced last month by Toshiba America's Computer Systems Division.

The Conner Kato Series drive is designed for the new generation of battery-operated notebook computers that require high performance in combination with small size, low power, reduced weight and high shock resistance.

The 2.5-inch Kato Series features 21.4 megabytes of formatted storage capacity and a 23 msec, average seek time, yet weighs just 5.5 ounces, requires only 1.5 watts of power to operate (in idle mode) and is designed to withstand up to 100 Gs (non-operating) shock.

''As one of the leading manufacturers of laptop computers, Toshiba also represents a major presence in the new notebook computer market,'' said Finis Conner, chairman and chief executive officer of Conner Peripherals. ''Their selection of our Kato product is a significant endorsement for the 2.5-inch form factor.''

Conner announced its Kato Series last October as part of its third generation of disk drives. The Kato drive is being offered in the Toshiba T1000xe and T1200XE, the hard disk versions of the company's new line of notebook computers.

Conner Peripherals designs, manufactures and markets high-performance 2.5-inch and 3.5-inch Winchester disk drives for workstations and the new generation of desktop, portable, laptop and notebook microcomputers.

These systems are based on 16-bit, 32-bit and RISC-based microprocessors and require greater storage capacity, faster access time, lower power consumption and smaller size than previous disk drive products.

GOTEBORG, Sweden (MARCH 21) BUSINESS WIRE - Swedish based SKF, the world leader in rolling bearings, announced Wednesday a definitive agreement under which SKF will acquire from INFINT S.A., a Luxembourg holding company, all the stock of IFINT's wholly owned subsidiary, CR Industries (Chicago Rawhide).

CR is the leading United States manufacturer of fluid sealing devices for the automotive, heavy truck and industrial equipment and replacement markets.

Founded in 1879, CR employs 3,000 people worldwide and has annual sales of USD 270 million. The company has 10 manufacturing units in the United States, one in Canada and joint ventures in Japan and Mexico.

SKF is the world's largest manufacturer of rolling bearings. In addition, SKF manufactures tools and a wide variety of component systems. Worldwide SKF employs more than 45,000 people and has annual sales of USD 4 billion.

SKF Group Chief Executive, Mauritz Sahlin, stated that ''CR Industries is recognized around the world as a leader and innovator in sealing technology, with a very efficient marketing and sales organization. I am certain that the combination of CR and SKF will be beneficial for both organizations.''

SKF sees the agreement with CR as a strategic move to expand its operations in the United States. SKF expects the transaction to be completed in early April.

NASHVILLE, TN (MARCH 21) BUSINESS WIRE - Carole F. Hoover, senior vice president of the Greater Cleveland (Ohio) Growth Association - the 9,500 member Chamber of Commerce of Greater Cleveland - yesterday was elected to the board of directors of Shoney's Inc. (NYSE:SHN).

She is president of Concessions International of Cleveland, a 100 percent minority-owned airport concession company and an officer in Original Cookie Airport Inc. Hoover is also a member of the board of directors of the Cleveland Convention and Visitors Bureau and a trustee of North Coast Development Corp. She is a founding member of the National Black Business Council.

Hoover is the first black to serve on the board of the 31-year-old restaurant and hospitality company of more than 1,600 units.

Last week, Roberts unveiled to the investment community one of the most aggressive franchise expansion programs in the industry for all of Shoney's Inc. concepts, including Shoney's restaurants, Captain D's and Lee's Famous Recipe Chicken.

Dr. Joseph Lowery, president of the Southern Christian Leadership Conference (SCLC), said that Shoney's Inc. needs to be congratulated for its success in recruiting a highly respected woman like Carole Hoover to

help guide Shoney's Inc.'s continued success, both in its financial performance and in recruiting women and minorities.

A native Tennessean, Hoover has long been active in working to bring about socio-economic change. After graduation from Howard High School in Chattanooga, Tenn. and Tennessee State University in Nashville, Hoover was invited by Dr. Martin Luther King Jr. to join the executive staff of the SCLC in Atlanta as director of development.

She is currently a member of the executive committee of the Atlanta-based Martin Luther King Jr. Center for Nonviolent Social Change, and chairs two of its committees. She also services on the board of directors of the SCLC.

She is active in numerous Cleveland-area organizations, including the Greater Cleveland Roundtable; Black Professionals Association; Greater Cleveland Chapter, American Red Cross; Cleveland Music School Settlement; and the Harvard Community Services Center.

Shoney's Inc. operates and franchises more than 1,600 restaurants and lodging units, including Shoney's, Captain D's, Lee's Famous Recipe Chicken, Fifth Quarter Steak House, Pargo's and Shoney's Inns.

#90080b0642 03/21/1990 ~Business Wire

HANNOVER, West Germany (MARCH 21) BUSINESS WIRE - Farallon Computing Inc. announced Wednesday at the international CeBit show here the availability of French versions of both Timbuktu 3.0.1 and the MacRecorder Sound System 2.0, a German version of Timbuktu 3.0.1, and a Spanish version of Timbuktu 3.0.1.

Timbuktu is a Macintosh screen-sharing application that enables users to work collaboratively on the same document over a network. The program also features point-to-point file exchange.

Farallon's MacRecorder Sound System 2.0 gives users the capability to record, edit and play live or pre-recorded sounds on Macintosh computers.

French versions of Farallon's PhoneNET Connectors and PhoneNET Repeaters are already available. German PhoneNET Connectors have been available since 1989.

''Europe is the fastest growing Mac market in the world with 40 percent growth expected this year. Offering a localized product line is a key to

maximizing sales in this marketplace. Farallon's strategy has been to localize all strategic products in all major European languages,'' said Thomas P. Rielly, Farallon director of marketing.

Software sales in Europe often lag one year behind hardware sales due to the complex challenges involved in rewriting software for different languages and cultures.

The MacRecorder Sound System works with a Macintosh Plus or later model and a hard disk. Timbuktu requires a minimum of 30K RAM, but memory requirements vary depending on screen size, application and number of guests on the system. AVAILABILITY

In March, both Timbuktu 3.0.1 and MacRecorder will begin shipping in France. Timbuktu will also be available in Germany in March. Products will be available through authorized Farallon retailers. For more information contact:

Farallon is the world's leading provider of twisted-pair networks, with more than one million PhoneNET System nodes installed worldwide in Fortune 500 companies, universities and government agencies. The company produces personal communications products and technologies, primarily for use on Macintosh computers.

SAN FRANCISCO (MARCH 21) BUSINESS WIRE - Deltanet Inc., the leader in dental insurance software systems, announced the availability of its dental claims administration system to insurance companies and organizations self-administrating their dental benefit programs.

Previously, the software product had been exclusive to members of the Delta Dental Plans Association.

Deltanet offers a feature-rich, on-line system capable of meeting complex and sophisticated dental claims administration requirements. The system was created to meet the specific requirements of dental claims processing and is used to process more than 10.5 million claims a year throughout the United States.

As an IBM business partner, Deltanet offers its dental administration

system on both the IBM VSE and MVS operating systems. Deltanet also offers a full service shared processing environment using Deltanet's computer processing center.

#90080b0649 03/21/1990 ~Business Wire

PHOENIX (MARCH 21) BUSINESS WIRE - Aztar Corp. (NASDAQ/NMS: AZTR) Wednesday reported net income of $79.4 million, or $1.97 per share, in 1989, compared with a loss of $5.1 million, or 13 cents per share, in 1988.

The 1989 results included a gain of $127.1 million on the disposal of discontinued operations in the restructuring of Ramada Inc., the company to which Aztar is the successor. In the restructuring, the company disposed of its hotel and restaurant businesses; its gaming business was spun off to its shareholders in the form of cash and Aztar stock.

Revenues were $522.3 million in 1989, up 14.5 percent from the 1988 level, mainly as a result of increased volume of business from capacity added during 1988. The increase was offset in part by a decline in casino revenue at the company's Las Vegas property from the 1988 level due to lower table games percentage hold.

The company opened the Ramada Express Hotel and Casino, a new property with 406 hotel rooms and a 30,000-square-foot casino in Laughlin, Nev., in June 1988. A $210-million expansion of the company's Atlantic City, N.J. property, TropWorld Casino and Entertainment Resort, was completed in late September 1988, doubling the number of hotel rooms to 1,014 and nearly doubling the casino to 91,000 square feet.

Aztar operating profit before net rent was $24.5 million in 1989, down from $60.1 million in 1988. The company reported a loss from continuing operations before income tax and extraordinary items of $62.2 million in 1989, compared with a loss of $1.8 million in 1988. Costs and expenses in 1989 were $497.8 million, up from $395.9 million in 1988, reflecting primarily the expanded operations, but also due to higher expenditures to establish market share in Aztar's expanded property in Atlantic City.

Other unusual expense factors were a year-over-year increase in restructuring costs of $13.1 million included in general and administrative costs, a $5 million provision for the closing of the company's property in Reno, Nev., and $3.9 million in incremental pre-opening cost amortization expense taken in 1989, which completed the amortization of this cost.

In the fourth quarter ended Dec. 28, 1989, Aztar reported revenues of $114.9 million, compared with $117.6 million in 1988's ending quarter.

Fourth-quarter 1989 net income was $101.2 million, or $2.49 per share, including the gain on disposal of discon- tinued operations, compared with a loss of $9.5 million, or 24 cents per share, a year earlier.

The company had an operating loss before net rent of $7.6 million in the fourth quarter of 1989, compared with a profit of $4.1 million in the 1988 quarter. Costs and expenses in the latest quarter included $10.0 million in restructuring costs, compared with $1 million of such costs in the year-earlier quarter.

Aztar Corp., a publicly held casino gaming company, operates TropWorld Casino and Entertainment Resort in Atlantic City, N.J., the Tropicana Resort and Casino in Las Vegas, Nev., and the Ramada Express Hotel and Casino in Laughlin, Nev.

HANNOVER, West Germany (MARCH 21) BUSINESS WIRE - Siemens Wednesday announced that Norsk Computer Industria A/S (NCI) will purchase Siemens personal computer products, including its 80386 and 80486 CPU boards, from Condatec Inc., master VAR for its OEM/VAR Personal Computer Division.

Announcement of the agreements, valued at approximately $5 million, was made here at the CeBit trade fair, with representatives from all three companies present.

NCI, a Norwegian computer research, development and manufacturing company,

will use Siemens CPU boards in its high-end file server products which are designed for the LAN market. Condatec will, in turn, market the NCI product throughout the United States, Canada and South America.

Worldwide marketing efforts in all other geographic areas will be handled by NCI.

According to Morgan Stuart, director of Siemens PC Division, ''In its position as a total resource for all Siemens PC components, Condatec will work with NCI to bring the market a full range of server products.''

He added, meanwhile, that the multi-national aspect of the NCI agreement is significant because it emphasizes Siemens strategy as a global technology partner.

This alliance allows NCI to incorporate Siemens slot-CPU technology in its own uniquely designed cabinets. These streamline server devices offer up to 20 processor slots for support of medium and large LAN networks.

As an immediate result of this agreement, NCI will announce delivery of its file servers with the '486 board.

With Siemens ''slot-CPU'' technology, the processor, memory, serial/parallel interface and graphics and disk controllers are on a single AT-sized plug-in card. Micro-processor boards range from 80286/12 MHz to 80486/25 MHz, while hardware options include desktop workstations, desktop network stations and standalone network servers.

Siemens OEM/VAR Personal Computer Division, based in Boca Raton, Fla., is part of the Peripheral Equipment Group of Siemens Information Systems Inc. which manufactures and markets communication and information systems and peripherals for the U.S. market.

CAMBRIDGE, MA (MARCH 21) BUSINESS WIRE - Lotus Development Corp. Wednesday announced the immediate availability of several new output device drivers for Freelance Plus 3.01, including support for some of the most popular new color PostScript devices on the market.

''The availability of these color device drivers is especially exciting for our customers because they now have access to the performance and resolution breakthroughs provided by these color devices,'' said Tim Davenport, director of Lotus' Graphics Products Division.

''In addition, by supplying more output options for our customers, we're helping them to maximize the hardware investments they've already made.''

Freelance Plus 3.01, Lotus' award-winning business graphics software package, gives PC users full-featured charting and drawing capabilities, complete presentation tools and the ability to easily create a wide range of business graphics with a minimum investment of time.

The new device drivers for Freelance Plus 3.01 include: QMS ColorScript 100 (color), NEC Colormate PS (color), HP PaintJet XL (color), and HP LaserJet IIP (black-and-white).

The device drivers are available from Lotus in 5.25-inch and 3.5-inch media, accompanied by documentation. There is a $20 shipping and handling charge for the disk. To order, registered Freelance Plus 3.01 users should send a check payable to Lotus Development Corporation to: Department FLD, Box 9158, Cambridge, MA 02139-9158. For additional information about the supplemental drivers and other Lotus products, users may call (800) 345-1043.

#90080b0687 03/21/1990 ~Business Wire

BRUSSELS, BELGIUM (MARCH 21) BUSINESS WIRE - VME GROUP N.V., a major international manufacturer of earthmoving and construction equipment, announced sales in 1989 of USD 1,177 million, an increase of 9 percent over 1988 and a record level.

Operating income reached USD 72.3 million, compared to USD 55.3 in the previous year, and net income rose by 65 percent to USD 49.0 million from USD 29.7 million in 1988. Return on equity amounted to 20.7 percent, compared to 14.4 percent in 1988, continuing the positive development from previous years.

The considerable gain in net income is attributed to the higher sales volume, improved price levels, a favorable product mix, and high levels of capacity utilization. The results also reflect the continued increase in efficiencies in the overall operation of the company. Rationalizations of the product range and of manufacturing, including adjustments of the production capacity level, and a continuous strengthening of the distribution network, have been major factors in this respect.

The continued strength in VME's financial position has allowed the company to invest increasing amounts in capital expenditures and for R&D. Capital expenditures, mainly for state-of-the-art manufacturing equipment, were USD 41 million in 1989, an increase of 42 percent vs. 1988. R&D expenses amounted to USD 45 million, up 23 percent from 1988. Over the last 5 years R&D expenditures have increased an average 16 percent annually to support the Group's aggressive product development programs.

VME Group is a major manufacturer of earthmoving and construction equipment with production facilities in Europe, North and South America. VME products are sold through a worldwide distribution network under the well known VOLVO BM, MICHIGAN and EUCLID trade names. The product line includes wheel loaders, rigid and articulated haulers, rubber-tired dozers excavator-loaders and log skidders.

RONKONKOMA, NY (BUSINESS WIRE)--LOGITEK Inc. (NASDAQ:LGTK), Wednesday announced the receipt of a major ''follow-on'' contract now totalling close to $1 million from the Cummins Engine Co., a government prime contractor.

The contract calls for LOGITEK to provide control products to be used on a Cummins mobile power generating system.

Calling for LOGITEK to provide more than 4,000 control devices, this $500,000 contract ''add-on'' is scheduled to be completed in March of 1991.

The company expects additional orders for these parts to be added on over the course of the next two years.

''This represents a significant increase to the company's backlog of orders, building a base for continued growth in revenues,'' said David M. Fischer, vice president of sales for LOGITEK Inc.

LOGITEK Inc. manuactures and markets electronic power monitors and controls and electronic power supplies for use in mobile systems such as aircraft and space vehicles, aboard ships, vehicular mobile communications and radar systems, off-shore rigs, and pipeline control stations. In addition, LOGITEK is also engaged in the contract manufacturing operations.

#90080b0699 03/21/1990 ~Business Wire
RONKONKOMA, NY (MARCH 21) BUSINESS WIRE - Logitek Inc., (NASDAQ: LGTK), Wednesday reported a continued increase in sales and profits for its second quarter and first half of fiscal 1990.

The company's net sales increased to $1,254,000, up 64 percent, for the second quarter ended Dec. 31, 1989 in comparison to $765,000 for the same period ended Dec. 31, 1988.

Net income rose to $51,000 or three cents per share for the second quarter of fiscal 1990, compared to a net loss of $121,000 or seven cents per share for the corresponding quarter in the previous year.

For the first six months of fiscal 1990, net sales were $2,358,000

compared to $1,500,000 for the corresponding period last year. Net income for the same period this year grew to $62,000 or four cents per share compared to a net loss of $233,000 or 14 cents per share last year.

Commenting on the company's continued strong performance, Herbert L. Fischer, president of Logitek Inc., stated, "The dramatic sales volume and earnings increase during the first six months of fiscal 1990 reflects the resolution of the government contract conflict which the company experienced last year, as well as the company's ability to bounce back from adverse situations. We expect the next quarter to be even stronger as we continue our rapid recovery and capitalize on continued strong new order bookings."

Logitek Inc., manufactures and markets electronic power monitors and controls and electronic power supplies for use in mobile systems such as aircraft and space vehicles, aboard ships, vehicular mobile communications and radar systems, off-shore rigs, and pipeline control stations. In addition, Logitek is also engaged in the contract manufacturing operations.

CHICAGO (MARCH 21) BUSINESS WIRE - Wells-Gardner Electronics Corp. Wednesday announced that Albert S. Wells Jr., 69, will retire as chairman of the board and chief executive officer, effective April 1990.

He will remain a member of the board of directors.

Wells, son of one of the firm's founders, started with the company over 48 years ago as a buyer and expediter in the purchasing department. Since that time, he has held numerous positions including president and chief operating officer. For the past five years, Wells has served as chairman and CEO.

Frank J. Myers, Wells-Gardner's president and chief operating officer stated, ''As a corporate leader, Al has always set high standards of conduct and performance, starting with himself. His reputation among his peers is outstanding and he has participated unselfishly in his industry's association activities, as well. Recently, Al was elected an honorary member of the Electronic Industries Association (EIA) in acknowledgement of his many important contributions to the industry over the years.''

''Al's retirement is well-earned and deserved. All his friends and fellow employees are quick to acknowledge that he will be missed. I speak for all of us in wishing him good health and happiness,'' Myers concluded.

Wells-Gardner Electronics Corp. designs and manufactures electronic products which are marketed both domestically and internationally. Its major products are color video monitors and data display monitors. In addition, the company assembles televisions under contract for distribution through Majestic, Industries.

#90080b0711 03/21/1990 ~Business Wire

COLUMBUS, OH (MARCH 21) BUSINESS WIRE - Max & Erma's Restaurants Inc. (NASDAQ:MAXE) announced record quarterly revenues and record pre-tax earnings for the first quarter of 1990.

For the 16 weeks ended Feb. 18, 1990, the company reported revenues of $8,738,000, and pre-tax income of $387,000 as compared to revenues of $7,200,000 and pre-tax income of $362,000 for the first quarter of 1989. Net income for the first quarter of 1990 was $255,000 or 8 cents per share

as compared to $314,000 or 11 cents per share for the first quarter of 1989. Results for 1989 include a $107,000, 4 cents per share, tax benefit of a net operating loss carryforward.

Todd Barnum, president, chief executive officer and chairman of the board, said he is pleased with the results in light of severe cold weather which depress sales during much of December and early January. The freeze also caused significant upward pressure on cost of sales because of damage to produce and citrus crops.

Barnum went on to say that despite experiencing a decline in liquor sales which reflects an overall trend away from drinking, same store sales for the quarter were up 4.5 percent over the first quarter of 1989, the 14th successive quarter of same store sales gains. Barnum said he is pleased that more and more people are coming to their restaurants for food. The company has long felt that for long-term success in the restaurant business its emphasis has to be on consistently good food and service.

Barnum attributed the 21 percent increase in revenue to the 4.5 percent same store sales gain and two new restaurants in Livonia, Mich., and Dublin, Ohio, which opened during the first quarter of 1989. Barnum noted that the two new restaurants contributed little to first quarter results. However, both were profitable by the end of the first quarter. He said sales at the new stores are above company average and both should perform very well as they develop operating efficiency.

Max & Erma's Restaurants Inc. operates 14 restaurants in Columbus and Dayton, Ohio; Indianapolis; Detroit; Pittsburgh; and Lexington, Ky., and franchises one restaurant in Canton, Ohio. Two new restaurants are under construction in Pittsburgh and additional units are planned for Indianapolis and Detroit.

#90080b0712 03/21/1990 ~Business Wire

DAYTON, OH (MARCH 21) BUSINESS WIRE - Moto Photo Inc. Wednesday announced that for the year ended Dec. 31, 1989, it incurred a net loss of $1,970,696 or 44 cents a share after provision for payment of preferred dividends of $501,000 annually.

This compared to a net income of $611,356 or two cents per share after preferred dividends. Revenues increased to $38,655,455 in 1989 from $31,461,269 in 1988.

For the fourth quarter, Moto Photo reported sales of $9.56 million as

compared to sales of $9.96 million in the fourth quarter of 1988. Net losses for the quarter came to $1.07 million (19 cents per share) versus net income of $46,313 (one cent per share) for the same period last year.

Michael F. Adler, president, said, "After four solid years of increasing revenues and profit, the loss was a major disappointment. However, we still accomplished many significant objectives during the year." Adler attributed much of the loss to "difficulties in fully integrating the 49 stores that we acquired in 1988, as well as a generally soft market in the photo industry for 1989."

Adler said, "Many steps have been instituted to make 1990 a solidly profitable year. We have significantly bolstered our management by adding Sid Laytin as our chief operating officer.

"The organizational structure has been compacted, and we have implemented many key programs during 1989 including more and better training programs, upgrading of company stores' equipment and facilities, a more efficient store design to promote greater sales, a state-of-the-art point-of-sale marketing and financial control system, franchisee accounting systems, and we have eliminated many expenses associated with our aggressive acquisition program of company stores. We also used the year to re-examine where we are headed and closed and wrote-off some unprofitable stores."

Adler continued by saying, "The first quarter is seasonally a difficult time for general retailing and the photofinishing industry and a quarter in which Moto traditionally operates at a loss. In 1990, the first quarter will show a substantial improvement over the $1,385,503 loss of last year's first quarter. We hope to continue to improve for the remainder of 1990 and produce a solid profitable year."

Adler commented by saying, "In spite of this loss for 1989, we are still generating cash in the form of depreciation and amortization in excess of the loss and preferred dividend requirements. We are pleased that our bank has been with us every step of the way and has extended our $1,500,000 line of credit commitment until August 1991 and has provided us with an additional $1,000,000 line of credit until August 1990."

HINTON, VA (MARCH 21) BUSINESS WIRE - WLR Foods, Inc. (NASDAQ:WLRF) announced Wednesday the retirement of Kenneth A. Longacre as president of the Company and as president of Horace W. Longacre, Inc., its further processing subsidiary.

Longacre, who is 56 years old, will continue to serve on the Board of Directors as he pursues other business interests and philanthropic endeavors. He will remain president of WLR Foods, Inc. until his successor is named by the Board of Directors.

In an internal restructuring, Horace W. Longacre, Inc. will be merged with Wampler Foods, Inc. on March 31, 1990 to create a fully integrated turkey subsidiary, Wampler-Longacre, Inc. James L. Mason, president of Wampler Foods, Inc., will become president of the combined operation.

In making the announcement, WLR Foods' Chief Executive Officer James L. Keeler stated: ''Ken Longacre's commitment and contributions to WLR Foods have been substantial. We are very pleased that we will continue to have Ken's experienced counsel on our Board and wish him well with his future plans.''

Kenneth A. Longacre commented: ''I am pleased that the consolidation of our turkey operations positions WLR Foods as a stronger competitor for the 1990s. It also gives me the opportunity to more thoroughly pursue many of the interests I've had over the years.''

WLR Foods, Inc. is engaged in fully integrated turkey and chicken production, processing, further processing and marketing. The Company is the eighth largest poultry processor/further processor in the United States.

NEW YORK (MARCH 21) BUSINESS WIRE - American Express Co. Wednesday announced the nomination of three new Directors: George M.C. Fisher, chairman and chief executive officer of Motorola, Inc.; Beverly Sills Greenough, president of the New York City Opera; and Frank P. Popoff, president and chief executive officer of The Dow Chemical Co. The nominees will stand for election to the board of directors at the annual meeting of American Express shareholders on April 23 in New York.

George M.C. Fisher became chairman and chief executive officer of Motorola Inc. in January 1990, after being elected president and chief executive officer in January 1988. Fisher, who joined Motorola in 1976, is a member of the U.S. Council on Competitiveness, the Business Roundtable and the Business Council. He is also a director of the Japan Society of New York and is active in international trade issues through advisory groups to the U.S. Trade Representative and the Secretary of Commerce.

Beverly Sills Greenough has been president of the New York City Opera since 1989 and had served as its general director since 1979, providing artistic and business leadership that has enhanced the company's international stature. She is a Director of Time-Warner Inc. and R.H. Macy & Co. Inc. The renowned soprano and opera performer is also National Chairman of the March of Dimes Birth Defects Foundation and a member of the President's Task Force on the Arts.

Frank P. Popoff became president of The Dow Chemical Co. in May 1987, and assumed the additional responsibility of chief executive officer in December 1987. Popoff, who joined Dow in 1959, is a member of the Business Council, the Business Roundtable, the Conference Board, the U.S. Council on Competitiveness, the American Chemical Society, the U.S.-Japan Business Council and the U.S.-U.S.S.R. Trade and Economic Council. He is also a Director of NCR Corp., Marion Merrell Dow Inc., Dow Corning Corp., Chemical Financial Corp. and Indiana University Foundation.

The company's entire 19-member board of directors is to be elected at the Annual Meeting. Directors standing for re-election are Anne L. Armstrong William G. Bowen, David M. Culver, Charles W. Duncan Jr., Richard M. Furlaud, F. Ross Johnson, Vernon E. Jordan Jr., Fred M. Kirby II, Henry A. Kissinger, Drew Lewis, Aldo Papone, Roger S. Penske, James D. Robinson III Robert V. Roosa, Rawleigh Warner Jr. and Joseph H. Williams. As previously announced, Aldo Papone, chairman of American Express Travel Related Services Co., was elected a director of American Express Co. on February 26, 1990.

American Express Co., a diversified travel, financial, and information services company founded in 1850, is a world leader in charge cards, Travelers Cheques and travel related activities. It is also a leader in

financial planning, securities brokerage, asset management, international banking, investment banking and information processing and communications services.

HOUSTON (MARCH 21) BUSINESS WIRE - Grace Energy Corp. (NYSE: GEG) Wednesday announced that its Homco International, Inc. subsidiary has entered into an agreement to acquire substantially all of the rental tool assets and business of San Antonio-based Land & Marine Rental Co., a subsidiary of Tesoro Petroleum Corp., also of San Antonio.

Terms of the transaction were not disclosed.

Completion of the transaction is subject to various conditions and is expected sometime in the second quarter.

Homco, headquartered in Houston, is an industry leader in fishing, tool

rental, pipe recovery wireline services and gas measurement services and provides related oilfield services such as casing patch and coring. Homco also manufactures Spiral Wate drillpipe and tubular completion accessories. Through this acquisition, Homco will enter additional geographic service areas, including Kenai, Alaska, and improve its services to the U.S. oil industry. Homco also expects to benefit through economies of scale, as several of Land & Marine's locations will likely be combined with nearby Homco locations.

Grace Energy Corp. is a diversified energy holding company, headquartered in Dallas, whose subsidiaries are engaged in supplying services and equipment to the petroleum industry, in the exploration for and development of oil and natural gas, and in coal mining.

DALLAS (MARCH 21) BUSINESS WIRE - Current Technology Wednesday announced the OptiSiftor, the industry's first totally isolated RS232 protection and transmission system which delivers fiber optic performance on conventional copper wire.

The OptiSiftor establishes a complete optical break between a device and its data cable. Then it drives the RS232 data signal down the line with over six times its original power. The signal is received by a patent pending, isolated line receiver of unprecendented accuracy and sensitivity.

"There is a tremendous need in business today for reliable, high-speed communications, whether it be building-to-building, floor-to-floor, or LAN-to-LAN," said Barry Epstein, founder and president of Current Technology.

"The OptiSiftor enables business-to-business communications to be conducted error-free, at higher speeds for greater distances, and without the restraints of conventional RS232." The latest addition to the DataSiftor Series of power protection devices, the OptiSiftor facilitates fiber optic performance on older RS232 circuits.

Data can be transmitted at speeds of 19,200 baud for up to one mile, and received without error, even in high noise environments with differing ground potentials.

Terminals, PCs and printers gain faster speed performance and better surge and lightning protection than any traditional line driver or limited distance modem can provide.

OptiSiftor models are available as single or multiple units for in-line use, rack or wall mountiung and DataServer system cabinets. Each rack can hold up to 16 cards and fits into the DataServer.

Current Technology Inc., based in Richardson, Texas leads the industry in the deisgn and manufacture of high quality power protection devices. With more than 20 years experience in delivering superior power protection, Current Technology's product line includes the MP Series, Power Siftor Series, DataSiftor Series, Power Server and Custom Products and Power Supplies.

OptiSiftor, Power Siftor, DataSiftor and Power Server are registered trademakrs of Current Technology Inc.

NEW CITY, NY (MARCH 21) BUSINESS WIRE - Cablec Corp., a unit of the BICC Group, the $7 billion London-based cables and construction group, has announced the formation of BICC North America Inc., a management company that will oversee and direct BICC's North American cable interests.

The new organization was formed to coordinate the management of Cablec Corp., the largest manufacturer of power, control and instrumentation cable in the United States, and Phillips Cables Ltd., Canada's leading cable company. Annual sales of the new company will be excess of $750 million.

Harry C. Schell, president and chief executive officer of Cablec Corp. and a member of the BICC Group Board of Directors, has been named chairman of BICC North America.

Other directors of the new management company include David Foy, president-elect of Phillips Cables; Charles Killeen, executive vice

president, electronic and industrial group, Cablec Corp.; and Carl Painter executive vice president, utility and polymers group, Cablec Corp.

''The new structure reflects the increasing convergence of the Canadian and U.S. cable markets and the growing importance that the BICC Group attaches to North America,'' said Robin Biggam, BICC Group Chief Executive.

''The aim is to accelerate the process, already begun, of making best joint use of the talents and resources within the cable companies in North America.''

Phillips Cables Ltd. manufactures construction, power, telecommunication and mineral-insulated cables for Canadian and international markets. Phillips, which celebrated its centennial in 1989, is a recognized leader in the wire and cable industry.

Cablec Corp. is the largest U.S. manufacturer of power, control, instrumentation, data and electronic cables.

Cablec was formed five years ago in a management-led buy-out of the Dodge cable business, and has grown rapidly through sale increases and acquisitions. The company became a member of the BICC Group in 1987.
